

CARBOHYDRATE RESEARCH, VOL. 134 (1984)

SUBJECT INDEX

- 2-Acetamido-*N*-(*L*-aspart-4-oyl)-2-deoxy- β -D-glucopyranosylamine residue, behavior during hydrazinolysis of, 177
- Acetoacetic esters, reactions of, with sugar nitroalkenes, 75
- Adsorption of bovine blood proteins onto the surface of *O*-(carboxymethyl)chitin, 305
- Alkenes, nitro-, from sugars, reactions of, with acetoacetic esters, 75
- Alkenes, nitro-, from sugars, reactions of, with 3-aminocrotonic esters, 63
- Amylose, estimation of the distribution of molecular weight for, using the low-angle laser-light-scattering technique combined with high-performance gel chromatography, 1
- 5,6-Anhydro-*L*-ascorbic acid, intermediate in the formation of 6-substituted derivatives of *L*-ascorbic acid, 321
- D,L-Arabinitol, formation in the formose reaction, c4
- Arabinogalactan from *Larix sibirica L.*, chemical and ^{13}C -n.m.r. studies of an, 265
- 1-Arabinitol, 1,5-anhydro-, selective benzylation of, 167
- L*-Arabino-D-galactan glycoproteins from radish leaves, 215
- DL-Arabinose, 2,3:4,5-di-*O*-isopropylidene-, diethyl dithioacetal, crystalline, 205
- Arabinose, some reactions of acetal derivatives of, 205
- L*-Ascorbic acid, 5,6-anhydro-, intermediate in the formation of 6-substituted derivatives of *L*-ascorbic acid, 321
- L*-Ascorbic acid, 6-substituted derivatives, synthesis via 5,6-anhydro-*L*-ascorbic acid of, 321
- Asparagine, glyco-, behavior of the 2-acetamido-2-deoxy- β -D-glucopyranosyl residue during hydrazinolysis of, 177
- Autoxidation of monosaccharides catalysed by buffer ions, production of free radicals during the, 191
- Biochemical Engineering, and Biotechnology, Handbook of (*book review*), c18
- (+)-Biotin, a modified synthesis from D-glucose of, 332
- Carbohydrate moieties of human Tamm-Horsfall glycoprotein, structural analysis of, 141
- Carbohydrate molecules in solution using an unmodified high-resolution n.m.r. spectrometer, measurement of self-diffusion coefficients of, c1
- Carrageenan, lyotropic effects of simple anions on the conformation and interactions of kappa-, 89
- Chemical and ^{13}C -n.m.r. studies of an arabinogalactan from *Larix sibirica L.*, 265
- Chitin, adsorption of bovine blood proteins onto the surface of *O*-(carboxymethyl), 305
- Conformation and interactions of kappa-carrageenan, lyotropic effects of simple anions on the, 89
- Cordyceps ophioglossoides*, structure of a galactosaminoglycan from, 275
- Crystalline 2,3:4,5-di-*O*-isopropylidene-DL-arabinose diethyl dithioacetal: some reactions of acetal derivatives of arabinose, 205
- Crystal structure and conformation of 3-*O*-(6-*O*-acetyl-2,3-anhydro-4-deoxy- α -*L*-ribo-hexopyranosyl)-1,2:5,6-di-*O*-isopropylidene- α -D-glucofuranose, 11
- 3-Deoxy-D-manno-2-octulosonic acid, spectroscopic analysis of a disaccharide from the lipopolysaccharide of a *Salmonella godesberg* Remutant containing, 157
- 1-Deoxy-3-*C*-methyl-D-fructose and -D-sorbose, synthesis of, 39
- 1-Deoxy-3-*C*-methyl-D-psicose, a new synthesis of, 327
- E. coli* O4, structural studies of the O-antigen polysaccharide of, 283
- Enzymes, Microbial, and Biotechnology (*book review*), c20
- Estimation of the distribution of molecular weight for amylose by the low-angle laser-light-scattering technique combined with high-performance gel chromatography, 1
- Formose reaction, formation of D,L-arabinitol in the, c4
- Free-radical production during the autoxidation of monosaccharides catalysed by buffer ions, 191
- D-Fructose and D-sorbose, synthesis of the 1-deoxy-3-*C*-methyl derivatives of, 39

