

## Subject Index of Volume 315

### Absorption spectroscopy

Amylose–dye complexes in cationic micelles: an optical spectroscopy study 35

### 5-Acetamido-2,6-anhydro-3,5-dideoxy-D-*glycero*-D-*galacto*-non-2-enonic acid

Synthesis of a Neu2en5Ac analog hapten and isolation of monoclonal antibody to Neu2en5Ac 243

### 5-Acetamido-2,6-anhydro-9-glutaramido-3,5,9-trideoxy-D-*glycero*-D-*galacto*-non-2-enonic acid

Synthesis of a Neu2en5Ac analog hapten and isolation of monoclonal antibody to Neu2en5Ac 243

### AFM

A <sup>13</sup>C CP/MAS NMR spectroscopy and AFM study of the structure of Glucagel™, a gelling β-glucan from barley 169

Imaging an alginate polymer gel matrix using atomic force microscopy 330

### Aldonic and uronic acids

Kinetics of the degradative oxidation of sugar-type ligands catalyzed by copper(II) ions 319

### Alginate

Imaging an alginate polymer gel matrix using atomic force microscopy 330

### Alpha amylase

Structure of dicarboxyl malto-oligomers isolated from hypochlorite-oxidised potato starch studied by <sup>1</sup>H and <sup>13</sup>C NMR spectroscopy 286

### Aluminium salts

Selective dehydration of glucose to hydroxymethylfurfural and a one-pot synthesis of a 4-acetylbutyrolactone from glucose and trioxane in solutions of aluminium salts 268

### 1-Amino-2,5-anhydro-1-deoxy-D-mannitol

An easy stereospecific synthesis of 1-amino-2,5-anhydro-1-deoxy-D-mannitol and arylamino derivatives 339

### α-Aminoisobutyric acid

Crystal structure of a fully protected β-*O*-galactosylated tripeptide 334

### 3-Aminopropyl spacer

Synthesis and NMR assignments of galactosylgloboside and its β-D-GalNAc-(1→4)-α-D-Gal-linked positional isomer in a conjugatable form 251

### Amylose

Amylose–dye complexes in cationic micelles: an optical spectroscopy study 35

### 2,5-Anhydro-1-arylamino-1-deoxy-D-mannitol derivatives

An easy stereospecific synthesis of 1-amino-2,5-anhydro-1-deoxy-D-mannitol and arylamino derivatives 339

### 2,5-Anhydro-3-deoxy-D-*ribo*-hexonic acid

Improved preparation and synthetic uses of 3-deoxy-D-*arabino*-hexonolactone: an efficient synthesis of *Leptosphaerin* 192

### Anthracycline glycons

A concise synthesis of methyl 2,6-dideoxy-2-fluoro-β-L-talopyranoside 187

### Anti-HIV activity

Synthesis of sulfated oligosaccharide glycosides having high anti-HIV activity and the relationship between activity and chemical structure 234

### Autocatalytic

New iodination of cellulose in phosphoric acid 350

### Bacterial polysaccharide

Structural determination of the exopolysaccharide of *Pseudoalteromonas* strain HYD 721 isolated from a deep-sea hydrothermal vent 273

### Bacterial α-(2→6)-sialyltransferase

Enzymatic synthesis of Kdn oligosaccharides by a bacterial α-(2→6)-sialyltransferase 137

### Barley

A <sup>13</sup>C CP/MAS NMR spectroscopy and AFM study of the structure of Glucagel™, a gelling β-glucan from barley 169

Rheological studies of barley (1→3)(1→4)-β-glucan in concentrated solution: mechanistic and kinetic investigation of the gel formation 302

### Barley (1→3)(1→4)-β-D-glucan

Rheological studies of barley (1→3)(1→4)-β-glucan in concentrated solution: investigation of the viscoelastic flow behaviour in the sol-state 293

### B/E constant linked scan FAB/MS

Isolation and characterization of new limonoid glycosides from *Citrus unshiu* peels 142

