

# **British Journal of Pharmacology**

## **Proceedings Supplement**

Proceedings of the British Pharmacological Society Meeting

University of Southampton  
(Joint Meeting with the Physiological Society)

8th–11th September 1998

The *British Journal of Pharmacology* is published by Stockton Press, a division of Macmillan Press Ltd. It is the official publication of the British Pharmacological Society.

**Scope** The *British Journal of Pharmacology* publishes 3 volumes of 8 issues per year and is published twice a month. It welcomes contributions in all fields of experimental pharmacology including neuroscience, biochemical, cellular and molecular pharmacology. The Board of Editors represents a wide range of expertise and ensures that well-presented work is published as promptly as possible, consistent with maintaining the overall quality of the journal.

This journal is covered by Current Contents, Excerpta Medica, BIOSIS, CABS, CINAHL and Index Medicus.

**Editorial** Manuscripts (plus two original copies) and all editorial correspondence should be sent to: The Editorial Office, British Journal of Pharmacology, BPS Office, 16 Angel Gate, 326 City Road, London EC1V 2SG, UK. Tel: +44 (0)171 417 0431/2/3; Fax: +44 (0)171 417 0430.

**Advertisements** Enquiries concerning advertisements should be addressed to: Robert Sloan, Advertisement Manager, 84 Arnos Grove, Southgate, London N14 7AR, UK. Tel: +44 (0)181 882 7199; Fax: +44 (0)181 882 7299.

**Publisher** All business correspondence, supplement enquiries and reprint requests should be addressed to *British Journal of Pharmacology*, Stockton Press, Houndmills, Basingstoke, Hampshire RG21 6XS, UK. Tel: +44 (0)1256 329242; Fax: +44 (0)1256 810526. Publisher: Jayne Marks. Production Controller: Jane Torr. Supplement Editor: Timothy Kopp. Supplement Production Controller: Theresa Emerick.

**WWW** The *British Journal of Pharmacology* is on the internet at: <http://www.stockton-press.co.uk>

All information on the website is free and includes: editor's details, scope, latest table of contents, paper abstracts, subscription prices, reprint ordering, sample copy ordering, news, supplement information, contact names in publishing, production, marketing and advertising departments. Register now to have the table of contents sent to you as soon as they are updated.

**Subscriptions – 1999 Subscription Rates – British Journal of Pharmacology** Institutional Subscriptions Print (Hard Copy); EU £890, Rest of World (surface mail) £985/US\$1625, Rest of World (airmail) £1182/US\$1950.

**Electronic – Online only** £890/US\$1469.

**Combined – Electronic Online & Print** EU £979, Rest of World (surface mail) £1084/US\$1789, Rest of World (airmail) £1281/US\$2114.

**Subscriptions – Outside the USA**

Orders must be accompanied by remittance. Cheques should be made payable to Macmillan Journals Subscriptions Ltd and sent to: The

Subscription Department, Macmillan Press Ltd, Houndmills, Basingstoke, Hampshire RG21 6XS, UK. Where appropriate, subscribers may make payments into UK Post Office Giro Account No: 519 2455. Full details must accompany the payment.

#### **Subscriptions – USA**

USA subscribers can call toll free: 1 800 747 3187. Please send check/money order/credit card details to: The Subscription Department, Macmillan Press Ltd, Houndmills, Basingstoke, Hampshire RG21 6XS, UK.

Prices are set in UK Sterling. Dollar prices are converted from UK Sterling at the current exchange rate. Accordingly, your credit card charge may vary slightly from the Dollar rate shown. To obtain the exact Dollar rate shown, please remit by check. All prices, specifications and details are subject to change without prior notification.

*British Journal of Pharmacology* (ISSN 0007–1188) is published twice a month by Macmillan Press Ltd, c/o Mercury Airfreight International Ltd, 2323 Randolph Avenue, Avenel, NJ 07001, USA. Subscription price for institutions is \$1505 per annum (surface). Periodicals postage is paid at Rahway NJ. Postmaster: send address corrections to Macmillan Press Ltd, c/o Mercury Airfreight International Ltd, 2323 Randolph Avenue, Avenel NJ 07001.

**Reprints** of any article in this journal are available from Stockton Press, Houndmills, Basingstoke, Hampshire RG21 6XS, UK. Tel: +44 (0)1256 329242; Fax: +44 (0)1256 810526.

5-HT<sub>2</sub> receptors 60P  
5-HT<sub>2</sub> receptor antagonists 65P  
5-HT<sub>2B</sub> receptors 8P  
5-HT<sub>7</sub> receptors 55P  
HU210 67P  
5-Hydroxydecanote 36P  
Hypertension 93P  
Hypothermia 69P  
Hypoxia 88P

IK<sub>Ca</sub> channels 106P  
Imidazolines 105P  
Imidazoline binding sites 76P  
Immunohistochemistry 55P  
*In situ* hybridisation 43P, 55P  
*In situ* RT-PCR 99P  
Inflammation 44P, 122P, 123P  
Inositol trisphosphate receptors 21P, 22P  
Ins(1,4,5)P<sub>3</sub>-receptors 23P  
Insulin 85P, 117P, 120P, 129P  
Insulin resistance 114P  
Insulin-like growth factor-1 92P  
Interleukin-1 $\beta$  34P, 50P  
Interleukin-6 112P  
Iprindole 41P  
Ischaemia 36P, 133P  
Isolated anococcygeus, rat 59P  
Isoprostanes 109P, 110P, 115P

