Papers will be considered for publication on all aspects of drug action, including chemotherapy.

Manuscripts (two copies) should be sent to Dr A. Ungar, Department of Pharmacology, University of Edinburgh Medical School, 1 George Square, Edinburgh EH8 9JZ. Authors should consult the instructions inside the back cover.

The British Journal of Pharmacology is published monthly by Macmillan Journals Ltd, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633, ISSN 0007-1188.

Annual subscription UK £57.50; USA & Canada, US \$130; Rest of world, US \$120; Airmail, US \$165 (or equivalent in any other currency). (Orders must be accompanied by remittance. Prices correct at time of publication.)

Cheques should be made payable to Macmillan Journals Limited: Subscription Department, Brunel Road, Basingstoke, Hampshire RG21 2XS, England. Where appropriate, overseas subscribers may make payments into UK Post Office Giro Account No. 519 2455. Full details must accompany the payment.

Enquiries concerning advertising space and rates should be addressed to: Advertisement Department, Macmillan Journals Limited, 4 Little Essex Street, London WC2R 3LF. Telephone: 01-836 6633.

Second class postage paid at New York, N.Y.
US Mailing Agent: Expeditors of the Printed Word, Inc.,
Suite 1217, 527 Madison Avenue, New York, NY 10022.

INSTRUCTIONS TO AUTHORS

Papers will be considered for publication on all aspects of drug action.

Before submitting a manuscript, authors must note the following points since failure to comply with instructions will lead to either delay or rejection of the manuscript.

1. **Manuscripts** (2 copies) should be sent to Dr. A. Ungar, Department of Pharmacology, 1 George Square, Edinburgh EH8 9JZ. The manuscript must be typed in double spacing on one side of paper, not larger than A4 (206 × 294 mm). There should be a separate title page with the names of authors (in alphabetical order) and their appropriate addresses. One first name of each author may be included.

2. **Style** Papers must be submitted in the style of the journal (see any recent issue of the journal) and in accordance with the Instructions to Authors published in *Br. J. Pharmac.* (1974) **50**, 3–23. (Copies of these instructions may be obtained from Dr. Ungar.)

3. **Statement** The manuscript must be accompanied by the following statement—‘This manuscript has not been nor will be published in whole or in part by any other journal’. The statement may be included as part of the accompanying letter which must be signed by all authors. No paper will be accepted without this statement and the signatures of each author.

4. **Summary** (2 copies) This should be a short summary of results and conclusions arranged in numbered paragraphs.

5. **Abstract** (2 copies) An abstract of not more than 100 words suitable for inclusion in an abstracting journal should be typed on a separate sheet, giving the author's name and address and the title of the paper.

6. **Short title** A short (running) title of not more than 50 letters and spaces should be submitted. This may be typed on the title page.

7. **Figures** These should not be larger than A4 (206 × 294 mm) and may be in the form of original drawings, recorded tracings or high quality photographic prints made from them. Negative prints of kymograph tracings (black on white) should be provided, and both ordinates and abscissae should be calibrated. Lettering on figures should be inserted in pencil. Symbols which are to appear in figures or legends should be chosen from the following:

○ ● □ ■ △ ▲ ▽ ▼

Photographs and photomicrographs should be printed on glossy paper and should be larger than the size required for reproduction. Each figure legend should be typed on a separate sheet of paper.

8. **Tables** These should generally have not more than 85 characters to a line (counting spaces between columns as 4 characters) and never more than 110 characters to a line. Each table should be typed on a separate sheet of paper.

9. **References** These must be collected in alphabetical order at the end of the paper. They should include the authors' names, year of publication (in brackets), title of article, title of publication (abbreviated in accordance with the fourth edition of the *World List of Scientific Periodicals*), volume number and first and last page numbers. References to books should, in addition, include the names of editors, the edition number (where appropriate), the town of origin then the name of publisher. Where citation is made to a paper ‘in press’ the paper should, if possible, accompany the manuscript, as an aid to the editor and referee.

10. **Short Communications** These will be accepted if they merit priority publication and do not require revision. They may contain up to 1,200 words of text and only one figure or table. The summary should be a single paragraph. An abstract and statement must be included.

Two page proofs will be supplied, one of which may be retained by the authors. The other should be corrected immediately and returned to the Press Editor. Corrections should be kept to a minimum.

Twenty-five reprints will be supplied to the authors free of charge. Additional reprints can be purchased. A reprint order form, which should be returned promptly, will be sent out with the proofs. If reprints will not be available from the author, a note to this effect may be added at the end of the text.

