

# INDEX OF SUBJECTS, 1944.

## A.

*N*-Acetomethyl-*m*-4-xylylide, physical constants of, 410.  
 Aceto-2-naphthalide, 1-bromo-4-nitro-, 386.  
 $\beta$ -Acetonaphthone,  $\omega$ -amino-, hydrochloride, 485.  
 Acetone, quinolyldrazones, 618.  
   vapour, photodecomposition of, in presence of inert gases, 588.  
 Acetone glucosaccharic acid, derivatives of, 67.  
 Acetophenone, *p*-bromo-, and *p*-cyano-, hydrazones, 613.  
 $\alpha$ -Acetyl-*p*-bromobenzyl cyanide, 613.  
 Acetyl-1:2:5:6-dibenzfluorene, and its oxime, 557.  
 1-Acetyl-3:4-dihydronaphthalene, and its semicarbazone, 505.  
 Acetylene, reaction of, with hydrogen, catalysed by metals, 373.  
 Acetylenyl glycols, 136.  
*N*-Acetyl-5-methoxyanthranilic acid, 3-nitro-, 622.  
 4-Acetyl-4-(2'-methoxyphenyl)-1-methylpiperidine, and its picrate, 264.  
 3-Acetyl-6'-methoxyrurbanol, 335.  
 1-Acetyl-9-methyl- $\Delta^1$ -octalin, and its derivatives, 506.  
 5-Acetylsulphanilamido-2:3-dimethylindole, 632.  
 3-Acetylsulphanilamidoethylindole, 632.  
 3-Acetylsulphanilamidoindole, 632.  
 Acids, monocarboxylic, dissociation constants and strengths of, in aqueous acetone and aqueous sucrose, 411.  
   heterocyclic, iron derivatives of, 25.  
   long-chain, with quaternary carbon atom, 152.  
 Acridines, antiseptic activity and reduction potentials of, 360.  
 Acridones, conversion of, into acridines, 679.  
 Acrylonitrile, spectrum of, vibrational, 597.  
 Activation energy, isodielectric, calculation of, 443.  
 Address, presidential, 340.  
 Adipic acid,  $\alpha$ -cyano-, ethyl ester and hydrazone, 14.  
 Adsorption, mechanism of, 477.  
 Ajacine, 108.  
 Aldehydes, parachors of, 380.  
 2'-Aldehydodiphenyl, 2-bromo-, and its derivatives, 73.  
 Aleuritic acid, yield of, from shellac, 306.  
 Alkyl phosphates, sulphates, and sulphites, parachors of, 385.  
   *mono*- and *di*-sulphides and thiols, parachors of, 383.  
 2-Alkyl-1:4-naphthaquinones, 3-hydroxy-, 55.  
 Aluminium chloride, action of, on phenyl ethers, 330.  
   isomerisation of aromatic ketones with, 232.  
 Amines, aliphatic, primary and secondary, reagent for, 314.  
   aromatic, nuclear methylation of, 109.  
   diazotised, reaction of, with cuprous oxide, 112.  
   molecular compounds of, with sulphur dioxide, 243.  
   reaction of, with halogenated unsaturated compounds, 371.  
 Amino-acids, synthesis of, from substituted cyanoacetic esters, 13.  
 $\alpha$ -Amino-acids, synthesis of, 666.  
*iso*Amyl alcohol, adsorption of, at air-water surfaces, 252.  
 2-*n*-Amylamino-pyridine, and its picrate, 249.  
 $\beta$ -*n*-Amyl- $\beta$ -*n*-heptylbutyric acid, and its derivatives, and  $\alpha$ -cyano-, ethyl ester, 154.  
 2-*iso*Amylnaphthalene, 1:3-*di*hydroxy-, and its derivatives, 55.  
 $\alpha$ -Amyradiene, *dichloro*-, 30.  
*l*- $\alpha$ -Amyradiene, 28.  
 $\alpha$ -Amyradienol, dehydration of, with phosphoric oxide, 28.  
*iso*- $\beta$ -Amyradienonol, and its acetate, 532.  
 $\alpha$ -Amyradienone II, 30.  
 $\alpha$ -Amyradienone III, 30.  
 $\beta$ -Amyradienonyl acetate, conversion of, into *allo*- $\beta$ -amyrenonyl acetate, 527.  
   esters, oxidation products of, 256.  
*d*- and *l*- $\alpha$ -Amyradienes, 28, 30.  
 $\beta$ -Amyradienol, and bromo-, and their derivatives, 533.  
 $\beta$ -Amyradienonyl acetate, conversion of, into  $\beta$ -amyradienonyl acetate, 532.  
 $\beta$ -Amyrenonyl esters, oxidation products of, 256.

*allo*- $\beta$ -Amyrenonyl acetate, 531.  
 $\alpha$ -Amyrin, dehydration of, with phosphoric oxide, 28.  
 $\beta$ -Amyrin, conversion of, into *iso*- $\beta$ -amyradienonol, 527.  
*allo*- $\beta$ -Amyrin acetate, 531.  
 Analgesics, synthetic, 261, 265, 267, 269.  
 Anhydro-4-aminobenzyl alcohol, dry distillation of, 111.  
 Anhydro-4-aminodimethylbenzyl alcohols, dry distillation of, 111.  
 Anhydro-4-amino-1-hydroxymethylnaphthalene, 111.  
 Anhydro-4-amino-3-methylbenzyl alcohol, dry distillation of, 111.  
 3:6-Anhydrogalactose, 229.  
 2:3-Anhydro- $\beta$ -methyl-*d*-taloside, and its derivatives, 523.  
 Aniline, *m*- and *p*-nitro-, diazotised, catalytic decomposition of, with cobalt, cupric, and ferric chlorides, 18.  
 2-Anilinohydroxymethyl-4:5-dihydrothiazole, 151.  
 Anionotropic rearrangement, kinetics of, 436, 443.  
 Anisole, cleavage of, by Grignard reagents, 462.  
 $\alpha$ -*p*-Anisyl- $\beta$ -(2-bromo-3:4:5-trimethoxyphenyl)acrylamide, 323.  
 $\alpha$ -*p*-Anisyl- $\beta$ -(2-bromo-3:4:5-trimethoxyphenyl)ethylene,  $\alpha$ -cyano-, 323.  
 4-Anisyl-2-methylpyrrole-3-carboxylic acid, ethyl ester, 485.  
 $\alpha$ -*p*-Anisyl- $\beta$ -(2-nitro-3:4:5-trimethoxyphenyl)ethylene,  $\alpha$ -cyano-, 323.  
 $\beta$ -Anisylpropionic acid,  $\alpha$ -cyano-, ethyl ester, and hydrazone, 14.  
 Annual General Meeting, 158.  
 Antibacterials, from *Aspergillus clavatus*, 415.  
 Antimalarials, attempts to find, 615, 619.  
 Antiplasmodial action, constitution and, 334.  
*d*-Araboascorbic acid, 227.  
 Aromatic compounds, sulphonation of, by sulphur trioxide, 649.  
 Aryldiazonium cobaltinitrites, decomposition of, 22.  
*Aspergillus clavatus*, antibacterial from, 415.  
 Atmosphere, ozone concentration in, measurement of, 1.  
 Atomic theory, old and new, 340.  
 Axerophthal, 410.  
 Azobenzene 2:2'-di(methylsulphide), 422.  
 Azobenzene-2:2'-disulphinic acid, sodium salt and dimethyl ester, 422.  
 Azo-compounds, from *o*-nitrothiophenol and its methyl ether, 421.  
 1:1'-Azonaphthalene, 4:4'-*dinitro*-, 16.  
 Azoxybenzene 2:2'-di(methylsulphide), 422.  
 Azoxyulphones, 368.

## B.

Balance sheets, 162.  
 Barbituric acids, reaction of, with phosphorus pentasulphide, 124.  
*Belmacamda sinensis*, constituents of, 307.  
 Belmacamdin, 307.  
 Belmacamgenin, 307.  
 Benzaldehyde, Tiemann-Reimer reaction with, 74.  
 Benzaldehyde, *p*-amino-, preparation of, 4.  
 Benzene, chloro-, sulphonation of, by sulphur trioxide, 469.  
   *dichloronitro*-derivatives, inhibition of resonance in, 404.  
 4-Benzeneazo-2-bromo-1-naphthol, 539.  
 1-Benzeneazo-4-cyano-2-hydroxynaphthalene, 540.  
 Benzeneazomalonitrile, *p*-chloro-, and *p*-nitro-, 317.  
 5-Benzeneazo-2-methylpyrimidine, 4:6-*di*amino-, and 4:6-*di*-amino-5-*p*-chloro- and -5-*p*-nitro-, 317.  
 5-Benzeneazo-4-methylpyrimidine, 2 : 6-*di*hydroxy-5-*p*-chloro-, 317.  
 5-Benzeneazopyrimidine, 4:6-*di*amino-5-*p*-chloro- and -5-*p*-nitro-, 317.  
 4:6-*di*amino-5-2':5'-*dichloro*-, 656.

