INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action, including chemotherapy. A recent issue of the Journal is a good guide to style.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh, EH8 9JZ, from whom copies of the full Instructions to Authors, published in *Br. J. Pharmac.* **50**, 3–23, may also be obtained. Specific points to note are:

1. **Manuscript** should be typed in double spacing on one side of paper not larger than A4 (206 × 294 mm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. One first name of each author may be included. A short title of not more than 50 letters should also be suggested.

2. **Statement** Papers are accepted only if accompanied by a statement that they have not been and will not be published in whole or in part in any other Journal.

3. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

4. **Abstract** (2 copies) An abstract of about 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

5. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

○ ● □ ■ △ ▲ ▽ ▼

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction.

6. **Tables** These should not have more than 85 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 110 characters to a line, unless absolutely unavoidable. **Figure legends and tables** should be typed on separate sheets of paper.

7. **References** These should be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.

Short Communications These may be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement should be included.

British Journal of Pharmacology

VOLUME 62 NUMBER 3 MARCH 1978

- 321 O'DONNELL, STELLA R. & PERSSON, C.G.A. β -Adrenoceptor mediated inhibition by terbutaline of histamine effects on vascular permeability
- 325 GREEN, A.R. Repeated exposure of rats to the convulsant agent Hurothyl entrances 5-hydroxytryptamine- and dopamine-mediated behavioural responses
- 333 OHGA, A. & TANEIKE, T. H_1 - and H_2 -receptors in the smooth muscle of the ruminant stomach
- 339 COX, B. & LEE, T.F. Is acetylcholine involved in a dopamine receptor mediated hyperthermia in mice and rats?
- 349 HARRIS, J.B. & ZAR, M.A. The effects of a toxin isolated from Australian tiger snake (*Notechis scutatus scutatus*) venom on autonomic neuromuscular transmission

SHORT COMMUNICATIONS

- 359 ITO, S., NAKAZATO, Y. & OHGA, A. Pharmacological evidence for the involvement of Na^+ channels in the release of catecholamines from perfused adrenal glands
- 362 BUCKINGHAM, R.E., HAMILTON, T.C. & ROBSON, D. Diminishing hypotensive effect of increasing doses of pindolol in DOCA/saline hypertensive rats
- 364 CARLSÖÖ, BENGT, DANIELSSON, ÅKE & HENRIKSSON, ROGER Effects of a new selective β_1 -adrenoceptor agonist on amylase secretion from the rat parotid gland
- 367 FRANDSEN E.K., KRISHNA G.A. & SAID S.I. Vasoactive intestinal polypeptide promotes cyclic adenosine 3',5'-monophosphate accumulation in guinea-pig trachea
- 370 BISSET, G.W., CHOWDREY, H.S. & FELDBERG, W. Release of vasopressin by enkaphalin
- 373P PROCEEDINGS OF THE BRITISH PHARMACOLOGICAL SOCIETY, London, 4-6 January 1978
