## CLASSIFIED ADVERTISEMENTS

**QUEEN MARY COLLEGE**  
University of London  
**DEPARTMENT OF CHEMISTRY**  
Postdoctoral Research Fellow  
Studies of Peptides by High Field  
Multinuclear NMR

Postdoctoral Research Assistant required for two years to work under the direction of Professor E. W. Randall on the secondary structures, exchange characteristics and motional properties of peptides in solution, using multinuclear NMR techniques. Instruments available include the highfield Bruker 400 and 250MHz instruments. Applicants should preferably have worked in the field of peptide synthesis and have some knowledge of NMR techniques, although applications from spectroscopists with experience of work on peptides will also be considered. The position is available at any time before 1st March 1983. Starting salary is in the range £6375-£7225 p.a. with London allowance of £1035.

Applications with c.v. and the names of two referees to The Personnel Officer, Queen Mary College, Mile End Road, London E1 4NS. Closing date 30 September 1982.

Further details obtainable from Professor E. W. Randall, (01-980-4811. Ex. 508) or Dr. G. E. Hawkes (Ext. 439).

**The Queen's University of Belfast**  
**POSTDOCTORAL RESEARCH**  
**ASSISTANTSHIP**

**Department of Chemistry**

Applications are invited to work on a S.E.R.C. supported programme in association with Dr. D. R. Boyd concerned with Arene Oxide-Oxepin Synthesis and Structure. Experience in synthetic organic chemistry is essential. N.m.r. studies on the structures of these compounds will be carried out in collaboration with Dr. W. B. Jennings of the University of Birmingham. The post, available from 1 October is initially tenable for one year, with the possibility of renewal. Salary range: £6375-£7656 per annum.

Applications with full curriculum vitae and the names and addresses of two referees should be sent to the Personnel Officer, The Queen's University of Belfast, BT7 1NN, Northern Ireland. Please quote Ref. 82/CC.