- Benzenediazo-*N*-bromocarbonamide, *p*-nitro-, hydrobromide, 398.
- 5-Benzenesulphonamidothiazole, 5-*p*-amino-, 103.
- Benzenesulphonyl chloride, *m*-nitro-, preparation of, 482.
- 1:2-Benzfluorene, 3-hydroxy-, 559.
- 2:3-Benzfluorene, 1-hydroxy-, and its derivatives, 56, 57.
- 1:2-Benzfluoreneol, 3-hydroxy-, acetyl derivative, 559.
- 1:2-Benzfluorenone, 3-hydroxy-, and its acetyl derivative, 559.
- 3:4-Benzfluorenes, 450.
- 3:4-Benzfluorenone-7-carboxylic acid, 452.
- 3:4-Benzfluorenone-8-carboxylic acid, 451.
- Benzimidazole, derivatives of, 274.
- Benzocyclooctatetraenes, 71, 73.
- Benzofuran, derivatives, synthesis of, 261.
- Benzoic acid, dissociation constant of, in aqueous acetone and aqueous sucrose, 411.
- Benzoic acid, *o*-, *m*-, and *p*-hydroxy-, and their alkyl ethers, thermodynamic dissociation constants of, 19.
- Benzo-1-naphthalide, 2-chloro-, 538.
- Benzo-2-naphthalide, 4-bromo-, and 4-chloro-, 539.
- 4-nitro-, 386.
- Benzophenone, dehydrogenation by, photochemically, 67.
- p*-Benzoquinone, constitution of, and magnetic susceptibility, 590.
- dehydrogenation by, photochemically, 67.
- 1-Benzoyl-1:2-dihydroquinaldinonitrile, 1-*o*- and -*m*-nitro-, 327.
- Benzoyldiphenylbromomethane, action of Grignard reagents on, 462.
- $\beta$ -Benzoyl- $\alpha$ -phenylpropionitrile, 5-amino-2:4-diphenylpyrroles from, 126.
- $\beta$ -Benzoylpropionic acid,  $\beta$ -4-hydroxy-, 552.
- Benzpinacols, photochemical formation of, 67.
- Benzthiazole, derivatives, reactions of, 11.
- Benzthiazole, 1-thiocyano-, reactions of, 11.
- Benzthiazyl-1-thioncarbamic acid, ethyl and methyl esters, 13.
- Benzyl alcohol, 4-amino-, dry distillation of, 111.
- Benzylamine-4-carboxylic acid, preparation of, 678.
- $\alpha$ -Benzyldeoxybenzene, 4:4'-dibromo-, 615.
- Benzylidenebistormamide, *m*- and *p*-nitro-, 648.
- Benzylidene glucosaccharic acid, diethyl ester, 67.
- Benzylidenemalononic acid, 4-hydroxy-, acetyl derivative, ethyl ester, 552.
- $\delta$ -Benzylmethylamino- $\alpha$ -benzylvaleric acid,  $\alpha$ -cyano-, ethyl ester, 271.
- $\gamma$ -Benzylmethylamino- $\alpha$ -phenylbutyric acid,  $\alpha$ -cyano-, ethyl ester, 270.
- $\gamma$ -Benzylmethylamino- $\alpha$ -phenylbutyronitrile, and its reineckate, 270.
- $\delta$ -Benzylmethylamino- $\alpha$ -phenylvaleric acid,  $\alpha$ -cyano-, ethyl ester, 270.
- $\delta$ -Benzylmethylamino- $\alpha$ -*o*-tolylvaleric acid,  $\alpha$ -cyano-, ethyl ester, 271.
- 3-Benzyl-1-methylpiperidine-3-carboxylic acid, ethyl ester, 271.
- 2-Benzylbenzaldehyde, azlactone of, 263.
- 2-Benzylphenylacetone, 263.
- 4-(2'-Benzylphenyl)-1-methylpiperidine-4-nitrile hydrochloride, 264.
- 2-Benzylphenylpyruvic acid, 263.
- $\alpha$ -Benzyl- $\gamma$ -phenylacetoacetic acid, ethyl ester, 57.
- Bis- $\beta$ -aminoethyl sulphoxide, and its dihydrobromide, 7.
- Bis- $\beta$ -aminoethylsulphone dihydrochloride, 7.
- $\alpha\alpha$ -Bis-( $\beta$ '-bromoethyl)phenylacetic acid, 268.
- (+)-Bis- $\alpha$ -carbethoxybenzyl sulphite, 90.
- (-)-Bis- $\alpha$ -carbethoxybenzyl hydrogen phosphite, 88.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)- $\alpha$ -isobutenyltrimethincyanine bromide, 484.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)- $\alpha$ -ethyltrimethincyanine bromide, 484.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)methincyanine bromide, 484.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)- $\alpha$ -*p*-methoxyphenyltrimethincyanine bromide, 485.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)- $\alpha$ -methyltrimethincyanine bromide, 484.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)- $\alpha$ -2'-naphthyltrimethincyanine bromide, 485.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)- $\alpha$ -phenyltrimethincyanine, 485.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)- $\alpha$ -phenyltrimethincyanine bromide, 485.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)trimethincyanine bromide, 485.
- Bis-2-(4-carbethoxy-3-phenyl-5-methylpyrrole)methane, 485.
- $\alpha\alpha$ -Bis-( $\beta$ '-chloroethyl)phenylacetone, 266.
- Bis-2-chlorocyclohexyl sulphite, 119.
- N,N,N'*-Bis-(*p*-chlorophenyl)-*N*-( $\gamma$ -diethylaminopropyl)guanidine, and its salts, 534.
- Bisdimethoxyindone, 367.
- $\alpha\beta$ -Bis(dimethylamino)propionic acid, ethyl ester, and its salts, 372.
- Bis-2-(3:5-dimethylpyrrole)- $\alpha$ -phenyltrimethincyanine bromide, 485.
- Bisdinaphthaxanthene, 70.
- Bis-2-(3:5-diphenylpyrrole)methincyanine bromide, 484.
- Bis-2-(3:5-diphenylpyrrole)- $\alpha$ -methyltrimethincyanine bromide, 484.
- Bis-2-(3:5-diphenylpyrrole)- $\alpha$ -phenyltrimethincyanine bromide, 484.
- $\alpha\alpha$ -Bis-( $\beta$ '-ethoxyethyl)phenylacetone, 268.
- $\alpha\alpha$ -Bis-( $\beta$ '-hydroxyethyl)phenylacetone, 266.
- ethers, action of halogen hydrides on, 267.
- $\alpha\alpha$ -Bis-( $\beta$ '-hydroxyethyl)-*o*-tolylacetone, 267.
- Bishydroxyindone, constitution of, and its reactions, 366.
- Bis-*di*hydroxytetraphenylethane orthosilicate, 81.
- Bis-1:3-indanedione. See Bishydroxyindone.
- $\alpha\alpha$ -Bis-( $\beta$ '-methoxymethoxyethyl)phenylacetone, 266.
- Bis-[2-methyl-3-indole]- $\beta$ -carbethoxy- $\alpha$ -methyltrimethincyanine bromide, 487.
- Bis-[2-methyl-3-indole]- $\beta$ -carbethoxy- $\alpha$ -phenyltrimethincyanine bromide, 487.
- Bis-[2-methyl-3-indole]- $\alpha$ -methyltrimethincyanine sulphate, 487.
- Bis-3-[2-methylindole]trimethincyanine sulphate, 487.
- Bis-(*N*-pantoyl- $\beta$ -aminoethyl) sulphides, 7.
- Bis(phenyl-*p*-bromophenyl-*p*-dimethylaminophenylphosphine)-palladium, dichloro-, 283.
- Bis(phenyl-*p*-bromophenylethylphosphine)palladium, dichloro-, 283.
- Bis-(4-phenyl-1-methylpiperidyl-4-methyl)amine, 265.
- Bis-2-(3-phenyl-5-methylpyrrole)- $\alpha$ -phenyltrimethincyanine bromide, 485.
- $\alpha\alpha$ -Bis-( $\beta$ '-vinylxyethyl)phenylacetone, 266.
- $\alpha\alpha$ -Bis-( $\beta$ '-vinylxyethyl)-*o*-tolylacetone, 267.
- Boron trifluoride, catalytic action of, 301.
- Bromine :-  
Hydrobromic acid, reaction of, with (-)phenylalkylcarbinols, 236.
- $\alpha$ -Bromo-ketones, action of Grignard reagents on, 462.
- n*-Butane-1:3-diol, derivatives of, 300.
- 1-*tert*-Butylcyclohexanol, 601.
- 2-Butylnaphthalenes, 1:3-*di*hydroxy-, and their diacetyl derivatives, 55.
- $\beta$ -*n*-Butyl- $\beta$ -*n*-nonylbutyric acid, and its derivatives, and  $\alpha$ -cyano-, ethyl ester, 154.

