Since 1960 the Union has made available to chemists everywhere a very large amount of important material which it handles each year through its regular publication in *Pure and Applied Chemistry*. The objectives of the journal are:

- to publish the main invited lectures of symposia sponsored by IUPAC at which authoritative and up-to-date accounts on the subject of the symposium are presented by prominent scientists; the lecturers cover their own recent work and review the worldwide literature on the subject;
- to publish the recommendations of the Union's commissions on nomenclature, symbols and units;
- to publish technical reports on standardization, recommended procedures, collaborative studies, data compilations, etc.;
- to publish critically evaluated state-of-the-art commissioned review articles on important topics.

Subscription Information

Pure and Applied Chemistry is published monthly. Subscription rates for 1988 are £355.00 (UK), \$600.00 (USA & Canada), £420.00 (elsewhere) post free.
