

Subject index

- Ab initio MO calculations
 - A theoretical study for methanol synthesis by CO₂ hydrogenation 39
- Absorbance change
 - Combined effects of small gold particles on the optical gas sensing by transition metal oxide films 135
- Adsorption
 - Size- and support-dependency in the catalysis of gold 153
- Alcohol
 - Role of CO₂ in the initiation of chain growth and alcohol formation during the Fischer–Tropsch synthesis 347
- Alkaline cations
 - Oxygenates from syngas over highly dispersed cobalt catalysts 311
- Alkane
 - Copper(II) catalyzed reaction of gaseous alkanes with amine *N*-oxides 85
- Alkylation
 - Selectivity in heterogeneous catalytic processes 497
- Amine *N*-oxide
 - Copper(II) catalyzed reaction of gaseous alkanes with amine *N*-oxides 85
- Aminomethylation
 - Copper(II) catalyzed reaction of gaseous alkanes with amine *N*-oxides 85
- Ammonia
 - Primary amine syntheses from syngas, olefins and ammonia 305
- Bacteria
 - The development and functions of silver in water purification and disease control 107
- σ/π Bonding
 - Polycarbonyl cations of Cu(I), Ag(I), and Au(I):[M(CO)_{*n*}]⁺ 99
- C–H Activation
 - Copper(II) catalyzed reaction of gaseous alkanes with amine *N*-oxides 85
- Carbon dioxide
 - Hydrogenation of CO and CO₂ toward methanol, alcohols and hydrocarbons on promoted copper–rare earth oxides catalysts 15
- Carbon monoxide
 - Cobalt promotion of Au/TiO₂ catalysts for the reaction of carbon monoxide with oxygen and nitrogen oxides 125
- Carbonylation
 - Molybdenum catalyzed carbonylation of ethylene to propionic acid and anhydride 227
- Carboxylation
 - Synthesis of *tert.*-Alkanoic acid catalyzed by Cu(CO)_{*n*}⁺ and Ag(CO)₂⁺ under atmospheric pressure 91
- Catalyst evaluation
 - The temperature scanning reactor I: Reactor types and modes of operation 167
- Catalyst, iron
 - Fischer–Tropsch synthesis over iron-based catalysts in a slurry reactor. Reaction rates, selectivities and implications for improving hydrocarbon productivity 335
 - Role of CO₂ in the initiation of chain growth and alcohol formation during the Fischer–Tropsch synthesis 347
- Catalytic effect
 - Copper(II) bis((trifluoromethyl) sulfonyl) amide. A novel Lewis acid catalyst in Diels–Alder reactions of cyclopentadiene with methyl vinyl ketone 81
- Catalytic reactor
 - Dynamics of catalytic reactions and reactors 461
- Catalytic synergy
 - Copper–zirconia catalysts for NO–CO reactions 71
- Ceramics
 - Ceramic membrane reactor for converting methane to syngas 265
- CO adsorption
 - Adsorption of CO on gold supported on TiO₂ 115
- CO₂ hydrogenation
 - A theoretical study for methanol synthesis by CO₂ hydrogenation 39
- CO₂ production
 - Adsorption of CO on gold supported on TiO₂ 115
- CO₂ hydrogenation
 - Structure and function of Cu-based composite catalysts for highly effective synthesis of methanol by hydrogenation of CO₂ and CO 25
- Cobalt carbonyl
 - Oxygenates from syngas over highly dispersed cobalt catalysts 311
- Cobalt catalyst
 - Oxygenates from syngas over highly dispersed cobalt catalysts 311