## C.

- Calycanthus floridus*, sterols of, 336.
- (-)- $\alpha$ -Carbethoxybenzylphosphorus dichloride and dihydrogen phosphite, 87.
- 3-Carboethoxycyanomethyleneamino-2-phenyl-1-ethylindole, 675.
- (2-Carboethoxy-3-indolylmethyl)malonic acid, 5-bromo-, and its esters, 627.
- 3-Carboethoxy-4-phenyl-2-methylpyrrole-5-aldehyde, 485.
- [4-Carboethoxy-3-phenyl-5-methyl-2-pyrrole]-[4-dimethylaminobenzene]- $\alpha$ -methyltrimethincyanine bromide, 489.
- [4-Carboethoxy-3-phenyl-3-methyl-2-pyrrole]-[4-dimethylaminobenzene]trimethincyanine bromide, 489.
- 2-(3-Carboethoxy-4-phenylpyrrole)-2'-(3'-carboethoxy-4'-phenyl-5'-methylpyrrole)methincyanine bromide, 485.
- 2-Carboethoxyskatole, and 1-hydroxy-, 628.
- Carbathalidines, constitution of, 147.
- $\beta$ -Carboxymethoxypropionic acid, and its derivatives, 301.
- Catalysts, copper and ferric chlorides as, for Sandmeyer reaction, 393.
- nickel, for reaction of acetylene with hydrogen, 373.
- Cathodes, mercury dropping, quinaldine acid reduction at, 427.

- Cell or Cells, electrochemical, for dielectric constant measurement, 467.
- 2-Cetylaminopyridine, and its picrate, 249.
- Chelidamic acid, ferric complexes of, 25.
- Chemotherapy in tropical medicine, 351.
- Chlorine, reaction of, with nitric oxide, 388.
- Cholestanyl hexahydrobenzoate, 337.
- Chondrosamine, derivatives of, 272.
- Chrysene, condensation of, with succinic anhydride, 329.
- $\beta$ -(4- or 5-Chrysenoyl)propionic acid, 329.
- Cinnamic acid, dissociation constant of, in aqueous acetone and aqueous sucrose, 411.
- Clavatin, preparation and properties of, and its derivatives, 417.
- Clock, laboratory, 113.
- Cobalt chloride, catalytic decomposition of diazonium salts with, 18.
- Colchicine, and its derivatives, 323, 325.  
purification of, by chromatography, 677.
- Constitution, antiplasmodial action and, 334.  
molecular volume and, 380.
- Copper chlorides as catalysts in Sandmeyer reaction, 393.
- Cuprous oxide, reaction of, with diazotised amines, 112.
- Crotonaldehyde, condensation of, with 2-methylvinylacetylene and with vinylacetylene, 140.
- Cyanine dyes, 670.
- Cyanogen :-  
Hydrocyanic acid, anhydrous, dielectric constant of, 77.  
studies on, 647.
- D.**
- Deca-3:7-dien-5-yn-2:9-diol, 144.
- Deca-3:8-dien-5-yn-2:7-diol, 144.
- Deca-3:5:7-trien-1-yn-9-ol, 136.
- Deca-4:6:8-trien-1-yn-3-ol, 136.
- Dec-2-en-5-yn-4:7-diol, and its derivatives, 143.
- Dec-3-en-5-yn-2:7-diol, 143. •
- Dehydrodiferulic acid. See 1:4-Di-(3'-methoxyphenyl)butane-2:3-dicarboxylic acid, 1:4-*di*-hydroxy-1:4-*di*-4'-hydroxy-.
- Delpheline, constitution of, and its acetyl derivative, 665.
- Delphinium* alkaloids, 108, 665.
- Deoxybenzoin, 4:4'-dibromo-, and its semicarbazone, 614.
- 2:6-Diacetyl 4-*a*-acetoxyethyl  $\beta$ -methylglucoside 3-nitrate, 494.
- 4:4'-Diamidino- $\alpha$  $\beta$ -diethylstilbene dihydrochloride, 614.
- 4:4'-Diamidino- $\gamma$  $\delta$ -diphenyl-*n*-hexane isethionate, 613.
- trans*-4:4'-Diamidino- $\alpha$ -ethylstilbene, 614.
- 4:4'-Diamidino- $\alpha$ -methylstilbene dihydrochloride, 614.
- $\beta\beta$ -Di-*n*-amylbutyric acid, and  $\alpha$ -cyano-, ethyl ester, 153.
- N,N'*-Dianisyl-*N*-( $\gamma$ -diethylaminopropyl)guanidine, and its salts, 534.
- Dianisylmethylisothiurea, 534.
- Dianthranol, preparation of, 307.
- Dianthraquinone, preparation of, 307.
- 2:4-Diarylpyrroles, 126.
- Diazoaminobenzene, 4:4'-*d*-nitro-, preparation of, 398.  
*syn*- and *anti*-Diazocyanides, aromatic, structure of, 395.
- 1-Diazo-2-naphthol, 4:5-*d*-nitro-, 9.
- 2-Diazo-1-naphthol, 6-bromo-, 10.
- Diazonium compounds, catalytic decomposition of, 18.
- Diazonium groups, replacement of, by nitro-groups, 22.
- Diazotates, structure of, 368.
- NN'*-Dibenzenesulphonyltetramethylenediamine, *NN'*-*di*-*p*-nitro-, 248.
- 1:2:5:6-Dibenzfluorene, amino-9-bromo-, 3-hydroxy-, and nitro-, 556.
- 1:2:6:7-Dibenzfluorene, and 9-bromo-, 559.
- 1:2:5:6-Dibenzfluorenesulphonic acid, 557.
- 1:2:5:6-Dibenz-9-fluoreneol, and 3- and 7-hydroxy-, acetyl derivatives, 557.
- 1:2:6:7-Dibenzfluoreneol, 559.
- 1:2:5:6-Dibenzfluorenone, amino-, 3-hydroxy-, and 7-hydroxy-, and its derivatives, and nitro-, 557.
- 1:2:5:6-Dibenzfluorenyl-9-acetic acid, and its methyl ester, 557.
- Dibenzoyl thioether, *d*-nitro-, 7.
- 1:6-Dibenzoyl dimethylene sorbitol, 60.
- 3-Dibenzoylmethyleneamino-2-phenyl-1-ethylindole, 675.
- 1:6-Dibenzoyl methylene mannitol, 60.
- 1:6-Dibenzoyl sorbitol, 60.
- aa*-Dibenzylacetic acid,  $\alpha$ -cyano-, ethyl ester, and hydrazide, 14.
- Dichelidamatoferric acid, and its salts, 26.
- Dichelidamatohydroxoferrates, 27.
- Dichelidamato-oxyferic acid, salts, 27.
- 1:4-Di-(3':4'-dimethoxyphenyl)butane-2:3-dicarboxylic acid, 1:4-*di*-hydroxy-, dilactone, and 6:6'-*d*-nitro-, 537.
- Dielectric constants of organic molecular compounds, 464.
- p*-Diethylaminobenzaldehyde, *p*-*di*- $\beta$ -chloro-, 490.
- $\beta$ -Diethylaminoethylaniline, and its salts, 622.
- 9- $\beta$ -Diethylaminoethylharmane, and its hydrochloride, 622.
- $\beta$ -Diethylaminoethylmethylmethylamine, and its dipicrate, 622.
- 7-Diethylaminoheptan-2:4-dione, 617.
- ( $\epsilon$ -Diethylamino- $\beta$ -pentyl)aminoanisoles, amino- and nitro-derivatives, 275.
- 11-( $\epsilon$ -Diethylamino- $\beta$ -pentyl)aminolupinane, and its tripicolonate, 276.
- 1-( $\epsilon$ -Diethylamino- $\beta$ -pentyl)-5-methoxybenzimidazole, and its picrate, 276.
- 1-( $\epsilon$ -Diethylamino- $\beta$ -pentyl)-6-methoxybenzimidazole, and its dipicolonate, 274.
- 1-( $\epsilon$ -Diethylamino- $\beta$ -pentyl)-5-methoxy-2-methylbenzimidazole, and its dipicrate, 276.
- 1-( $\epsilon$ -Diethylamino- $\beta$ -pentyl)-6-methoxy-2-methylbenzimidazole, and its dipicolonate, 276.
- p*-Diethylaminophenyldithiocarbamic acid, *p*-diethylamino-phenylammonium salt, 151.
- $\gamma$ -Diethylamino- $\alpha$ -phenyl- $\alpha$ -ethylbutyronitrile, 265.
- 2-*p*-Diethylaminostyryl-3:4-dihydro-3-quinoxalone, 2-*p*-*di*-chloro-, methosulphates, 492.
- 2-*p*-Diethylaminostyryl-3:3-dimethylindolenine, 2-*p*-*di*- $\beta$ -chloro-, methiodide, 491.
- 2-Diethylaminostyryl-4-methyl-3:4-dihydroquinoxalone, 2-*di*- $\beta$ -chloro-, methochloride, 492.
- 2-Diethylaminostyrylpyridine, 2-*p*-*di*- $\beta$ -chloro-, ethiodide, 491.
- 2:6-Diethyl-*p*-cresol, 332.

