

JOURNAL OF THE CHEMICAL SOCIETY

Chemical Communications

Number 1

1985

CONTENTS

- 1 Notice to Authors, 1985
- 3 Aconaguine: An Isoquinoline-derived Alkaloid from *Berberis actinacantha* **Inge Weiss, Alan J. Freyer, Maurice Shamma, Alejandro Urzúa**
- 4 Regio- and Stereo-chemical Control in the Nickel-catalysed Addition of HCN to Alkynes. A Simple Synthesis of (*E*)-2-Alkyl-3-trialkylsilylalk-2-enenitriles **Gary D. Fallon, Neil J. Fitzmaurice, W. Roy Jackson, Patrick Perlmutter**
- 5 A Molecular Orbital Study of CLi_2F_2 : Planar 3-Co-ordinate and Pyramidal 4-Co-ordinate Carbon **John D. Watts, John G. Stamper**
- 7 Oxygen Vacancy Ordering in Superlattices of the Two Novel Oxides, $La_2Ni_2O_5$ and $La_2Co_2O_5$, prepared by Low Temperature Reduction of the Parent Perovskites **Kanamaluru Vidyasagar, Armin Reller, Jagannatha Gopalakrishnan, C. N. Ramachandra Rao**
- 8 Use of Hydride-forming Metals as Renewable Chemical Reagents: the Dehydrogenation of Isobutane to Isobutene **A. J. Fanelli, A. J. Maeland, A. M. Rosan, R. K. Crissey**
- 10 An Unusual Ecdysteroid, (20*S*)-Cholesta-7,14-diene-3 β ,5 α ,6 α ,20,25-pentaol (Bombycosterol) from the Ovaries of the Silkworm, *Bombyx mori* **Yoshinori Fujimoto, Satoru Miyasaka, Takafumi Ikeda, Nobuo Ikekawa, Eiji Ohnishi, Takashi Mizuno, Kunio Watanabe**
- 12 Lithium 2-Lithio-1,1,3,3-tetraphenylpropene **Josef Bernard, Christoph Schnieders, Klaus Müllen**
- 14 Activation of μ -Alkylidene Ligands through Oxidation–Deprotonation: A New Synthesis of μ -Methyne, and its Hydrogenation to μ -Methyl **Neil G. Connelly, Nigel J. Forrow, Benjamin P. Gracey, Selby A. R. Knox, A. Guy Orpen**
- 16 Activation of a μ_3 -Ethylidyne Ligand through Oxidation–Deprotonation: X-Ray Structure of $[Ru_3(\mu_3-CMe)(\mu-CO)_3(\eta-C_5Me_5)_3][BF_4]$ **Neil G. Connelly, Nigel J. Forrow, Selby A. R. Knox, Kirsty A. Macpherson, A. Guy Orpen**
- 18 Functionalisation of 1,3-Dienes using Cationic Complexes of Molybdenum **Michael Green, Simon Greenfield, Meinolf Kersting**
- 20 Condensation of Ketene Acetals derived from Glycolates with Aldehydes and Ketones: Synthesis of α,β -Dialkoxy Esters **Brian D. Gray, James D. White**
- 21 Solid State Unidirectional Photoisomerization of (β -Substituted Ethyl)bis(disubstituted Glyoximato)(L)cobalt(III) to the α -Substituted Ethyl Complexes (L = Pyridine or Primary Amine) **Yoshiaki Ohgo, Seiji Takeuchi**
- 23 Oxidative Cyclization of the Dianion of 1,3-Diphenylpropan-2-one **Marye Anne Fox, Chia-Chung Chen**
- 24 Quinone-capped Porphyrins as Model Photosynthetic Systems: Use of Metal Co-ordination to Control Chromophore Orientation and Interaction **Philip Leighton, Jeremy K. M. Sanders**
- 26 X-Ray Crystal Structure of Sarothralin, a Novel Antibiotic Compound from *Hypericum japonicum* **Kyoko Ishiguro, Masae Yamaki, Shuzo Takagi, Yuriko Yamagata, Ken-ichi Tomita**
- 27 The Photochemical Synthesis of $[Cr(CO)_5(H_2)]$ in Solution: I.r. Evidence for Co-ordinated Molecular Dihydrogen **Rita K. Upmacis, Gerard E. Gadd, Martyn Poliakoff, Michael B. Simpson, James J. Turner, Robin Whyman, Alan F. Simpson**
- 30 Flash Photolysis of $Cr(CO)_6$ in H_2 -saturated Cyclohexane Solution: I.R. Spectroscopic Evidence for a $Cr(CO)_5(H_2)$ Complex at Room Temperature **Stephen P. Church, Friedrich-Wilhelm Grevels, Horst Hermann, Kurt Schaffner**
- 32 Identification of Tetracyclic Diterpene Hydrocarbons in Australian Crude Oils and Sediments **Rohinton Noble, John Knox, Robert Alexander, Robert Kagi**
- 34 Synthetic Use of Lithium Nitride, an Unusual Reducing Agent. Formation of Ti_4 and Ti_6 Complexes **Melvyn Kilner, Gerard Parkin, Andrew G. Talbot**
- 35 Metallacyclobutene Formation from a Substituted-acetylene Complex of Cobalt and an Isocyanide. Regioselectivity and Rearrangement **Yasuo Wakatsuki, Sin-ya Miya, Shigeru Ikuta, Hiroshi Yamazaki**
- 37 Total Synthesis of (\pm)-Isoprosopinine B and (\pm)-Desoxoprosopinine **Andrew B. Holmes, John Thompson, Andrew J. G. Baxter, John Dixon**
- 39 Activation of a Ruthenium Cluster by a Gold Centre **John Evans, Gao Jingxing**
- 41 Selective Binding of a Cyanine Dye at the Surface of Ammonium Bilayer Membranes **Naotoshi Nakashima, Akihiko Tsuge, Toyoki Kunitake**