- Cobalt promotion
 - Cobalt promotion of Au/TiO₂ catalysts for the reaction of carbon monoxide with oxygen and nitrogen oxides 125
- Cobalt-manganese
 - Conversion of syngas to light olefins over silicalite-1 supported iron and cobalt catalysts: Effect of manganese addition 285
- Coking
 - Deactivation by coking of zeolite catalysts. Prevention of deactivation. Optimal conditions for regeneration 477
- Composite catalysts
 - Hydrogenation of CO and CO₂ toward methanol, alcohols and hydrocarbons on promoted copper–rare earth oxides catalysts 15
- Condensation
 - Synthesis of methyl methacrylate by vapor phase condensation of formaldehyde with propionate derivatives 243
- Copper acetate
 - Copper(II) catalyzed reaction of gaseous alkanes with amine *N*-oxides 85
- Copper carbonyl
 - Synthesis of *tert*.-Alkanoic acid catalyzed by Cu(CO)_n⁺ and Ag(CO)₂⁺ under atmospheric pressure 91
- Copper catalysts
 - Hydrogenation of CO and CO₂ toward methanol, alcohols and hydrocarbons on promoted copper–rare earth oxides catalysts 15
- Copper oxide
 - Comparative studies of TPD and TPR of the adsorbed NO₃ species formed on copper oxide and ion-exchanged copper mordenite from nitrogen dioxide 65
- Copper/mordenite
 - Comparative studies of TPD and TPR of the adsorbed NO₃ species formed on copper oxide and ion-exchanged copper mordenite from nitrogen dioxide 65
- Copper
 - Activity and selectivity of precipitated iron Fischer–Tropsch catalysts 325
 - Liquid phase methanol synthesis from CO₂ utilizing liquid–liquid separation 33
 - Polycarbonyl cations of Cu(I), Ag(I), and Au(I):[M(CO)_n]⁺ 99
 - Steam reforming and dehydrogenation of methanol: Difference in the catalytic functions of copper and group VIII metals 45
 - The effect of pretreatments on different copper exchanged ZSM-5 for the decomposition of NO 57
- Crude oil
 - Deep hydrotreating of middle distillates from crude and shale oils 393
- Cs promotion
 - Catalytic synthesis of methanol, higher alcohols and ethers 3
- Cu-based composite catalysts
 - Structure and function of Cu-based composite catalysts for highly effective synthesis of methanol by hydrogenation of CO₂ and CO 25
- Cu/ZnO catalyst
 - A theoretical study for methanol synthesis by CO₂ hydrogenation 39
- Cu/ZrO₂ catalyst
 - Copper–zirconia catalysts for NO–CO reactions 71
- Data filtering
 - The temperature scanning reactor III: Experimental procedures and data processing 209
- Deactivation
 - Copper–zirconia catalysts for NO–CO reactions 71
- Deactivation
 - Deactivation by coking of zeolite catalysts. Prevention of deactivation. Optimal conditions for regeneration 477
- Decahydronaphthalene
 - Alcohol synthesis in a high-temperature slurry reactor 255
- Defects
 - Molecular dynamics simulation for ultrafine gold particles deposited on metal oxides 143
- Diels–Alder reaction
 - Copper(II) bis((trifluoromethyl) sulfonyl) amide. A novel Lewis acid catalyst in Diels–Alder reactions of cyclopentadiene with methyl vinyl ketone 81
- Diesel
 - Hydrotreating catalysts, an old story with new challenges 375
- Disease
 - The development and functions of silver in water purification and disease control 107
- Ethers
 - Catalytic synthesis of methanol, higher alcohols and ethers 3
- Experimental methods
 - The temperature scanning reactor III: Experimental procedures and data processing 209
- Fischer–Tropsch synthesis (FTS)
 - Fischer–Tropsch synthesis over iron-based catalysts in a slurry reactor. Reaction rates, selectivities and implications for improving hydrocarbon productivity 335
 - Role of CO₂ in the initiation of chain growth and alcohol formation during the Fischer–Tropsch synthesis 347
 - Supercritical-phase process for selective synthesis of wax from syngas: Catalyst and process development 295
 - Activity and selectivity of precipitated iron Fischer–Tropsch catalysts 325
- Formaldehyde
 - Synthesis of methyl methacrylate by vapor phase condensation of formaldehyde with propionate derivatives 243
- Formation process
 - Molecular dynamics simulation for ultrafine gold particles deposited on metal oxides 143
- FTS catalyst activity
 - Activity and selectivity of precipitated iron Fischer–Tropsch catalysts 325
- FTS chain initiation
 - Role of CO₂ in the initiation of chain growth and alcohol formation during the Fischer–Tropsch synthesis 347
- FTS oxygenates
 - Role of CO₂ in the initiation of chain growth and alcohol formation during the Fischer–Tropsch synthesis 347
- FTS process
 - Fischer–Tropsch synthesis over iron-based catalysts in a slurry reactor. Reaction rates, selectivities and implications for improving hydrocarbon productivity 335

