Subject index

- α -Al₂O₃
 - Preparation and characterisation of nickel-modified ceramic filters 229
- Activated carbon
 - Hydration of α -pinene over zeolites and activated carbons dispersed in polymeric membranes 167
- Adsorption
 - Experimental study and numerical simulation of hydrogen/isobutane permeation and separation using MFI-zeolite membrane reactor 253
- Aqueous NO₃ reduction
 - Catalytic membrane in reduction of aqueous nitrates: operational principles and catalytic performance 137
- Atomic force microscopy
 - EUROCAT oxide: an European V₂O₅–WO₃/TiO₂ SCR standard catalyst study. Characterisation by electron microscopies (SEM, HRTEM, EDX) and by atomic force microscopy 415
- Benzene
 - Electrochemical coupling of benzene hydrogenation and water electrolysis 307
- Butane isomers
 - Permeation characteristics of butane isomers through MFI-type zeolitic membranes 265
- Butane oxidation
 - Use of membrane reactors for the oxidation of butane to maleic anhydride under high butane concentrations 191
- Carbon membrane
 - A carbon membrane reactor 103
- Catalysis
 - Dense organic catalytic membranes for fine chemical synthesis 147
- Catalytic filter
 - Preparation and characterisation of nickel-modified ceramic filters 229
- Catalytic membrane
 - Zeolite containing catalytic membranes as interphase contactors 113
- Catalytic membrane reactor
 - Catalytic membrane reactors for spontaneous synthesis gas production 325
 - Dense organic catalytic membranes for fine chemical synthesis 147
 - Selective hydrocarbon oxidation using a liquid-phase catalytic membrane reactor 131
- An analysis of the performance of membrane reactors for the water–gas shift reaction using gas feed mixtures 53
- Vanadium-based catalytic membrane reactors for the oxidative dehydrogenation of propane 247
- Catalytic reduction
 - Characterisation by EPR spectroscopy 371
- Ceramic membrane
 - Catalytic dehydrogenation of hydrocarbons in palladium composite membrane reactors 21
- Characterization
 - XPS and SIMS characterization 403
- Chemical analysis
 - Surface area and porosity, X-ray diffraction and chemical analyses 335
- Chemical diffusion coefficient
 - Measurements of surface exchange kinetics and chemical diffusion in dense oxygen selective membranes 315
- Chemical vapor deposition
 - Hydrogen permeation properties through composite membranes of platinum supported on porous alumina 65
- Composite membrane
 - Catalytic dehydrogenation of hydrocarbons in palladium composite membrane reactors 21
- Concentration gradient
 - Permeation characteristics of butane isomers through MFI-type zeolitic membranes 265
- Conducting ceramics
 - Prospects and problems of dense oxygen permeable membranes 283
- Continuous direct contact membrane reactor
 - Analysis of a direct contact membrane reactor for lipase catalysed oil hydrolysis in a dynamic emulsion system 179
- CVD membranes
 - Membrane reactor application to hydrogen production 97
- Defects
 - Fabrication of dense palladium composite membranes for hydrogen separation 45
- Dehydrogenation
 - A carbon membrane reactor 103
 - Catalytic dehydrogenation of hydrocarbons in palladium composite membrane reactors 21
- Denitrification
 - Characterisation by vibrational and electronic spectroscopies 361

- DeNO_x reaction
Electrical properties of V₂O₅–WO₃/TiO₂ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) deNO_x reaction 389
- DeNO_x
Catalytic properties in deNO_x and SO₂–SO₃ reactions 431
- Dense membranes
Dense organic catalytic membranes for fine chemical synthesis 147
- Doping effects
Electrical properties of V₂O₅–WO₃/TiO₂ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) deNO_x reaction 389
- DR UV–Vis spectroscopies
Characterisation by vibrational and electronic spectroscopies 361
- Dynamic emulsion system
Analysis of a direct contact membrane reactor for lipase catalysed oil hydrolysis in a dynamic emulsion system 179
- Electrical conductivity