### Calcium

NMR study of a Lewis<sup>X</sup> pentasaccharide derivative: solution structure and interaction with cations 48

### Capillary electrophoresis

Kinetics of the degradative oxidation of sugar-type ligands catalyzed by copper(II) ions 319

### α-C-Arabinosides

Synthesis of C-(D-glycopyranosyl)ethylamines and C-(D-glycofuranosyl)methylamines as potential glycosidase inhibitors 106

### Carbohydrate percolation

Hydration of glucose in the rubbery and glassy states studied by molecular dynamics simulation 63

### Carbohydrates

Nuclear magnetic resonance spectroscopy of peracetylated oligosaccharides having <sup>13</sup>C-labeled carbonyl groups in lieu of permethylation analysis for establishing linkage substitutions of sugars 206

### C-Disaccharide

Synthesis of a 'direct-linked' C-disaccharide from a pyranulose glycoside 98

### Cellulose

New iodination of cellulose in phosphoric acid 350

### C-Glucosyl aldehyde

Synthesis of C-(D-glycopyranosyl)ethylamines and C-(D-glycofuranosyl)methylamines as potential glycosidase inhibitors 106

## Chemical depolymerization

Stability studies of chondroitin sulfate 345

## Chondroitin

Stability studies of chondroitin sulfate 345

*Citrus unshiu*Isolation and characterization of new limonoid glycosides from *Citrus unshiu* peels 142CMP- $\beta$ -D-KdnEnzymatic synthesis of Kdn oligosaccharides by a bacterial  $\alpha$ -(2  $\rightarrow$  6)-sialyltransferase 137 $^{13}\text{C}$  NMRNMR study of a Lewis<sup>x</sup> pentasaccharide derivative: solution structure and interaction with cations 48

## Configurational inversion

A concise synthesis of methyl 2,6-dideoxy-2-fluoro- $\beta$ -L-talopyranoside 187

## Conformational analysis

Conformational analysis of an  $\alpha$ -galactosyl trisaccharide epitope involved in hyperacute rejection upon xenotransplantation 76

Conformational analysis of maltoside heteroanalogues using high-quality NOE data and molecular mechanics calculations. Flexibility as a function of the interglycosidic chalcogen atom 222

## Copper(II)–gluconate complexes

Kinetics of the degradative oxidation of sugar-type ligands catalyzed by copper(II) ions 319

## CP/MAS NMR

A  $^{13}\text{C}$  CP/MAS NMR spectroscopy and AFM study of the structure of Glucagel<sup>TM</sup>, a gelling  $\beta$ -glucan from barley 169 $\beta$ -CyclodextrinCrystal structure of heptakis(2,6-di-*O*-methyl)- $\beta$ -cyclodextrin dihydrate: a water molecule in an apolar cavity 199

## Degradative oxidation

Kinetics of the degradative oxidation of sugar-type ligands catalyzed by copper(II) ions 319

## Dehydration

Selective dehydration of glucose to hydroxymethylfurfural and a one-pot synthesis of a 4-acetylbutyrolactone from glucose and trioxane in solutions of aluminium salts 268

3-Deoxy-D-*arabino*-hexono-lactoneImproved preparation and synthetic uses of 3-deoxy-D-*arabino*-hexonolactone: an efficient synthesis of *Leptosphaerin* 1923-Deoxy-D-*arabino*-hexoseImproved preparation and synthetic uses of 3-deoxy-D-*arabino*-hexonolactone: an efficient synthesis of *Leptosphaerin* 192 $\beta$ -D-Gal-(1  $\rightarrow$  3)- $\beta$ -D-GalNPhth synthonSynthesis and NMR assignments of galactosylgloboside and its  $\beta$ -D-GalNAc-(1  $\rightarrow$  4)- $\alpha$ -D-Gal-linked positional isomer in a conjugatable form 251 $\beta$ -D-GalNAc-(1  $\rightarrow$  3/4)- $\alpha$ -D-GalSynthesis and NMR assignments of galactosylgloboside and its  $\beta$ -D-GalNAc-(1  $\rightarrow$  4)- $\alpha$ -D-Gal-linked positional isomer in a conjugatable form 251(1  $\rightarrow$  3)(1  $\rightarrow$  4)- $\beta$ -D-glucanRheological studies of barley (1  $\rightarrow$  3)(1  $\rightarrow$  4)- $\beta$ -glucan in concentrated solution: mechanistic and kinetic investigation of the gel formation 302

