Subject index

Ab initio HF approaches

Study of MoO_3 (0 1 0) surface clusters by ab initio HF approaches 243

Acrylic acid

Reaction pathways in the selective oxidation of propane over a mixed metal oxide catalyst 223

Alkali promoters

Oxidative dehydrogenation of propane over vanadium oxide based catalysts. Effect of support and alkali promoter 333

Alkali-ion

Photocatalytic oxidation of alkane at a steady rate over alkali-ion-modified vanadium oxide supported on silica 109

Ammonia

NH_3 oxidation to nitrogen and water at low temperatures using supported transition metal catalysts 179

Ammonia oxidation

Characterization and reactivity of $\text{MoO}_3/\text{SiO}_2$ catalysts in the selective catalytic oxidation of ammonia to N_2 187

Ammonoxidation

Ammonoxidation of methylpyrazine over V–Ti oxide system 173
Correlations between the optical basicity of catalysts and their selectivity in oxidation of alcohols, ammonoxidation and combustion of hydrocarbons 197

Amorphous titanasilicate

Surface modified amorphous titanasilicate catalysts for liquid phase epoxidation 49

Antimony

Oxidative dehydrogenation of propane on zeolite catalysts 343

Aromatic compounds

Selective oxidation of aromatic compounds on zeolites using N_2O as a mild oxidant. A new approach to design active sites 123

Bed reactor

A two-phase compartments model for the selective oxidation of *n*-butane in a circulating fluidized bed reactor 73

Benzaldehyde

In situ DRIFT study of the reactivity and reaction mechanism of catalysts based on iron–molybdenum oxides encapsulated in Boralite for the selective oxidation of alkylaromatics 211

Benzene

Direct synthesis of phenol from benzene over hydroxyapatite catalysts 143

Biphasic

Supported micelles in biphasic oxidation catalysis 29

Bismuth

Stability of bimetallic Bi–Pd and Pb–Pd carbon-supported catalysts during their use in glyoxal oxidation 255

Bismuth molybdate catalysts

New insights in the understanding of the behaviour and performances of bismuth molybdate catalysts in the oxygen-assisted dehydration of 2-butanol 279

Bonding properties

Study of MoO_3 (0 1 0) surface clusters by ab initio HF approaches 243

Boron

Oxidative dehydrogenation of propane on zeolite catalysts 343

n-Butane

A two-phase compartments model for the selective oxidation of *n*-butane in a circulating fluidized bed reactor 73

MoO_3/MgO as a catalyst in the oxidative dehydrogenation of *n*-butane in a two-zone fluidized bed reactor 101

Relationship between structural/surface characteristics and reactivity in *n*-butane oxidation to maleic anhydride. The role of V^{3+} species 203

Butane-rich feed

The use of membrane reactors for catalytic *n*-butane oxidation to maleic anhydride with a butane-rich feed 3

2-butanol

New insights in the understanding of the behaviour and performances of bismuth molybdate catalysts in the oxygen-assisted dehydration of 2-butanol 279

Calcium

Oxidative dehydrogenation of propane on zeolite catalysts 343

Carbon dioxide use in ODH

Oxidative dehydrogenation of isobutane over LaBaSm oxide catalyst. Influence of the addition of CO_2 in the feed 369

Catalytic activity

A correlation between crystal structure and catalytic activity in the solid solutions $\text{CdMo}_x\text{W}_{1-x}\text{O}_4$ 231

Catalytic membrane

Partial oxidation of propane on Nafion supported catalytic membranes 37

C_3 – C_4 -alkanes

On the role of heterogeneous and homogeneous processes in oxidative dehydrogenation of C_3 – C_4 alkanes 287

$\text{CdMo}_x\text{W}_{1-x}\text{O}_4$

A correlation between crystal structure and catalytic activity in the solid solutions $\text{CdMo}_x\text{W}_{1-x}\text{O}_4$ 231

