

CARBOHYDRATE RESEARCH, VOL. 153 (1986)

SUBJECT INDEX

- 2-Acetamido-2-deoxy-D-galactopyranosyl group, α -D-galactopyranosyl-(1 \rightarrow 3)-, in carcinoma cells, 87
- Actions of *A. oryzae* alpha-amylase and some phosphorylases on phosphorylated (1 \rightarrow 4)- α -D-glucan, 295
- Adriamycin analogues. Preparation of 7-O-(D-ribofuranosyl)-daunomycinone and -adriamycinone, 171
- Aldoses, general methods for enriching with oxygen isotopes, 253
- Aldoses, C-1-C-2 rearrangement and 2-epimerization of, by paramolybdate anion-exchange resin as an improved catalyst for, 263
- 2-Amino-2-deoxyarabinose hydrochloride, synthesis of, 150
- Amino sugars in polysaccharide hydrolysates, a thin-layer chromatographic method for analyses of, 132
- Amylopectin: a study using analytical ultracentrifugation, the size and shape of, 195
- Analysis of the depolymerization of (1 \rightarrow 4)- β -D-mannuronan by an extracellular alginate lyase from a marine bacterium, liquid chromatographic, 181
- Benzoxazole 2- β -D-ribofuranosyl-, from 2,5-anhydro-D-allonoimidate, 271
- Biosynthesis of D-glucaric acid in mammals: a free-radical mechanism?, 119
- Branched cyclodextrins, isolation and characterization of, 55
- Carcinoma cells, α -D-galactopyranosyl group in glycoproteins of, 87
- Cellulose acetate and O-methylcellulose: occurrence of crosslinking, triflates of, c1
- Characterisation of the phenylhydrazone derivatives of "glycated albumin" purified from diabetic sera, 314
- Chrysolaminaran from the ice diatom *Stauroneis amphioxys* (Gregory), structural studies of, 330
- Crosslinking, triflates of cellulose acetate and O-methylcellulose: occurrence of, c1
- Crystal and molecular structure of α -laminaribiose octa-acetate, 205
- Crystal structure of isopropyl 1-thio- β -D-galactopyranoside monohydrate at 123 K, 217
- Cyclodextrins, isolation and characterization of branched, 55
- Cyclohexanetetrol, synthesis of (1,2,3,4,5/0)-5-hydroxymethyl-1,2,3,4-, 25
- Daunomycinone and -adriamycinone, adriamycin analogues. Preparation of 7-O-(D-ribofuranosyl)-, 171
- O-Deacylation of polyacylated sugars, regioselective heterogeneous, 162
- Decitols, synthesis of some, via the epoxide route, c7
- Dehydro-L-ascorbic acid analogues, reaction of O-phenylenediamine with, 146
- 2-Deoxy-2-fluoro-D-glucose, synthesis of, 168
- 2-Deoxy-2-[18 F]fluoro-D-glucose and -D-mannose, synthesis of, 141
- N-(1-Deoxyhexitol-1-yl) amino acids by h.p.l.c., non-enzymatic glycation of proteins: analysis of, 285
- 3,6-Di-O-benzoyl-2,4-dideoxy-D-threo-hexopyranose, synthesis of, and selective benzoylation of 2-deoxy-D-arabino-hexose, 325
- 1,4-Dideoxy-1,4-imino-D-glucitol, synthesis of, a glucosidase inhibitor, 45
- Efficient chemical synthesis of methyl β -glycosides of β -(1 \rightarrow 6)-linked D-galacto-oligosaccharides by a stepwise and a blockwise approach, 237
- Epoxide route, synthesis of some decitols via the, c7
- Extended core-region of the saccharide moiety of N-linked glycoproteins, synthesis of a tetrasaccharide of the, 155
- Fluorination of glycals in water, 17
- 2-[18 F]Fluoro-D-glucose and -D-mannose, 2-deoxy-, synthesis of, 141
- 2-Fluoro-D-glucose, 2-deoxy-, synthesis of, 168
- 2-Fluorohexoses, 2-deoxy-, synthesis by fluorination of glycals in water of, 17
- Free-radical mechanism for the biosynthesis of D-glucaric acid in mammals, 119
- D-Galacto-D-mannan of seeds of *Melilotus indica* All, structure, 69
- Galactomannan from the seeds of *Teramnus labialis*, structure of a water-soluble, 334
- D-Galacto-oligosaccharides by a stepwise and blockwise approach, efficient chemical synthesis of methyl β -glycosides of (1 \rightarrow 6)- β -linked, 237

