Use CHI, LHB and Hazards (3rd ed) together they make a 'Great Safety Team'

NEW
from
January 1984

A MONTHLY CURRENT AWARENESS BULLETIN WHICH REPORTS ON HAZARDS, HEALTH AND SAFETY IN THE CHEMICAL AND ALLIED INDUSTRIES.

CHEMICAL HAZARDS IN INDUSTRY (CHI) is designed to give full coverage of the recent scientific literature concerning health and safety information, hazards, and safe working practices in chemical plants and related facilities.

CHI... contains over 200 items per issue drawn from hundreds of primary journals and periodicals on a regular basis keeping you up to date and saving you the time, effort and expense of manual literature searching.

CHI... covers health and safety, toxicology, environmental health, epidemiology, medicine, chemical and biological hazards, accident prevention, chemical engineering and new legislation, making it a comprehensive single source of vital information for all those working in the chemical and allied industries.

CHI... references include titles, full bibliographic details and ABSTRACTS.

CHI... is indexed by both Chemical and Subject, making it easy to locate the items you are particularly interested in. An enhanced cumulative index will be produced annually as a separate issue.
