

Subject index

Acetone hydrogenation

Mechanisms for activation of hydrogen and hydrogenation of acetone to isopropanol and of carbon oxides to methanol over copper-containing oxide catalysts 457

Acid catalysis

Adsorbed carbocations as transition states in heterogeneous acid catalyzed transformations of hydrocarbons 419

Studies of a new alkene oligomerization catalyst derived from nickel sulfate 153

Acid site

Studies of a new alkene oligomerization catalyst derived from nickel sulfate 153

Molecular models of catalytically active sites in zeolites. Quantum chemical approach 397

Acid–base properties

Catalytic performance, structure, surface properties and active oxygen species of the fluoride-containing rare earth (alkaline earth)-based catalysts for the oxidative coupling of methane and oxidative dehydrogenation of light alkanes 161

Acidity

Titania–silica as catalysts: molecular structural characteristics and physico-chemical properties 233

Acrylonitrile

Recent advances in R and D of commercial catalysts for acrylonitrile synthesis, styrene production and toluene disproportionation processes 141

Active oxygen species

Forty years of applied catalysis research at Xiamen University and its interaction with fundamental catalysis research 3

Additives

Supported metal oxide and other catalysts for ethane conversion: a review 319

Alkane dehydrogenation

Alkane dehydrogenation over supported chromium oxide catalysts 223

Alkene oligomerization

Studies of a new alkene oligomerization catalyst derived from nickel sulfate 153

Alumina

Olefin metathesis over supported rhenium oxide catalysts 289

Rhodium-oxide species formed on progressive oxidation of rhodium clusters dispersed on alumina 93

Amorphous ensemble

Amorphous features of working catalysts 47

Aromatization

Saturation of aromatics and aromatization of C₃ and C₄ hydrocarbons over metal loaded pillared clay catalysts 135

Supported metal oxide and other catalysts for ethane conversion: a review 319

Butane oxidation

Behavior of vanadium–phosphorus-oxides catalyst for butane oxidation to maleic anhydride in a single-tube packed bed reactor 85

Butane

Reaction kinetic behavior of sulfated-zirconia catalysts for butane isomerization 269

C₃ and C₄ hydrocarbons

Saturation of aromatics and aromatization of C₃ and C₄ hydrocarbons over metal loaded pillared clay catalysts 135

C₄ hydrocarbons

Structure–reactivity relationships in oxidation of C₄ hydrocarbons on supported vanadia catalysts 255

C₄O–ZnO catalysts

Mechanisms for activation of hydrogen and hydrogenation of acetone to isopropanol and of carbon oxides to methanol over copper-containing oxide catalysts 457

Calcination temperature

Structure of Co–K–Mo/ γ -Al₂O₃ catalysts and their catalytic activity for mixed alcohols synthesis 187

Carbene and nitrene species

Giant cluster catalysis: possible intermediacy of nitrene and carbene species 595

Carbenium ions

Adsorbed carbocations as transition states in heterogeneous acid catalyzed transformations of hydrocarbons 419

Carbonium ions

Adsorbed carbocations as transition states in heterogeneous acid catalyzed transformations of hydrocarbons 419

Carriers

Study of reactions over sulfide catalysts in CO–CO₂–H₂–H₂O system 25

Catalysis

Catalysis and non-equilibrium thermodynamics: modern in situ studies and new theoretical approaches 435

Research and development of catalytic processes for petroleum and natural gas conversions in the Dalian Institute of Chemical Physics 59

- Catalyst development
 - Methanol reforming for fuel-cell applications: development of zirconia-containing Cu–Zn–Al catalysts 521

- Ethane conversion
Supported metal oxide and other catalysts for ethane conversion: a review 319
- EXAFS/XANES
Titania–silica as catalysts: molecular structural characteristics and physico-chemical properties 233
- Fe–Mo catalyst
Improvement in reactivity, reproducibility and stability of Fe–Mo catalysts by wet mixing 195
- Fine chemicals
Catalysis for fine chemicals: towards specificity with polyphasic media 547
- Flue gases
Progress on the mechanistic understanding of SO₂ oxidation catalysts 469
- Fluoride-containing rare earth-based catalysts
Catalytic performance, structure, surface properties and active oxygen species of the fluoride-containing rare earth (alkaline earth)-based catalysts for the oxidative coupling of methane and oxidative dehydrogenation of light alkanes 161
- Formaldehyde
Condensation of formaldehyde and methyl formate to methyl glycolate and methyl methoxy acetate using heteropolyacids and their salts 127
Improvement in reactivity, reproducibility and stability of Fe–Mo catalysts by wet mixing 195
- Formyl intermediate
Forty years of applied catalysis research at Xiamen University and its interaction with fundamental catalysis research 3
- FTIR
Kinetic and in situ FTIR studies of the catalytic oxidation of 1,2-dichlorobenzene over V₂O₅/Al₂O₃ catalysts 203
- Fuel cell
Methanol reforming for fuel-cell applications: development of zirconia-containing Cu–Zn–Al catalysts 521
- Gas–solid isomorphous substitution
Synthesis, characterization and catalytic properties of low cost titanium silicalite 177
- Gasoline catalytic converter
Catalytic converters: state of the art and perspectives 351
- Glass
Titania–silica as catalysts: molecular structural characteristics and physico-chemical properties 233
- Heterogeneous catalysis
Electrochemical promotion of heterogeneous catalysis 581
Development of technical catalysts 535
- Heterogeneous oxidations
Selective oxidation of light alkanes: interaction between the catalyst and the gas phase on different classes of catalytic materials 561
- Heteropoly compounds
Condensation of formaldehyde and methyl formate to methyl glycolate and methyl methoxy acetate using heteropolyacids and their salts 127
- Highly effective gasoline synthesis
Recent advance in catalysis for solving energy and environmental problems 361
- Highly effective methanol synthesis
Recent advance in catalysis for solving energy and environmental problems 361
- Homogeneous reactions
Selective oxidation of light alkanes: interaction between the catalyst and the gas phase on different classes of catalytic materials 561
- Hydration of cyclohexene
New catalytic technologies in Japan 369
- Hydrodemethylation
Membrane catalysis 391
- Hydrogen peroxide
Catalytic performance in phenol hydroxylation by hydrogen peroxide over a catalyst of V–Zr–O complex 39
- Hydrogen production
Methanol reforming for fuel-cell applications: development of zirconia-containing Cu–Zn–Al catalysts 521
- Hydrogenation
Membrane catalysis 391
Progress in design of new amorphous alloy catalysts 113
- In situ* IR
Catalytic performance, structure, surface properties and active oxygen species of the fluoride-containing rare earth (alkaline earth)-based catalysts for the oxidative coupling of methane and oxidative dehydrogenation of light alkanes 161
- In situ* Raman
Catalytic performance, structure, surface properties and active oxygen species of the fluoride-containing rare earth (alkaline earth)-based catalysts for the oxidative coupling of methane and oxidative dehydrogenation of light alkanes 161
- In situ* Raman spectra
Forty years of applied catalysis research at Xiamen University and its interaction with fundamental catalysis research 3
- In situ* spectroscopy
Alkane dehydrogenation over supported chromium oxide catalysts 223
- Intermediates