- β -D-Galactopyranoside, isopropyl 1-thio-, monohydrate, the crystal structure of, at 123 K, 217
- α -D-Galactopyranosyl-(1 \rightarrow 3)-2-acetamido-2-deoxy-D-galactopyranosyl group in carcinoma cells, 87
- General methods for enriching aldoses with oxygen isotopes, 253
- D-Glucal, 3,4,6-tri-O-acetyl, fluorination in water of, 141
- (1 \rightarrow 4)- α -D-Glucan, actions of *A. oryzae* alpha-amylase and some phosphorylases on phosphorylated, 295
- D-Glucuronic acid biosynthesis in mammals, a free-radical mechanism for, 119
- Glucodisaccharides, the scope and limitations of the SIMPLE ^{13}C -n.m.r. method of structural analysis of, 1
- D-Glucose, 2-deoxy-2-fluoro, synthesis of, 168
- Glucosidase inhibitor, synthesis of 1,4-dideoxy-1,4-imino-D-glucitol, a, 45
- Glycals, fluorination in water of, 17
- "Glycated albumin" purified from diabetic sera, characterisation of the phenylhydrazone derivatives of, 314
- Glycation of proteins: analysis of *N*-(1-deoxyhexitol-1-yl) amino acids by h.p.l.c., non-enzymatic, 285
- Glycosylaminothiazoles, synthesis of, 318
- D-*arabino*-Hex-1-enitol, 3,4,6-tri-O-acetyl-1,5-anhydro-2-deoxy-, fluorination in water of, 141
- Ice diatom *Stauroneis amphioxys* (Gregory), structural studies of chrysolaminaran from the, 300
- Interconversion rates of tautomers of 3-deoxy-D-manno-octulosonic acid (KDO) from a quantitative analysis of two dimensional n.m.r. exchange data, 136
- Isolation and characterization of branched cyclodextrins, 55
- 2-Ketoaldonic acids, the selective oxidation of aldoses and aldonic acids to, using lead-modified platinum-on-carbon catalysts, 227
- Kiwifruit (*Actinidia deliciosa*), structure of neutral oligosaccharides obtained from the stem-pith mucilage of, 107
- Kiwifruit (*Actinidia deliciosa*), structure of the inner core of the mucilage from the stem-pith of, 97
- α -Laminaribiose octa-acetate, the crystal and molecular structure of, 205
- Lead-modified platinum-on-carbon catalysts, the selective oxidation of aldoses and aldonic acids to 2-ketoaldonic acids with, 227
- N*-Linked glycoproteins, synthesis of a tetrasaccharide of the extended core-region of the saccharide moiety of, 155
- Liquid-chromatographic analysis of the depolymerization of (1 \rightarrow 4)- β -D-mannuronan by an extracellular alginate lyase from a marine bacterium, 181
- D-Mannan, D-galacto-, of seeds of *Melilotus indica* All, structure of, 69
- Mannuronan by an extracellular alginate lyase from a marine bacterium, liquid chromatographic analysis of the depolymerization of (1 \rightarrow 4)- β -D-, 181
- Melilotus indica* All, structure of D-galacto-D-mannan of seeds of, 69
- 2-Methyl-2-propanethiol, reaction of xylo-pentodialdo-1,4-furanose and, 308
- Mucilage from the stem pith of kiwifruit (*Actinidia deliciosa*), structure of the inner core of the, 97
- Mucilage of kiwifruit (*Actinidia deliciosa*), structure of neutral oligosaccharides obtained from the stem-pith, 107
- ^{13}C -N.m.r. method of structural analysis of glucodisaccharides, the scope and limitations of the SIMPLE, 1
- Observations on the structure of the fungal extracellular polysaccharide pullulan, 79
- Octulosonic acid, 3-deoxy-D-manno-, interconversion rates of tautomers of, from a quantitative analysis of two-dimensional n.m.r. exchange rate, 136
- Paramolybdate anion-exchange resin; an improved catalyst for the C-1-C-2 rearrangement and 2-epimerization of aldoses, 263
- xylo-Pentodialdo-1,4-furanose, reaction of 2-methyl-2-propanethiol and, 308
- o*-Phenylenediamine, reaction of dehydro-L-ascorbic acid analogues with, 146
- Phenylhydrazone derivatives of "glycated albumin" purified from diabetic sera, characterisation of the, 314
- Phosphorylated (1 \rightarrow 4)- α -D-glucan, actions of *A. oryzae* alpha-amylase and some phosphorylases on, 295
- Polyacylated sugars, regioselective heterogeneous O-deacylation of, 162
- Polysaccharide hydrolysates, a thin-layer chromatographic method for analyses of amino sugars in, 132
- Proteins: analysis of *N*-(1-deoxyhexitol-1-yl) amino acids by h.p.l.c. Non-enzymatic glycanin of, 285
- Pseudo- β -DL-talopyranose, synthesis of, 25

