Chemical Defence Establishment, Porton Down, Wilts

Pharmacologist

The doctor appointed will lead the Human Studies group in the investigation of contingent therapeutic regimes and the development work involved. These are mainly pharmacodynamic studies, to which behavioural scientists make a contribution. The successful candidate will also advise colleagues within the Establishment on experimental protocols, ensure the adequacy of facilities (including an experimental ward and a clinical biochemistry laboratory), and monitor the training of paramedical staff.

Candidates must be fully registered as medical practitioners in the UK and hold an MRCP or equivalent qualification in pharmacology.

Salary, as Medical Officer (Research), will be £6985-£9560 *plus* pay supplements up to £522 as applicable. Starting salary up to £9770 according to qualifications and experience. There are promotion prospects and a non-contributory pension scheme.

For further details and an application form (to be returned by 23 June 1978) write to Civil Service Commission, Alencon Link, Basingstoke, Hants. RG21 1JB, or telephone Basingstoke (0256) 68551 (answering service operates outside office hours).
Please quote ref: S(0)6304.

Ministry of Defence

British Journal of Pharmacology

British Journal of Pharmacology provides up-to-date research on all aspects of drug action essential to those involved in pharmacology. Ensure you receive this information each month by taking a subscription.

Subscription Dept, Macmillan Journals Ltd, Brunel Road, Basingstoke, Hants RG21 2XS, England.

Please enter me for a year's subscription to the BRITISH JOURNAL OF PHARMACOLOGY starting with the issue dated

I enclose payment of £52.50; USA & Canada, US \$115; Rest of world, US \$105; Airmail, US \$140 (or equivalent in any other currency).

Prices correct at time of publication. Payment may be made in any currency at the current exchange rates. Orders can only be processed if accompanied by the correct remittance. Cheques should be made payable to Macmillan Journals Ltd.

INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action, including chemotherapy. A recent issue of the Journal is a good guide to style.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh, EH8 9JZ, from whom copies of the full Instructions to Authors, published in *Br. J. Pharmac.* **50**, 3–23, may also be obtained. Specific points to note are:

1. **Manuscript** should be typed in double spacing on one side of paper not larger than A4 (206 × 294 mm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. One first name of each author may be included. A short title of not more than 50 letters should also be suggested.

2. **Statement** Papers are accepted only if accompanied by a statement that they have not been and will not be published in whole or in part in any other Journal.

3. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

4. **Abstract** (2 copies) An abstract of about 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

5. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

○ ● □ ■ △ ▲ ▽ ▼

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction.

6. **Tables** These should not have more than 85 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 110 characters to a line, unless absolutely unavoidable. **Figure legends** and **tables** should be typed on separate sheets of paper.

7. **References** These should be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.

Short Communications These may be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement should be included.

British Journal of Pharmacology

VOLUME 63 NUMBER 2 JUNE 1978

SHORT COMMUNICATION

- 229 MELLOW, A.M., PHILLIPS, T.E. & SILINSKY, E.M. On the conductance pathway traversed by strontium in mediating the asynchronous release of acetylcholine by motor nerve impulses

PAPERS

- 233 STEINESS, EVA Digoxin toxicity compared with myocardial digoxin and potassium concentration
- 239 SCHOLFIELD, C.N. Depression of evoked potentials in brain slices by adenosine compounds
- 245 AMINOFF, M.J., JAFFE, R.A., SAMPSON, S.R. & VIDRUK, E.H. Effects of droperidol on activity of carotid body chemoreceptors in cat
- 251 BOULLIN, D.J., HUNT, TERESA M. & ROGERS, A.T. Models for investigating the aetiology of cerebral arterial spasm: comparative responses of the human basilar artery with rat colon, anococcygeus, stomach fundus, and aorta and guinea-pig ileum and colon
- 259 CASAMENTI, F., MANTOVANI, P. & PEPEU, G. Stimulation of acetylcholine output from brain slices caused by the ionophores BrX-537A and A 23187
- 267 FENNESSY, M.R. & TAYLOR, D.A. Antagonism of the effects on thermoregulation of Δ^9 -tetrahydrocannabinol by clomipramine in the rat
- 275 KIRSTEN, EDWARD B., SATAYAVIVAD, J., ST. JOHN, WALTER M. & WANG, S.C. Alteration of medullary respiratory unit discharge by iontophoretic application of putative neurotransmitters

- 283 GREENWOOD, B. & KERRY, P.J. The effects of methotrexate and melphalan in sheep
- 287 TYERS, M.B. Factors limiting the rate of termination of the neuromuscular blocking action of fazedinium dibromide
- 295 GODFRAIND, J.M. Acetylcholine and somatically evoked inhibition on perigeniculate neurones in the cat
- 303 AUGUY-VALETTE, A., CROS, J., GOUARDERES, Ch., GOUT, R. & PONTONNIER, G. Morphine analgesia and cerebral opiate receptors: a developmental study
- 309 FOSTER, H.E., HOOPER, M., SPEDDING, M., SWEETMAN, A.J. & WEETMAN, D.F. Antagonism of the inhibitory effects of adenosine 5'-triphosphate on the isolated taenia of the guinea-pig caecum: structure-activity relationships within a series of isatogen derivatives
- 315 HUGHES, I.E. The effect of amitriptyline on presynaptic mechanisms in noradrenergic nerves
- 323 BLACKWELL, M., JAMES, T.A. & STARR, M.S. Potentiation by substance P of contractions of the isolated vas deferens of the mouse elicited by electric field stimulation and by drugs
- *331 KISIN, I. Acute myocardial ischaemia in anaesthetized cats: effects of papaverine
