# NEW..a monthly current awareness bulletin giving worldwide coverage in the field of synthetic chemistry...

## METHODS IN ORGANIC SYNTHESIS

The massive amount of literature published these days in the field of synthetic chemistry makes it a laborious and time-consuming task to find just the items YOU want.

**METHODS IN ORGANIC SYNTHESIS (MOS)** provides current and cost-effective coverage of novel and unusual reactions and reaction schemes, keeping you up to date and saving you the time, effort and expense of performing your own literature searches.

**MOS** contains over 200 items per issue, drawn from the world's major primary organic chemistry journals, and published within weeks of the appearance of the original documents!

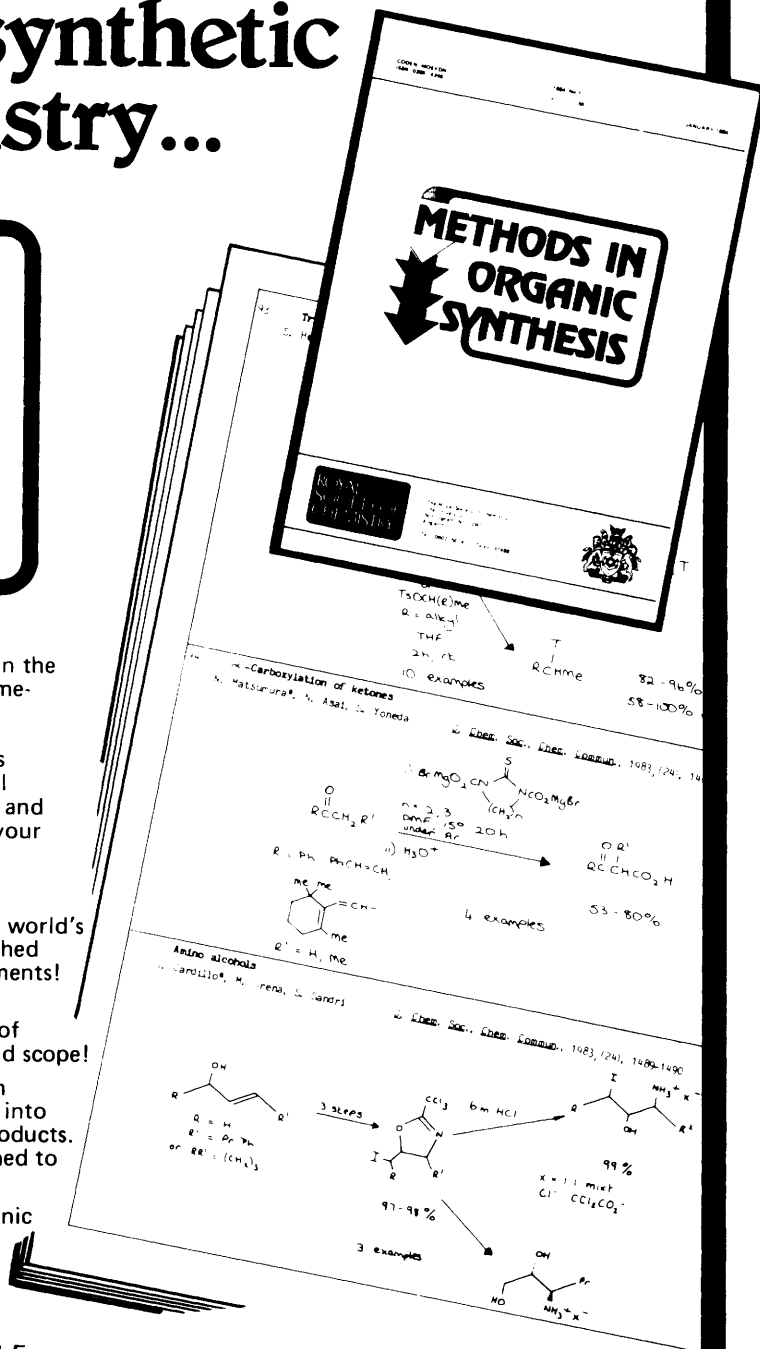

**MOS** items include titles, bibliographic details and **STRUCTURAL DIAGRAMS** or **LINE FORMULAE** of reaction schemes with details of conditions, yields and scope!

**MOS** issues each contain five comprehensive indexes: an Author Index, and a Keyword Subject Index divided into four sections: Reactants, Reactions, Reagents and Products. These indexes are cumulated annually, and are designed to give you easy access to items of particular interest!

**MOS** also includes books and reviews of interest to organic chemists!