## D-Glucono-1,5-lactone

Improved preparation and synthetic uses of 3-deoxy-D-*arabino*-hexonolactone: an efficient synthesis of *Leptosphaerin* 192

## 2,6-Dideoxy-2-fluoro-L-talose

A concise synthesis of methyl 2,6-dideoxy-2-fluoro- $\beta$ -L-talopyranoside 187Dimethylated  $\beta$ -cyclodextrinCrystal structure of heptakis(2,6-di-*O*-methyl)- $\beta$ -cyclodextrin dihydrate: a water molecule in an apolar cavity 199

## Direct-linked C-disaccharide

Synthesis of a 'direct-linked' C-disaccharide from a pyranulose glycoside 98

 $\alpha$ -D-Mannofuranoside

Synthesis of C-(D-glycopyranosyl)ethylamines and C-(D-glycofuranosyl)methylamines as potential glycosidase inhibitors 106

## Dynamics

NMR study of the rotational dynamics of linear homopolysaccharides in dilute solutions as a function of linkage position and stereochemistry 16

## Elicitor-active D-glucosylhexatose

A highly convergent and effective synthesis of the phytoalexin elicitor hexasaccharide 117

## Enamine

Improved preparation and synthetic uses of 3-deoxy-D-*arabino*-hexonolactone: an efficient synthesis of *Leptosphaerin* 192

## Enzymatic synthesis

Enzymatic synthesis of Kdn oligosaccharides by a bacterial  $\alpha$ -(2  $\rightarrow$  6)-sialyltransferase 137

## Erythrosin B

Amylose–dye complexes in cationic micelles: an optical spectroscopy study 35

## ESMS

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC–MS, ESMS and ESMS/MS 312

## ESMS/MS

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC–MS, ESMS and ESMS/MS 312

## Ester

New iodination of cellulose in phosphoric acid 350

## Exopolysaccharide

Structural determination of the acidic exopolysaccharide produced by a *Pseudomonas* sp. strain 1.15 159

## Extracellular polymers

Imaging an alginate polymer gel matrix using atomic force microscopy 330

## Flexibility of glycosidic linkages

Conformational analysis of maltoside heteroanalogues using high-quality NOE data and molecular mechanics calculations. Flexibility as a function of the interglycosidic chalcogen atom 222

## Flow irregularities

Rheological studies of barley (1  $\rightarrow$  3)(1  $\rightarrow$  4)- $\beta$ -glucan in concentrated solution: investigation of the viscoelastic flow behaviour in the sol-state 293

## Fluorescence spectroscopy

Amylose–dye complexes in cationic micelles: an optical spectroscopy study 35

## Fluoro sugars

A concise synthesis of methyl 2,6-dideoxy-2-fluoro- $\beta$ -L-talopyranoside 187 $\alpha$ -Galactosyl epitopesConformational analysis of an  $\alpha$ -galactosyl trisaccharide epitope involved in hyperacute rejection upon xenotransplantation 76

## Galactosylgloboside

Synthesis and NMR assignments of galactosylgloboside and its  $\beta$ -D-GalNAc-(1  $\rightarrow$  4)- $\alpha$ -D-Gal-linked positional isomer in a conjugatable form 251

## GC–MS

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC–MS, ESMS and ESMS/MS 312

## Gelation

Rheological studies of barley (1→3)(1→4)-β-glucan in concentrated solution: mechanistic and kinetic investigation of the gel formation 302

## Glass transitions in carbohydrates

Hydration of glucose in the rubbery and glassy states studied by molecular dynamics simulation 63

