GERLI 1993 Meeting on Glycolipids: Function and Pathology

The 1993 GERLI Meeting on Glycolipids will be held in Strasbourg on September 3 to 4. The symposium will consist of oral presentations and a poster session.

Topics will include:

- (1) Glycolipids as cellular markers and recognition molecules.
- (2) Glycolipids in cellular differentiation and signalling.
- (3) Glycolipids and pathology: cancer and auto-immunity, genetic diseases, neuro-immunological aspects.

For further information, please contact:

Dr. Henry Dreyfus, Clinique Ophtalmologique-Laboratoire Laveran-CHRU, 1 place the l'Hopital, BP 426, F-67091 Strasbourg Cédex, France. Tél. (33) 88 243313; Fax (33) 88 243314.

1993 Cereal Prize

The Cereal Prize, which is awarded annually by the French Cereal Organisations, rewards research results that show significant innovation in the non-food-stuff use of cereals or their co-products. The Prize (total grant of 15,000 ecus to be distributed amongst three prize-winners) will be awarded to young scientists (less than 35 years of age) from public research laboratories and institutions of higher education in the European Community.

The Prize is aimed at activities upstream of the cereal sector (varietal, phytosanitary, even cultural improvements) as well as activities downstream of this same sector – namely, new applications, insofar as the improvements and developments made are truly original, interesting with respect to the environment, offer, in the long term, perspectives for real markets, and are specifically intended for non-alimentary industrial application.

Further information and the rules for the Prize may be obtained from UNI-GRAINS, Secrétariat des Prix, 8, Avenue du Président Wilson, F-75116 Paris, France; Tel: (1) 44 31 10 40; FAX: (1) 44 31 10 46. (**Closing date: 15 June 1993.**)
