Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the instructions inside the back cover.

The British Journal of Pharmacology is published monthly by Macmillan Journals Ltd, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633, ISSN 0007-1188.

Annual subscription UK £57.50; USA & Canada, US \$125; Rest of world, US \$115; Airmail, US \$160 (or equivalent in any other currency). (Orders must be accompanied by remittance. Prices correct at time of publication.)

Cheques should be made payable to Macmillan Journals Limited: Subscription Department, Brunel Road, Basingstoke, Hampshire RG21 2XS, England. Where appropriate, overseas subscribers may make payments into UK Post Office Giro Account No. 519 2455. Full details must accompany the payment.

Enquiries concerning advertising space and rates should be addressed to: Advertisement Department, Macmillan Journals Limited, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633.

International Symposium

LONG-TERM EFFECTS OF NEUROLEPTICS

A Symposium on 'Long-term effects of Neuroleptics' will be held in Monte-Carlo, Principauté de Monaco, 18-21 March 1979.

Details from:

F. Cattabeni, G. Racagni and P. F. Spano,
International Menarini Foundation,
Piazza del Carmine,
4-20121 Milan,
Italy.

PEPTIDE HORMONES Edited by J. A. Parsons

This review of the current state of knowledge on peptide hormones aims to ease the exchange of information between those working with various hormones, which have until recently been very difficult to study. The book comprises the edited papers on this subject which were first presented at the 1974 Biological Council Symposium on Drug Action by an international group of experts in this field.

UK Price £15.00, 0 333 18794 6

Please order through your local bookshop, or in case of difficulty write direct to The Macmillan Press, 4 Little Essex Street, London WC2R 3LF.

British Journal of Pharmacology

British Journal of Pharmacology provides up-to-date research on all aspects of drug action essential to those involved in pharmacology. Ensure you receive this information each month by taking a subscription.

INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action, including chemotherapy. A recent issue of the Journal is a good guide to style.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh, EH8 9JZ, from whom copies of the full Instructions to Authors, published in *Br. J. Pharmac.* 50, 3–23, may also be obtained. Specific points to note are:

1. **Manuscript** should be typed in double spacing on one side of paper not larger than A4 (206 × 294 mm). There should be a separate title page giving the names and addresses of the authors in alphabetical order. One first name of each author may be included. A short title of not more than 50 letters should also be suggested.
2. **Statement** Papers are accepted only if accompanied by a statement that they have not been and will not be published in whole or in part in any other Journal.
3. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.
4. **Abstract** (2 copies) An abstract of about 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.
5. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction.

6. **Tables** These should not have more than 85 characters to a line (counting spaces between columns as 4 characters) and certainly not more than 110 characters to a line, unless absolutely unavoidable. **Figure legends** and **tables** should be typed on separate sheets of paper.
7. **References** These should be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should in addition, include the names of editors, the edition number, where appropriate, and the town of origin and name of publisher.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. No reprints of abstracts are supplied.

Short Communications These may be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement should be included.

British Journal of Pharmacology

VOLUME 64 NUMBER 1 SEPTEMBER 1978

SHORT COMMUNICATIONS

- 3 BERKOWITZ, B.A. & HEAD, R.J. Adrenal origin of plasma catecholamines after decapitation: a study in normal and diabetic rats
- 6 HOULT, J.R.S. & MOORE, P.K. Sulphasalazine is a potent inhibitor of prostaglandin 15-hydroxydehydrogenase: possible basis for therapeutic action in ulcerative colitis

PAPERS

- 9 MESSIHA, F.S. Anti-depressant action of caesium chloride and its modification of chlorpromazine toxicity in mice
- 13 BURNSTOCK, G., COCKS, T. & CROWE, RAHIMA Evidence for purinergic innervation of the anococcygeus muscle
- 21 WHALLEY, E.T. The action of bradykinin and oxytocin on the isolated whole uterus and myometrium of the rat in oestrus
- 29 MAUGER, JEAN-PIERRE, MOURA, ANNE-MARIE & WORCEL, MANUEL Pharmacology of the adrenoceptors and cholinceptors of the BC₃H1 nonfusing muscle cell line
- 37 HOSOTANI, T. & MISU, Y. Prevention by guanethidine analogues of output of noradrenaline induced by sodium reduction in rabbit ventricular slices
- 47 GANGULY, D.K., NATH, D.N., ROSS, H-G. & VEDASIROMONI, J.R. Rat isolated phrenic nerve-diaphragm preparation for pharmacological study of muscle spindle afferent activity: effect of oxotremorine
- 53 ENDOH, M., SHIMIZU, T. & YANAGISAWA, T. Characterization of adrenoceptors mediating positive inotropic responses in the ventricular myocardium of the dog
- 63 LIVINGSTON, A. & WATERMAN, A.E. The development of tolerance to ketamine in rats and the significance of hepatic metabolism
- 71 BURNS, J.W. & DOE, J.E. A comparison of drug-induced responses on rat tracheal, bronchial and lung strip *in vitro* preparations
- 75 MENNINI, TIZIANA, PATACCINI, R. & SAMANIN, R. Effects of narcotic analgesics on the uptake and release of 5-hydroxytryptamine in rat synaptosomal preparations
- 83 STANDEN, N.B. The postnatal development of adrenoceptor responses to agonists and electrical stimulation in rat isolated atria