## E.

- Ehrlich reaction, 488.
- Elaidic acid, methyl ester, photo-oxidation of, 242.
- d*-Erythronic acid, 3:4-di-*p*-nitrobenzoyl derivative, methyl ester, 228.
- Esters, parachors of, 380.
- Ethane, nitro-, preparation of, 24.
- Ethers, cleavage of, by Grignard reagents, 462.
- 6-Ethoxy-2-*p*-methyl- $\beta$ -chloroethylaminobenzylideneethoxyindoxyl, 491.
- 2-Ethoxy-1-naphthoylpropionic acid, 553.
- 2-Ethoxy-6-naphthoylpropionic acid, and its 2:4-dinitrophenylhydrazone, 553.
- 5-Ethoxy-2-phenyl-1-ethylindole, and 3-nitroso-, 673.
- (5-Ethoxy-2-phenyl-1-ethyl-3-indole)(1-methyl-4-quinoline)- $\alpha$ -azadimethincyanine iodide, 676.
- 4-Ethoxyquinazoline picrate, 623.
- 3-Ethyladipic acid, and its di-*p*-phenylphenacyl ester, 102.
- p*-Ethyl- $\beta$ -chloroethylaminobenzaldehyde, and its semicarbazone, 490.
- p*-Ethyl- $\beta$ -chloroethylaminobenzylideneacyanoacetic acid, ethyl ester, 490.
- 2-*p*-Ethyl- $\beta$ -chloroethylaminostyrylbenzthiazole methiodide, 491.
- 2-*p*-Ethyl- $\beta$ -chloroethylaminostyryl-3-methylquinoxaline methiodide, 491.
- 2-*p*-Ethyl- $\beta$ -chloroethylaminostyrylpyridine ethiodide, 491.
- p*-Ethyl- $\beta$ -chloroethylaminostyrylquinoline methiodide, 491.
- Ethyl- $\beta$ -chloroethylformal, 266.
- 2-Ethyl-*p*-cresol, 332.
- $\alpha$ -Ethyldeoxybenzoin, 4:4'-*dibromo*-, 614.
- 9-Ethyl-1:2:5:6-dibenz-9-fluoreno!, 557.

**Ethyleneimine**, spectrum of, absorption, infra-red, and structure, 301.  
**Ethyltrifluorosilane**, 455.  
**Ethylidene glucosaccharic acid**, derivatives of, 67.  
**4:6-Ethylidene  $\beta$ -methylglucoside**, and its derivatives, 494, 496, 499.  
**Ethyl-6'-methoxyrubanol**, 3-hydroxy-, dihydrobromide, 335.  
**2-Ethyl-naphthalene**, 1:3-dihydroxy-, and its diacetyl derivative, 54.  
**1-Ethylcyclopentan-2-one-1-carboxylic acid**, esters, 102.  
***N*-Ethyl-*p*-phenetidine**, 673.  
 **$\alpha$ - $\beta$ -Ethyl- $\alpha$ -phenylbutyrolactone**,  $\alpha$ - $\beta$ -bromo-, -chloro-, and -hydroxy-, 268.  
 **$\alpha$ -Ethylstilbene**, 4:4'-dibromo-, and 4:4'-dicyano-, 614.  
**Ethylthiol**,  $\beta$ -amino-, preparation of, 6.  
***iso*Eugenol**, 5-bromo-, 536.  
**Euphol**, isolation of, from euphorbium, and its derivatives, 249.  
**Euphorbium resin**, alcohols from, 249.  
 **$\alpha$ -Euphorbol**, isolation of, from euphorbium, and its derivatives, 249.

## F.

**Ferric chloride**. See under Iron.  
**Ferulic acid**, oxidation of, 535.  
 5-bromo-, and its ethyl ester, 536.  
**Fluorescence**, quenching of, 541, 544.  
**Fluorescent substances**, photochemistry of, 541, 544.  
**Formamidodichloride**, preparation and reactions of, 647.  
**Formo-1-naphthalide**, 3-nitro-, 77.  
**Formo-2-naphthalide**, 4-nitro-, 77.  
**2-Formyl-1-decalone**, 502.  
**Furan compounds**, formation of, from sucrose, 667.  
**Furan-2-carboxylic-5-acetic acid**, 670.

## G.

**Galactose**, conversion of, into *d*-idose derivatives, 522.  
**Geranylamine**, 306.  
**2-Geranylaminopyridine**, and its picrate, 249.  
***N*<sup>1</sup>-Geranyl-*N*<sup>1</sup>-2-pyridylsulphanilamide**, 249.  
**Germanicol**, and its derivatives, 285.  
**Glucopolysaccharides**, structure of, 473.  
**Glucosaccharic acid**, derivatives of, 65.  
 lactones of, and their derivatives, 510, 571, 633, 637.  
**Glucurone**, 584.  
**Glycogen**, analysis of, 475.

## H.

**Harmine methobromide**, 622.  
**Heptadecyl-*p*-nitrobenzenesulphonamide**, 248.  
***N*<sup>1</sup>-*n*-Heptadecylsulphanilamide**, and its *N*<sup>4</sup>-acetyl derivative, 248.  
**Hexadecahydro-9:9'-dianthryl**, 291.  
**Hexahydroanthracene**, 291.  
*trans*-Hexahydroanthrone, and its derivatives, 291.  
**1:2:3:4:12:13-Hexahydro-6:5-quinolindoles**, 13-nitro-12-hydroxy-, 618.  
**1:2:3:5:6:7-Hexamethoxy-9:10-dihydroanthracene**, 324.  
*cyclo*Hexane-1:1'-pyridinium chloride, 2-isonitroso-, 314.  
*cyclo*Hexanone quinolyldrazones, 617, 618.  
*cyclo*Hexene, chlorination of, 118.  
 nitrosites, 123.  
 $\Delta^1$ -*cyclo*Hexenylsuccinic acid, 551.  
**Hex-3-en-5-yn-2-ol**, condensation of, with carbonyl compounds, 141.  
*cyclo*Hexyl nitrite, 123.  
 sulphite, 2-chloro-, chloride, 119.  
 $\alpha$ -*cyclo*Hexyl- $\Delta^{\alpha\beta}$ -butenolide, 552.  
**2-*n*-Hexylbutyric acid**, and its *p*-toluidide, 147.  
*cyclo*Hexylhydroxylamine, 123.  
 $\alpha$ -*cyclo*Hexylpropionic acid,  $\beta$ -formyl derivative, 552.  
*cyclo*Hexylsuccinic acid, and its methyl ester, 551.  
**1-Hexyne**, condensation of, with  $\alpha\beta$ -unsaturated ketones, 144.  
**Hydroacridones**, synthesis of, and their dehydrogenation, 425.  
**Hydroanthracenes**, 286.

**Hydrobromic acid**. See under Bromine.  
**Hydrocarbons**, aromatic polycyclic, 553.  
 polycyclic, fluorescence of, quenching of, 541, 544.  
**Hydrocyanic acid**. See under Cyanogen.  
**Hydrogen**, reaction of, with acetylene, catalysed by metals, 373.  
**Hydrogen cyanide**. See Hydrocyanic acid under Cyanogen.  
**Hydrophenanthrenes**, 286.  
**Hydroxy-compounds**, reaction of, with phosphorus and thionyl halides, effect of tertiary bases on, 85.

## I.

**l-Idosaccharic acid**, dimethyl dimethylene ester, synthesis of, 363.  
*cis*-Indane-1:2-dicarboxylic anhydride, 560.  
 and its ethyl ester, 561.  
**Indene**, derivatives, 366.  
**Indole**, sulphonamides from, 632.  
**Indole**, 3-nitroso-, 1:2-disubstituted derivatives, condensation products of, 670.  
**Indoles**, blue dyes from, 488.  
**Indole series**, 624, 626, 629, 632.  
**Indole-3-glyoxylic acid**, anil and ethyl ester, 631.  
**3-Indole-3'-(2'-methylindole)- $\alpha$ -methyltrimethincyanine iodide**, 487.  
**Indole trimethincyanines**, preparation of, 486.  
 **$\beta$ -3-Indolylidenebutyrac acid**, ethyl ester, 487.  
**Ions**, multivalent, diffusion potentials and mobilities of, 606.  
**Iron**:-  
 Ferric chloride, as catalyst in Sandmeyer reaction, 393.  
 catalytic decomposition of diazonium salts with, 18.  
 reduction of, by stannous salts, 309.

## K.

**Ketoacetyloleanolic acid**, methyl ester, preparation of, and its derivatives, 260.  
**7-Ketocholesteryl benzoate**, 337.  
**5-Keto-4-deoxyglucosaccharo-3:6-lactone**, enol, 637.  
**5-Keto-4-deoxymannosaccharolactone** enol, and its hydrate and methyl ester, 582.  
**1-Keto-2:3-dihydropentindole**, 625.  
**1-Keto-2:3-dihydropentindole-2-glyoxylic acid**, *iso*amyl and ethyl esters, 625.  
**7-Keto-3:4-dimethoxy-13-ethyl-5:6:7:9:10:13-hexahydrophenanthrene**, and its 2:4-dinitrophenylhydrazone, 510.  
**7-Keto-3:4-dimethoxy-13-ethyl-5:6:7:9:10:13-hexahydrophenanthrene**, 1-chloro-, and its 2:4-dinitrophenylhydrazone, 509.  
**6-Keto-3:4-dimethoxy-5-ethyl-5- $\gamma$ -ketobutyl-5:6:7:8-tetrahydronaphthalene**, 510.  
**7-Keto-3:4-dimethoxy-13-ethyl-5:6:7:8:9:10:13:14-octahydrophenanthrene**, and its semicarbazone, 509.  
**7-Keto-3:4-dimethoxy-13-ethyl-5:6:7:8:9:10:13:14-octahydrophenanthrene**, 1-chloro-, 509.  
**6-Keto-3:4-dimethoxy-5-ethyl-5:6:7:8-tetrahydronaphthalene**, and its semicarbazone, 510.  
**6-Keto-3:4-dimethoxy-5-ethyl-5:6:7:8-tetrahydronaphthalene**, 1-chloro-, and its derivatives, 509.  
**5-Keto-3:4-dimethoxy-5:6:7:8-tetrahydronaphthalene**, 1-chloro-, and its derivatives, 508.  
**5-Keto-4-hydroxy-3-methoxy-5:6:7:8-tetrahydronaphthalene**, 1-chloro-, and its 2:4-dinitrophenylhydrazone, 508.  
**4-Keto-7-methoxy-3'-*isopropyl*-1:4:9:10:11:12-hexahydro-1:2-cyclopentenophenanthrene**, 506.  
**8-Keto-6-methyl-6-*n*-amyltridecane**, 153.  
 $\gamma$ -Keto- $\beta$ -methylhexoic acid, 420.  
**1-Keto-3-(2'-naphthyl)indene-2-acetic acid**, 558.  
**Ketones**, aromatic, isomerisation of, with aluminium chloride, 232.  
 parachors of, 380.  
**1-Keto-3-phenyl-6:7-benzindene-2-acetic acid**, 558.  
**1-Keto-1:2:3:4-tetrahydrocarbazole**, 6-bromo-, 625.  
**1-Keto-1:2:3:4-tetrahydrocarbazole-2-carboxylic acid**, ethyl ester, 625.  
**5-Keto- $\Delta^4$ :<sup>9</sup>-tetrahydroindridene**, 2:4-dinitrophenylhydrazone and semicarbazone, 435.  
**5'- or 8'-Keto-5':6':7':8'-tetrahydro-1:2-(2':3'-naphtha)phenanthrene**, 330.