Electrical properties of V₂O₅–WO₃/TiO₂ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) deNO_x reaction 389
- Electrocatalytic reduction
Use of electrocatalytic membrane reactor for synthesis of sorbitol 173
- Electrochemical synthesis
Use of electrocatalytic membrane reactor for synthesis of sorbitol 173
- Electroless plating
Fabrication of dense palladium composite membranes for hydrogen separation 45
Preparation and characterization of palladium-based composite membranes by electroless plating and magnetron sputtering 89
Hydrogen permeation properties through composite membranes of platinum supported on porous alumina 65
- Electroless-plating membranes
Membrane reactor application to hydrogen production 97
- Electron microscopies
EUROCAT oxide: an European V₂O₅–WO₃/TiO₂ SCR standard catalyst study. Characterisation by electron microscopies (SEM, HRTEM, EDX) and by atomic force microscopy 415
- Electron paramagnetic resonance
Characterisation by EPR spectroscopy 371
- Electron processes
Electrical properties of V₂O₅–WO₃/TiO₂ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) deNO_x reaction 389
- Equilibrium shift
A carbon membrane reactor 103
- Ethanol
Ethanol production in membrane distillation bioreactor 159
- EUROCAT catalyst
Electrical properties of V₂O₅–WO₃/TiO₂ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) deNO_x reaction 389
- EUROCAT oxide
Characterisation by EPR spectroscopy 371
Characterisation by thermal techniques 357
Characterisation by vibrational and electronic spectroscopies 361
Characterization by temperature programmed reduction 347
EUROCAT oxide: an European V₂O₅–WO₃/TiO₂ SCR standard catalyst study. Characterisation by electron microscopies (SEM, HRTEM, EDX) and by atomic force microscopy 415
Industrial features 333
- EUROCAT V₂O₅–WO₃/TiO₂ samples
Other catalytic properties 443
- Fermentation
Ethanol production in membrane distillation bioreactor 159
- Fine chemicals
Dense organic catalytic membranes for fine chemical synthesis 147
- Gas separation
Experimental study and numerical simulation of hydrogen/isobutane permeation and separation using MFI-zeolite membrane reactor 253
- H₂ separation
Preparation and characterization of palladium-based composite membranes by electroless plating and magnetron sputtering 89
- H₂S poisoning
The effect of hydrogen removal during methane steam reforming in membrane reactors in the presence of hydrogen sulphide 13
- Heteropolyacid
Simulation and experimental study on the polymer membrane reactors for the vapor-phase MTBE (methyl tert-butyl ether) decomposition 275
- n*-hexane oxyfunctionalization
Zeolite containing catalytic membranes as interphase contactors 113
- Hollow fiber
A carbon membrane reactor 103
- Hot gas cleaning
Preparation and characterisation of nickel-modified ceramic filters 229
- Hydrocarbon permeance
Mordenite and ZSM-5 hydrophilic tubular membranes for the separation of gas phase mixtures 221
- Hydrogen
Membrane reactor application to hydrogen production 97
- Hydrogen permeation
Hydrogen permeation properties through composite membranes of platinum supported on porous alumina 65
- Hydrogen permeation properties
Rhodium- and iridium-dispersed porous alumina membranes and their hydrogen permeation properties 83
- Hydrogen permselective membrane
Catalytic dehydrogenation of hydrocarbons in palladium composite membrane reactors 21

- Hydrogen separation
Fabrication of dense palladium composite membranes for hydrogen separation 45
- Hydrogenation
Electrochemical coupling of benzene hydrogenation and water electrolysis 307
- Industrial aspects
Industrial features 333
- Inert membrane reactor
Oxidative dehydrogenation of propane in an inert membrane reactor 239
Use of membrane reactors for the oxidation of butane to maleic anhydride under high butane concentrations 191
- Interphase contactors
Zeolite containing catalytic membranes as interphase contactors 113
- Intraporous mass transport
Catalytic membrane in reduction of aqueous nitrates: operational principles and catalytic performance 137