- 42 A New Method for the Determination of the Stability Constant of Metalloporphyrins: Use of the Catalytic Effect of Mercury(II) on Metalloporphyrin Formation **Masaaki Tabata, Motoharu Tanaka**
- 43 Orthometallation Reaction at a Binuclear Pyrazolyl (pz) Bridged Rhodium Compound: Synthesis and Crystal Structure Determination of $\text{Rh}_2(\mu\text{-pz})_2[\mu\text{-P}(\text{C}_6\text{F}_4)\text{Ph}_2]\text{Br}(\text{CO})(\text{pcBr})$, $\text{pcBr} = \text{P}(o\text{-BrC}_6\text{F}_4)\text{Ph}_2$ **Francisco Barceló, Pascual Lahuerta, M. Angeles Ubeda, Concepcion Foces-Foces, Felix H. Cano, Martin Martinez-Ripoll**

NEW PUBLICATIONS

from The Royal Society of Chemistry

TWO NEW BOOKS FOR TEACHERS AND STUDENTS OF CHEMISTRY RSC PAPERBACKS

In 1983 The Royal Society of Chemistry introduced a new series of inexpensive texts for students and teachers. Topics covered relate to those subjects which are commonly featured in courses on chemistry and related areas, which are currently taught in schools, universities and colleges.

Prices quoted below apply to both RSC Members and non-RSC Members.

FOOD: The Chemistry of its Components

By T. P. Coultate

Softcover 202pp
0 85186 483 X (1984)

Price £5.95 (\$11.00)

This book gives a detailed account of the chemistry of the principal substances of which our food is composed. Both the macro-components, the carbohydrates, lipids and proteins, which can be classified by their chemical structures, and the micro-components, the colours, flavours, vitamins and preservatives, which are classified in terms of function are considered. Throughout the book, Dr Coultate's theme is the relationship between the chemical structure of a substance and its contribution to the properties and behaviour of foodstuffs—whether observed in the laboratory, the factory, the kitchen or the dining room.

Contents:

Introduction, carbohydrates, lipids, proteins, colours, flavours, vitamins, preservatives, EEC numbers of food additives. Subject index. This book will be of particular benefit to students and teachers of food science and related courses in universities, colleges of further education and schools.

WATER

Revised 1st Edition

By Felix Franks

Softcover 102pp
0 85186 473 2 (1984)

Price £2.50 (\$6.00)

The book considers the present state of our knowledge of liquid water, its remarkable physical properties and how these give rise to a unique structure, its influence on the interactions between solutes, its role in maintaining biologically active structures, its involvement in chemical reactions and the problems posed by its management and in providing sufficient amounts of water of adequate quality.

An understanding of the behavioural properties of water is fundamental to gaining an appreciation of many scientific processes and principles. Science students and teachers will, therefore, find *Water* not only interesting reading, but also of considerable relevance to their studies.

Contents:

Occurrence, importance and physical properties; The place of water in the general classification of liquids; Isotopic composition; The structure of the water molecule and the nature of the hydrogen bond in water: Ice – its structure and dynamics; The structure of liquid water; The dynamic properties of liquid water; Towards a molecular description of water; Aqueous solutions of simple molecules; Aqueous solutions of electrolytes; The role of water in the stabilisation of biologically significant structures; Reactions in aqueous solutions; Water in the environment – quality, availability and exploitation; Summary and future prospects.

ORDERING RSC Members should send their orders to:

The Membership Officer, The Royal Society of Chemistry, 30 Russell Square, London WC1B 5DT.

Non-RSC Members should send their orders to:

The Royal Society of Chemistry, Distribution Centre, Blackhorse Road, Letchworth, Herts SG6 1HN.

CLASSIFIED ADVERTISEMENTS

QUEEN MARY COLLEGE UNIVERSITY OF LONDON CHEMISTRY DEPARTMENT

Applications are invited for appointment as Graduate Research Assistant in Organic Chemistry from January 1985 (or as soon as possible thereafter) on a 3-year S.E.R.C.-funded project involving investigation of novel carbanion chemistry and its application to total synthesis, under the supervision of Dr. N. S. Simpkins. Candidates should have a good honours degree in Chemistry and will be encouraged to register for a higher degree. Initial salary £7833 p.a. Applications, enclosing C.V. and names of 2 referees, should be made as soon as possible to the Personnel Officer, Queen Mary College, Mile End Road, London E1 4NS.

UNIVERSITY OF BRISTOL Postdoctoral Position in Inorganic Chemistry

Applications are invited for a postdoctoral appointment, supported by the S.E.R.C., to work with Dr. N. G. Connelly on the chemistry of mixed-valence organotransition-metal complexes. Applicants should have a good background in synthetic chemistry; a knowledge of simple electrochemical techniques would be an advantage but is not essential.

The appointment will be initially for one year with the possibility of renewal. The salary is on the 1A scale £7,520-£8,450.

Candidates should apply as soon as possible, sending curriculum vitae and names and addresses of two referees to:

Dr. N. G. Connelly
Department of Inorganic Chemistry
University of Bristol
Bristol BS8 1TS.
