

BRITISH JOURNAL OF PHARMACOLOGY

The *British Journal of Pharmacology* welcomes contributions in all fields of experimental pharmacology including neuroscience, biochemical, cellular and molecular pharmacology. The Board of Editors represents a wide range of expertise and ensures that well-presented work is published as promptly as possible, consistent with maintaining the overall quality of the journal.

Submission of manuscripts: Manuscripts (two copies) should be sent to The Editorial Office, British Journal of Pharmacology, St. George's Hospital Medical School, Cranmer Terrace, London SW17 0RE.

Authors should consult the Instructions to Authors and the Nomenclature Guidelines for Authors in Vol. 117, 389–399. These Instructions and Guidelines also appear with the journal Index for Volumes 114–116, 1995. A checklist of the essential requirements is summarised in each issue of the journal, or as the last page of the issue.

Whilst every effort is made by the publishers and editorial committee to see that no inaccurate or misleading data, opinion or statement appears in this Journal, they and the *British Pharmacological Society* wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the responsibility of the contributor or advertiser concerned. Accordingly, the *British Pharmacological Society*, the publishers and the editorial committee and their respective employees, officers and agents accept no liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

M. Rapacon, P. Mieyal, J.C. McGiff, D. Fulton & J. Quilley Contribution of calcium-activated potassium channels to the vasodilator effect of bradykinin in the isolated, perfused kidney of the rat **1504**

D.J. Prentice & S.M.O. Hourani Activation of multiple sites by adenosine analogues in the rat isolated aorta **1509**

G.E. Knight & G. Burnstock The involvement of the endothelium in the relaxation of the leopard frog (*Rana pipiens*) aorta in response to acetylcholine **1518**

C.-S. Sum, D.C.C. Wan & W.-T. Cheung Potentiation of purinergic transmission by angiotensin in prostatic rat vas deferens **1523**

G. Mannaioni, V. Carlà & F. Moroni Pharmacological characterization of metabotropic glutamate receptors potentiating NMDA responses in mouse cortical wedge preparations **1530**

Z.-Y. Wang, P. Alm & R. Håkanson The contribution of nitric oxide to endotoxin-induced ocular inflammation: interaction with sensory nerve fibres **1537**

B. Gardner, D.A. Hall & P.G. Strange Pharmacological analysis of dopamine stimulation of [³⁵S]-GTPγS binding via human D_{2short} and D_{2long} dopamine receptors expressed in recombinant cells **1544**

M.R. Domenici, A. Scotti de Carolis & S. Sagratella Block by N⁶-L-phenylisopropyl-adenosine of the electrophysiological and morphological correlates of hippocampal ischaemic injury in the gerbil **1551**

M.A. Desai, J.P. Burnett, N.G. Mayne & D.D. Schoeppe Pharmacological characterization of desensitization in a human mGlu1α-expressing non-neuronal cell line co-transfected with a glutamate transporter **1558**

Erratum **1565**

The *British Journal of Pharmacology* is published by Stockton Press, a division of Macmillan Press Ltd. It is the official publication of the British Pharmacological Society.

Scope The *British Journal of Pharmacology* is published twice a month. It welcomes contributions in all fields of experimental pharmacology including neuroscience, biochemical, cellular and molecular pharmacology. The Board of Editors represents a wide range of expertise and ensures that well-presented work is published as promptly as possible, consistent with maintaining the overall quality of the journal.

This journal is covered by Current Contents, Excerpta Medica, BIOSIS, CABS, CINAHL and Index Medicus.

Editorial Manuscripts (plus two copies) and all editorial correspondence should be sent to: The Editorial Office, *British Journal of Pharmacology*, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE, UK. Tel: +44 (0)181 767 6765; Fax: +44 (0)181 767 5645.

Advertisements Enquiries concerning advertisements should be addressed to: Michael Rowley, Hasler House, High Street, Great Dunmow, Essex CM6 1AP, UK. Tel: +44 (0)1371 874613; Fax: +44 (0)1371 872273.

Publisher All business correspondence, supplement enquiries and reprint requests should be addressed to *British Journal of Pharmacology*, Stockton Press, Houndmills, Basingstoke, Hampshire RG21 6XS, UK. Tel: +44 (0)1256 29242; Fax: +44 (0)1256 810526. Publisher: Marija Vukovojac. Production Controller: Nicci Crawley. Supplement Production Controller: Simone Larché

Subscriptions – EU/Rest of World Subscription price per annum (3 volumes, 24 issues) £655, rest of world £735 (Surface mail) £880 (Airmail), or equivalent in any other currency. Orders must be accompanied by remittance. Cheques should be made payable to *Macmillan Magazines* and sent to: The Subscription Department, Macmillan Press Ltd, Houndmills, Basingstoke, Hampshire RG21 6XS, UK. Where appropriate, subscribers may make payments into UK Post Office Giro Account No. 519 2455. Full details must accompany the payment. Subscribers from EC territories should add sales tax at the local rate.

