

CARBOHYDRATE RESEARCH, VOL. 154 (1986)

SUBJECT INDEX

- Acacia erioloba* exudate, glycosylated hydroxyproline derivatives from, 289
- Acetylation pattern in some bacterial alginates, monomer sequence and, 239
- A comparison of bis(tributyltin) oxide, potassium cyanide, and potassium hydroxide as reagents for the regioselective 1-*O*-deacetylation of fully acetylated sugars, 165
- Acylated glycosylamines and their transformations into glycosyl isothiocyanates and *N,N'*-diglycosylthiureas, a new method for the preparation of, 280
- Aldobiuronic and aldotriuronic acid derivatives, n.m.r. spectra of, 251
- Aldohexopyranosyl cyanides, per-*O*-acetylated, improved preparations of some, 145
- Alginates, monomer sequence and acetylation pattern in some bacterial, 239
- 2-Alkyl(aryl)amino-(1,2-dideoxy- α -D-glucopyranosyl)[2,1-*d*]-2-thiazolines, synthesis of, 49
- 2-Amino-2-deoxy- α -D-glucopyranosyl end-groups, preparation from heparin of trisaccharides having, 217
- Amylodextrins and amylose polymorphs, high-resolution c.p.-m.a.s. ^{13}C -n.m.r. spectra of solid, 1
- 3,4-Anhydro-1-deoxy-3-*C*-methyl-D-hexulose derivatives, synthesis of, 71
- Benzylidene acetals, catalytic-transfer hydrogenolysis of, with palladium-carbon and ammonium formate of hydrazine hydrate, 296
- Bis(tributyltin) oxide, potassium cyanide, and potassium hydroxide, a comparison of, as reagents for the regioselective 1-*O*-deacetylation of fully acetylated sugars, 165
- Branched cyclomalto-oligosaccharides using *Pseudomonas* isoamylase, synthesis of, 81
- Catalytic-transfer hydrogenolysis of benzylidene acetals with palladium-carbon and ammonium formate or hydrazine hydrate, 296
- 5,6-Cellulosene, facile preparation of deoxyiodocellulose and its conversion into, 63
- Cyanides, per-*O*-acetylated aldohexopyranosyl, improved preparations of some, 145
- Cyclomalto-oligosaccharides, synthesis of branched, using *Pseudomonas* isoamylase, 81
- 1-*O*-Deacetylation, regioselective, of fully acetylated sugars, 165
- Deoxyfluoro-D-glucopyranosyl phosphates, the synthesis and hydrolysis of a series of, 127
- Deoxyiodocellulose and its conversion into 5,6-cellulosene; facile preparation of, 63
- 3-Deoxysucrose, 3-deoxy-3-fluorosucrose, and α -D-allopyranosyl- β -D-fructofuranoside, inhibition- and acceptor-reaction studies of *Streptococcus mutans* 6715 glucosyltransferases with, 229
- Displacement of "pseudoanomeric" hydroxyl groups by using the diethyl azodicarboxylate-triphenylphosphine system, 115
- Effects of some oxidising agents, especially ammonium peroxysulphate, on sugar-beet pectins, 205
- 3,4-Enediols, evidence for the involvement of, in the hydroxide-catalyzed isomerization of D-[1- ^{13}C]mannose, 29
- Enzymic and chemical degradation and the fine structure of pectins from sugar-beet pulp, 189
- Epimerization at C-2 during the Wittig reaction of 2,3,5-tri-*O*-benzyl-D-ribose and methylidenetriphenylphosphorane, 270
- Facile preparation of deoxyiodocellulose and its conversion into 5,6-cellulosene, 63
- Feruloylated pectic substances from sugar-beet pulp, 177
- Fine structure of pectins from sugar-beet pulp, enzymic and chemical degradation and the, 189
- Formation and polymerisation of malonaldehyde during irradiation of aqueous solutions of D-glucose and lactose with ultrasound, 37
- Glucosyltransferases with 3-deoxysucrose, 3-deoxy-3-fluorosucrose, and α -D-allopyranosyl- β -D-fructofuranoside, inhibition- and acceptor-reaction studies of *Streptococcus mutans* 6715, 229
- D-Glucurono-D-xylans, 4-*O*-methyl, n.m.r. spectra of, 251
- Glycosylated hydroxyproline derivatives from *Acacia erioloba* exudate, 289
- Glycosyl isothiocyanates and *N,N'*-diglycosylthiureas, a new method for the preparation of

