Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the instructions inside the back cover.

The British Journal of Pharmacology is published monthly by Macmillan Journals Ltd, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633, ISSN 0007-1188.

Annual subscription UK £57.50; USA & Canada, US \$130; Rest of world, US \$120; Airmail, US \$165 (or equivalent in any other currency). (Orders must be accompanied by remittance. Prices correct at time of publication.)

Cheques should be made payable to Macmillan Journals Limited: Subscription Department, Brunel Road, Basingstoke, Hampshire RG21 2XS, England. Where appropriate, overseas subscribers may make payments into UK Post Office Giro Account No. 519 2455. Full details must accompany the payment.

Enquiries concerning advertising space and rates should be addressed to: Advertisement Department, Macmillan Journals Limited, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633.

Second class postage paid at New York, N.Y.
US Mailing Agent: Expeditors of the Printed Word, Inc.,
Suite 1217, 527 Madison Avenue, New York, NY 10022.

INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action.

Before submitting a manuscript, authors must note the following points since failure to comply with instructions will lead to either delay or rejection of the manuscript.

1. **Manuscripts** (2 copies) should be sent to Dr. A. Ungar, Department of Pharmacology, 1 George Square, Edinburgh EH8 9JZ. The manuscript must be typed in double spacing on one side of paper, not larger than A4 (206 × 294 mm). There should be a separate title page with the names of authors (in alphabetical order) and their appropriate addresses. One first name of each author may be included.

2. **Style** Papers must be submitted in the style of the journal (see any recent issue of the journal) and in accordance with the Instructions to Authors published in *Br. J. Pharmac.* (1974) **50**, 3–23. (Copies of these instructions may be obtained from Dr. Ungar.)

3. **Statement** The manuscript must be accompanied by the following statement—'This manuscript has not been nor will be published in whole or in part by any other journal'. The statement may be included as part of the accompanying letter which must be signed by all authors. No paper will be accepted without this statement and the signatures of each author.

4. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

5. **Abstract** (2 copies) An abstract of not more than 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

6. **Short title** A short (running) title of not more than 50 letters and spaces should be submitted. This may be typed on the title page.

7. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction. Each figure legend should be typed on a separate sheet of paper.

8. **Tables** These should generally have not more than 85 characters to a line (counting spaces between columns as 4 characters) and never more than 110 characters to a line. Each table should be typed on a separate sheet of paper.

9. **References** These must be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number (where appropriate), the town of origin then the name of publisher. Where citation is made to a paper 'in press' the paper should, if possible, accompany the manuscript, as an aid to the editor and referee.

10. **Short Communications** These will be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement must be included.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. If reprints will not be available from the author, a note to this effect may be added at the end of the text.

British Journal of Pharmacology

VOLUME 65 NUMBER 2 FEBRUARY 1979

PAPERS

- 163 DEPORTER, D.A., DUNN, C.J. & WILLOUGHBY, D.A. Cyclic adenosine 3',5'-monophosphate and the mechanism of action of three common anti-inflammatory drugs
- 167 JORDAN, V.C. & NAYLOR, KAREN E. The binding of [^3H]-oestradiol-17 β in the immature rat uterus during the sequential administration of non-steroidal anti-oestrogens
- 175 ANNING, ELIZABETH N., BRYAN, LESLEY J. & O'DONNELL, STELLA R. The extraneuronal accumulation of isoprenaline in trachea and atria of guinea-pig and cat: a fluorescence histochemical study
- 183 CARNEY, JOHN M., ROSECRANS, JOHN A. & VASKI, MICHAEL R. Barbitone-induced tolerance to the effects of sedative-hypnotics and related compounds on operant behaviour in the rat
- 193 DESAULLES, E. & SCHWARTZ, J. A comparative study of the action of frusemide and methyclothiazide on renin release by rat kidney slices and the interaction with indomethacin
- 197 SCOTT, ELIZABETH, VAAGE, J. & WIBERG, T. Lack of release of prostaglandins from isolated perfused lungs during pulmonary hypertension and oedema
- 205 BENNETT, T. & GARDINER, SHEILA M. Prevention and reversal of isolation-induced systolic arterial hypertension in rats by treatment with β -adrenoceptor antagonists
- 215 LARSEN, JENS-JØRGEN α - and β -adrenoceptors in the detrusor muscle and bladder base of the pig and β -adrenoceptors in the detrusor muscle of man
- 223 PICKLES, HILARY G. Presynaptic γ -aminobutyric acid responses in the olfactory cortex
- 229 DANIELS, S., PATON, W.D.M. & SMITH, E.B. The effects of some hydrophobic gases on the pulmonary surfactant system
- 237 COSTA, M. & FURNESS, J.B. The sites of action of 5-hydroxytryptamine in nerve-muscle preparations from the guinea-pig small intestine and colon
- 249 MALTA, E., McPHERSON, G.A. & RAPER, C. Comparison of pre-junctional α -adrenoceptors at the neuromuscular junction with vascular post-junctional α -receptors in cat skeletal muscle
- 257 KONAKA, S., OHASHI, H., OKADA, T. & TAKEWAKI, T. The appearance of noradrenaline and adrenaline and the developmental changes in their concentrations in the gut of the chick
- 261 KOMORI, S., OHASHI, H., OKADA, T. & TAKEWAKI, T. Evidence that adrenaline is released from adrenergic neurones in the rectum of the fowl.
- 271 MASSEY, S.C. & NEAL, M.J. Release of [^3H]-acetylcholine from the isolated retina of the rat by potassium depolarization: dependence on high affinity choline uptake
- 277 OKAMOTO, KOICHI & SAKAI, YUTAKA Augmentation by chlordiazepoxide of the inhibitory effects of taurine, β -alanine and γ -aminobutyric acid on spike discharges in guinea-pig cerebellar slices
- 287 CONSTANTINI, A. & NISTRI, A. Further observations on the interaction between glutamate and aspartate on lobster muscle
- 303 ABOU, Y.Z. & FARJO, I.B. Reversal of DOPA-induced arousal in reserpine-treated rabbits and mice by histidine
- 311 BHARGAVA, HEMENDRA N. The synthesis rate and turnover time of 5-hydroxytryptamine in brains of rats treated chronically with morphine
- 319 ITO, S., NAKAZATO, Y. & OHGA, A. The effect of veratridine on the release of catecholamines from the perfused adrenal gland
- 331 HUGHES, I.E. & RADWAN, SALWA The relative toxicity of amitriptyline, imipramine, maprotiline and mianserin in rabbits *in vivo*
- 339 BROWN, D.A. & SCHOLFIELD, C.N. Depolarization of neurones in the isolated olfactory cortex of the guinea-pig by γ -aminobutyric acid
- 347 BROWN D.A. & GALVAN, M. Responses of the guinea-pig isolated olfactory cortex slice to γ -aminobutyric acid recorded with extracellular electrodes
