

International Conference on Triazenes: Chemical, Biological and Clinical Aspects

Trieste, November 23 - 24, 1989

The conference will cover all aspects of synthesis, chemical properties, carcinogenicity, antitumor action, immunopharmacology, pharmacokinetics and mechanism of action of triazenes. An overview of the clinical effectiveness of dacarbazine and of new triazene analogues will be also covered

The conference will be structured in sessions with contributions by invited speakers covering the topics indicated, and by poster sessions including brief oral presentation (with 2-3 slides) followed by discussion for proffered papers

The abstracts and proceedings of the conference will be published

Invited speakers who have already accepted to give a presentation are: E. Bonmassar, A. H. Calvert, M. D'Incalci, S. Eckhardt, A. Gescher, G. F. Kolar, G. P. Margison, E. S. Newland, C. J. Rutt, M. F. G. Stevens, M. Tisdale, K. Vaughan and D. E. V. Wilman

The organizing committee encourages preclinical and clinical investigators to submit abstracts of their research activities for poster presentation

Organizing committee: T. Giraldi, T. A. Connors, G. Cartei

Scientific advisory board: M. D'Incalci, S. Eckhardt, M. C. Fioretti, A. Gescher, K. Lapis, K. Karrer, K. Kolaric, S. Plesnicar, K. Vaughan

The registration fee for active participants is 130 US \$ (or the equivalent in Italian lira) if received before June 1st, 1989; for registrations received after this date, the fee will be 150 US \$. The registration fee includes one copy of the abstract book, and lunches, coffee and tea during the conference, the conference dinner.

A reduced fee of 30 US \$ will be available for students providing an official statement of their status, which will provide admission to the conference and the abstract book.

Further information, concerning the conference, instructions for presentation of abstracts, registration and accommodation can be obtained from the secretariat at the following address to:
