## Chemical Communications

20 FEBRUARY 1974

JCCCAT (4) 117-156 (1974)

### CONTENTS

- Page
- 117 Reversible Formation of a High-spin Cobalt(II) Complex of the Neutral Dioxxygen Ligand  
**Christopher J. Willis**
- 118 An Example of a Phosphoranyl Radical in a Tetrahedral Configuration  
**Gerrit Boekestein, Eugène H. J. M. Jansen, and Henk M. Buck**
- 119 Synthesis of Cyclic Carbonates by a Novel Carbonate Rearrangement  
**R. Garth Pews**
- 119 Conformational Rigidity in [2,2](2,5)Pyrrolofuranophane  
**Stuart M. Rosenfeld and Philip M. Keehn**
- 120 Gas-phase Ionic Reactions Related to Acid-catalysed Carbonyl Reactions in Solution  
**James K. Pau, Jhong K. Kim, and Marjorie C. Caserio**
- 121 Intramolecular 1,6-Hydride Transfer in Gaseous Carbonium Ions  
**Jhong K. Kim, James K. Pau, and Marjorie C. Caserio**
- 122 A Convenient Synthesis of *N*-Isothiocyanatoimines  
**Carsten Berg**
- 123 Benzylidenecarbene as a Probable Intermediate in the Interconversion of  $\text{Ph}^{13}\text{C}\equiv\text{CH}$  and  $\text{PhC}\equiv^{13}\text{CH}$  at 550 °C and 700 °C  
**Roger F. C. Brown, Kevin J. Harrington, and Gabrielle L. McMullen**
- 124 Selective Organic Reactions in Sheet-silicate Intercalates: Conversion of 4,4'-Diamino-*trans*-stilbene into Aniline  
**D.T.B. Tennakoon, John M. Thomas, M. J. Tricker, and S. H. Graham**
- 125 Structure of Nic-2, A Major Steroidal Constituent of the Insect Repellent Plant *Nicandra physaloides*  
**Robert B. Bates and Steven R. Morehead**
- 126 Photochemical and Thermal Inertness of a Bicyclo[2,2,2]octadienone Di-imine  
**Harold Hart and Robert W. Peiffer**
- 127 Synthesis and Birch Reduction of Benzocyclopropene  
**Phillip Radlick and Herschel T. Crawford**
- 128 Lanthanide-induced Shifts in the Carbon-13 Nuclear Magnetic Resonance Spectra of Ketones  
**Derek J. Chadwick and Dudley H. Williams**
- 129 Photorearrangement of 3-Oxo-1-pyrroline 1-Oxides  
**David St. Clair Black and Alan B. Boscacci**
- 130 *O*-Alkenyl Oxime Ethers: a New Product Type from Nitrosophenol-Olefin Reactions  
**Barry Pepper and Maurice Porter**
- 131 Reactions of 5 $\alpha$ -Hydroxy-steroids: the Mechanism of Backbone Rearrangement in Sulphuric Acid-Acetic Acid-Acetic Anhydride  
**E. T. John Bathurst and James M. Coxon**
- 132 Molybdenum Nitrosyl Complexes Containing Bridging Hydrazido-groups: X-Ray Analysis of the Structure of  $\{(\pi\text{-C}_5\text{H}_5)_2\text{Mo}(\text{NO})\text{I}\}_2(\mu\text{-NNMe}_2)$   
**W. George Kita, Jon A. McCleverty, Brian E. Mann, Duncan Seddon, George A. Sim, and David I. Woodhouse**
- 133 The Role of [<sup>3</sup>H]-Labelling in the Determination of the Mechanism of Formation of Benzyne from Benzene-diazonium Acetate  
**J. I. G. Cadogan, Charles D. Murray, and John T. Sharp**
- 134 Reaction of Aromatic or Heterocyclic Amines and Perfluoro-2-methylpent-2-ene to give Fused Pyridines, Ketenimines, or Enamines  
**William T. Flowers, Robert N. Haszeldine, Clifford R. Owen, and Abraham Thomas**
- 135 Enolate Alkylation with Bromomethyl Sulphides: Synthesis of  $\alpha$ -Methylene Ketones and Carboxylic Acids  
**Hans J. Reich and James M. Renga**