## L

- $\gamma$ -Lactones, unsaturated, synthesis of, 548.  
 Lactucarium germanicum, non-saponifiable constituents of, 283.  
 Lectures, delivered before the Chemical Society, 183, 193, 208, 351.  
 Leuckart reaction, 126.  
 Lupinane, derivatives of, 274.

## M.

- Magnetic susceptibility of organic compounds, 590.  
 (—)Mandelic acid, ethyl ester, reaction of, with phosphorus and thionyl chlorides, effect of tertiary bases on, 85.  
 Mannitol, derivatives of, 58.  
 Mannosaccharic acid, lactones, 217, 221, 574, 577.  
 Mannosaccharodilactone, isomerisation of, with alkalis, 577.  
*d*-Mannuronic acid, synthesis of, 587.  
 Medicine, tropical, chemotherapy in, 351.  
 Mercury organic compounds:—  
 Mercury alkylmercaptides, parachors of, 384.  
 Metals, dissolving, reduction by, 430.  
*dl*-Methionine, preparation of, and its derivatives, 666.  
 7-Methoxy-2-acetylcoumaron, 263.  
 6-Methoxy-1-acetyl-3:4-dihydronaphthalene, and its semicarbazone, 505.

**[2-Methyl-3-indole]-[4-dimethylaminobenzene]- $\beta$ -carbethoxy- $\alpha$ -methyltrimethincyanine**, 489.  
**[2-Methyl-3-indole]-[4-dimethylaminobenzene]- $\alpha$ -phenyl-trimethincyanine sulphate**, 489.  
 **$\beta$ -7-Methyl-3-indolylidenebutyric acid**, ethyl ester, 487.  
 **$\beta$ -2-Methyl-3-indolylidenepropionic acid**, ethyl ester, 487.  
**Methylmalonic acid**,  $\alpha\beta$ -dibromo-, ethyl ester, 628.  
**5-Methyl- $\Delta^1$ -mannosaccharo-3:6-lactone**, 1-methyl ester, 583.  
 **$\alpha$ -Methylmannuronoside**, 588.  
**2-Methyl  $\beta$ -methylglucoside**, derivatives of, 495.  
**3-Methyl  $\beta$ -methylglucoside**, synthesis of, and its derivatives, 496.  
**3-Methyl  $\beta$ -methyl-*d*-idoside**, 524.  
**2-Methyl-3-4'-*spiro*-(1'-methylpiperidine)coumaran**, and its picrate, 264.  
**2-Methyl-3-morpholinomethyl-6:5-pyrroquinoline**, and its hydrochloride, 618.  
**2-Methyl-3-morpholinomethyl-8:7-pyrroquinoline**, and its salts, 619.  
**2-Methylnaphthalene**, 1:3-dihydroxy-, and its diacetyl derivative, 54.  
**3-Methylnonan-1-ol**, and its  $\alpha$ -naphthylurethane, 146.  
**3-Methylnon-6-en-4-yn-3:8-diol**, 144.  
**3-Methylnon-1-en-4-yn-3-ol**, 146.  
**3-Methylnon-2-en-4-yn-1-ol**, and its  $\alpha$ -naphthylurethane, 146.  
**7-Methylocta-2:7-dien-5-yn-4-ol**, and its  $\alpha$ -naphthylurethane, 141.  
**7-Methylocta-3:7-dien-5-yn-2-ol**, and its  $\alpha$ -naphthylurethane, 141.  
**7-Methyloctan-2-ol**, and its  $\alpha$ -naphthylurethane, 141.  
**7-Methyloctan-2-one**, and its semicarbazone, 141.  
 **$\beta$ -Methyloctic acid**,  $\alpha$ -cyano-, ethyl ester, 153.  
**1-Methyloctylidencyanoacetic acid**, ethyl ester, 154.  
**1-Methyl-2-oximinomethylindole**, 3-nitroso-, 674.  
**1-Methyl-2-oximinomethyl-3-indole(1-ethyl-2-benzthiazole)- $\alpha$ -azadimethincyanine iodide**, 676.  
**2-Methyl-3-cyclopentylideneindolenine sulphate**, 487.  
**2-Methyl-3-piperidinomethyl-6:5-pyrroquinoline**, and its hydrochloride, 618.  
**2-Methyl-3-piperidinomethyl-8:7-pyrroquinoline**, and its salts, 619.  
**2-Methyl-3-isopropylideneindolenine sulphate**, 487.  
**4-Methyl-3-isopropyl-1:9:10:11-tetrahydro-1:2-cyclopenteno-phenanthrene**, 506.  
 **$N^1$ -2-(6-Methylpyridyl)- $N^1$ -octadecylsulphanilamide**, and its  $N^4$ -acetyl derivative, 249.  
**2-Methylpyrimidine**, 4:6-diamino-, diacetyl derivative, 477.  
**4:5:6-triamino-**, 317.  
**4:6-dichloro-5-nitro-**, and 5-nitro-4:6-diamino-, 678.  
**2-Methyl-6:5-pyrroquinoline methiodide**, 618.  
**2-Methyl-6:5-(2':3-pyrro)quinoline**, 618.  
**2-Methyl-8:7-pyrroquinoline**, and its methosulphate, 618.  
 **$\alpha$ -Methylstilbene**, 4:4'-dibromo-, and 4:4'-dicyano-, 614.  
**Methyl-1:2:3:4-tetrahydroacridones**, and their picrates, 426.  
**2-Methyl-3-tetrahydroisoquinolyl-6:5-pyrroquinoline**, and its hydrochloride, 618.  
**2-Methyl-3-tetrahydroisoquinolyl-8:7-pyrroquinoline** hydrochloride, 619.

**6-Methylthio-5:5-diethyl-2:4-dithiobarbituric acid**, 125.  
**7-Methyltrideca-5:8-diyen-7-ol**, 147.  
**2-Methylvinylacetylene**, condensation of, with crotonaldehyde, 140.  
**Molecular theory**, old and new, 340.