Jurkat T-cells 82P

Kidney, rat 76P  
KN-62 83P

Leech Retzius cells 71P  
Leptin 91P  
Leukocyte recruitment 31P  
Ligand-gated ion channels 86P  
Localisation 53P  
Locus coeruleus 3P  
Long QT syndrome 77P  
Long-term potentiation 34P

L-type channels 78P  
Lung 11P  
Lung microvascular endothelium 31P

MAP kinase 25P  
Marmoset sleep–wake cycle 68P  
Mechanical hyperalgesia 122P  
Melatonin receptors 75P  
MEN 10627 74P  
MEN 11420 74P  
Metabotropic glutamate receptors 45P, 46P  
*N*-Methyl-D-aspartate receptors 2P  
Microangiogenesis 101P  
Microassays 119P  
Microdialysis 57P  
Migraine 49P  
Monoclonal antibodies 126P  
Mouse hyperalgesia 122P  
[<sup>3</sup>H]-MPPF 56P, 58P  
MPTP 4P  
Mucosa 12P  
Muscarinic acetylcholine receptors 24P  
Muscarinic receptors 25P, 62P  
Muscarinic M<sub>3</sub> receptor heterogeneity 62P

L-NAME 30P, 49P  
Neuroma 39P  
NF- $\kappa$ B 32P  
Nicotine 1P  
Nicotinic receptor upregulation 78P, 79P  
Nitric oxide 17P, 19P, 44P, 93P, 94P, 97P, 103P, 108P, 118P, 124P  
Nitric oxide synthase 49P, 125P  
7-Nitroindazole 124P  
Nociceptin 5P  
Nociception 49P, 50P, 51P  
Non-steroidal anti-inflammatory drugs 35P  
Noradrenaline 3P, 107P

Ocular muscles 62P  
ODA 67P  
[<sup>3</sup>H]8-OH-DPAT 58P  
Operant responding 1P  
ORL1 receptors 5P  
Oxidant stress 113P, 114P, 115P, 116P, 118P, 130P

P1 hydrolysis 85P  
P2X<sub>7</sub> 83P  
P38 kinase inhibitors 89P  
Parkinson's disease 4P, 43P, 66P  
Partial agonism 23P  
Patch clamp 47P  
PD165929 28P  
PDE inhibitors 87P  
Penile tissue, human 13P  
Phagocyte function 121P  
Phosphates, high energy 131P

Pigment granule aggregation 75P  
Poly(ADP-ribose) synthetase 113P, 132P  
Polycations 123P  
Potassium channels 9P, 88P  
Potassium channel blockers 16P  
Potassium channel openers 106P  
Potassium ATP channels 105P  
Potassium currents 41P  
Prazosin 13P  
Pressor effect 92P  
Presynaptic modulation 48P  
Propylthiouracil 97P  
Protein kinase 84P  
Protein kinase A 32P  
Pulmonary arteries, bovine 100P

QT prolongation 128P

Radioligand binding 27P, 86P  
Reactive oxygen species 37P, 120P, 133P, 134P  
Receptor desensitisation 28P  
Receptor subtypes 59P  
Recombinant GABA<sub>A</sub> receptors, human 26P  
Relaxation 110P  
Renal proximal tubular cells, rat 113P  
Reperfusion 36P, 133P  
Reperfusion injuries 37P, 131P, 132P  
Ro-31-8220 83P

Scintillation proximity assay 21P  
Scorpion venom 14P  
Screen, high throughput 82P  
Seizures 46P  
Selective serotonin reuptake inhibitors 54P  
Sepsis 124P  
Sleep 68P  
Smooth muscle 105P, 108P  
Sodium channels 39P, 51P  
Soman 7P  
Spinal cord 50P, 51P, 53P  
Splanchnic artery occlusion shock 112P  
Striatal slices 48P  
Striatum 47P  
Substrate-contact residue 80P  
Sumatriptan 61P  
*Suncus murinus* intestine 60P  
Superoxide anions 17P  
Superoxide dismutase mimetics 17P  
Sympathetic nerve activity 8P

Tachykinin NK<sub>2</sub> receptors 74P  
Telemetry 68P  
Tempol 133P, 134P  
Tetraethylammonium 34P  
Thapsigargin 40P, 101P  
Thoracic aortae, rat 95P  
Thromboxane receptors 98P  
TP receptors 109P

Trachea, guinea-pig 87P  
Transition metals 19P, 108P  
Tricyclic antidepressants 77P

Umbilical artery, human isolated 98P

Vas deferens, rat 61P  
Vascular endothelium 9P  
Vascular system 95P  
Vasoconstriction 91P, 92P  
Veins, saphenous 20P  
Voltammetry 3P, 54P  
V<sub>1</sub>-receptors 102P

4030W92 51P

*Xenopus* oocytes 72P

Zucker rats 116P, 117P, 119P