Contents—continued overleaf

Contents—continued

- 136  $\beta$ -Ethylene Complex of Molybdenum(0) and Hydrido(acetylacetonato)-complex of Molybdenum(II) with Diphosphine Ligands  
**Takashi Ito, Toshiyuki Kokubo, Takakazu Yamamoto, Akio Yamamoto, and Sakuji Ikeda**
- 137 Competitive  $\alpha\alpha$ - and  $\alpha\beta$ -Dehydrohalogenations from  $\text{CH}_3\text{CDF}_2$  behind Shock Waves  
**M. V. C. Sekhar and E. Tschuikow-Roux**
- 138 Treatment of *N*-Alkyl-*N'*-tosylhydrazines with Oxidizing Agents: a New Route to Alkanesulphinic Esters  
**Orazio Attanasi, Luciano Caglioti, and Francesco Gasparrini**
- 139 Transition-metal-Nucleotide Complexes. X-Ray Crystal and Molecular Structure of the Complex Between Nickel(II) and Inosine 5'-Monophosphate  $[\text{Ni}(\text{imp})(\text{H}_2\text{O})_5, 2\text{H}_2\text{O}]$   
**George R. Clark and John D. Orbell**
- 140 Selectivity in the Electrophilic Addition of Carbenes and Nitrenes to Aliphatic and Cyclic Sulphides  
**David C. Appleton, David C. Bull, James McKenna, Jean M. McKenna, and Andrew R. Walley**
- 141 Determination of Deuteron Quadrupole Coupling Constant in the Liquid State  
**Lloyd M. Jackman, Edward S. Greenberg, Nikolaus M. Szeverenyi, and Gerd K. Schnorr**
- 142 A Method for Olefin Inversion *via* Phosphine Oxides  
**Alexander J. Bridges and Gordon H. Whitham**
- 143 Reaction of 3-Alkyl-2-benzyl-1,4-naphthoquinones with *t*-Butylamine: Isolation of Epoxides and Heterocycles  
**Ian Baxter and Jeremy K. M. Sanders**
- 144 Oligomerization of Sulphene in Solution  
**J. Stuart Grossert and Madan M. Bharadwaj**
- 145 Synthesis of 18,21-Dihydroxypregn-4-ene-3,20-dione ('18-Hydroxy-deoxycorticosterone')  
**David N. Kirk and Maruthiandan S. Rajagopalan**
- 147 Unusual Intermolecular Ligand Exchange Process in Octakis(trimethyl phosphite)dirhodium(0),  $\text{Rh}_2[\text{P}(\text{OMe})_3]_8$   
**Rene Mathieu and John F. Nixon**
- 148 Evidence for a Bridged Transition State in the Formation of  $\beta$ -Bromoalkyl Radicals  
**Edward N. Cain and Richard K. Solly**
- 149 Electrochemistry of Four-co-ordinate Quadrivalent Organosulphur(IV) Compounds  
**Chi-Sheng Liao, James Q. Chambers, Istvan Kapovits, and Jozsef Rabaif**
- 150 X-Ray Crystallographic Determination of the Structure and Absolute Configuration of the Alkaloids Cocculine and Cocculidine  
**Radzhab Razakov, Sabir Yu. Yunusov, Said-Murat Nasyrov, Anatol N. Chekhlov, Valentine G. Andrianov, and Yuri T. Struchkov**
- 151 An Alternative Synthesis of the Corey Prostaglandin Aldehyde  
**Richard Peel and James K. Sutherland**
- 153 The Synthesis and Crystal Structure of a Carbadiene-allyl Nickel Complex  
**Michael Green, Judith Howard, John L. Spencer, and F. Gordon A. Stone**
- 154 Aluminium-27 Nuclear Magnetic Resonance: Octahedral and Tetrahedral Solvates of the Aluminium Cation  
**Jean-J. Delpuech, Mohamed R. Khaddar, Alain Peguy, and Patrice Rubini**
- 155 Unusual Alkyl Group Directing Effects During Cyclopropane Ring Hydrogenolysis  
**M. Naseem Akhtar, W. Roy Jackson, John J. Rooney, and Nicolas G. Samman**