## Glucagel™

A <sup>13</sup>C CP/MAS NMR spectroscopy and AFM study of the structure of Glucagel™, a gelling β-glucan from barley 169

## β-Glucan

A <sup>13</sup>C CP/MAS NMR spectroscopy and AFM study of the structure of Glucagel™, a gelling β-glucan from barley 169

## Glucoamylase

Structure of dicarboxyl malto-oligomers isolated from hypochlorite-oxidised potato starch studied by <sup>1</sup>H and <sup>13</sup>C NMR spectroscopy 286

## Glucose

Selective dehydration of glucose to hydroxymethylfurfural and a one-pot synthesis of a 4-acetylbutyrolactone from glucose and trioxane in solutions of aluminium salts 268

## Glucose hydration

Hydration of glucose in the rubbery and glassy states studied by molecular dynamics simulation 63

## Glucosidase inhibitors

Conformational analysis of maltoside heteroanalogues using high-quality NOE data and molecular mechanics calculations. Flexibility as a function of the interglycosidic chalcogen atom 222

## Glycogen phosphorylase b

Chemoenzymatic preparation of 2-chloro-4-nitrophenyl β-maltooligosaccharide glycosides using glycogen phosphorylase b 180

## Glycolipid

A simple synthesis of 8-(methoxycarbonyl)octyl 3,6-di-*O*-(α-D-mannopyranosyl)-α-D-mannopyranoside and derivatives and their use in the preparation of neoglycoconjugates 148

## Glycopeptides

Crystal structure of a fully protected β-*O*-galactosylated tripeptide 334

## Glycosaminoglycans

Stability studies of chondroitin sulfate 345

## Glycosidase inhibitor

Synthesis of *C*-(D-glycopyranosyl)ethylamines and *C*-(D-glycofuranosyl)methylamines as potential glycosidase inhibitors 106

## Glycosylation

A highly efficient and convergent synthesis of a hexasaccharide, a dimer of the repeating unit of the antigen O2 polysaccharide of *Stenotrophomonas maltophilia* 128

## Heterocycle, glucosylated

Synthesis of glucosylated 1,2,3-triazole derivatives 262

## Heteroxylan

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC-MS, ESMS and ESMS/MS 312

<sup>1</sup>H NMR

NMR study of a Lewis<sup>X</sup> pentasaccharide derivative: solution structure and interaction with cations 48

## HPAEC-PAD

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC-MS, ESMS and ESMS/MS 312

## HPAEC-PAD

Structure of dicarboxyl malto-oligomers isolated from hypochlorite-oxidised potato starch studied by <sup>1</sup>H and <sup>13</sup>C NMR spectroscopy 286

## Hydrogen bonding

Crystal structure of heptakis(2,6-di-*O*-methyl)-β-cyclodextrin dihydrate: a water molecule in an apolar cavity 199

## Hydrogen bonds

The manifestation of hydrogen bonding in the IR spectra of DL-threitol and erythritol (300–20 K) 89

## Hydrophobicity

Synthesis of sulfated oligosaccharide glycosides having high anti-HIV activity and the relationship between activity and chemical structure 234

## Hydrothermal vent

Structural determination of the exopolysaccharide of *Pseudoalteromonas* strain HYD 721 isolated from a deep-sea hydrothermal vent 273

## Inclusion complexes

Crystal structure of heptakis(2,6-di-*O*-methyl)-β-cyclodextrin dihydrate: a water molecule in an apolar cavity 199

## Iodination

New iodination of cellulose in phosphoric acid 350

## IR spectroscopy

The manifestation of hydrogen bonding in the IR spectra of DL-threitol and erythritol (300–20 K) 89

## Kinetics

Kinetics and mechanism of the oxidation of some aldoses, amino sugars and methylated sugars by tris(pyridine-2-carboxylato)manganese(III) in weakly acidic medium 70

Kinetics of the degradative oxidation of sugar-type ligands catalyzed by copper(II) ions 319

