The authors have recently notified us of an error in the above paper. It has come to their attention that the sentence on p. 6, line 5 should read 'A noncompetitive behaviour of BIBN4096BS can be explained if the affinity of BIBN4096BS (apparent $pK_B \sim 11$) to CGRP₁-receptors is higher than that of CGRP ($pK_A \sim 9$), which seems to be the case in our study'.

The full article appears in this issue on pp. 1066–1073.
