

## **Erratum**

### **Repair of DNA Interstrand Crosslinks after Busulphan. A Possible Mode of Resistance**

P. Bedford and B. W. Fox

Cancer Chemother Pharmacol (1982) 8: 3–7

The following errors were inadvertently made by the author:

1. Equation for relative retention values is inverted in the text (p. 5, col. 2, line 3) but is correctly used in the remainder of the text calculation of data.

2. The references [19, 7] employed on p. 7, col. 1, line 13–22 have been incorrectly quoted. The resistance mechanism proposed by them was based on differential mono-adduct removal and not to cross link as stated by us.