## Laminara-oligosaccharides

Synthesis of sulfated oligosaccharide glycosides having high anti-HIV activity and the relationship between activity and chemical structure 234

## Leptosphaerin

Improved preparation and synthetic uses of 3-deoxy-D-arabinohexonolactone: an efficient synthesis of *Leptosphaerin* 192

Lewis<sup>X</sup>

NMR study of a Lewis<sup>X</sup> pentasaccharide derivative: solution structure and interaction with cations 48

## Lichenan

Rheological studies of barley (1→3)(1→4)-β-glucan in concentrated solution: mechanistic and kinetic investigation of the gel formation 302

## Limonoid glycosides

Isolation and characterization of new limonoid glycosides from *Citrus unshiu* peels 142

## Linkage analysis

Nuclear magnetic resonance spectroscopy of peracetylated oligosaccharides having <sup>13</sup>C-labeled carbonyl groups in lieu of permethylation analysis for establishing linkage substitutions of sugars 206

## Maltooligosaccharide series

Chemoenzymatic preparation of 2-chloro-4-nitrophenyl β-maltooligosaccharide glycosides using glycogen phosphorylase b 180

## Maltose heteroanalogues

Conformational analysis of maltoside heteroanalogues using high-quality NOE data and molecular mechanics calculations. Flexibility as a function of the interglycosidic chalcogen atom 222

## Manganese

Kinetics and mechanism of the oxidation of some aldoses, amino sugars and methylated sugars by tris(pyridine-2-carboxylato)manganese(III) in weakly acidic medium 70

## Mannotrioxide

A simple synthesis of 8-(methoxycarbonyl)octyl 3,6-di-*O*-( $\alpha$ -D-mannopyranosyl)- $\alpha$ -D-mannopyranoside and derivatives and their use in the preparation of neoglycoconjugates 148

## Mass spectrometry

Structural determination of the acidic exopolysaccharide produced by a *Pseudomonas* sp. strain 1.15 159

## Methylation

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC-MS, ESMS and ESMS/MS 312

Methyl nomilinate 17-*O*- $\beta$ -D-glucopyranoside

Isolation and characterization of new limonoid glycosides from *Citrus unshiu* peels 142

## Molecular dynamics simulation of hydration

Hydration of glucose in the rubbery and glassy states studied by molecular dynamics simulation 63

## Molecular mechanics calculations

Conformational analysis of maltoside heteroanalogues using high-quality NOE data and molecular mechanics calculations. Flexibility as a function of the interglycosidic chalcogen atom 222

## Monoclonal antibody

Synthesis of a Neu2en5Ac analog hapten and isolation of monoclonal antibody to Neu2en5Ac 243

## Monte Carlo simulation

Conformational analysis of an  $\alpha$ -galactosyl trisaccharide epitope involved in hyperacute rejection upon xenotransplantation 76

*N*-Acetylneuraminic acid

Synthesis of a Neu2en5Ac analog hapten and isolation of monoclonal antibody to Neu2en5Ac 243

## Neoglycoconjugates

A simple synthesis of 8-(methoxycarbonyl)octyl 3,6-di-*O*-( $\alpha$ -D-mannopyranosyl)- $\alpha$ -D-mannopyranoside and derivatives and their use in the preparation of neoglycoconjugates 148

## Neu2en5Ac

Synthesis of a Neu2en5Ac analog hapten and isolation of monoclonal antibody to Neu2en5Ac 243

## NMR

Nuclear magnetic resonance spectroscopy of peracetylated oligosaccharides having  $^{13}\text{C}$ -labeled carbonyl groups in lieu of permethylation analysis for establishing linkage substitutions of sugars 206

Structural determination of the acidic exopolysaccharide produced by a *Pseudomonas* sp. strain 1.15 159

## NMR-relaxation

NMR study of the rotational dynamics of linear homopolysaccharides in dilute solutions as a function of linkage position and stereochemistry 16

## Nuclear Overhauser enhancement

Conformational analysis of maltoside heteroanalogues using high-quality NOE data and molecular mechanics calculations. Flexibility as a function of the interglycosidic chalcogen atom 222