Subscriptions – USA USA subscribers call toll free 1-800-221-2123 or send check/money order/credit card details to: Stockton Press, 345 Park Avenue South, 10th Floor, New York, NY 10010-1707; Tel: +1 212 689 9200, Fax: +1 212 689 9711. USA annual subscription rates (institutional/corporate): \$1170 (surface) \$1400 (airmail). Individual making personal payment: \$240.

British Journal of Pharmacology (ISSN 0007-1188) is published twice a month by Macmillan Press Ltd, c/o Mercury Airfreight International Ltd, 2323 Randolph Avenue, Avenel, NJ 07001, USA. Subscription price for institutions is \$1170 per annum (surface). 2nd class postage is paid at Rahway NJ. Postmaster: send address corrections to Macmillan Press Ltd, c/o Mercury Airfreight International Ltd, 2323 Randolph Avenue, Avenel NJ 07001.

Reprints of any article in this journal are available from Stockton Press, Houndmills, Basingstoke, Hampshire RG21 6XS, UK. Tel: +44 (0)1256 29242; Fax: +44 (0)1256 810526.

LIBRARY RECOMMENDATION FORM

To: Librarian/Library Acquisition Committee

I have just reviewed a sample copy of the journal detailed overleaf entitled:

Please include it in your next serials review meeting with my recommendation.

(Further sample copies are available from Stockton Press, Direct Marketing, Houndmills, Basingstoke Hampshire RG21 6XS, UK)

I recommend the journal for the following reasons:

Name: _____

Position: _____

Department: _____

PREPARATION OF MANUSCRIPTS

Authors are strongly recommended to read the full *Instructions to Authors and Nomenclature Guidelines for Authors* (*Br. J. Pharmacol.* 1996, **117**, 389–399) before submitting a manuscript for publication in the *British Journal of Pharmacology*. The manuscript and cover letter should be checked against the following list before mailing.

The original and one copy of the manuscript must be supplied. Manuscripts must be typed in double-line spacing on one side of A4 paper, in type not smaller than 12 characters per inch or 10 point. Both copies to include Tables and a set of labelled Figures. One set of Figures without numbers or letters is also to be included. The text to be arranged in the following subsections:

1. **Title**—To have no more than 150 characters on a separate page, which should also include a Short Title (50 characters maximum) and the name and address of the author for correspondence.
2. **Summary**—To be arranged in numbered paragraphs (Full Papers) or a single paragraph (Special Reports).
—to include aims, principal results and conclusions.
—to include Key words (10 maximum) at end of summary.
3. **Introduction**—To contain concise statements of the problem and the aims of the investigation.
4. **Methods**—To have brief but adequate account of the procedures; *full names of drugs (including those referred to by manufacturer's code)*, sources of drugs and statistical tests to be stated.
5. **Results**—To have no repetition of data in Figures, Tables and text.
6. **Discussion**—Findings and conclusions to be placed in context of other relevant work.
NB Simple repetition of results and unwarranted speculation are not acceptable.
7. **Acknowledgements**—Sources of support. Sources of drugs not widely available commercially.
8. **References**—All references in the text to be included in the Reference List and *vice versa*. References in alphabetical order with complete citations; Journals publishing 'in press' papers identified.

References to manuscripts submitted to other journals but not yet accepted are not allowed.

9. **Tables**—Each on a separate page and prepared in accordance with current requirements of the Journal.
10. **Figures**—Both labelled and non-labelled Figures to be prepared in accordance with current requirements of the Journal (see *Instructions to Authors*, 1996, **117**, 389–396) and provided with Figure Number and Authors' names on back (*in pencil*).
—each legend to be typed on a separate page and carrying keys to symbols.
—keys to symbols and histograms must not appear on the figures themselves, but in the respective legends.
—'box style' figures are not in keeping with the Journal style; line drawings etc must have only left-hand and bottom axes.
11. **Manuscripts**—To be accompanied by a declaration signed by each author that
 - (a) results are original
 - (b) approval of all persons concerned has been given to submit manuscripts for consideration (see also 12b)
 - (c) the same material is neither 'in press' (i.e. is in proof or has definitely been accepted for publication) nor under consideration elsewhere. Furthermore it will not be submitted or published elsewhere before a decision has been reached by the Editorial Board of the *British Journal of Pharmacology* and will not be submitted elsewhere if accepted by the *British Journal of Pharmacology*.
 - (d) Copyright assignment is included.
12. **Cover letter**—To state clearly
 - (a) Corresponding author's full postal address, telephone, telex or Fax number
 - (b) where appropriate, that *either* ethical approval has been given for investigation *or* Company or Institutional permission to publish work has been received.
13. **Reminder**—Packaging to be sufficiently robust to protect Figures and to withstand mailing.