- Ceria catalysts
 Selective oxidehydrogenation of ethane with CO₂ over CeO₂-based catalysts 43
- CO₂ as oxidant
 Selective oxidehydrogenation of ethane with CO₂ over CeO₂-based catalysts 43
- Cobalt oxides
 Partial oxidation of alkanes to oxygenates in supercritical carbon dioxide 9
- Copper catalyst
 NH₃ oxidation to nitrogen and water at low temperatures using supported transition metal catalysts 179
- Copper oxide
 NH₃ oxidation to nitrogen and water at low temperatures using supported transition metal catalysts 179
- Copper-zeolite Y
 NH₃ oxidation to nitrogen and water at low temperatures using supported transition metal catalysts 179
- Corundum micromonoliths
 Oxidative dehydrogenation of propane over monoliths at short contact times 93
- Cr–Al–Nb oxide
 High-throughput synthesis and screening of V–Al–Nb and Cr–Al–Nb oxide libraries for ethane oxidative dehydrogenation to ethylene 87
- Crystal structure
 A correlation between crystal structure and catalytic activity in the solid solutions CdMo_xW_{1-x}O₄ 231
- Dehydrogenation
 A comparison of H₂ addition to 3 ms partial oxidation reactions 65
- Diffuse reflectance infrared Fourier transform spectroscopy
 Physico-chemical properties of V–Sb-oxide systems and their catalytic behaviour in oxidative dehydrogenation of light paraffins 325
- DRIFT
 In situ DRIFT study of the reactivity and reaction mechanism of catalysts based on iron–molybdenum oxides encapsulated in Boralite for the selective oxidation of alkylaromatics 211
- Epoxidation
 Supported micelles in biphasic oxidation catalysis 29
 Surface modified amorphous titanasilicate catalysts for liquid phase epoxidation 49
- EPR
 Catalytic hydroxylation of benzene over vanadium-containing molecular sieves 137
- Ethane
 Comparison of behaviour of rare earth containing catalysts in the oxidative dehydrogenation of ethane 317
- Ethane oxidation
 Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295
- Faujasite
 Oxidative dehydrogenation of propane on zeolite catalysts 343
- Fenton system
 Partial oxidation of propane on Nafion supported catalytic membranes 37
- Fluidized bed reactor
 MoO₃/MgO as a catalyst in the oxidative dehydrogenation of *n*-butane in a two-zone fluidized bed reactor 101
- FT-IR
 Catalytic hydroxylation of benzene over vanadium-containing molecular sieves 137
- Gallium
 Oxidative dehydrogenation of propane on zeolite catalysts 343
- Glyoxal oxidation
 Stability of bimetallic Bi–Pd and Pb–Pd carbon-supported catalysts during their use in glyoxal oxidation 255
- H₂ addition
 A comparison of H₂ addition to 3 ms partial oxidation reactions 65
- Heterogeneous and homogeneous processes
 On the role of heterogeneous and homogeneous processes in oxidative dehydrogenation of C₃–C₄ alkanes 287
- Heterogeneous catalyst
 Partial oxidation of alkanes to oxygenates in supercritical carbon dioxide 9
- Heterogeneous gold catalyst
 Metal sols as a useful tool for heterogeneous gold catalyst preparation: reinvestigation of a liquid phase oxidation 165
- H₂O₂
 Generation of H₂O₂ from H₂ and O₂ over zeolite beta containing Pd and heterogenized organic compounds 117
 Preliminary study on the TS-1 deactivation during styrene oxidation with H₂O₂ 263
- H₂S
 Selective oxidation of H₂S in Claus tail-gas over SiC supported NiS₂ catalyst 157
- H₂S abatement
 Selective oxidation of H₂S in Claus tail-gas over SiC supported NiS₂ catalyst 157
- H₂S selective oxidation
 Study of H₂S selective oxidation on new model catalysts. Influence of composition 149
- Hydrocarbon
 Chemistry of surface oxygen formed from N₂O on ZSM-5 at moderate temperatures 129
- Hydroquinone-adsorbed Pd-zeolite
 Generation of H₂O₂ from H₂ and O₂ over zeolite beta containing Pd and heterogenized organic compounds 117
- Hydroxyapatite catalysts
 Direct synthesis of phenol from benzene over hydroxyapatite catalysts 143
- Hydroxylation of benzene
 Catalytic hydroxylation of benzene over vanadium-containing molecular sieves 137