## N.

**Naphthacene-11:12-quinone**, 9:10-dihydroxy-, structure of, 366.  
**3:4-(1':2'-Naphtha)fluorenone** 2-hydroxy-, acetyl derivative, 558.  
**Naphthalene**, 1-amino-2-hydroxy-4-cyano-, diazotisation of, 539.  
**1:2:3:4-tetrabromo-**, 1:3-dibromo-2-nitro-, 1:3:4-tribromo-2-nitro-, and 4-chloro-1:3-dibromo-2-nitro-, 22.  
**1-bromo-3-iodo-**, 2-bromo-1-iodo-, 1-chloro-3-bromo-, 3-chloro-1-bromo-, 1-chloro-3-iodo-, and 1:3-diiodo-, 539.  
**1:3-dihydroxy-derivatives**, 53.  
**1:3-dinitro-**, monoreduction of, 75.  
**1:2:3-trinitro-**, 561.  
**2-nitro-4-cyano-**, 77.  
**Naphthalene series**, syntheses in, 53, 55, 56.  
**Naphthaleneazo- $\beta$ -naphthol**, 3-nitro-, 538.  
**Naphthalene-1-azo- $\beta$ -naphthol**, 2-hydroxy-4-cyano-, 540.  
**Naphthalene-2-azo- $\beta$ -naphthol**, 4-nitro-, 386.  
**1:6-dinitro-**, 10.  
**Naphthalene-1':2'-azo-1-naphthol**, 4:4'-dinitro-, 17.  
**Naphthalene-1':2'-azo-1-naphthylamine**, 4:4'-dinitro-, 17.  
**Naphthalene-1-diazonium salts**, 4-nitro-, decomposition of, by sodium acetate and sodium sulphite, 15.  
**Naphthalene-1:2-diazo-oxide**, 4-cyano-, 540.  
**1:4-Naphthaquinone**, 2-hydroxy-, 56.  
**1-Naphthol**, 2-bromo-, 539.  
**6-bromo-**, 2- and 4-bromo-6-nitro-, 2:4-dibromo-6-nitro-, 2-chloro-4-bromo-6-nitro-, 2-chloro-6-nitro-, 2- and 4-iodo-6-nitro-, and their derivatives, 9.  
**2-Naphthol**, 1-bromo-4:5-dinitro-, and 4:5-dinitro-, 9.  
**4-cyano-**, preparation of, and its acetate, 539.  
**6-Naphthoylpropionic acid**, 2-hydroxy-, and its 2:4-dinitrophenylhydrazone, 553.  
**2-Naphthyl methyl ethers**, 4-amino-, derivatives of, 4-iodo-, and 4-nitro-, 451.  
**1-Naphthylamine**, 2-bromo-, and 2-iodo-, and their derivatives, and 3-nitro-, derivatives of, 538.  
**2:4-dibromo-3-nitro-**, and 3-nitro-, and their derivatives, 21.  
**3-nitro-**, diazotisation of, 77.  
**reactions of**, 21.  
**separation of**, from 4-nitro-2-naphthylamine, 75, 385.  
**2:3:4-trinitro-**, 561.  
**2-Naphthylamine**, 1:3:4-tribromo-, 22.  
**1-bromo-4-nitro-**, 386.  
**4-nitro-**, bromination of, and its separation from 3-nitro-1-naphthylamine, 385.  
**1:6-dinitro-**, diazotised, decomposition of, by precipitated copper in organic solvents, 10.  
 **$\gamma$ -6-Naphthyl- $\Delta^{\beta\gamma}$ -butenolide**,  $\gamma$ -2-hydroxy-, acetyl derivative, 553.  
**1:3-Naphthylenediamine**,  $N,N'$ -diacetyl derivative, 21.  
**3-(2'-Naphthyl)indene-2-acetic acid**, 559.  
**1-Naphthylmaleamic acid**, 3-nitro-, 386.  
**2-Naphthylmaleamic acid**, 4-nitro-, 386.  
**4- $\beta$ -Naphthyl-2-methylpyrrole-5-carboxylic acid**, ethyl ester, 485.  
**Nickel**, catalytic, 373.  
**Nitric oxide**. See Nitrogen dioxide.  
**Nitrogen dioxide (nitric oxide)**, quenching of fluorescence by, 541.  
**reaction of**, with chlorine, 388.  
**Nitroxides**, photochemical formation of, 541.  
**Nucleotides**, chemistry of, 208.

- Octadeca-2:4:6:12:14:16-hexaen-9-yn-8:10-diol**, 139.  
**Octadeca-3:5:7:11:13:15-hexaen-9-yn-2:17-diol**, 139.  
**2-Octadecylaminopyridine**, 249.  
 **$\Delta^{1:5}$ -cycloOctadiene**, 1:5-dichloro-, 101.  
**Octa-2:7-dien-5-yn-4-ol**, and its *n*-naphthylurethane, 140.  
**Octa-3:5-dien-1-yn-7-ol**, 136.  
**Octa-3:7-dien-5-yn-2-ol**, 141.  
**Octa-4:6-dien-1-yn-3-ol**, 136.  
*trans-as*-**Octahydroanthracene**, and *ar*- and 9-hydroxy-, 291.  
**1:2:3:4:7:8:9:10-Octahydrobenzazulene**, 293.  
**1:2:3:4:7:8:9:10-Octahydro-5:6-benz-7-azulol**, 293.  
**1:2:3:4:7:8:9:10-Octahydro-5:6-benz-7-azulone**, and its 2:4-dinitrophenylhydrazone, 293.  
*n*-**Octane**, 2-amino-, preparation and resolution of, 456.  
(+)- **$\beta$ -Octanol**, reaction of, with phosphorus and thionyl chlorides, effect of tertiary bases on, 85.  
**Octatrienal**, ethynylcarbinol from, 134.  
*sec*-**Octyl alcohol**, surface tension of aqueous solutions of, 477.  
(+)- **$\beta$ -Octyl dihydrogen phosphite**, 87.  
(-)- **$\beta$ -Octyloxyphosphorus dichloride**, 87.  
**Olefines**, *a*-methylene reactivity in, 296.  
*cyclo*-**Olefines**, parachors of, 380.  
**Oleic acid**, methyl ester, combination of, with oxygen, 105.  
**Organic compounds**, magnetic susceptibility of, 590.  
molecular, formation and structure of, 464.  
**3-Oximino-2-keto-6-*m*-methoxyphenylhexane**, and its derivatives, 504.  
**2-Oximino-5-*m*-methoxyphenylvaleric acid**, 504.  
**Ozone**, concentration of, in atmosphere, measurement of, 1.

## P.

- Pantothenic acid**, analogues of, 5, 94.  
*N*-**Pantoyl- $\beta$ -aminoethylthiol**, 7.  
**Pantoyltaurine**, aryl derivatives of, 94.  
*N*-**Pantoyltaurine**, growth-inhibitors related to, 9.  
**Parachor** of aldehydes, fatty acid esters, and ketones, 380.  
*cyclo***Paraffins**, parachors of, 380.  
**Perbunan**, spectrum of, vibrational, 597.  
**Perhydroanthracene**, 292.  
**Pethidine**, synthesis of, 265.  
**4-Phenacyl-4'-dimethylaminophenyl-2''-ketocyclopentylmethane**, 4-amino-, acetyl derivative, 622.  
**Phenanthraquinone**, reaction of, with ethylenes, 387.  
**Phenolic substances**, nuclear methylation of, 400.  
 **$\delta$ -Phenoxyvaleric acid**, *a*-amino-, and *a*-cyano-, ethyl ester and hydrazone, 14.  
**Phenyl allyl ether**, action of Grignard reagents on, 462.  
ethers, action of aluminium chloride on, 330.  
**Phenylacetylhydrazide**, 2:4-dinitro-, 324.  
**Phenylacetic acid**, dissociation constant of, in aqueous acetone and aqueous sucrose, 411.  
**Phenylacetic acid**, *o*-bromo-, ethyl ester, 73.  
 **$\gamma$ -Phenylacetoacetic acid**,  $\gamma$ -4-nitro-, and its ethyl ester, 55.  
**Phenylacetylene**, spectrum of, 595.  
**2-Phenylacetylfluorene**, and its reduction products, 560.  
*dl*-**Phenylalanine**, and its phenylcarbamyl derivative, 14.  
(-)-**Phenylalkylcarbinols**, reaction of, with hydrogen bromide, 236.  
 **$\gamma$ -Phenyl-*a*-allylacetoacetic acid**, ethyl ester, 58.  
**5-Phenyl-7-(aminophenyl)-4-azahydrindenes**, and their derivatives, 621.  
 **$\gamma$ -Phenyl-*a*-isoamylacetoacetic acid**, ethyl ester, 54.  
 **$\gamma$ -Phenyl-*n*-amyldiethylamine**, 265.  
**5-Phenyl-7-(*p*-anisyl)-4-azahydrindene methiodide**, 621.  
**Phenyl-*p*-anisyl-*n*-butylphosphine**, 281.  
**Phenyl-*p*-anisylchlorophosphine**, 281.  
**Phenyl-*p*-anisylethylphosphine**, 282.  
**Phenyl-*p*-anisylmethyl ethylphosphonium iodide**, 282.  
**Phenyl-*p*-anisylmethyl-*n*-propylphosphonium iodide**, 283.  
**Phenyl-*p*-anisyl-*n*-propylphosphine**, 283.  
**Phenyl-*p*-anisyl-*p*-tolyl-*p*-chlorophenacylphosphonium bromide**, 283.  
**Phenyl-*p*-anisyl-*p*-tolylphosphine**, and its sulphide, 283.  
**3-Phenyl-6:7-benzindene-2-acetic acid**, 1-hydroxy-, 559.  
**Phenyl-*p*-benzoyloxyphenyl-*n*-butylphosphine**, and its derivatives, 281.  
**Phenylbromoacetic acid**, liberation of bromide ions from aqueous solutions of, 90.  
**Phenyl-*p*-bromophenyl-*p*-anisylphosphine**, 283.  
**Phenyl-*p*-bromophenylchlorophosphine**, 279.  
**Phenyl-*p*-bromophenyl-*p*-dimethylaminophenylphosphine**, and its derivatives, 279.  
**Phenyl-*p*-bromophenylethylphosphine**, 279.  
**Phenyl-*p*-bromophenylphosphonic acid**, 279.  
**Phenyl-*p*-bromophenyl-2- and -3-pyridylphosphines**, and their derivatives, 280.  
***a*-Phenyl- $\Delta^{\alpha\beta}$ -butenolide**, 550.  
 **$\gamma$ -Phenyl- $\Delta^{\beta\gamma}$ -butenolide**,  $\gamma$ -4-hydroxy-, acetyl derivatives, 553.  
 **$\gamma$ -Phenyl-*a*-butylacetoacetic acids**, ethyl esters, 54.  
***a*-Phenylbutyric acid**, *a* $\gamma$ -dicyano-, ethyl ester, 271.  
***a*-Phenylbutyrolactone**,  $\gamma$ -hydroxy-, acetyl derivative, 550.  
***dl*-*a*-*N*-Phenylcarbamidoisovaleric acid**, 14.  
**Phenyl-*p*-(carboxymethoxy)phenyl-*n*-butylphosphine sulphide**, resolution of, 276.  
**Phenyl-*p*-(carboxymethoxy)phenylethylphosphine sulphide**, and its derivatives, 282.  
**Phenyl dichlorophosphine**, *p*-bromo-, 279.  
**4-Phenyl-2-*p*-di- $\beta$ -chloroethylaminostyryl-3:4-dihydro-3-quinoxalone methosulphate**, 492.