O2 antigen of *Stenotrophomonas maltophilia*

A highly efficient and convergent synthesis of a hexasaccharide, a dimer of the repeating unit of the antigen O2 polysaccharide of *Stenotrophomonas maltophilia* 128

## Oat

Rheological studies of barley (1 $\rightarrow$ 3)(1 $\rightarrow$ 4)- $\beta$ -glucan in concentrated solution: mechanistic and kinetic investigation of the gel formation 302

## Oligosaccharide

NMR study of a Lewis<sup>X</sup> pentasaccharide derivative: solution structure and interaction with cations 48

## Oligosaccharide glycosides

Synthesis of sulfated oligosaccharide glycosides having high anti-

HIV activity and the relationship between activity and chemical structure 234

## Oligosaccharides

Nuclear magnetic resonance spectroscopy of peracetylated oligosaccharides having  $^{13}\text{C}$ -labeled carbonyl groups in lieu of permethylation analysis for establishing linkage substitutions of sugars 206

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC-MS, ESMS and ESMS/MS 312

## Orthoester

A highly convergent and effective synthesis of the phytoalexin elicitor hexasaccharide 117

## Oxidised starch, structure

Structure of dicarboxyl malto-oligomers isolated from hypochlorite-oxidised potato starch studied by  $^1\text{H}$  and  $^{13}\text{C}$  NMR spectroscopy 286

## Oxygen ligands

Selective dehydration of glucose to hydroxymethylfurfural and a one-pot synthesis of a 4-acetylbutyrolactone from glucose and trioxane in solutions of aluminium salts 268

## Paramagnetic ions

NMR study of a Lewis<sup>X</sup> pentasaccharide derivative: solution structure and interaction with cations 48

## Partial hydrolysis

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC-MS, ESMS and ESMS/MS 312

## Peracetylation

Nuclear magnetic resonance spectroscopy of peracetylated oligosaccharides having  $^{13}\text{C}$ -labeled carbonyl groups in lieu of permethylation analysis for establishing linkage substitutions of sugars 206

## Phenolphthalein

Amylose-dye complexes in cationic micelles: an optical spectroscopy study 35

## Phosphoric acid

New iodination of cellulose in phosphoric acid 350

*Plantago major* L.

Structural studies of a heteroxylan from *Plantago major* L. seeds by partial hydrolysis, HPAEC-PAD, methylation and GC-MS, ESMS and ESMS/MS 312

## Polysaccharide

Imaging an alginate polymer gel matrix using atomic force microscopy 330

## Polysaccharides

NMR study of the rotational dynamics of linear homopolysaccharides in dilute solutions as a function of linkage position and stereochemistry 16

*Pseudomonas*

Structural determination of the acidic exopolysaccharide produced by a *Pseudomonas* sp. strain 1.15 159

## Pyranulose glycoside

Synthesis of a 'direct-linked' C-disaccharide from a pyranulose glycoside 98

## Rearrangement

A highly convergent and effective synthesis of the phytoalexin elicitor hexasaccharide 117

## Reductive amination

Synthesis of C-(D-glycopyranosyl)ethylamines and C-(D-glycofuranosyl)methylamines as potential glycosidase inhibitors 106

## Rheology

Rheological studies of barley (1 $\rightarrow$ 3)(1 $\rightarrow$ 4)- $\beta$ -glucan in concentrated solution: mechanistic and kinetic investigation of the gel formation 302

## Ring-cleavage

Structure of dicarboxyl malto-oligomers isolated from hypochlorite-oxidised potato starch studied by  $^1\text{H}$  and  $^{13}\text{C}$  NMR spectroscopy 286

## Rose bengal

Amylose–dye complexes in cationic micelles: an optical spectroscopy study 35

Selective 2D  $J$ - $\delta$  INEPT NMR spectroscopy

Conformational analysis of an  $\alpha$ -galactosyl trisaccharide epitope involved in hyperacute rejection upon xenotransplantation 76