- In situ Raman**
Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295
- In situ UV–Vis DRS**
Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295
- Indium**
Oxidative dehydrogenation of propane on zeolite catalysts 343
- Infrared**
In situ DRIFT study of the reactivity and reaction mechanism of catalysts based on iron–molybdenum oxides encapsulated in Boralite for the selective oxidation of alkylaromatics 211
- Infrared spectroscopy**
Oxidative dehydrogenation of *n*-butane and 1-butene on undoped and K-doped VO_x/Al₂O₃ catalysts 361
- Integrated reactor concepts**
Syngas formation by direct oxidation of methane. Reaction mechanisms and new reactor concepts 55
- Iron mixed valency**
Study of H₂S selective oxidation on new model catalysts. Influence of composition 149
- Iron–molybdate**
In situ DRIFT study of the reactivity and reaction mechanism of catalysts based on iron–molybdenum oxides encapsulated in Boralite for the selective oxidation of alkylaromatics 211
- Isobutane**
Oxidative dehydrogenation of isobutane over LaBaSm oxide catalyst. Influence of the addition of CO₂ in the feed 369
Oxidative dehydrogenation of isobutane over magnesium molybdate catalysts 377
- Isobutene**
Oxidative dehydrogenation of isobutane over LaBaSm oxide catalyst. Influence of the addition of CO₂ in the feed 369
- LaBaSm oxide catalyst**
Oxidative dehydrogenation of isobutane over LaBaSm oxide catalyst. Influence of the addition of CO₂ in the feed 369
- Lead**
Stability of bimetallic Bi–Pd and Pb–Pd carbon-supported catalysts during their use in glyoxal oxidation 255
- Light paraffins**
Physico-chemical properties of V–Sb-oxide systems and their catalytic behaviour in oxidative dehydrogenation of light paraffins 325
- Liquid phase oxidation**
Metal sols as a useful tool for heterogeneous gold catalyst preparation: reinvestigation of a liquid phase oxidation 165
- Magnesium**
Oxidative dehydrogenation of propane on zeolite catalysts 343
- Magnesium molybdate catalysts**
Oxidative dehydrogenation of isobutane over magnesium molybdate catalysts 377
- Maleic anhydride**
The use of membrane reactors for catalytic *n*-butane oxidation to maleic anhydride with a butane-rich feed 3
A two-phase compartments model for the selective oxidation of *n*-butane in a circulating fluidized bed reactor 73
Relationship between structural/surface characteristics and reactivity in *n*-butane oxidation to maleic anhydride. The role of V³⁺ species 203
- Mechanical mixture**
New results on the oxidative dehydrogenation of ethane to ethylene. Promoting catalytic performance of Mo–V- and Ni–V-oxide by α -Sb₂O₄ 309
- Membrane reactors**
The use of membrane reactors for catalytic *n*-butane oxidation to maleic anhydride with a butane-rich feed 3
- Metal sols**
Metal sols as a useful tool for heterogeneous gold catalyst preparation: reinvestigation of a liquid phase oxidation 165
- Methane**
Oxidative transformation of methane over nickel catalysts supported on rare-earth metal oxides 303
- Methane oxidation**
Syngas formation by direct oxidation of methane. Reaction mechanisms and new reactor concepts 55
- Methane steam reforming**
Micro-kinetic analysis and Monte Carlo simulation in methane partial oxidation into synthesis gas 237
- Methylpyrazine**
Ammoxidation of methylpyrazine over V–Ti oxide system 173
- Micro-kinetics**
Micro-kinetic analysis and Monte Carlo simulation in methane partial oxidation into synthesis gas 237
- Mild Oxidation**
A correlation between crystal structure and catalytic activity in the solid solutions CdMo_xW_{1-x}O₄ 231
- Mixed metal oxide catalyst**
Reaction pathways in the selective oxidation of propane over a mixed metal oxide catalyst 223
- Mn-MCM41**
Structural and oxidative properties of Mn-MCM41 catalysts synthesised by MOCVD method 19
- MOCVD**
Structural and oxidative properties of Mn-MCM41 catalysts synthesised by MOCVD method 19
- MoO₃**
Study of MoO₃ (0 1 0) surface clusters by ab initio HF approaches 243
- MoO₃/SiO₂ catalysts**
Characterization and reactivity of MoO₃/SiO₂ catalysts in the selective catalytic oxidation of ammonia to N₂ 187
- Nafion**
Partial oxidation of propane on Nafion supported catalytic membranes 37
- Nano-reactor**
Supported micelles in biphasic oxidation catalysis 29
- Ni**
Oxidative transformation of methane over nickel catalysts supported on rare-earth metal oxides 303