- D-Fructosyltransferases, extracellular, from *Streptococcus mutans* serotypes *c*, *e*, and *f*, 293
- F.t.i.r. and laser-Raman spectra of thymine and thymidine, 23
- D-Galactan glycoproteins, L-arabino-, from radish leaves, 215
- Galactomannan-like oligosaccharides from the endosperm of the seed of *Gleditsia triacanthos*, 115
- Galactosaminoglycan from *Cordyceps ophioglossoides*, structure of *a*, 275
- D-Glucofuranose, synthesis, crystal structure, and conformation of 3-*O*-(6-*O*-acetyl-2,3-anhydro-4-deoxy- α -L-ribo-hexopyranosyl)-1,2:5,6-di-*O*-isopropylidene- α -D-, 11
- D-Glucopyranosylamine residue, 2-acetamido-1-*N*-(L-aspart-4-oyl)-2-deoxy-, behavior during hydrazinolysis of, 177
- Glucosyltransferase complex of *Streptococcus mutans* 6715, specific and non-specific affinities of the extracellular, 245
- D-Glucosyltransferases, extracellular, from *Streptococcus mutans* serotypes *c*, *e*, and *f*, 293
- Glycosaminoglycans, of Body Fluids, in Health and Disease (*book review*), c16
- Glycoasparagines, behavior of the 2-acetamido-2-deoxy- β -D-glucopyranosyl residue during hydrazinolysis of, 177
- Handbook, of Biochemical Engineering and Biotechnology (*book review*), c18
- α -D-erythro-Hex-2-enopyranoside, 4,6-di-*O*-acetyl-2,3-dideoxy-, 4,6-di-*O*-acetyl-2,3-dideoxy- α -D-erythro-hex-2-enopyranosyl, the preparation and oxyamination of, 49
- High-resolution n.m.r. spectrometer, measurement of self-diffusion coefficients of carbohydrate molecules in solution using an, c1
- Human serum transcortin and thyroxine-binding globulin, pregnancy-associated molecular variants of, 133
- Hydrogenolysis of some methyl 4,6-*O*-benzylidene- α -D-mannopyranoside derivatives: unambiguous synthesis of the 2,4- and 3,4-dimethyl ethers of methyl α -D-mannopyranoside, 172
- 3-Hydroxybutanoic acid as a component of the acidic extracellular polysaccharide of *Rhizobium trifolii* 0403, identification of, c7
- Identification of 3-hydroxybutanoic acid as a component of the acidic extracellular polysaccharide of *Rhizobium trifolii* 0403, c7
- KDO, spectroscopic analysis of a disaccharide from the lipopolysaccharide of a *Salmonella godesberg* Remutant containing, 157
- Larix sibirica* L., chemical and ^{13}C -n.m.r. studies of an arabinogalactan from, 265
- Lyotropic effects of simple anions on the conformation and interactions of kappa-carrageenan, 89
- α -D-Mannopyranoside, α -D-mannopyranosyl, synthesis of two new diamino derivatives of, 49
- α -D-Mannopyranoside, methyl 4,6-*O*-benzylidene-, hydrogenolysis of some derivatives of, 172
- α -D-Mannopyranoside, methyl, unambiguous synthesis of the 2,4- and 3,4-dimethyl ethers of, 172
- α -D-Mannopyranoside, *p*-nitrophenyl 2-*O*- and 3-*O*- α -D-mannopyranosyl, 83
- Measurement of self-diffusion coefficients of carbohydrate molecules in solution using an unmodified high-resolution n.m.r. spectrometer, c1
- Modified synthesis of (+)-biotin from D-glucose, 332
- Molecular variants of human serum transcortin and thyroxine-binding globulin, pregnancy-associated, 133
- Molecular weight distribution for amylose, use of the low-angle laser-light-scattering technique combined with high-performance gel chromatography for estimation of the, 1
- Microbial Enzymes, and Biotechnology (*book review*), c20
- Mucopolysaccharides, of Body Fluids, in Health and Disease (*book review*), c16
- Neisseria meningitidis*, rate, mechanism, and immunochemical studies of lactonisation in serogroup B and C polysaccharides, 229
- p*-Nitrophenyl 2- and 3-*O*- α -D-mannopyranosyl- α -D-mannopyranoside, 83
- Oligosaccharides, the galactomannan-like, from the endosperm of the seed of *Gleditsia triacanthos*, 115
- Polysaccharide, capsular, of *Klebsiella* serotype K80, structural investigation of the, 103
- Polysaccharide of *E. coli* O4, structural studies of the O-antigen, 283
- Polysaccharides of *Neisseria meningitidis*, rate, mechanism, and immunochemical studies of lactonisation in serogroup B and C, 229
- Polysaccharides, the, Volume 2 (*book review*), c13
- Pregnancy-associated molecular variants of human serum transcortin and thyroxine-binding globulin, 133