- FTS product selectivity
Activity and selectivity of precipitated iron Fischer–Tropsch catalysts 325
Fischer–Tropsch synthesis over iron-based catalysts in a slurry reactor. Reaction rates, selectivities and implications for improving hydrocarbon productivity 335
- FTS promoter
Activity and selectivity of precipitated iron Fischer–Tropsch catalysts 325
- FTS reaction mechanism
Role of CO₂ in the initiation of chain growth and alcohol formation during the Fischer–Tropsch synthesis 347
- FTS reaction rate
Fischer–Tropsch synthesis over iron-based catalysts in a slurry reactor. Reaction rates, selectivities and implications for improving hydrocarbon productivity 335
- Functionalization
Some aspects that affect the selective oxidation of paraffins 431
- Gas phase nitration
Selectivity in heterogeneous catalytic processes 497
- Gold catalyst
Adsorption of CO on gold supported on TiO₂ 115
Cobalt promotion of Au/TiO₂ catalysts for the reaction of carbon monoxide with oxygen and nitrogen oxides 125
Size- and support-dependency in the catalysis of gold 153
- Gold particles (small)
Combined effects of small gold particles on the optical gas sensing by transition metal oxide films 135
- Gold
Polycarbonyl cations of Cu(I), Ag(I), and Au(I):[M(CO)_n]⁺ 99
- Heteropolyacid salt
Preparation of bulk and supported heteropolyacid salts 441
- Heteropolyacid
Preparation of bulk and supported heteropolyacid salts 441
- High-silica zeolite
New strategy of creation of local catalytic sites in definite electronic and coordination states 485
- Higher alcohols
Catalytic synthesis of methanol, higher alcohols and ethers 3
- Hydrocarbons
Hydrogenation of CO and CO₂ toward methanol, alcohols and hydrocarbons on promoted copper–rare earth oxides catalysts 15
- Hydrodeoxygenation
Deep hydrotreating of middle distillates from crude and shale oils 393
- Hydrosulfurization
Deep hydrotreating of middle distillates from crude and shale oils 393
- Hydroformylation
Hydroformylation catalyzed by immobilized rhodium complex to polymer support 357
- Hydrogenation
Hydrogenation of CO and CO₂ toward methanol, alcohols and hydrocarbons on promoted copper–rare earth oxides catalysts 15
Selectivity in heterogeneous catalytic processes 497
- Hydronitrogenation
Deep hydrotreating of middle distillates from crude and shale oils 393
- Hydrosulfurization (HDS)
Hydrotreating catalysts, an old story with new challenges 375
- Hydrosulfurization, deep
Hydrotreating catalysts, an old story with new challenges 375
- Immobilization
Hydroformylation catalyzed by immobilized rhodium complex to polymer support 357
- Inverse-spillover
Structure and function of Cu-based composite catalysts for highly effective synthesis of methanol by hydrogenation of CO₂ and CO 25
- Iron-manganese
Conversion of syngas to light olefins over silicalite-1 supported iron and cobalt catalysts: Effect of manganese addition 285
- Isotopic tracer
Role of CO₂ in the initiation of chain growth and alcohol formation during the Fischer–Tropsch synthesis 347
- Kinetics
The temperature scanning reactor III: Experimental procedures and data processing 209
- Lewis acid
Copper(II) bis((trifluoromethyl) sulfonyl) amide. A novel Lewis acid catalyst in Diels–Alder reactions of cyclopentadiene with methyl vinyl ketone 81
- Light olefins
Conversion of syngas to light olefins over silicalite-1 supported iron and cobalt catalysts: Effect of manganese addition 285
- Liquid–liquid separation
Liquid phase methanol synthesis from CO₂ utilizing liquid–liquid separation 33
- Membrane reactor
Ceramic membrane reactor for converting methane to syngas 265
- Metal carbonyls
Polycarbonyl cations of Cu(I), Ag(I), and Au(I):[M(CO)_n]⁺ 99
- Metal catalyst
Supercritical-phase process for selective synthesis of wax from syngas: Catalyst and process development 295
- Metal oxide surface
Molecular dynamics simulation for ultrafine gold particles deposited on metal oxides 143
- Metal salts
Copper(II) bis((trifluoromethyl) sulfonyl) amide. A novel Lewis acid catalyst in Diels–Alder reactions of cyclopentadiene with methyl vinyl ketone 81
- Methane conversion
Ceramic membrane reactor for converting methane to syngas 265
- Methanol dehydrogenation
Steam reforming and dehydrogenation of methanol: Difference in the catalytic functions of copper and group VIII metals 45

