

# Lawesson's Reagent

Lawesson's Reagent [2,4-bis(4-methoxyphenyl)-1,3-dithia-2,4-diphosphetane-2,4-disulfide, 1] is a potent reagent for the thiation of diverse carbonyl compounds. It also enables the synthesis of some unique heterocyclic systems. Some examples are given below:

$$O = \langle \begin{matrix} N - R \\ | \\ N - R \end{matrix} \qquad \begin{matrix} 1 \\ | \\ N - R \end{matrix} \qquad \begin{matrix} O \\ | \\ N - N \end{matrix} \qquad \begin{matrix} S \\ | \\ P - Ar \\ | \\ N - N \end{matrix} \qquad \begin{matrix} (ref. 8) \end{matrix}$$

$$Ar = 4 - M \cdot OC_6 H_4 \qquad \qquad R \qquad \qquad R$$

### EDUCATION AIDS FROM THE ROYAL SOCIETY OF CHEMISTRY

# **Chemistry Cassettes**

## **Chemistry Cassettes**

General Editor: Peter Groves, The University of Aston, Birmingham

The Royal Society of Chemistry Educational Techniques Subjects Group has produced a series of cassettes which will be of considerable benefit to the chemistry student. Chemistry Cassettes contain accounts of important topics given by leading authorities. Each cassette is supplemented by a workbook which contains diagrams, equations, examples and other material discussed by the lecturer and, in many cases, problem sections designed to stimulate thought and test the student's appreciation of the subject. Chemistry Cassettes enable the student to listen and learn at his own pace, wherever and whenever he pleases.

MISCELLANEOUS

# Hazards in the Chemical Laboratory 3rd Edition

Edited by L. Bretherick

Hazards in the Chemical Laboratory has become established as an essential handbook of safety measures, practice and toxic effects for laboratories handling chemicals and chemical equipment.

Since the 2nd Edition was published in 1977, there have been many changes in legislation, recommended safety measures, protective standards, safety equipment, measurements of toxic effects, etc., which have resulted in a real need for this new updated edition. For example, the sections dealing with hazards have been greatly revised and expanded to include the steadily increasing body of knowledge on hazardous properties—reflected by the expansion of The Toxic Substances List from 13000 compounds in 1974 to 34000 in 1978 (now retitled the Registry of Toxic Effect of Chemical Substances). Comments on the predictive value of comprehensive toxicity and carcinogenicity testing, now required for commercial chemicals, is included. A section has also been added which deals with mutagens and carcinogens in relation to health care and first aid, and also includes sources of information on toxicity and medical emergencies. This third edition, of Hazards in the Chemical Laboratory edited by L. Bretherick, one of the world's leading experts on hazards and safety standards, is an essential requirement for any laboratory handling hazardous chemicals.

### **CLASSIFIED ADVERTISEMENTS**

#### UNIVERSITY OF CANTERBURY Christchurch, New Zealand LECTURERS IN CHEMISTRY

Applications are invited for two positions of Lecturer in the Department of Chemistry. Other factors being equal, preference will be given to applicants who have special qualifications in:

(a) Inorganic or Structural or Analytical chemistry.

(b) Organic chemistry.

The appointee will be expected to commence duties at an agreed date after 1 February 1982. The salary for Lecturers is on a scale from NZ\$19,140 to \$23,520 per annum.

Applications close on 15 September 1981.

Further particulars and Conditions of Appointment may be obtained from the Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H OPF.

#### UNIVERSITY OF SALFORD DEPARTMENT OF CHEMISTRY AND APPLIED CHEMISTRY POSTDOCTORAL RESEARCH FELLOW

Required to study Synthetic Aspects of Nitrene and Carbene Chemistry using Spray Pyrolysis, under the direction of Dr O Meth Cohn.

The appointment is tenable for one year, with the possibility of renewal for up to three years, from 1 October 1981. Salary within the range £6070 – £6880 pa; USS benefits.

Application forms obtainable from the Registrar, University of Salford, Salford M5 4WT (tel: 061-736 5843 ext. 215) to whom completed applications should be returned by Friday 21 August 1981 quoting reference number CH/283/CC.

## UNIVERSITY OF GLASGOW Department of Organic Chemistry

Postdoctoral Research Assistantship in Bio-organic Chemistry

Applications are invited for an SERC – sponsored Research Assistantship to study terpenoid metabolism in plant-tissue cultures and micro-organisms. Applicants should have a good background in organic synthesis. Experience with radio-isotopes and micro-organisms would be an advantage. The post is available from 1.10.81 and is tenable in the first instance for one year at a salary in the range £6070 to £6880 (Range 1A, Research & Analogous scales). Applications with curriculum vitae and the names of two referees should be sent as soon as possible to Professor K. H. Overton, Department of Chemistry, The University of Glasgow, Glasgow G12 8QQ. In reply please quote Ref. No. 4838.

# **Instrumentation Specialist**

## University of Petroleum & Minerals Dhahran, Saudi Arabia

The University of Petroleum & Minerals, Dhahran, Saudi Arabia, is seeking for its chemistry department a full-time specialist to service the department's major instrumentation-Varian XL 200 ft NMR superconducting spectrometer, ENRAF Nonius CAD-4 automatic diffractometer, RIBERMAG GC-MS and emission spectrograph. New acquisitions will include EPR and ENDOR spectrometers.

Applicants should have a least a B.S. in electronics, or a B.S. degree in chemistry, physics or chemical engineering with training in electronics, and be knowledgeable in the operation and maintenance of computer-interfaced instrumentation. Experience with magnetic resonance is preferred. Responsibilities will include the maintenance, troubleshooting and repair of these instruments.

Minimum regular contract for two years, renewable. Competitive salaries and

allowances. Air-conditioned and furnished housing provided. Free air transportation to and from Dhahran each year. Attractive educational assistance grants for schoolage dependant children. All earned income without Saudi taxes. 10½ months duty each year with 45 days vacation with salary plus other fringe benefits as per policy.

Apply with complete résumé on academic, professional and personal data, together with photograph, list of references, copies of certificates, diplomas and degrees and home and office addresses and telephone numbers to:

Dean of Faculty and Personnel Affairs, University of Petroleum & Minerals, P.O. Box 144, Dhahran International Airport, Dhahran, Saudi Arabia.

An International Symposium on Polymer Supported Reagents will be held in LYON-FRANCE the 29th June to 1st July 1982 with the following topics:

- Synthesis with reagents or substrates bonded to polymers or in inorganic materials.
- Polymer catalysts: triphase catalysis, "solid solvents",
- Structure-reactivity relationship,
- Enzyme-like synthetic polymers,
- Chiral polymers for asymmetric synthesis or racemate resolution,
- Immobilized enzymes for preparative purposes

#### UNIVERSITY OF CANTERBURY Christchurch, New Zealand VISITING LECTURER IN CHEMISTRY

Applications are invited for a Visiting Lectureship in Chemistry, tenable for one year. The appointment is to be taken up as early as possible in 1982. It is anticipated that the appointee will have completed a Ph.D. and show evidence of strong research interest in some particular field of Chemistry. The emolument payable will be a fixed fee, between NZ\$19,140 and \$23,520, part of which may be designated as a travel allowance.

Applications should be air-mailed by 15 August 1981.

Further particulars and Conditions of Appointment may be obtained from the Association of Commonwealth Universities (Appts.), 36 Gordon Square, London WC1H OPF.