 $N^1$ -Pyridyl- $N^1$ -2-octadecylsulphanilamide, 249.  
 $N^1$ -2-Pyridyl- $N^1$ -*n*-propylsulphanilamide, 249.  
 Pyrimidine, derivatives, coupling of, with diazonium salts, 315.  
 Pyrimidine, 4:6-*di*amino-2-hydroxy-, hydrochloride, 477.  
 Pyrimidines, synthesis of, from esters and malondiamidine, 476.  
 Pyrimidines, 5-amino-, preparation of, 315.  
 chloro-, preparation of, 678.  
 Pyrimidine-2-carboxylic acid, 4:6-*di*amino-, 477.  
 Pyrroles, blue dyes from, 488.  
 2-Pyrrole-2'-(3'-carbethoxy-4'-phenyl-5'-methylpyrrole)- $\alpha$ -methyltrimethincyanine bromide, 485.  
 [2-Pyrrole]-[4-dimethylaminobenzene]- $\alpha$ -methyltrimethincyanine bromide, 489.  
 2-Pyrrole-2'-(3':5'-diphenylpyrrole)- $\alpha$ -methyltrimethincyanine bromide, 484.  
 Pyrrole trimethincyanines, 482.

## Q.

- Quinaldinic acid, reduction of, at dropping mercury cathodes, 427.  
 Quinazoline, 2- and 4-amino-, and the 2-(*p*-acetylbenzenesulphonyl) derivative, 623.  
 4-Quinazolylhydrazine, 623.  
 Quinhydrone, magnetic susceptibility of, 590.  
 Quinine, derivatives, antiplasmodial action of, 334.  
*iso*Quinine, antiplasmodial action of, 334.  
 Quinisol sulphate, 335.  
 Quinol, magnetic susceptibility of, 590.  
 Quinoline, 8-bromo-6-amino-, and its derivatives, 312.  
 Quinoxaline cyanines, 489.

## R.

- Rays, infra-red, use of, in chemistry, 183.  
 Reactions, ionic, in aqueous solutions, 309.  
 Reduction, by dissolving metals, 430.  
 Report of the Council, 159.  
 Resins, natural, phenolic, constituents of, 535.  
 synthetic, formaldehyde-phenol, nature and formation of, 402.  
 Resinols, triterpene, 28, 256, 527, 532.  
 Resonance, steric inhibition of, 404, 408.  
*D*-Ribobenzimidazole, 339.  
*d*-Ribonic phenylhydrazide, 339.  
 9-*d*-Ribopyranosidoadenine, 658.  
 9-*d*-Ribopyranosidohypoxanthine, 658.  
 4-Ribosidamino-5-(2':5'-*d*-chlorobenzeneazo)pyrimidine, 6-amino-, and its 6-triacetyl derivative, 658.  
 6-*d*-Ribosidaminopyrimidine, and 4-amino-, 6-triacetyl-5-thioformyl derivative, 658.  
 Rice starch. See under Starch.  
 Rotation, optical, of triterpenoid compounds, and their structure, 659.  
 Rubber, 114, 120.  
 halogenation of, 114.

## S.

- Sandmeyer reaction, 18, 393.  
 Shellac, constitution of, 306.  
 Silane, derivatives of, 293.  
 fluoro-derivatives, 293.  
 Silicon organic compounds, 81.  
 Silicon ethyl and phenyl fluorides, 454.  
 Sodium, reduction by, in liquid ammonia, 430.  
 Sodium polysulphides, reaction of, with *p*-nitrotoluene, 4.  
 Sorbaldehyde, ethynylcarbinol from, 134.  
 Sorbitol, derivatives of, 58.  
 Spectra, absorption, ultra-violet, of polyisoprenes, 600.  
 Stannous salts. See under Tin.  
 Starch, rice, analysis of, 476.  
 Sterols, synthesis of substances related to, 503.  
 Stilbene, derivatives, preparation of, 612.  
 reaction of, with phenanthraquinone, 387.  
 Styrene, reaction of, with phenanthraquinone, 387.  
 Succinic anhydride, condensation of, with chrysenes, 329.  
 Sucrose, conversion of, into furan compounds, 667.  
 Sugar nitrates, 492, 496, 499.  
 Sulphanilamide, derivatives of, 248.  
 5-Sulphanilamido-2:3-dimethylindole, 633.  
 3-Sulphanilamidoethylindole, 632.  
 3-Sulphanilamidoinole, 632.  
 Sulphonation, aromatic, by sulphur trioxide, 649.  
 kinetics of, 469.  
 Sulphur dioxide, ionic reactions in, 243.  
 molecular compounds of, with amines, 243.  
 trioxide, sulphonation of aromatic compounds by, 649.  
 Sulphuryl chloride, halogenation with, 119.  
 Surfaces, freshly-formed, properties of, 252, 477.

## T.

- 2:3:6:7:2':3':6':7'-Tetrabenzisfluorenylideneazine, 560.  
 2:3:6:7:2':3':6':7'-Tetrabenzis-9:9-difluorenyl, 560.

- Tetradeca-2:4:10:12-tetraen-7-yn-6:9-diol, 139.  
 Tetradeca-3:5:9:11-tetraen-7-yn-2:13-diol, 139.  
 1:2:3:4-Tetrahydroacridone, 426.  
 5':6':7':8'-Tetrahydro-1:2-(2':3'-naphtha)phenanthrene, 330.  
 Tetrahydro- $\gamma$ -pyran, 4-hydroxy-, and its derivatives, 300.  
 Tetrahydropyretrolone methyl ethers, and their semicarbazones, 644.  
 Tetrahydroisopyretrolone, enol, and its acetate, 53.  
 Tetrahydro- $\gamma$ -pyrone, and its derivatives, 300.  
 1:2:3:4-Tetrahydroquinolindoles, 618.  
 Tetramethoxy-9-methylphenanthrenes, 325.  
 Tetramethoxyphenanthrene-9-aldehydes, and their derivatives, 328.  
 Tetramethoxyphenanthrene-9-carboxylic acids, and their derivatives, 328.  
 2:3:5:6-Tetramethyl *d*-arabascorbic acid, 227.  
 3:3':5:5'-Tetramethyldiphenylmethane, 3:3'-4:4'-tetrahydroxy-, 403.  
 2:3:4:6-Tetramethyl glucose, analysis of, mixed with di- and tri-methyl glucoses, 473.  
 Tetramethyl  $\delta$ -idonolactone, 525.  
 Tetramethyl *d*-idose, 524.  
 Tetramethyl  $\beta$ -methyl-*d*-idoside, 524.  
 2:2:6:6-Tetramethyltetrahydro- $\gamma$ -pyrone, 338.  
 Tetraphenylene, spectrum of, absorption, and structure, 73.  
 Thebaine, degradation products of, 506.  
 Theophylline-7-( $\beta$ )-*d*-arabinoside, 594.  
 $\alpha$ -(Theophylline-7)-*a*'-hydroxymethylidiglycollic aldehyde, 595.  
 Thiazole-2-amide, 5-amino-, and its 5-*p*-acetylbenzenesulphonyl derivative, 104.  
 Thiazole-2-carboxylic acid, 5-amino-, 104.  
 Thiazole-2-nitrile, 5-amino-, and its derivatives, 104.  
 Thiazole-2-thioamide, 5-amino-, and its derivatives, 103.  
 2-Thio-3-*p*-anisyl-5-methyltetrahydro-1:3:5-thiadiazine, 151.  
 2-Thio-3-(3'-chloro-4'-hydroxyphenyl)-5-methyltetrahydro-1:3:5-thiadiazine, 151.  
 2-Thio-3-*p*-chlorophenyl-5-methyltetrahydro-1:3:5-thiadiazine, 151.  
 2-Thio-3-(*p*-dimethylaminophenyl)-5-methyltetrahydro-1:3:5-thiadiazine, 151.  
 2-Thio-3:5- and 4:8-dimethyltetrahydro-1:3:5-thiadiazines, 151.  
 5-Thioformamido-4-*d*-xylosidamino-2-methylpyrimidine, 6-amino-, and its 4-triacetyl derivative, 320.  
 2-Thio-3-(*p*-hydroxyphenyl)-5-methyltetrahydro-1:3:5-thiadiazine, 151.  
 2-Thio-3- $\alpha$ -naphthyl-5-methyltetrahydro-1:3:5-thiadiazine, 151.  
 Thionyl halides, reaction of, with hydroxy-compounds, effect of tertiary bases on, 85.  
 Thiophenol, *o*-nitro-, azo-compound from, 421.  
 2-Thio-3-phenyl-5-( $\beta$ -diethylaminoethyl)tetrahydro-1:3:5-thiadiazine, 151.  
 2-Thio-3-phenyl-5-( $\beta$ -hydroxyethyl)tetrahydro-1:3:5-thiadiazine, 151.  
 2-Thio-3-phenyl-5-methyltetrahydro-1:3:5-thiadiazine, 151.  
 $\beta$ -Thymoxyethyldiethylamine, and its salts, 677.  
 Thyroid, biochemistry of, 193.  
 Tilden Lecture, 208.  
 Tin :-  
 Stannous salts, reduction of ferric chloride by, 309.  
 Tolan, 4:4'-*di*bromo-, 614.  
 Toluene, *p*-nitro-, reaction of, with sodium polysulphides, 4.  
 sulphonation of, by sulphur trioxide, 469.  
 Toluene-*p*-sulphon-1-naphthalide, 2:3:4-*tri*nitro-, 561.  
*o*-Tolylecyanoacetic acid, ethyl ester, 271.  
 3-*o*-Tolyl-1-methylpiperidine-3-carboxylic acid, ethyl ester, and its salts, 271.  
 4-(*o*-Tolyl)-1-methylpiperidine-4-carboxylic acid, ethyl ester, and its hydriodide, 267.  
 4-(*o*-Tolyl)-1-methylpiperidine-4-nitrile, and its salts, 267.  
 6-Tosyl 3:4-acetone 2-methyl  $\alpha$ -methylgalactoside, 231.  
 2-Tosyl 3:6-anhydro- $\alpha$ -methylgalactopyranoside, 232.  
 2-Tosyl 4:6-benzylidene  $\alpha$ - and  $\beta$ -methylgalactosides, 524.  
 $\beta$ -( $\alpha$ -Tosyl- $\gamma$ -hydroxy- $\beta$ - $\beta$ -dimethylbutylamido)ethanesulphonic acid, sodium salt, 96.  
 2-Tosyl 4-methyl 3:6-anhydro- $\alpha$ -methylgalactopyranoside, 232.  
 2-Tosyl 3-methyl 4:6-benzylidene  $\alpha$ -methylgalactoside, 525.  
 2-Tosyl  $\alpha$ -methylgalactoside, 525.  
 6-Tosyl 2-methyl methylgalactoside, 231.  
 Tosylpantolactone, 96.