- Pullulan, observations on the structure of, 79
- Pyrazole, the structure and properties of the products of reaction between 3,4,6-tri-*O*-acetyl-2-deoxy-2-nitroso- α -D-galactopyranosyl chloride and, 33
- Reaction of dehydro-L-ascorbic acid analogues with *o*-phenylenediamine, 146
- Reaction of xylor-pentodialdo-1,4-furanose and 2-methyl-2-propanethiol, 308
- Regioselective heterogeneous *O*-deacylation of polyacylated sugars, 162
- Resin, paramolybdate anion-exchange, an improved catalyst for the C-1-C-2 rearrangement and 2-epimerization of aldoses, 263
- 2- β -D-Ribofuranosylbenzoxazole from 2,5-anhydro-D-allonoimide, and 1,3-dimethyl-8- β -D-ribofuranosylxanthine from 2,5-anhydro-D-allono-thioimides and -dithioates, 271
- Scope and limitations of the SIMPLE ^{13}C -n.m.r. method of structural analysis of carbohydrates: glucodisaccharides, 1
- Selective benzylation of 2-deoxy-D-*arabino*-hexose and synthesis of 3,6-di-*O*-benzoyl-2,4-dideoxy-D-*threo*-hexopyranose, 325
- Selective oxidation of aldoses and aldonic acids to 2-ketoaldonic acids with lead-modified platinum-on-carbon catalysts, 227
- Size and shape of amylopectin: a study using analytical ultracentrifugation, 195
- Structural studies of chrysolaminaran from the ice diatom *Stauroneis amphioxys* (Gregory), 330
- Structure and properties of the products of reaction between 3,4,6-tri-*O*-acetyl-2-deoxy-2-nitroso- α -D-galactopyranosyl chloride and pyrazole, 33
- Structure of a water-soluble galactomannan from the seeds of *Teramnus labialis*, 334
- Structure of α -laminaribiose octa-acetate, the crystal and molecular, 205
- Structure of neutral oligosaccharides obtained from the stem-pith mucilage of kiwifruit (*Actinidia deliciosa*), 107
- Structure of pullulan, observations on the, 79
- Structure of the inner core of the mucilage from the stem pith of kiwifruit (*Actinidia deliciosa*), 97
- Synthesis of a tetrasaccharide of the extended core-region of the saccharide moiety of *N*-linked glycoproteins, 155
- Synthesis of 2-amino-2-deoxyarabinose hydrochloride, 150
- Synthesis of 3,6-di-*O*-benzoyl-2,4-dideoxy-D-*threo*-hexopyranose and selective benzylation of 2-deoxy-D-*arabino*-hexose, 325
- Synthesis of 1,4-dideoxy-1,4-imino-D-glucitol, a glucosidase inhibitor, 45
- Synthesis of glycosylaminothiazoles, 318
- Synthesis of (1,2,3,4,5/0)-5-hydroxymethyl-1,2,3,4-cyclohexanetetrol (pseudo- β -DL-talopyranose), 25
- Synthesis of methyl β -glycosides of β -(1 \rightarrow 6)-linked D-galacto-oligosaccharides by a stepwise and a blockwise approach, efficient chemical, 237
- Synthesis of some decitols *via* the epoxide route, c7
- Teramnus labialis*, structure of a water-soluble galactomannan from the seeds of, 334
- The Chemist's English (*book review*), c1
- Thin-layer chromatographic method for analyses of amino sugars in polysaccharide hydrolysates, 132
- 3,4,6-Tri-*O*-acetyl-2-deoxy-2-nitroso- α -D-galactopyranosyl chloride and pyrazole, structure and properties of the products of reaction between, 33
- Triflates of cellulose acetate and *O*-methyl-cellulose: occurrence of crosslinking, c1
- Ultracentrifugation, the size and shape of amylopectin: a study using analytical, 195
- Xanthine, 1,3-dimethyl-8- β -D-ribofuranosyl-, from 2,5-anhydro-D-allono-thioimides and -dithioates, 271