- Preparation and oxyamination of 4,6-di-*O*-acetyl-2,3-dideoxy- α -D-*erythro*-hex-2-enopyranosyl-4,6-di-*O*-acetyl-2,3-dideoxy- α -D-*erythro*-hex-2-enopyranoside. Synthesis of two new diamino derivatives of α -D-mannopyranosyl α -D-mannopyranoside, 49
- Production of free radicals during the autoxidation of monosaccharides catalysed by buffer ions, 191
- Proteins onto the surface of *O*-(carboxymethyl)chitin, adsorption of bovine blood, 305
- Psicose, a new synthesis of 1-deoxy-3-*C*-methyl-D-, 327
- Radish leaves, L-arabino-D-galactan-containing glycoproteins from, 215
- Rate, mechanism, and immunochemical studies of lactonisation in serogroup B and C polysaccharides of *Neisseria meningitidis*, 229
- Reactions of sugar nitro-alkenes with acetoacetic esters, 75
- Reactions of sugar nitro-alkenes with 3-amino-crotonic esters, 63
- Reaction trifolii* 0403, identification of 3-hydroxybutanoic acid as a component of the acidic extracellular polysaccharide of, C7
- Salmonella godesberg* Remutant lipopolysaccharide, spectroscopic analysis of a disaccharide containing KDO from, 157
- Selective benzoylation of 1,5-anhydro-L-arabinitol, 167
- Specific and non-specific affinities of the extracellular glucosyltransferase complex of *Streptococcus mutans* 6715, 245
- Streptococcus mutans*, serotypes *c*, *e*, and *f*, extracellular D-glucosyl- and D-fructosyl-transferases from, 293
- Streptococcus mutans* 6715, specific and non-specific affinities of the extracellular glucosyltransferase complex of, 245
- Structural analysis of the carbohydrate moieties of human Tamm-Horsfall glycoprotein, 141
- Structural investigation of the capsular polysaccharide of *Klebsiella* serotype K80, 103
- Structural studies of the O-antigen polysaccharide of *E. coli* O4, 283
- Structure of a galactosaminoglycan from *Cordyceps ophioglossoides*, 275
- Sucrose dithiocarbamates, synthesis of, 313
- Sucrose dithiocarbonates, synthesis of, 313
- Synthesis, crystal structure, and conformation of 3-*O*-(6-*O*-acetyl-2,3-anhydro-4-deoxy- α -L-ribohexopyranosyl)-1,2:5,6-di-*O*-isopropylidene- α -D-glucofuranose, 11
- Synthesis of (+)-biotin from D-glucose, a modified, 332
- Synthesis of 1-deoxy-3-*C*-methyl-D-fructose and 1-deoxy-3-*C*-methyl-D-sorbose, 39
- Synthesis of 1-deoxy-3-*C*-methyl-D-psicose, a new, 327
- Tamm-Horsfall glycoprotein, structural analysis of the carbohydrate moieties of human, 141
- The Polysaccharides, Volume 2 (*book review*), C13
- Thiocarbamoyl derivatives of sucrose, synthesis of, 313
- Thiocarbonyl derivatives of sucrose, synthesis of, 313
- Thymidine, F.t.-i.r. and laser-Raman spectra of, 23
- Thymine, F.t.-i.r. and laser-Raman spectra of, 23
