

Carbohydrate Polymers

Papers Published in 1985

Contents of Volume 5

Number 1

Extent of β -glucan Chain Elongation by Ryegrass (<i>Lolium multiflorum</i>) Enzymes. Robert J. Henry and Bruce A. Stone (Australia)	1
<i>N</i> -Carboxyacyl- <i>N</i> -acylchitosan Gels as Novel Media for Gel Chromato- graphy. Shigehiro Hirano and Yukio Nishiguchi (Japan)	13
Microcalorimetric Studies on the Lyophilic Properties of Pectic Sub- stances. G. Ignatov, N. Markova and Chr. Kratchanov (Bulgaria)	25
Enzymatic Depolymerization of Polysaccharides. James Rollings (USA).	37
Summaries of UK Patent Applications	83

Number 2

Removal of Uranium from Solutions and Brines by a Derivative of Chitosan and Ascorbic Acid. R. A. A. Muzzarelli (Italy)	85
Reinvestigation of Potato Starch Volume during the Sorption Process. V. Haine, H. Bizot and A. Buleon (France)	91
Configurational Statistics of 1,6-Linked Glycans. K. M. Middlemiss, M. K. Boyd and S. G. Whittington (Canada)	107
A Radiochemical Approach to the Determination of Carboxylic Acid Groups in Polysaccharides. Marilyn A. Anderson and B. A. Stone (Australia)	115
Action of Chitinase on Spines of the Diatom <i>Thalassiosira fluviatilis</i> . Gabriel J. H. Lindsay and Graham W. Gooday (UK)	131
Polysaccharides from <i>Cannabis sativa</i> Active in Lowering Intraocular Pressure. Linda C. Hodges, Howard M. Deutsch, Keith Green and Leon H. Zalkow (USA)	141
Book Review	155

Number 3

Structural Studies of the Solutions of Anionic Polysaccharides. IV. Study of Pectin Solutions by Light-scattering. <i>I. G. Plashchina, M. G. Semenova, E. E. Braudo and V. B. Tolstoguzov (USSR)</i>	159
Fluorescence Polarisation Studies on the Interaction of Cellulose Polycations with Polyanions. <i>J. B. Lawton and C. Salveridis (UK)</i>	181
A Study of Some Factors Influencing Amylose Gelation. <i>H. S. Ellis and S. G. Ring (UK)</i>	201
An Investigation to Identify Factors that Confer High Strength Properties to Normal Cottons: The Relationship Between Orientation Factors (X-Ray, Optical) and Tensile Strength. <i>A. R. Kalyanaraman (India)</i>	215
A Comparison of the Reactivity of Alginate and Pectate Esters with Gelatin. <i>James E. McKay, George Stainsby and Eric L. Wilson (UK)</i>	223
Summaries of UK Patent Applications	237

Number 4

Gel Permeation Chromatography of Sunflower Pectin. <i>H. Anger and G. Berth (German Democratic Republic)</i>	241
Macromolecular Distribution of <i>Acacia senegal</i> Gum (Gum Arabic) by Size-Exclusion Chromatography. <i>Marie-Colette Vandeveld and Jean-Claude Fenyo (France)</i>	251
Melting Behaviour of a Triple Helical Polysaccharide Schizophyllan in Aqueous Solution. <i>Toshio Yanaki, Kengo Tabata and Takemasa Kojima (Japan)</i>	275
Studies on Chitin. 2. Preparation and Properties of Chitin Membranes. <i>Sei-ichi Aiba, Masato Izume, Norihiko Minoura and Yukihiro Fujiwara (Japan)</i>	285
The <i>N</i> -Permethylation of Chitosan and the Preparation of <i>N</i> -Trimethyl Chitosan Iodide. <i>Riccardo A. A. Muzzarelli and Fabio Tanfani (Italy)</i>	297
Research Note	
On the Dual Role of Starch, Cellulose and their Dialdehydes as Fillers and Accelerators in the Tertiary Amine Catalysed Curing of Epoxy Resin. <i>A. J. Varma and Y. K. Jamdade (India)</i>	309
Announcement	317

Number 5

Characterization of Enzymatic Degradation Products of Carboxymethyl Cellulose by Gel Chromatography. <i>K. Hamacher and H. Sahm (Federal Republic of Germany)</i>	319
The Extrusion of Soya with Alginate Using a Twin-screw Cooking Extruder. <i>A. P. Imeson, P. Richmond and A. C. Smith (UK)</i>	329
Absorption and Excretion of Tablet Disintegrating β -Cyclodextrin Polymer in Rats. <i>A. Gerlőczy, A. Fónagy, É. Fenyvesi and J. Szejtli (Hungary)</i>	343
Crosslinking of Methylolcellulose During Acetylation in the Dimethylacetamide-Paraformaldehyde System. <i>M. Terbojevich, A. Cosani, C. Carraro and R. Leoni (Italy)</i>	351
Thermal Behavior of Amylose-Lipid Complexes. <i>C. G. Biliaderis, C. M. Page, L. Slade and R. R. Sirett (Canada)</i>	367
Summaries of UK Patent Applications	391
Book Review	397

Number 6

An HPLC Method for the Determination of Acetyl and Pyruvyl Groups in Polysaccharides. <i>Norman W. H. Cheetham and Acharaporn Punruckvong (Australia)</i>	399
Optical Rotation Behavior of Xathan in Mixtures of Water and Cadoxen. <i>Hiroko Kitagawa, Takahiro Sato, Takashi Norisuye and Hiroshi Fujita (Japan)</i>	407
Molecular Weight Distribution of Carrageenans by Size Exclusion Chromatography and Low Angle Laser Light Scattering. <i>D. Lecaheux, R. Panaras, G. Brigand and G. Martin (France)</i>	423
Heterogeneity in Branching of Amylopectin. <i>Angelika Thurn and Walther Burchard (Federal Republic of Germany)</i>	441
Determination of the Degree of Acetylation of Chitosans by First Derivative Ultraviolet Spectrophotometry. <i>Riccardo A. A. Muzzarelli and Roberto Rocchetti (Italy)</i>	461
Research Note	
Radiation Effects on the Biological Activity and Molecular Weight Parameters of Heparin. <i>H. E. Edwards, A. R. Menzies, G. O. Phillips (Wales), Y. Nakamura, M. Shimada and S. Takigami (Japan)</i>	473