Failure to comply with *Instructions to Authors* may lead to substantial delays in processing, review and publication and may even jeopardize acceptance of the manuscript.

NOMENCLATURE

Authors are reminded that accepted receptor and associated terminology is laid out in *Nomenclature Guidelines for Authors*, as published in the *British Journal of Pharmacology*, *Br. J. Pharmacol.*, 1996, **117**, 397–399.

SPECIAL REPORTS

The purpose of *Special Reports* is to provide rapid publication for **new** and **important** results which the Editorial Board considers are likely to be of special pharmacological significance. *Special Reports* will have publication priority over all other material and so authors are asked to consider carefully the status of their work before submission.

In order to speed publication there is normally no revision allowed beyond very minor typographical or grammatical corrections. If significant revision is required, the Board may either invite rapid re-submission or, more probably, propose that it be re-written as a Full Paper and be re-submitted for consideration. In order to reduce delays, proofs of *Special Reports* will be sent to authors but **essential corrections must reach the Production Office within 48 hours of receipt**. Authors should ensure that their submitted material conforms exactly to the following requirements. **In a covering letter, the authors should state clearly and briefly, why THEY consider the Report to be of special pharmacological significance and should therefore receive priority for publication as a Special Report.**

Special Reports should normally occupy no more than two printed pages of the Journal; two illustrations (Figures or Tables, with legends) are permitted. As a guideline, with type face of 12 pitch and double-line spacing, a page of A4 paper could contain about 400 words. The absolute maximum length of the *Special Report* is 1700 words. For each Figure or Table, please deduct 200 words. The manuscript should comprise a Title page with key words (maximum of 10), a Summary consisting of a single short paragraph, followed by Introduction, Methods, Results, Discussion and References (maximum of 10). In all other respects, the requirements are the same as for Full Papers (see current 'Instructions to Authors').