- IR
Characterisation by vibrational and electronic spectroscopies 361
- Iridium
Rhodium- and iridium-dispersed porous alumina membranes and their hydrogen permeation properties 83
- Kinetic-diffusion membrane model
Zeolite containing catalytic membranes as interphase contactors 113
- Lipase catalysed oil hydrolysis
Analysis of a direct contact membrane reactor for lipase catalysed oil hydrolysis in a dynamic emulsion system 179
- Magnetron sputtering
Preparation and characterization of palladium-based composite membranes by electroless plating and magnetron sputtering 89
- Maleic anhydride
Use of membrane reactors for the oxidation of butane to maleic anhydride under high butane concentrations 191
- Membrane
Oxidative coupling of methane using oxygen-permeable dense membrane reactors 297
- Membrane bioreactor
Ethanol production in membrane distillation bioreactor 159
- Membrane distillation
Ethanol production in membrane distillation bioreactor 159
- Membrane reactor
A carbon membrane reactor 103
Catalytic dehydrogenation of hydrocarbons in palladium composite membrane reactors 21
Characteristics and performance in the oxidative dehydrogenation of propane of MFI and V-MFI zeolite membranes 199
Investigation of sol-gel methods for the synthesis of VPO membrane materials adapted to the partial oxidation of *n*-butane 211
Membrane performance: the key issues for dehydrogenation reactions in a catalytic membrane reactor 3
- Oxidation of isobutane over supported noble metal catalysts in a palladium membrane reactor 35
Simulation and experimental study on the polymer membrane reactors for the vapor-phase MTBE (methyl tert-butyl ether) decomposition 275
Steam reforming of methane in membrane reactors: comparison of electroless-plating and CVD membranes and catalyst packing modes 75
The effect of hydrogen removal during methane steam reforming in membrane reactors in the presence of hydrogen sulphide 13
Use of electrocatalytic membrane reactor for synthesis of sorbitol 173
- Methane
Oxidative coupling of methane using oxygen-permeable dense membrane reactors 297
Steam reforming of methane in membrane reactors: comparison of electroless-plating and CVD membranes and catalyst packing modes 75
The effect of hydrogen removal during methane steam reforming in membrane reactors in the presence of hydrogen sulphide 13
- MFI
Experimental study and numerical simulation of hydrogen/isobutane permeation and separation using MFI-zeolite membrane reactor 253
- Mixed conducting ceramics
Prospects and problems of dense oxygen permeable membranes 283
- Mixture gases feed
An analysis of the performance of membrane reactors for the water-gas shift reaction using gas feed mixtures 53
- Modeling
Experimental study and numerical simulation of hydrogen/isobutane permeation and separation using MFI-zeolite membrane reactor 253
- MTBE
Simulation and experimental study on the polymer membrane reactors for the vapor-phase MTBE (methyl tert-butyl ether) decomposition 275
- Natural gas
Catalytic membrane reactors for spontaneous synthesis gas production 325
- Nickel
Preparation and characterisation of nickel-modified ceramic filters 229
- Osmosis
Fabrication of dense palladium composite membranes for hydrogen separation 45
- Oxidation
Oxidative coupling of methane using oxygen-permeable dense membrane reactors 297
Selective hydrocarbon oxidation using a liquid-phase catalytic membrane reactor 131
- Oxidative dehydrogenation
Oxidation of isobutane over supported noble metal catalysts in a palladium membrane reactor 35

- Oxidative dehydrogenation of propane in an inert membrane reactor 239
- Vanadium-based catalytic membrane reactors for the oxidative dehydrogenation of propane 247
- Oxidative dehydrogenation
 - Other catalytic properties 443
- Oxidative dehydrogenation of propane
 - Characteristics and performance in the oxidative dehydrogenation of propane of MFI and V-MFI zeolite membranes 199