Nicotinic acid

Formation of active state in vanadium–titanium oxide system regarding to reaction of oxidation of β -picoline to nicotinic acid 249

 N_2O

Chemistry of surface oxygen formed from N_2O on ZSM-5 at moderate temperatures 129

Non-hydrolytic condensation

Mixed-oxide catalysts involving V, Nb and Si obtained by a non-hydrolytic sol–gel route: preparation and catalytic behaviour in oxydative dehydrogenation of propane 353

Optical basicity

Correlations between the optical basicity of catalysts and their selectivity in oxidation of alcohols, ammoxidation and combustion of hydrocarbons 197

Orbital populations

Study of MoO_3 (0 1 0) surface clusters by ab initio HF approaches 243

Oxidation

Supported micelles in biphasic oxidation catalysis 29

Direct synthesis of phenol from benzene over hydroxyapatite catalysts 143

NH_3 oxidation to nitrogen and water at low temperatures using supported transition metal catalysts 179

Reaction pathways in the selective oxidation of propane over a mixed metal oxide catalyst 223

Oxidation state

Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295

Oxidative coupling

Oxidative transformation of methane over nickel catalysts supported on rare-earth metal oxides 303

Oxidative dehydrogenation

High-throughput synthesis and screening of V–Al–Nb and Cr–Al–Nb oxide libraries for ethane oxidative dehydrogenation to ethylene 87

MoO_3/MgO as a catalyst in the oxidative dehydrogenation of *n*-butane in a two-zone fluidized bed reactor 101

On the role of heterogeneous and homogeneous processes in oxidative dehydrogenation of C_3 – C_4 alkanes 287

Comparison of behaviour of rare earth containing catalysts in the oxidative dehydrogenation of ethane 317

Physico-chemical properties of V–Sb-oxide systems and their catalytic behaviour in oxidative dehydrogenation of light paraffins 325

Oxidative dehydrogenation of propane over vanadium oxide based catalysts. Effect of support and alkali promoter 333

Oxidative dehydrogenation of propane on zeolite catalysts 343

Oxidative dehydrogenation of *n*-butane and 1-butene on undoped and K-doped VO_x/Al_2O_3 catalysts 361

Oxidative dehydrogenation of isobutane over LaBaSm oxide catalyst. Influence of the addition of CO_2 in the feed 369

Oxidative dehydrogenation of isobutane over magnesium molybdate catalysts 377

Oxidative dehydrogenation of ethane

New results on the oxidative dehydrogenation of ethane to ethylene. Promoting catalytic performance of Mo–V- and Ni–V-oxide by α - Sb_2O_4 309

Oxidative dehydrogenation of propane

Mixed-oxide catalysts involving V, Nb and Si obtained by a non-hydrolytic sol–gel route: preparation and catalytic behaviour in oxydative dehydrogenation of propane 353

Oxidehydrogenation of ethane

Selective oxidehydrogenation of ethane with CO_2 over CeO_2 -based catalysts 43

Oxygen assisted dehydration

New insights in the understanding of the behaviour and performances of bismuth molybdate catalysts in the oxygen-assisted dehydration of 2-butanol 279

Oxygenates

Partial oxidation of alkanes to oxygenates in supercritical carbon dioxide 9

Partial oxidation

Partial oxidation of alkanes to oxygenates in supercritical carbon dioxide 9

Oxidative transformation of methane over nickel catalysts supported on rare-earth metal oxides 303

Partial oxidation reactions

A comparison of H_2 addition to 3 ms partial oxidation reactions 65

Pd

Generation of H_2O_2 from H_2 and O_2 over zeolite beta containing Pd and heterogenized organic compounds 117