- acylated glycosylamines and their transformations into, 280
- Heparin, n.m.r. studies of oligosaccharides obtained by degradation with nitrous acid of bovine lung, 15
- Heparin trisaccharides with 2-amino-2-deoxy-D-glucopyranosyl end-groups, preparation of, 217
- Hexoses, 3,6-dideoxy-3-(methylamino)-, synthesis of, for g.l.c.-m.s. identification of *Rhizobium* lipopolysaccharide components, 103
- High-resolution, c.p.-m.a.s., ^{13}C -n.m.r. spectra of solid amyloextrins and amylose polymorphs, 1
- Hydrogenolysis, catalytic-transfer, of benzylidene acetals with palladium-carbon and ammonium formate or hydrazine hydrate, 296
- Hydroxide-catalyzed isomerization of D-[1- ^{13}C]mannose: evidence for the involvement of 3,4-enediols, 29
- Hydroxyl groups, "pseudoanomeric", displacement of, by using the diethyl azodicarboxylate-triphenylphosphine system, 115
- Hydroxyproline derivatives from *Acacia erioloba* exudate, glycosylated, 289
- Improved preparations of some per-*O*-acetylated aldohexopyranosyl cyanides, 145
- Inhibition- and acceptor-reaction studies of *Streptococcus mutans* 6715 glucosyltransferases with 3-deoxysucrose, 3-deoxy-3-fluorosucrose, and α -D-allopyranosyl- β -D-fructofuranoside, 229
- Interaction of *Vicia faba* lectin with methyl α -D-mannopyranoside, investigated by ultraviolet difference spectroscopy, 259
- Lactose and 3,2'-difucosyl-lactose, synthesis of 3- and 2'-fucosyl-, from partially benzylated lactose derivatives, 93
- Lectin with methyl α -D-mannopyranoside, investigated by ultraviolet difference spectroscopy, interaction of *Vicia faba*, 259
- Malonaldehyde, formation and polymerisation of, during irradiation of aqueous solutions of D-glucose and lactose with ultrasound, 37
- D-[1- ^{13}C]Mannose, hydroxide-catalyzed isomerization of, 29
- Method for the preparation of acylated glycosylamines and their transformations into glycosyl isothiocyanates and *N,N'*-diglycosylthioureas, a new, 280
- 3-*C*-Methyl-D-hexulose derivatives, synthesis of 3,4-anhydro-1-deoxy-, 71
- Methyl α -D-mannopyranoside, partial tosylation of, 305
- Monomer sequence and acetylation pattern in some bacterial alginates, 239
- Nitric acid, oxidation of xyloisosaccharinic acid by, 301
- N.m.r. studies of oligosaccharides obtained by degradation of bovine lung heparin with nitrous acid, 15
- Novel 2,6-anhydro- β -D-hexopyranosyl fluorides via DAST fluorination of 1,6-anhydro- β -D-hexopyranoses, 275
- Oligosaccharides obtained by degradation of bovine lung heparin with nitrous acid, n.m.r. studies of, 15
- Oxidation of xyloisosaccharinic acid by nitric acid, 301
- Oxidising agents (especially ammonium persulphate), the effects on sugar-beet pectins of some, 205
- Partially benzylated lactose derivatives, synthesis of 3- and 2'-fucosyl-lactose and 3,2'-difucosyl-lactose from, 93
- Partial tosylation of methyl α -D-mannopyranoside, 305
- Pectic substances from sugar-beet pulp, feruloylated, 177
- Pectins from sugar-beet pulp, enzymic and chemical degradation and the fine structure of, 189
- Pectins, the effect of some oxidising agents (especially ammonium peroxydisulphate) on sugar-beet, 205
- Regioselective formation of terminal 1,3-dioxolanes from 1-*C*-substituted-D-erythro-glycerols, 265
- Ribose and methylidenetriphenylphosphorane, epimerization at C-2 during the Wittig reaction of 2,3,5-tri-*O*-benzyl-D-, 270
- 1-*C*-Substituted-D-erythro-glycerols, regioselective formation of terminal 1,3-dioxolanes from, 265
- Sugar-beet pulp, feruloylated pectic substances from, 177
- Synthesis of 3- and 2'-fucosyl-lactose and 3,2'-difucosyl-lactose from partially benzylated lactose derivatives, 93
- Synthesis of 3,4-anhydro-1-deoxy-3-*C*-methyl-D-hexulose derivatives, 71
- Synthesis of branched cyclomalto-oligosaccharides using *Pseudomonas* isoamylase, 81
- Synthesis of 3,6-dideoxy-3-(methylamino)hexoses for g.l.c.-m.s. identification of *Rhizobium* lipopolysaccharide components, 103
- Synthesis of 1,3,4,6-tetra-*O*-acetyl-2-[3-alkyl(aryl)thioureido]-2-deoxy- α -D-glucopyranoses and their transformation into 2-alkyl(aryl)-amino-(1,2-dideoxy- α -D-glucopyranosyl)[2,1-*d*]-2-thiazolines, 49

- Terminal 1,3-dioxolanes from 1-C-substituted-D-*erythro*-glycerols, regioselective formation of, 265
- Tetra-*O*-acetyl-2-[3-alkyl(aryl)thioureido]-2-deoxy- α -D-glucopyranoses, synthesis of 1,3,4,6-, and transformation into 2-alkyl(aryl)amino-(1,2-dideoxy - α - D - glucopyrano)[2,1 - *d*] - 2 - thiazolines, 49
- The polysaccharides, volume 3 (*book review*), c1
- The synthesis and hydrolysis of a series of deoxyfluoro-D-glucopyranosyl phosphates, 127
- Tosylation of methyl α -D-mannopyranoside, partial, 305
- Trisaccharides with nonreducing 2-amino-2-deoxy- α -D-glucopyranosyl end-groups, preparation from heparin of, 217
- Ultrasound irradiation of aqueous solutions of D-glucose and lactose, formation and polymerisation of malonaldehyde during, 37
- Ultraviolet difference spectroscopy, interaction of *Vicia faba* lectin with methyl α -D-mannopyranoside, investigated by, 259
- Wittig reaction of 2,3,5-tri-*O*-benzyl-D-ribose and methylenetriphenylphosphorane, epimerization at C-2 during the, 270
- D-Xylans, 4-*O*-methyl-D-glucurono-, n.m.r. spectra of, 251
- Xyloisosaccharinic acid, oxidation of, by nitric acid, 301
