

CORRIGENDUM

Interactions of metoclopramide and ergotamine with human 5-HT_{3A} receptors and human 5-HT reuptake carriers**Jan Walkembach, Michael Brüss, Bernd W. Urban & Martin Barann***British Journal of Pharmacology* (2005) **146**, 1156. doi:10.1038/sj.bjp.0706610**Correction to:** *British Journal of Pharmacology* (2005) **146**, 543–552. doi:10.1038/sj.bjp.0706351

The authors have recently notified us of an error in the above paper. It has come to their attention that the sentence within the results section on page 548, left text column, line 6 should read:

Calculating the rate constants k_{OFF} (0.48 s^{-1}) and k_{ON} ($3.04 \times 10^6 \text{ s}^{-1} \text{ M}^{-1}$) from these time constants, a K_{D} for metoclopramide of 155 nM was determined, which is close to the IC_{50} .

The authors would like to apologise for this mistake.