British Journal of Pharmacology

VOLUME 65 NUMBER 3 MARCH 1979

SHORT COMMUNICATIONS

- 357 ANHUT, HENNING, BRUNE, KAY, FRÖLICH, JÜRGEN C. & PESKAR, BERNHARD A. Prostaglandin D₂ is the prevailing prostaglandin in the acute inflammatory exudate of urate arthritis in the chicken
- 360 BOURA, A.L.A., BOYLE, LYNDALE, SIN-NATHURAY, T.A. & WALTERS, W.A.W. Release of prostaglandins during contraction of the human umbilical vein on reduction of temperature

PAPERS

- 363 SAKAI, K. Role of 5-hydroxytryptamine in the vasoconstrictor action of compound 48/80 in the rat femoral vasculature
- 367 CREED, KATE E. The role of the hypogastric nerve in bladder and urethral activity of the dog
- 377 BURNSTOCK, GEOFFREY, CROW, RAHIMA & WONG, HELEN K. Comparative pharmacological and histochemical evidence for purinergic inhibitory innervation of the portal vein of the rabbit, but not guinea-pig
- 389 COHEN, Y., LINDENBAUM, A., MIDOL-MONNET, MICHÈLE, PORQUET, D. & WEPIERRE, J. β -Adrenoceptor blocking drugs and isoprenaline: central effects on cardiovascular parameters
- 395 ATKINSON, GORDON, ENNIS, MADELEINE & PEARCE, FREDERICK L. The effect of alkaline earth cations on the release of histamine from rat peritoneal mast cells treated with compound 48/80 and peptide 401
- 403 AKERA, TAI, BRODY, THEODORE M. & WIEST, SALLY A. Saturable adenosine 5'-triphosphate-independent binding of [³H]-ouabain to brain and cardiac tissue *in vitro*
- 411 HARRIS, J.B. & RIBCHESTER, R.R. Pharmacological aspects of neuromuscular transmission in the isolated diaphragm of the dystrophic (Rej 129) mouse
- 423 JAMES, THOMAS A. & STARR, MICHAEL S. Effects of substance P injected into the substantia nigra
- 431 SEIDLER, F.J. & SLOTKIN, T.A. Presynaptic and postsynaptic contributions to ontogeny of sympathetic control of heart rate in the pre-weanling rat

- 435 BROWN, D.A. & CAULFIELD, M.P. Hyperpolarizing ' α_2 '-adrenoceptors in rat sympathetic ganglia
- 447 KERRY, P.J. Prostaglandin biosynthesis by guinea-pig skeletal muscle *in vitro* and the effect of oestradiol-17 β and progesterone
- 451 GILBERT, R.F.T., HANLEY, M.R. & IVERSEN L.L. [³H]-quinuclidinyl benzilate binding to muscarinic receptors in rat brain: comparison of results from intact brain slices and homogenates
- 457 BOWEN, S.R., CARPENTER, F.G. & SOWELL, J.G. Ventilatory depression in naive and tolerant rats in relation to plasma morphine concentration
- 465 BONTA, I.L. & PARNHAM, M.J. Time-dependent stimulatory and inhibitory effects of prostaglandin E₁ on exudative and tissue components of granulomatous inflammation in rats
- 473 TOMLINSON, D.R. On the mechanism of pancuronium-induced supersensitivity to noradrenaline in rat smooth muscle
- 479 WELMAN, ELIZABETH Stabilization of lysosomes in anoxic myocardium by propranolol
- 483 ANWYL, ROGER & NARAHASHI, TOSHIO Action of colchicine and cytochalasin B on the acetylcholine receptor
- 489 HUTCHINS, D.A. The effect of pargyline and desmethyylimipramine on monoamine concentrations and amphetamine-induced glycogenolysis in the mouse brain
- 495 BAKHLE, Y.S., HARTIALA, J., TOIVONEN, H. & UOTILA, P. Effects of cigarette smoke on the metabolism of vasoactive hormones in rat isolated lungs
- 501 JONES, R.S.G. & ROBERTS, M.H.T. Potentiation of responses to monoamines by antidepressants after destruction of monoamine afferents
- 511 FEGER, JEAN, HAMMOND, CONSTANCE & ROUZAIRE-DUBOIS, BEATRICE Pharmacological properties of acetylcholine-induced excitation of subthalamic nucleus neurones
- 517 WILLIAMS, T.J. Prostaglandin E₂, prostaglandin I₂ and the vascular changes of inflammation
- 525 KRŠIAK, M. Effects of drugs on behaviour of aggressive mice
- 536 BEDDELL, C.R., GOODFORD, P.J., STAMMERS, D.K., & WOOTTON, R. Species differences in the binding of compounds designed to fit a site of known structure in adult human haemoglobin