- Oxide catalysts
 - XPS and SIMS characterization 403
- Oxidising and non-oxidising conditions
 - Other catalytic properties 443
- Oxygen permeable membranes
 - Prospects and problems of dense oxygen permeable membranes 283
- Palladium membrane
 - Oxidation of isobutane over supported noble metal catalysts in a palladium membrane reactor 35
 - Fabrication of dense palladium composite membranes for hydrogen separation 45
- Pd–Cu catalysts
 - Catalytic membrane in reduction of aqueous nitrates: operational principles and catalytic performance 137
- Pd-based membrane
 - Preparation and characterization of palladium-based composite membranes by electroless plating and magnetron sputtering 89
- Pd/Ag membrane
 - Membrane performance: the key issues for dehydrogenation reactions in a catalytic membrane reactor 3
- PDMS
 - Dense organic catalytic membranes for fine chemical synthesis 147
- PDMS membranes
 - Hydration of α -pinene over zeolites and activated carbons dispersed in polymeric membranes 167
- Permeable membrane
 - Prospects and problems of dense oxygen permeable membranes 283
- α -pinene hydration
 - Hydration of α -pinene over zeolites and activated carbons dispersed in polymeric membranes 167
- Polymer electrolyte
 - Electrochemical coupling of benzene hydrogenation and water electrolysis 307
- Polymer membrane
 - Simulation and experimental study on the polymer membrane reactors for the vapor-phase MTBE (methyl tert-butyl ether) decomposition 275
- Porosity
 - Surface area and porosity, X-ray diffraction and chemical analyses 335
- Porous alumina
 - Hydrogen permeation properties through composite membranes of platinum supported on porous alumina 65
- Porous catalytic membrane
 - Catalytic membrane in reduction of aqueous nitrates: operational principles and catalytic performance 137
- Preformed support
 - Preparation and characterisation of nickel-modified ceramic filters 229
- Pressure gradient
 - Permeation characteristics of butane isomers through MFI-type zeolitic membranes 265
- Propan-2-ol conversion
 - Other catalytic properties 443
- Propane
 - Oxidative dehydrogenation of propane in an inert membrane reactor 239
- Propane dehydrogenation
 - Membrane performance: the key issues for dehydrogenation reactions in a catalytic membrane reactor 3
- Propene
 - Oxidative dehydrogenation of propane in an inert membrane reactor 239
- Pure and La- and Ti-doped $\text{Sr}_4\text{Fe}_6\text{O}_{13}$
 - Measurements of surface exchange kinetics and chemical diffusion in dense oxygen selective membranes 315
- Raman
 - Characterisation by vibrational and electronic spectroscopies 361
- Rhodium
 - Rhodium- and iridium-dispersed porous alumina membranes and their hydrogen permeation properties 83
- SCR catalyst
 - Characterization by solid state ^{51}V NMR spectroscopy 379
- SCR standard catalyst
 - Industrial features 333
- SCR
 - Electrical properties of $\text{V}_2\text{O}_5\text{--WO}_3/\text{TiO}_2$ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) de NO_x reaction 389
- Selective catalytic reduction
 - Catalytic properties in de NO_x and $\text{SO}_2\text{--SO}_3$ reactions 431
- Selective dissolution
 - Surface area and porosity, X-ray diffraction and chemical analyses 335
- SIMS
 - XPS and SIMS characterization 403
- Simulation
 - Simulation and experimental study on the polymer membrane reactors for the vapor-phase MTBE (methyl tert-butyl ether) decomposition 275
- $\text{SO}_2\text{--SO}_3$ reactions
 - Catalytic properties in de NO_x and $\text{SO}_2\text{--SO}_3$ reactions 431
- Sol–gel process
 - Investigation of sol–gel methods for the synthesis of VPO membrane materials adapted to the partial oxidation of *n*-butane 211

- Solid state ^{51}V NMR
Characterization by solid state ^{51}V NMR spectroscopy 379
- Solution-diffusion transport mechanism
Membrane reactor application to hydrogen production 97
- Sorbital
Use of electrocatalytic membrane reactor for synthesis of sorbitol 173
- Spontaneous conversion