## Shear-induced gelation

Rheological studies of barley (1  $\rightarrow$  3)(1  $\rightarrow$  4)- $\beta$ -glucan in concentrated solution: investigation of the viscoelastic flow behaviour in the sol-state 293

## Sialic acid

Synthesis of a Neu2en5Ac analog hapten and isolation of monoclonal antibody to Neu2en5Ac 243

## Size-exclusion column chromatography

Chemoenzymatic preparation of 2-chloro-4-nitrophenyl  $\beta$ -maltooligosaccharide glycosides using glycogen phosphorylase b 180

## Sodium picolinate–picolinic acid

Kinetics and mechanism of the oxidation of some aldoses, amino sugars and methylated sugars by tris(pyridine-2-carboxylato)manganese(III) in weakly acidic medium 70

## Sol–gel transition

Rheological studies of barley (1  $\rightarrow$  3)(1  $\rightarrow$  4)- $\beta$ -glucan in concentrated solution: investigation of the viscoelastic flow behaviour in the sol-state 293

## Stability studies

Stability studies of chondroitin sulfate 345

## Structure

Imaging an alginate polymer gel matrix using atomic force microscopy 330

Structural determination of the acidic exopolysaccharide produced by a *Pseudomonas* sp. strain 1.15 159

Sugar ring  $^1\text{H}$ -acetyl carbonyl  $^{13}\text{C}$   $J$  couplings

Nuclear magnetic resonance spectroscopy of peracetylated oligosaccharides having  $^{13}\text{C}$ -labeled carbonyl groups in lieu of permethylation analysis for establishing linkage substitutions of sugars 206

## Sulfated sugars

Synthesis of sulfated oligosaccharide glycosides having high anti-HIV activity and the relationship between activity and chemical structure 234

## Synthesis

A highly convergent and effective synthesis of the phytoalexin elicitor hexasaccharide 117

A simple synthesis of 8-(methoxycarbonyl)octyl 3,6-di- $O$ -( $\alpha$ -D-mannopyranosyl)- $\alpha$ -D-mannopyranoside and derivatives and their use in the preparation of neoglycoconjugates 148

Synthesis and NMR assignments of galactosylgloboside and its  $\beta$ -D-GalNAc-(1  $\rightarrow$  4)- $\alpha$ -D-Gal-linked positional isomer in a conjugatable form 251

Synthesis of a 'direct-linked' C-disaccharide from a pyranulose glycoside 98

Synthesis of glucosylated 1,2,3-triazole derivatives 262

## Synthesis of hexasaccharide

A highly efficient and convergent synthesis of a hexasaccharide, a dimer of the repeating unit of the antigen O2 polysaccharide of *Stenotrophomonas maltophilia* 128

## Tetritols

The manifestation of hydrogen bonding in the IR spectra of DL-threitol and erythritol (300–20 K) 89

## Time-correlation functions

NMR study of the rotational dynamics of linear homopolysaccharides in dilute solutions as a function of linkage position and stereochemistry 16

## Triazole

Synthesis of glucosylated 1,2,3-triazole derivatives 262

*Trypanosoma brucei* hexoses transporter (THT1)

An easy stereospecific synthesis of 1-amino-2,5-anhydro-1-deoxy-D-mannitol and arylamino derivatives 339

## Uronic acid

Structural determination of the exopolysaccharide of *Pseudoalteromonas* strain HYD 721 isolated from a deep-sea hydrothermal vent 273

## Viscoelastic flow behaviour

Rheological studies of barley (1  $\rightarrow$  3)(1  $\rightarrow$  4)- $\beta$ -glucan in concentrated solution: investigation of the viscoelastic flow behaviour in the sol-state 293

## Xenotransplantation

Conformational analysis of an  $\alpha$ -galactosyl trisaccharide epitope involved in hyperacute rejection upon xenotransplantation 76

## X-ray diffraction analysis

Crystal structure of a fully protected  $\beta$ - $O$ -galactosylated tripeptide 334