Pd/C catalysts

Stability of bimetallic Bi–Pd and Pb–Pd carbon-supported catalysts during their use in glyoxal oxidation 255

Phenol

Direct synthesis of phenol from benzene over hydroxyapatite catalysts 143

Phosphate

Study of H_2S selective oxidation on new model catalysts. Influence of composition 149

Photocatalytic oxidation

Photocatalytic oxidation of alkane at a steady rate over alkali-ion-modified vanadium oxide supported on silica 109

 β -Picoline

Formation of active state in vanadium–titanium oxide system regarding to reaction of oxidation of β -picoline to nicotinic acid 249

Platinum

Oxidative dehydrogenation of propane over monoliths at short contact times 93

Platinum catalyst

Syngas formation by direct oxidation of methane. Reaction mechanisms and new reactor concepts 55

Polymerization degree

Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295

- Powder refinements mild oxidation
A correlation between crystal structure and catalytic activity in the solid solutions $\text{CdMo}_x\text{W}_{1-x}\text{O}_4$ 231
- Probability
Micro-kinetic analysis and Monte Carlo simulation in methane partial oxidation into synthesis gas 237
- Promoters
Oxidative dehydrogenation of propane over monoliths at short contact times 93
- Propane
Partial oxidation of alkanes to oxygenates in supercritical carbon dioxide 9
Reaction pathways in the selective oxidation of propane over a mixed metal oxide catalyst 223
Oxidative dehydrogenation of propane over vanadium oxide based catalysts. Effect of support and alkali promoter 333
Oxidative dehydrogenation of propane on zeolite catalysts 343
- Propane oxidative dehydrogenation
Oxidative dehydrogenation of propane over monoliths at short contact times 93
- Propylene
Oxidative dehydrogenation of propane over monoliths at short contact times 93
- Rare earth catalysts
Comparison of behaviour of rare earth containing catalysts in the oxidative dehydrogenation of ethane 317
- Rare-earth oxides
Oxidative transformation of methane over nickel catalysts supported on rare-earth metal oxides 303
- Reaction pathways
Reaction pathways in the selective oxidation of propane over a mixed metal oxide catalyst 223
- Real-time Monte Carlo
Micro-kinetic analysis and Monte Carlo simulation in methane partial oxidation into synthesis gas 237
- Remote control mechanism
New insights in the understanding of the behaviour and performances of bismuth molybdate catalysts in the oxygen-assisted dehydration of 2-butanol 279
- Selective catalytic oxidation
Characterization and reactivity of $\text{MoO}_3/\text{SiO}_2$ catalysts in the selective catalytic oxidation of ammonia to N_2 187
- Selective mild oxidation
Correlations between the optical basicity of catalysts and their selectivity in oxidation of alcohols, ammoxidation and combustion of hydrocarbons 197
- Selective oxidation
A two-phase compartments model for the selective oxidation of *n*-butane in a circulating fluidized bed reactor 73
Selective oxidation of aromatic compounds on zeolites using N_2O as a mild oxidant. A new approach to design active sites 123
- SiC supported catalyst
Selective oxidation of H_2S in Claus tail-gas over SiC supported NiS_2 catalyst 157
- Silylation reaction
Surface modified amorphous titanasilicate catalysts for liquid phase epoxidation 49
- Sol–gel method
Surface modified amorphous titanasilicate catalysts for liquid phase epoxidation 49
- Solid-state reaction
Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295
- Spillover oxygen
New insights in the understanding of the behaviour and performances of bismuth molybdate catalysts in the oxygen-assisted dehydration of 2-butanol 279
New results on the oxidative dehydrogenation of ethane to ethylene. Promoting catalytic performance of Mo-V- and Ni-V-oxide by $\alpha\text{-Sb}_2\text{O}_4$ 309
- Stoichiometry
Structural and oxidative properties of Mn-MCM41 catalysts synthesised by MOCVD method 19
- Styrene oxidation
Preliminary study on the TS-1 deactivation during styrene oxidation with H_2O_2 263
- Supercritical carbon dioxide
Partial oxidation of alkanes to oxygenates in supercritical carbon dioxide 9
- Support effect
Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295
- Supported aqueous phase catalysts
Supported micelles in biphasic oxidation catalysis 19
- Synthesis gas
Syngas formation by direct oxidation of methane. Reaction mechanisms and new reactor concepts 55
- Temperature programmed reduction
Oxidative dehydrogenation of propane over vanadium oxide based catalysts. Effect of support and alkali promoter 333
- Tin
Oxidative dehydrogenation of propane on zeolite catalysts 343
- Toluene
In situ DRIFT study of the reactivity and reaction mechanism of catalysts based on iron–molybdenum oxides encapsulated in Boralite for the selective oxidation of alkylaromatics 211
- Toluene partial oxidation
Transient kinetics of toluene partial oxidation over V/Ti oxide catalysts 271
- Total oxidation
Correlations between the optical basicity of catalysts and their selectivity in oxidation of alcohols, ammoxidation and combustion of hydrocarbons 197
- Transient response techniques
Transient kinetics of toluene partial oxidation over V/Ti oxide catalysts 271