- Methanol steam reforming**
Steam reforming and dehydrogenation of methanol: Difference in the catalytic functions of copper and group VIII metals 45
- Methanol synthesis**
A theoretical study for methanol synthesis by CO₂ hydrogenation 39
Liquid phase methanol synthesis from CO₂ utilizing liquid–liquid separation 33
Structure and function of Cu-based composite catalysts for highly effective synthesis of methanol by hydrogenation of CO₂ and CO 25
- Methanol**
Alcohol synthesis in a high-temperature slurry reactor 255
Catalytic synthesis of methanol, higher alcohols and ethers 3
Hydrogenation of CO and CO₂ toward methanol, alcohols and hydrocarbons on promoted copper–rare earth oxides catalysts 15
- Methyl methacrylate**
Synthesis of methyl methacrylate by vapor phase condensation of formaldehyde with propionate derivatives 243
- Microorganisms**
The development and functions of silver in water purification and disease control 107
- Middle distillate**
Deep hydrotreating of middle distillates from crude and shale oils 393
- Model reaction**
Molybdenum catalyzed carbonylation of ethylene to propionic acid and anhydride 227
- Molecular dynamics**
Molecular dynamics simulation for ultrafine gold particles deposited on metal oxides 143
- Molecular sieve, carbon**
Selectivity in heterogeneous catalytic processes 497
- Molybdenum**
Molybdenum catalyzed carbonylation of ethylene to propionic acid and anhydride 227
- Nitric oxide decomposition**
The effect of pretreatments on different copper exchanged ZSM-5 for the decomposition of NO 57
- Nitrogen dioxide**
Comparative studies of TPD and TPR of the adsorbed NO₃ species formed on copper oxide and ion-exchanged copper mordenite from nitrogen dioxide 65
- Nitrogen oxides**
Cobalt promotion of Au/TiO₂ catalysts for the reaction of carbon monoxide with oxygen and nitrogen oxides 125
- NO–CO reaction**
Copper–zirconia catalysts for NO–CO reactions 71
- NO₃-type adsorbed species**
Comparative studies of TPD and TPR of the adsorbed NO₃ species formed on copper oxide and ion-exchanged copper mordenite from nitrogen dioxide 65
- Olefin addition**
Supercritical-phase process for selective synthesis of wax from syngas: Catalyst and process development 295
- Olefin oligomerization**
The development of an environmental friendly catalytic system for the conversion of olefins 451
- Optochemical sensors**
Combined effects of small gold particles on the optical gas sensing by transition metal oxide films 135
- Oxidation**
Cobalt promotion of Au/TiO₂ catalysts for the reaction of carbon monoxide with oxygen and nitrogen oxides 125
- Oxygen**
The development and functions of silver in water purification and disease control 107
- Oxygenates**
Oxygenates from syngas over highly dispersed cobalt catalysts 311
- Paraffin**
Some aspects that affect the selective oxidation of paraffins 431
- Pd- and Ga-modification**
Structure and function of Cu-based composite catalysts for highly effective synthesis of methanol by hydrogenation of CO₂ and CO 25
- PdZn alloys**
Steam reforming and dehydrogenation of methanol: Difference in the catalytic functions of copper and group VIII metals 45
- Perovskites**
Ceramic membrane reactor for converting methane to syngas 265
- Phosphonate-phosphane complexes**
Supported phosphonate–phosphane complexes for vapour-phase carbonylation 273
- Polymer support**
Hydroformylation catalyzed by immobilized rhodium complex to polymer support 357
- Potassium**
Activity and selectivity of precipitated iron Fischer–Tropsch catalysts 325
- Preparation**
Size- and support-dependency in the catalysis of gold 153
- Primary amine**
Primary amine syntheses from syngas, olefins and ammonia 305
- Rare earth oxide catalysts**
Hydrogenation of CO and CO₂ toward methanol, alcohols and hydrocarbons on promoted copper–rare earth oxides catalysts 15
- Reaction dynamics**
Dynamics of catalytic reactions and reactors 461
- Reaction kinetics**
Molybdenum catalyzed carbonylation of ethylene to propionic acid and anhydride 227
- Reactor design**
The temperature scanning reactor I: Reactor types and modes of operation 167
The temperature scanning reactor II: Theory of operation 191
- Reactor operation**
The temperature scanning reactor I: Reactor types and modes of operation 167

