## Chemical Communications

16 FEBRUARY 1977

JCCCAT (4) 105–136 (1977)

### CONTENTS

- Page
- 105 *X*-Ray Crystal and Molecular Structure of Kodo-cytochalasin-I  
**Joyce A. McMillan, Chian C. Chiang, Marty K. Greensley, Iain C. Paul, S. A. Patwardhan, Sukh Dev, Mark A. Beno, and Gary G. Christoph**
- 106 Kinetics of Binding of Imidazole to  $\alpha\beta\gamma\delta$ -Tetraphenylporphinatoiron(III) in Dimethyl Sulphoxide  
**Robert F. Pasternack and James R. Stahlbush**
- 108 Photolysis of Benzyl Halides and Benzyl Acetate in Alcohols  
**David C. Appleton, Brian Brocklehurst, James McKenna, Jean M. McKenna, Martin J. Smith, Paul S. Taylor, Stephen Thackeray, and Andrew R. Walley**
- 109 Structure and Reactivity of Dipolar Heterocycles  
**Christopher A. Ramsden**
- 111 Stereospecific Synthesis of 4,11-Epoxy-*cis*-eudesmane, a Tricyclic Sesquiterpene Defence Secretion from the Termite *Amitermes evuncifer*  
**Raymond Baker, David A. Evans, and Phillip G. McDowel**
- 111 Synthesis of a Silylamino-substituted Phosphorane  
**Alan H. Cowley and Rosalind Chung-Yi Lee**
- 112 Mechanism of Phase-transfer Catalysis  
**Dario Landini, Angelamaria Maia, and Fernando Montanari**
- 113 Biosynthesis of the Natural (Type-III) Porphyrins: Proof that Rearrangement Occurs After Head-to-tail Bilane Formation  
**Alan R. Battersby, Edward McDonald, D. Clive Williams, and Hanns K. W. Wurziger**
- 115 Enzymic Formation of the Type-III Porphyrin Macrocycle from Unrearranged AP·AP Pyrromethane  
**Alan R. Battersby, Dennis G. Buckley, Edward McDonald, and D. Clive Williams**
- 117 Mechanistic Study of the Enzymic Incorporation of Unrearranged AP·AP Pyrromethane into Uro'gen-III  
**Alan R. Battersby, David W. Johnson, Edward McDonald, and D. Clive Williams**
- 119 Linear Free Energy Relationships for Carbon-13 Chemical Shifts in *N*-Phenacylpyridinium Bromides  
**Alan D. Harsch, Shelley Johnson, and David W. Boykin**
- 120 Reaction of Patchouli Alcohol with Lead Tetra-acetate; a New Regiospecific Fragmentation of Patchouli Alcohol  
**Alan F. Thomas and Michel Ozainne**
- 121 Preparation and *X*-Ray Crystal Structures of 5,10-Dibromo-*nido*-decaborane(14)  
**Robert E. Loffredo, Timothy J. Dupont, R. Curtis Haltiwanger, and Arlan D. Norman**
- 122 Thermal Rearrangement of 1-Alkoxy-2-methylenecyclopropanes  
**Wolfgang Kirmse and Hans-Rüdiger Murawski**
- 124 Thermal Rearrangement of Alkoxy-cyclopropanes  
**Wolfgang Kirmse and Manfred Zeppenfeld**
- 125 New Synthesis of Selected Dehydroamino-acid Esters and Triazolidines  
**Ronald Grigg and James Kemp**
- 126 Reaction of Thiobenzophenones with the Dicarboxylcyclopentadienyliron Anion: a Novel Fulvene Synthesis *via* Desulphurization  
**Howard Alper and Hang-Nam Paik**
- 127 An Intermediate with a Copper–Carbon Bond Formed by the Reaction of Copper Ions with  $\cdot\text{CH}_2\text{CO}_2\text{H}$  Radicals in Aqueous Solutions  
**Mira Freiberg and Dan Meyerstein**
- 128 Cleavage of Water Over Zeolites  
**Peter A. Jacobs, Jan B. Uytterhoeven and Hermann K. Beyer**
- 129 Novel Transient Tin-centred Radical Tris-(2-phenyl-2-methylpropyl)stannyl  
**Hans U. Buschhaus, Manfred Lehnig, and Wilhelm P. Neumann**
- 130 Synthesis of Benzothiet from Benzo[*b*]thiophen 1,1-dioxide  
**Wim J. M. van Tilborg and Roel Plomp**
- 131 Reduction of Arenediazonium Fluoroborates to Arylhydrazines by Benzeneselenol  
**Frank G. James, M. John Perkins, Ombretta Porta, and Brian V. Smith**

Contents—continued overleaf

Contents—*continued*

- Page
- 132 ( $\eta^4$ -Cyclo-octa-1,4-diene)( $\eta^6$ -cyclo-octa-1,3,5-triene)ruthenium(0) Chemistry: the Role of Molecular Hydrogen in a New Synthetic Route to Cyclo-olefin Ruthenium Complexes  
**Paolo Petrici, GianPaolo Simonelli, Giovanni Vitulli, Giulio Deganello, PierLuigi Sandrini, and Angelo Mantovani**
- 133 Photolysis of Pyridazine 1,2-Dioxides; Formation of the Novel 1,4,6,7-Dioxadiazocin Ring System  
**Heihachiro Arai, Akio Ohsawa, Katsunori Saiki, and Hiroshi Igeta**
- 135 Inorgano-Grignard Reagents. Preparation, Reactions, and X-Ray Crystal Structure of Bis-( $\eta$ -cyclopentadienyl)hydridomolybdenum[bromo(bistetrahydrofuran)magnesium]  
**Stephen G. Davies, Malcolm L. H. Green, Keith Prout, Alessandro Coda, and Vittorio Tazzoli**