2-Tosyl 3:4:6-trimethyl  $\alpha$ -methylgalactoside, 525.  
 2-Tosyl 3:4:6-trimethyl  $\beta$ -methylgalactoside, 526.  
 Triacetone dialcohol, and its dehydration products, 338.  
 2:3:4-Triacetyl  $\alpha$ -methylmannuronoside, 588.  
 4-Triacetyl-*d*-xylosidaminopyrimidine, 5:6-diamino-, and its 5-thioformyl derivative, 655.  
 1:2:3:4:5-Tribenz- $\Delta^{1:3,5:7}$ -cyclooctatetraene, and its 7:8-dibromide, 71.  
   spectrum of, absorption, and structure, 73.  
 1:2:3:4:5-Tribenz- $\Delta^{1:3,5:7}$ -cyclooctatetraene-7:8-dicarboxylic anhydride, 72.  
 Tri-(2-carbethoxy-5-furfuryl)amine, 670.  
 Triethylamine, compound of, with sulphur dioxide, 247.  
 Triethylammonium hydrogen sulphite, 247.  
 Triketohydrindene, photochemical reduction of, 366.  
 3:4:5-Trimethoxybenzaldehyde, and its derivatives, 323, 327.  
 3:4:5-Trimethoxybenzanilide, 323.  
 1-(3':4':5'-Trimethoxybenzoyl)-1:2-dihydroquinaldinonitrile, and 1:2'-nitro-, 327.  
 3:4:5-Trimethoxybenzyl alcohol, and its 3:5-dinitrobenzoate, 323.  
 3:4:5-Trimethoxybenzylmalonic acid, and its ethyl ester, 324.  
 3:4:5-Trimethoxyphenylacetic acid, and its derivatives, 324.  
 $\beta$ -3:4:5-Trimethoxyphenylpropionic acid, 324.  
 2:3:5-Trimethyl *d*-araboascorbic acid, 227.  
 1:2:3-Trimethylbenzene, 4-amino-, and its acetyl derivative, 111.  
 2:3:5-Trimethyl 4-deoxyglucosaccharic acid, methylamide and methyl ester, 516.  
 Trimethylene sorbitol, constitution of, 517.  
 2:3:5-Trimethyl gluconic acid, phenylhydrazide, 574.  
 2:3:5-Trimethyl  $\gamma$ -gluconolactone, 574.  
 Trimethyl glucosaccharolactones, 571.  
 2:3:5-Trimethyl glucose, 574.  
 2:3:6-Trimethylglucose, analysis of, mixed with di- and tetramethyl glucoses, 473.

 Trimethyl methylchondrosaminides, *N*-acetyl derivatives, 274.  
 2:3:4-Trimethyl  $\alpha$ -methyl- $\alpha$ -galacturonoside, 134.  
 2:3:5-Trimethyl methylglucofuranoside, 574.  
 2:4:6-Trimethyl  $\beta$ -methylglucoside, synthesis of, and its 3-nitrate, 492, 495.  
 2:3:4-Trimethyl  $\beta$ -methylglyceronoside, 134.  
 3:4:6-Trimethyl  $\beta$ -methyl-*d*-idoside, 525.  
 2:3:5-Trimethyl methylmannofuranoside, 576.  
 2:3:4-Trimethyl  $\alpha$ -methylmannoside, 133.  
 2:4:5-Trimethyl saccharic acid, amide, 571.  
 (-)Tri- $\beta$ -octyl phosphite, 88.  
 Triphenylethylene, reaction of, with phenanthraquinone, 387.  
 2-(3:4:5-Triphenylpyrrole)-2'-(3':5'-diphenylpyrrole)- $\alpha$ -methyltrimethincyanine bromide, 484.  
 Tripicolinatoiron, 26.  
 Tri-2-pyridylarsine, 283.  
 Tri-2-pyridylphosphine, 283.  
 Triterpene group, 283.

Triterpene resinols, 28, 256, 527, 532.  
 Triterpenoid compounds, optical rotation and structure of, 659.  
 6-Trityl 2:3-dimethyl *d*-araboascorbic acid, 227.  
 6-Trityl methylglucofuranoside, 573.  
 6-Trityl  $\beta$ -methylglucoside 3-nitrate, and its 2:4-diacetyl derivative, 494.  
 6-Trityl  $\alpha$ -methyl-*d*-mannofuranoside, 576.  
 6-Trityl 2:3:4-triacetyl  $\alpha$ -methylmannoside, 133.  
 6-Trityl 2:3:5-trimethyl methylglucofuranoside, 574.  
 6-Trityl 2:3:4-trimethyl  $\beta$ -methylglucoside, 134.  
 6-Trityl 2:3:5-trimethyl  $\alpha$ -methylmannofuranoside, 576.  
 6-Trityl 2:3:4-trimethyl  $\alpha$ -methylmannoside, 133.  
 Tryptophan, synthesis of, 624, 626, 629.  
*d*-Tryptophan, and its *N*-benzoyl derivative, 631.

## U.

Unsaturated compounds, containing ethylenic halogen, reaction of, with amines, 371.  
 Uronic acids, synthesis of, 131, 587.

## V.

*iso*Valeryltropëine hydrobromide, synthesis of, 482.  
 Velocity of reaction in solution, effect of alkyl groups on, 422.  
 Veratrylidenesuccinic acid, 6-nitro-, 537.  
 Vinyl halides, spectra of, absorption, infra-red, 303.  
 Vinylacetylene, condensation of, with crotonaldehyde, 140.  
 3-Vinyladipic acid, 3- $\alpha$ -chloro-, and its di-*p*-phenylphenacyl ester, 102.  
 1-Vinyl- $\Delta^3$ -cyclohexene, 3-chloro-1- $\alpha$ -chloro-, 101.  
 Vitamin-*A* aldehyde. See Axerophthal.  
 Volume, molecular, structure and, 380.

## X.

Xanthopinacol, pyrolysis of, 305.  
 9-Xanthyldiphenylcarbinol, 70.  
*m*-Xylidines, inhibition of resonance in, 408.  
 9-*d*-Xylopyranosidoadenine, 655.  
 9-*d*-Xylopyranosidohypoxanthine, 656.  
 4-*d*-Xylosidamino-5-(2':4'-*d*-chlorobenzeneazo)-2-methylpyrimidine, 6-amino-, and its 4-triacetyl derivative, 320.  
 4-*d*-Xylosidamino-5-(2':5'-*d*-chlorobenzeneazo)pyrimidines, 6-amino-, and their 4-triacetyl derivatives, 655, 656.  
 6-*d*-Xylosidamino-2-methylpurine, and its 6-triacetyl derivative, 320.  
 4-*d*-Xylosidamino-5-*p*-nitrobenzeneazo-2-methylpyrimidine, 6-amino-, 320.  
 6-*d*-Xylosidaminopurine, 655.  
 4-*d*-Xylosidaminopyrimidine-I, 6-amino-, 655.  
 9-*d*-Xylosido-2-methyladenine, 321.  
 9-*d*-Xylosido-2-methylhypoxanthine, 321.

## Y.

Yeast ribonucleic acid, constitution of, 30, 33.
