

**Corrigenda** **$\alpha$ -C-Glycopyranosides from Lewis Acid Catalysed Condensations of Acetylated Glycals and Enol Silanes****Robert David Dawe and Bert Fraser-Reid***J. Chem. Soc., Chem. Commun.*, 1981, 1180.

In footnote †, p. 1180, the carbon-13 n.m.r. values given for (4) and (5) should be reversed; thus, for (4)  $\delta(\text{C-5}) = 73.293$  p.p.m. and for (5)  $\delta(\text{C-5}) = 68.024$  p.p.m.

**An Efficient Stereoselective Method for the Synthesis of Thienamycin Intermediates****Robert V. Stevens and Kim Albizati***J. Chem. Soc., Chem. Commun.*, 1982, 104.

On p. 105, at the bottom of the scheme, the structure for X should be:

Also, reference 8 in the text should be disregarded.
