Symposium on Glycobiology

The 1989 UCLA Symposium Series will include a meeting on Glycobiology, organized by Ernest Jaworski and Joseph Welply. The symposium will be held at Frisco, Colorado, U.S.A., January 14–20, 1989. Topics to be discussed include: glycoprotein synthesis and routing; lectins and oligosaccharide receptors; glycosylation and biological activity; future applications of glycosylation in biotechnology; new approaches in glycobiology; glycoproteins in cell-cell recognition; proteoglycans and glycoproteins in cellular adhesion; glycoproteins/glycolipids in host-parasite, host-bacterial, or host-virus interactions and glycoproteins in disease. Requests for information should be addressed to: UCLA Symposia, 103 Molecular Biology Institute, Los Angeles, CA 90024-1378, U.S.A. Telephone: (213) 206-6292.
