

Corrigendum**Halogen-exchange Reactions and Barriers to Torsion Around N-S Bonds in Halogeno-sulphinamides**

By W. R. JACKSON, T. G. KEE, and W. B. JENNINGS

J.C.S. Chem. Comm., 1972, 1154

It has been brought to our attention by Dr. Senning that some kinetic data for SN bond torsion in compounds (**la**, **e**, **f**, and **j**) have been reported previously (H. J. Jakobsen, A. Senning, and S. Kaae, *Acta Chem. Scand.*, 1971, **25**, 3031; M. Mikolajczyk and J. Drabowicz, *Z. Naturforsch.*, 1971, **26b**, 1372; R. Keat, D. S. Ross, and D. W. A. Sharp, *Spectrochim. Acta*, 1971, **27A**, 2219), though the possibility of ready halogen exchange at sulphur does not appear to have been noted.