Catalytic membrane reactors for spontaneous synthesis gas production 325
- Stainless-steel membrane
Catalytic dehydrogenation of hydrocarbons in palladium composite membrane reactors 21
- Static and MAS experiments
Characterization by solid state ^{51}V NMR spectroscopy 379
- Steam reforming
Membrane reactor application to hydrogen production 97
- Steam reforming
Steam reforming of methane in membrane reactors: comparison of electroless-plating and CVD membranes and catalyst packing modes 75
- Steam reforming
The effect of hydrogen removal during methane steam reforming in membrane reactors in the presence of hydrogen sulphide 13
- Supported platinum membrane
Hydrogen permeation properties through composite membranes of platinum supported on porous alumina 65
- Surface area
Surface area and porosity, X-ray diffraction and chemical analyses 335
- Surface diffusion mechanism
Membrane reactor application to hydrogen production 97
- Surface exchange rate constant
Measurements of surface exchange kinetics and chemical diffusion in dense oxygen selective membranes 315
- Synthesis gas
Catalytic membrane reactors for spontaneous synthesis gas production 325
Prospects and problems of dense oxygen permeable membranes 283
- Temperature programmed reduction
Characterization by temperature programmed reduction 347
- Thermal analysis
Characterisation by thermal techniques 357
- Thermogravimetric analysis
Characterisation by thermal techniques 357
- Transient thermogravimetric measurements
Measurements of surface exchange kinetics and chemical diffusion in dense oxygen selective membranes 315
- Urea
Preparation and characterisation of nickel-modified ceramic filters 229
- V-MFI membranes
Characteristics and performance in the oxidative dehydrogenation of propane of MFI and V-MFI zeolite membranes 199
- $\text{V}_2\text{O}_5\text{--NO}_3/\text{TiO}_2$ redox processes
Electrical properties of $\text{V}_2\text{O}_5\text{--WO}_3/\text{TiO}_2$ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) de NO_x reaction 389
- $\text{V}_2\text{O}_5\text{--WO}_3/\text{TiO}_2$
Industrial features 333
- Vanadia-tungsten-titania catalysts
Characterization by temperature programmed reduction 347
- Vanadia-tungsten/titania
Electrical properties of $\text{V}_2\text{O}_5\text{--WO}_3/\text{TiO}_2$ EUROCAT catalysts evidence for redox process in selective catalytic reduction (SCR) de NO_x reaction 389
- Vanadium supported catalysts
Vanadium-based catalytic membrane reactors for the oxidative dehydrogenation of propane 247
- VPO membrane
Investigation of sol-gel methods for the synthesis of VPO membrane materials adapted to the partial oxidation of *n*-butane 211
- Water electrolysis
Electrochemical coupling of benzene hydrogenation and water electrolysis 307
- Water separation
Mordenite and ZSM-5 hydrophilic tubular membranes for the separation of gas phase mixtures 221
- Water-gas shift reaction
An analysis of the performance of membrane reactors for the water-gas shift reaction using gas feed mixtures 53
- X-ray diffraction
Surface area and porosity, X-ray diffraction and chemical analyses 335
- XPS
XPS and SIMS characterization 403
- Zeolite beta
Hydration of α -pinene over zeolites and activated carbons dispersed in polymeric membranes 167
- Zeolite membrane
Experimental study and numerical simulation of hydrogen/isobutane permeation and separation using MFI-zeolite membrane reactor 253
Characteristics and performance in the oxidative dehydrogenation of propane of MFI and V-MFI zeolite membranes 199
Mordenite and ZSM-5 hydrophilic tubular membranes for the separation of gas phase mixtures 221
- Zeolite USY
Hydration of α -pinene over zeolites and activated carbons dispersed in polymeric membranes 167
- Zeolite-encapsulated iron-phthalocyanine
Selective hydrocarbon oxidation using a liquid-phase catalytic membrane reactor 131
- Zeolitic membranes
Permeation characteristics of butane isomers through MFI-type zeolitic membranes 265
