

Corrigendum

Effects of pH on the inhibition of fatty acid amidohydrolase by ibuprofen

Sandra Holt, Jonas Nilsson, Romelda Omeir, Gunnar Tiger & Christopher J. Fowler

Br. J. Pharmacol., 2001; **133**, 513–520.

Since the publication of the above paper, the authors have identified two errors. The errors detected in no way affect the interpretation of the data.

- (1) For the transfection experiments, the host cells used were COS-1, not COS-7. The difference between the cells is rather minor, since they are both derived from the same original cell line, and highly unlikely differentially to affect the properties of the transfected FAAH.
- (2) In Figure 4b, three experiments were undertaken as stated in the legend, but one was over the range 1–7 μM and two over the range 0.7–5 μM , that explains why the main figure has seven data points per curve, whereas the insert had only five data points.