ODH

Supported metal oxide and other catalysts for ethane conversion: a review 319

Olefin metathesis

Olefin metathesis over supported rhenium oxide catalysts 289

Olefin polymerization

Olefin polymerization over supported chromium oxide catalysts 215

Oxidation

Kinetic and in situ FTIR studies of the catalytic oxidation of 1,2-dichlorobenzene over V_2O_5/Al_2O_3 catalysts 203

Oxidation of sulfur dioxide over supported vanadia catalysts: molecular structure – reactivity relationships and reaction kinetics 301

Rhodium-oxide species formed on progressive oxidation of rhodium clusters dispersed on alumina 93

Supported metal oxide and other catalysts for ethane conversion: a review 319

The effects of microwaves on the catalyst preparation and the oxidation of *o*-xylene over a V_2O_5/SiO_2 system 147

Oxidative coupling of methane

Catalytic performance, structure, surface properties and active oxygen species of the fluoride-containing rare earth (alkaline earth)-based catalysts for the oxidative coupling of methane and oxidative dehydrogenation of light alkanes 161

Oxidative dehydrogenation of light alkanes

Catalytic performance, structure, surface properties and active oxygen species of the fluoride-containing rare earth (alkaline earth)-based catalysts for the oxidative coupling of methane and oxidative dehydrogenation of light alkanes 161

Oxides

Supported metal oxide and other catalysts for ethane conversion: a review 319

Oxygen species

Catalytic performance, structure, surface properties and active oxygen species of the fluoride-containing rare earth (alkaline earth)-based catalysts for the oxidative coupling of methane and oxidative dehydrogenation of light alkanes 161

Oxygenates

Supported metal oxide and other catalysts for ethane conversion: a review 319

Palladium black

Membrane catalysis 391

Petrochemistry

Research and development of catalytic processes for petroleum and natural gas conversions in the Dalian Institute of Chemical Physics 59

Photocatalysis

Titania–silica as catalysts: molecular structural characteristics and physico-chemical properties 233

Pillared clay

Saturation of aromatics and aromatization of C_3 and C_4 hydrocarbons over metal loaded pillared clay catalysts 135

Pilot plant test

Development of technical catalysts 535

Plasma spraying

Application of plasma spraying in the preparation of metal-supported catalysts 411

Pore size effect

Catalytic behavior of vanadium substituted mesoporous molecular sieves 501

Porous ceramic membrane

Catalytic reactors based on porous ceramic membranes 377

Potassium

Study of reactions over sulfide catalysts in $CO-CO_2-H_2-H_2O$ system 25

Promoters

Study of reactions over sulfide catalysts in $CO-CO_2-H_2-H_2O$ system 25

Raman

Titania–silica as catalysts: molecular structural characteristics and physico-chemical properties 233

Rapid methane reforming

Recent advance in catalysis for solving energy and environmental problems 361

Rare-earth catalysts

Forty years of applied catalysis research at Xiamen University and its interaction with fundamental catalysis research 3

Reaction mechanism

Progress on the mechanistic understanding of SO_2 oxidation catalysts 469

Synthesis, characterization and catalytic properties of low cost titanium silicalite 177

Redox properties

Selective oxidation of light alkanes: interaction between the catalyst and the gas phase on different classes of catalytic materials 561

Reduction

Mechanisms for activation of hydrogen and hydrogenation of acetone to isopropanol and of carbon oxides to methanol over copper-containing oxide catalysts 457

Rhodium-oxide species formed on progressive oxidation of rhodium clusters dispersed on alumina 93

Regioselectivity

Catalysis for fine chemicals: towards specificity with polyphasic media 547

Review

Catalysis for fine chemicals: towards specificity with polyphasic media 547

Rh-modified Ni-based composite catalyst

Recent advance in catalysis for solving energy and environmental problems 361

Rhenium oxide

Olefin metathesis over supported rhenium oxide catalysts 289

Rhodium-oxides

Rhodium-oxide species formed on progressive oxidation of rhodium clusters dispersed on alumina 93

Saturation of aromatics

Saturation of aromatics and aromatization of C_3 and C_4 hydrocarbons over metal loaded pillared clay catalysts 135