PAPERS

- U.G. Friis & T. Johansen** Dual regulation of the Na^+/H^+ -exchange in rat peritoneal mast cells: role of protein kinase C and calcium on pH_i regulation and histamine release 1327
- M.A. Martínez-Cuesta, J.V. Esplagues & B.J.R. Whittle** Modulation by nitric oxide of spontaneous motility of the rat isolated duodenum: role of tachykinins 1335
- H. Rhim, P.T. Toth & R.J. Miller** Mechanism of inhibition of calcium channels in rat nucleus tractus solitarius by neurotransmitters 1341
- E. Ribaldi, A.M. Mezzasoma, E. Francescangeli, M. Prosdoci, G.G. Nenci, G. Goracci & P. Gresele** Inhibition of PAF synthesis by stimulated human polymorphonuclear leucocytes with cloricromene, an inhibitor of phospholipase A_2 activation 1351
- A. Papapetropoulos, G. Abou-Mohamed, N. Marczin, F. Murad, R.W. Caldwell & J.D. Catravas** Downregulation of nitrovasodilator-induced cyclic GMP accumulation in cells exposed to endotoxin or interleukin- 1β 1359
- E.G. Silva, L.M. Vianna, P. Okuyama & T.B. Paiva** Effect of treatment with cholecalciferol on the membrane potential and contractility of aortae from spontaneously hypertensive rats 1367
- M. Féléto, E. Bonnardel & E. Canet** Bradykinin and changes in microvascular permeability in the hamster cheek pouch: role of nitric oxide 1371
- E. Delpy & A.-C. le Monnier de Gouville** Cardiovascular effects of a novel, potent and selective phosphodiesterase 5 inhibitor, DMPP0: *in vitro* and *in vivo* characterization 1377
- G.J. Liu & B.W. Madsen** Biphasic effect of pentobarbitone on chick myotube nicotinic receptor channel kinetics 1385
- M.E. Cavet, M. West & N.L. Simmons** Transport and epithelial secretion of the cardiac glycoside, digoxin, by human intestinal epithelial (Caco-2) cells 1389
- S. Noguchi, Y. Kashiwara & C. Bertrand** The induction of a biphasic bronchospasm by the ET_B agonist, IRL 1620, due to thromboxane A_2 generation and endothelin-1 release in guinea-pigs 1397
- K. Shibata, A. Hirasawa, N. Moriyama, K. Kawabe, S. Ogawa & G. Tsujimoto** α_{1A} -Adrenoceptor polymorphism: pharmacological characterization and association with benign prostatic hypertrophy 1403
- E.J. Hide & C. Thiemermann** Sulprostone-induced reduction of myocardial infarct size in the rabbit by activation of ATP-sensitive potassium channels 1409
- A. Rubino & G. Burnstock** Evidence for a P_2 -purinoceptor mediating vasoconstriction by UTP, ATP and related nucleotides in the isolated pulmonary vascular bed of the rat 1415
- J.A. Terrón** The relaxant 5-HT receptor in the dog coronary artery smooth muscle: pharmacological resemblance to the cloned 5-HT $_7$ receptor subtype 1421
- P. Moreau, H. Takase & T.F. Lüscher** Effect of endothelin antagonists on the responses to prostanoid endothelium-derived contracting factor 1429
- S. Pfeiffer, E. Leopold, K. Schmidt, F. Brunner & B. Mayer** Inhibition of nitric oxide synthesis by N^G -nitro-L-arginine methyl ester (L-NAME): requirement for bioactivation to the free acid, N^G -nitro-L-arginine 1433
- G. Bonanno, A. Gemignani, G. Schmid, P. Severi, P. Cavazzani & M. Raiteri** Human brain somatostatin release from isolated cortical nerve endings and its modulation through GABA_B receptors 1441
- J.C. Hancox & A.J. Levi** Actions of the digitalis analogue strophanthidin on action potentials and L-type calcium current in single cells isolated from the rabbit atrioventricular node 1447
- S.M. Bryant & G. Hart** Effects of neuropeptide Y on L-type calcium current in guinea-pig ventricular myocytes 1455
- A.K. Dixon, A.K. Gubit, D.J.S. Sirinathsinghji, P.J. Richardson & T.C. Freeman** Tissue distribution of adenosine receptor mRNAs in the rat 1461
- C.L. Davis, S. Naeem, S.B. Phagoo, E.A. Campbell, L. Urban & G.M. Burgess** B_1 bradykinin receptors and sensory neurones 1469
- M. Diener, F. Hug, D. Strabel & E. Scharrer** Cyclic AMP-dependent regulation of K^+ transport in the rat distal colon 1477
- I.R. Pelá, A.L. Rosa, C.A.A. Silva & J.P. Huidobro-Toro** Central B_2 receptor involvement in the antinociceptive effect of bradykinin in rats 1488
- C.A. Maggi, S. Giuliani, P. Santicoli & A.F. Brading** Role of intracellular Ca^{2+} in the K channel opener action of CGRP in the guinea-pig ureter 1493
- M. Rapacon, P. Mieyal, J.C. McGiff, D. Fulton & J. Quilley** Contribution of calcium-activated potassium channels to the vasodilator effect of bradykinin in the isolated, perfused kidney of the rat 1504
- D.J. Prentice & S.M.O. Hourani** Activation of multiple sites by adenosine analogues in the rat isolated aorta 1509
- G.E. Knight & G. Burnstock** The involvement of the endothelium in the relaxation of the leopard frog (*Rana pipiens*) aorta in response to acetylcholine 1518
- C.-S. Sum, D.C.C. Wan & W.-T. Cheung** Potentiation of purinergic transmission by angiotensin in prostatic rat vas deferens 1523
- G. Mannaioni, V. Carlà & F. Moroni** Pharmacological characterization of metabotropic glutamate receptors potentiating NMDA responses in mouse cortical wedge preparations 1530
- Z.-Y. Wang, P. Alm & R. Håkanson** The contribution of nitric oxide to endotoxin-induced ocular inflammation: interaction with sensory nerve fibres 1537
- B. Gardner, D.A. Hall & P.G. Strange** Pharmacological analysis of dopamine stimulation of [^{35}S]-GTP γS binding via human $\text{D}_{2\text{short}}$ and $\text{D}_{2\text{long}}$ dopamine receptors expressed in recombinant cells 1544
- M.R. Domenici, A. Scotti de Carolis & S. Sagratella** Block by N^6 -L-phenylisopropyl-adenosine of the electrophysiological and morphological correlates of hippocampal ischaemic injury in the gerbil 1551
- M.A. Desai, J.P. Burnett, N.G. Mayne & D.D. Schoeppe** Pharmacological characterization of desensitization in a human mGlu1 α -expressing non-neuronal cell line co-transfected with a glutamate transporter 1558

Erratum 1565