- Reduction (selective)
Comparative studies of TPD and TPR of the adsorbed NO₃ species formed on copper oxide and ion-exchanged copper mordenite from nitrogen dioxide 65
- Regeneration
Copper–zirconia catalysts for NO–CO reactions 71
- Regeneration
Deactivation by coking of zeolite catalysts. Prevention of deactivation. Optimal conditions for regeneration 477
- Review
Hydrotreating catalysts, an old story with new challenges 375
- Rhodium complex
Hydroformylation catalyzed by immobilized rhodium complex to polymer support 357
- S_N2 reaction
Catalytic synthesis of methanol, higher alcohols and ethers 3
- Sanitation
The development and functions of silver in water purification and disease control 107
- Selective oxidation
Some aspects that affect the selective oxidation of paraffins 431
- Shale oil
Deep hydrotreating of middle distillates from crude and shale oils 393
- Silicalite-1
Conversion of syngas to light olefins over silicalite-1 supported iron and cobalt catalysts: Effect of manganese addition 285
- Silver carbonyl
Synthesis of *tert.*-Alkanoic acid catalyzed by Cu(CO)_n⁺ and Ag(CO)₂⁺ under atmospheric pressure 91
- Silver
Polycarbonyl cations of Cu(I), Ag(I), and Au(I):[M(CO)_n]⁺ 99
The development and functions of silver in water purification and disease control 107
- Sintering process
Molecular dynamics simulation for ultrafine gold particles deposited on metal oxides 143
- Slurry reactor
Alcohol synthesis in a high-temperature slurry reactor 255
- Solid-state exchange
New strategy of creation of local catalytic sites in definite electronic and coordination states 485
- Spectroscopy
Molybdenum catalyzed carbonylation of ethylene to propionic acid and anhydride 227
- Spillover
Structure and function of Cu-based composite catalysts for highly effective synthesis of methanol by hydrogenation of CO₂ and CO 25
- Supercritical phase
Supercritical-phase process for selective synthesis of wax from syngas: Catalyst and process development 295
- Supported rhodium catalysts
Supported phosphonate–phosphane complexes for vapour-phase carbonylation 273
- Syngas conversion
Conversion of syngas to light olefins over silicalite-1 supported iron and cobalt catalysts: Effect of manganese addition 285
- Syngas reaction
Oxygenates from syngas over highly dispersed cobalt catalysts 311
- Syngas
Ceramic membrane reactor for converting methane to syngas 265
Primary amine syntheses from syngas, olefins and ammonia 305
- Temperature scanning
The temperature scanning reactor I: Reactor types and modes of operation 167
The temperature scanning reactor II: Theory of operation 191
The temperature scanning reactor III: Experimental procedures and data processing 209
- Ternary catalysts
Synthesis of methyl methacrylate by vapor phase condensation of formaldehyde with propionate derivatives 243
- tert.*-Alkanoic acid
Synthesis of *tert.*-Alkanoic acid catalyzed by Cu(CO)_n⁺ and Ag(CO)₂⁺ under atmospheric pressure 91
- Tetrahydronaphthalene
Alcohol synthesis in a high-temperature slurry reactor 255
- Theory
The temperature scanning reactor II: Theory of operation 191
- TiO₂ support
Adsorption of CO on gold supported on TiO₂ 115
- Ton
The development of an environmental friendly catalytic system for the conversion of olefins 451
- Transient kinetics
The temperature scanning reactor I: Reactor types and modes of operation 167
The temperature scanning reactor II: Theory of operation 191
- Transition metal cation
New strategy of creation of local catalytic sites in definite electronic and coordination states 485
- Transition metal oxide films
Combined effects of small gold particles on the optical gas sensing by transition metal oxide films 135
- Transport effect
Supercritical-phase process for selective synthesis of wax from syngas: Catalyst and process development 295
- Ultrafine gold particles
Molecular dynamics simulation for ultrafine gold particles deposited on metal oxides 143
- UNIFAC
Liquid phase methanol synthesis from CO₂ utilizing liquid–liquid separation 33
- Vapour-phase carbonylation
Supported phosphonate–phosphane complexes for vapour-phase carbonylation 273

Vinyl pyridine polymer

Hydroformylation catalyzed by immobilized rhodium complex to polymer support 357

Water

The development and functions of silver in water purification and disease control 107

Zeolite catalyst

Deactivation by coking of zeolite catalysts. Prevention of deactivation. Optimal conditions for regeneration 477

Zeolite

Selectivity in heterogeneous catalytic processes 497

Zeolites

Catalytic synthesis of methanol, higher alcohols and ethers 3
The development of an environmental friendly catalytic system for the conversion of olefins 451

Zinc chromite

Alcohol synthesis in a high-temperature slurry reactor 255

Zirconium phosphonate catalysts

Supported phosphonate–phosphane complexes for vapour-phase carbonylation 273

ZSM-5

The effect of pretreatments on different copper exchanged ZSM-5 for the decomposition of NO 57