TS-1 zeolite

Preliminary study on the TS-1 deactivation during styrene oxidation with H_2O_2 263

UV–Vis DRS

Generation of H_2O_2 from H_2 and O_2 over zeolite beta containing Pd and heterogenized organic compounds 117

Catalytic hydroxylation of benzene over vanadium-containing molecular sieves 137

 V^{3+} species

Relationship between structural/surface characteristics and reactivity in *n*-butane oxidation to maleic anhydride. The role of V^{3+} species 203

V/Ti oxide catalysts

Transient kinetics of toluene partial oxidation over V/Ti oxide catalysts 271

V–Al–Nb oxide

High-throughput synthesis and screening of V–Al–Nb and Cr–Al–Nb oxide libraries for ethane oxidative dehydrogenation to ethylene 87

Vanadia

Dynamic behavior of supported vanadia catalysts in the selective oxidation of ethane. In situ Raman, UV–Vis DRS and reactivity studies 295

Vanadia based catalysts

Oxidative dehydrogenation of propane over vanadium oxide based catalysts. Effect of support and alkali promoter 333

Vanadium niobium mixed oxide

Mixed-oxide catalysts involving V, Nb and Si obtained by a non-hydrolytic sol–gel route: preparation and catalytic behaviour in oxydative dehydrogenation of propane 353

Vanadium oxide

Photocatalytic oxidation of alkane at a steady rate over alkali-ion-modified vanadium oxide supported on silica 109

Vanadium-antimony oxide catalysts

On the role of heterogeneous and homogeneous processes in oxidative dehydrogenation of C_3 – C_4 alkanes 287

Vanadium-containing molecular sieves

Catalytic hydroxylation of benzene over vanadium-containing molecular sieves 137

Vanadium–titanium oxide system

Formation of active state in vanadium–titanium oxide system regarding to reaction of oxidation of β -picoline to nicotinic acid 249

Vanadyl pyrophosphate

Relationship between structural/surface characteristics and reactivity in *n*-butane oxidation to maleic anhydride. The role of V^{3+} species 203

 $\text{VO}_x/\text{Al}_2\text{O}_3$ catalysts

Oxidative dehydrogenation of *n*-butane and 1-butene on undoped and K-doped $\text{VO}_x/\text{Al}_2\text{O}_3$ catalysts 361

V–Sb-oxide systems

Physico-chemical properties of V–Sb-oxide systems and their catalytic behaviour in oxidative dehydrogenation of light paraffins 325

V–Ti–O system

Ammonoxidation of methylpyrazine over V–Ti oxide system 173

XANES

Catalytic hydroxylation of benzene over vanadium-containing molecular sieves 137

Zeolite

Chemistry of surface oxygen formed from N_2O on ZSM-5 at moderate temperatures 129

Zeolite beta

Generation of H_2O_2 from H_2 and O_2 over zeolite beta containing Pd and heterogenized organic compounds 117

Zeolites

Selective oxidation of aromatic compounds on zeolites using N_2O as a mild oxidant. A new approach to design active sites 123

ZSM-5

Chemistry of surface oxygen formed from N_2O on ZSM-5 at moderate temperatures 129

Oxidative dehydrogenation of propane on zeolite catalysts 343
