Chemical Communications

5 JANUARY 1977

JCCCAT (1) 1-32 (1977)

CONTENTS

- Page
- 5 Reactivity Patterns in Phenolysis Reactions. Evidence for the Importance of π Complexing
Allan K. Colter and **Michael R. J. Dack**
- 6 Relative Reactivities of Conjugated Dienes Towards Silicon Difluoride
Richard A. Ferrieri, E. Edwin Siefert, Michael J. Griffin, Otto F. Zeck, and **Yi-Noo Tang**
- 7 Preparation of Isoxazoline *N*-Oxide Derivatives from a Nitro-sugar and *S*-Ylides
Tohru Sakakibara and **Rokuro Sudoh**
- 8 Synthesis and *X*-Ray Crystal Structure of a Bis(2,2'-bipyridyl)trithionatocopper(II) Complex
Marisa Belicchi Ferrari, Giovanna Gasparri Fava, and **Corrado Pelizzi**
- 9 Polymeric Sulphur Nitride: a New Electrode Material
Robert J. Nowak, Harry B. Mark, Jr., A. G. MacDiarmid and **David Weber**
- 11 Tetrathioethylene Dications: Endocyclic to Exocyclic Rearrangement
Robert M. Harnden, P. Ricker Moses, and **James Q. Chambers**
- 12 Structures of Falaconitine and Mithaconitine, Two Novel Diterpenoid Alkaloids from *Aconitum falconeri* Stapf.
S. William Pelletier, Naresh V. Mody, and **H. S. Puri**
- 13 Unusual Formation of 2,5-Diarylpyrazines from $\alpha\alpha'$ -Dibromoacetophenone Azines and Hydrazine
David A. Trujillo, Kozaburo Nishiyama, and **Jean-Pierre Anselme**
- 14 Molecular Structure of High- and Low-spin 1,1'-Dimethylmanganocenes Determined by Gas Phase Electron Diffraction
Arne Almennigen, Svein Samdal, and **Arne Haaland**
- 15 pH-induced Co-ordination Geometry Change in a Macrocyclic Nickel(II) Complex
Tobias J. Lotz and **Thomas A. Kaden**
- 16 Short and Stereoselective Construction of a Key Intermediate for Synthesis of Unsymmetrical Pentacyclic Triterpenes
Tetsuji Kametani, Yoshiro Hirai, Fumio Satoh, and **Keiichiro Fukumoto**
- 18 Decomposition of 2-Azidosulphonylbenzophenones. Unusual Rearrangement Products
Rudolph A. Abramovitch and **Daniel P. Vanderpool**
- 19 Conformational Studies of Chlorotetrahydropyrans by Nuclear Quadrupole Resonance Spectroscopy
Muhammed Sabir, John A. S. Smith, Olivier Riobe, Alain Lebouc,
Jacques Delaunay, and **Jack Cousseau**
- 20 Application of Iron Carbonyls to Organic Synthesis. Mediation of Nucleophilic Addition to Alkenes via Tetracarbonyliron Complexes
Bryan W. Roberts and **Janice Wong**
- 21 Equilibria in Vitamin D₃. Preparation and Properties of 6-Methylvitamin D₃ and its Isomers
Mordechai Sheves and **Yehuda Mazur**
- 23 [3,3]Sigmatropic Rearrangement of an *N*-Benzoyl-3,6-dihydro-1,2-oxazine Derived from Ergosteryl Acetate and Nitrosocarbonylbenzene
Gordon W. Kirby and **John W. M. Mackinnon**
- 24 Bis(diazadiene)iron Complexes, $(R^1M=CR^2-CR^3=NR^4)_2Fe^1$
Heindirk tom Dieck and **Horst Bruder**
- 25 2-Arylsulphonyl-3-phenyloxaziridines: a New Class of Stable Oxaziridine Derivatives
Franklin A. Davies, Upender K. Nadir, and **Edward W. Kluger**
- 27 Vetispirane Sesquiterpene Glucosides from Flue-cured Virginia Tobacco: Structure, Absolute Stereochemistry, and Synthesis. *X*-Ray Structure of the *p*-Bromobenzenesulphonate of One of the Derived Aglycones
Robert C. Anderson, Donald M. Gunn, Judith Murray-Rust, Peter Murray-Rust,
and **James S. Roberts**

Contents—continued overleaf

Contents—continued

- Page
- 29 Facile Acyl Transfer from Imidazole to the Hydroxy-group in a Cationic Micelle in the Hydrolysis of *p*-Nitrophenyl Acetate
Waichiro Tagaki, Shohei Kobayashi, and Daikichi Fukushima
- 30 X-Ray Crystal and Molecular Structure of $[\text{Et}_2\text{NCFe}(\text{CO})_3]_2$: an Example of the Division of an Alkyne into Two Separate Units by Rupture of the $\text{C}\equiv\text{C}$ Bond
Gordon G. Cash, Roger C. Pettersen, and R. Bruce King
- 31 X-Ray Crystal and Molecular Structure of Au_3Cl_8 , the Product of the Reduction of Au_3Cl_4 by $\text{Au}(\text{CO})\text{Cl}$
Daniela Belli Dell'Amico, Fausto Calderazzo, Fabio Marchetti, Stefano Merlino, and Giovanni Perego
