

CURRENT BIOTECHNOLOGY

What better way to keep abreast of developments in this diverse field?

Current Biotechnology (formerly Current Biotechnology Abstracts) is a monthly current awareness publication which gives you comprehensive coverage of the literature of biotechnology products and processes with industrial and commercial application. It covers the production of chemicals from biomass, biotechnology in energy production and waste treatment, new biotechnological techniques and new applications of classical biotechnology.

Each issue contains over 500 references with full abstracts drawn from over 500 journals, books, press releases, technical reports, and patents.

CB SAMPLE

3754-92-6 Biopharmaceuticals and conventional drugs: clinical success rates.

In 1989, one third of new drugs clinically tested in the US were produced by biotechnology. The clinical development stage of biopharmaceuticals is compared to that of conventional drugs. Two groups of biopharmaceuticals are included: proteins derived from recombinant DNA technology and proteins derived from hybridomas. Conventional drugs are limited to new chemical entities not previously clinically tested. Success rates at clinical trials were 63-68% for recombinant DNA products, 35-48% for monoclonal antibodies and 32% for the selected group of conventional drugs.

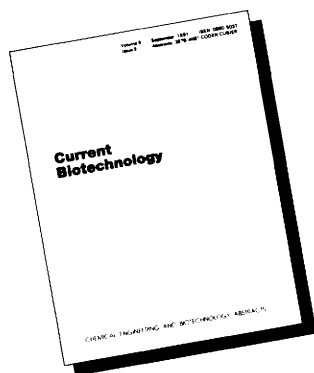

Bienz-Tadmor, B.; Dicerbo, P. A.; Tadmor, G.; Lasagna, L. Center Study Drug Dev., Tufts Univ., Boston, MA, USA
Bio/Technology May 1992, 10(5), 521-525.

CHEMICAL SAFETY DATA SHEETS

NEW
ADDITION
TO SERIES

Would you know what to do in an emergency such as a chemical spill or explosion?

Are you up-to-date with the procedures necessary for the safe handling of hazardous chemicals?

The Chemical Safety Data Sheets series provides the information you need to quickly and accurately assess the risks associated with a chemical and how to prevent accidents. The data sheets are clearly and systematically presented to provide an ideal reference format for fast scanning and assessment. Each volume covers a particular group of chemicals; the latest addition to the series is concerned with Flammable Chemicals.

NEW...

Volume 5 – Flammable Chemicals

This volume consists of 80 alphabetically arranged data sheets on flammable chemicals, selected from the UK Health and Safety Commission 'Authorised and Approved List'. It provides up-to-date information on the full range of hazards likely to be encountered by their use and the appropriate safety measures to be taken.

Softcover
Approx 300 pages
ISBN 0 85186 411 2
Price £54.95

Also available:

Volume 1 – Solvents

Softcover 350 pages
ISBN 0 85186 903 3 (1989) Price £49.95

Volume 2 – Main Group Metals and their Compounds

Softcover 439 pages
ISBN 0 85186 913 0 (1990) Price £49.95

Volume 3 – Corrosives and Irritants

Softcover 300 pages
ISBN 0 85186 923 8 (1990) Price £49.95

Volume 4 – Toxic Chemicals

Part a (A–L)

Softcover 350 pages
ISBN 0 85186 311 6 (1991) Price £49.95

Part b (M–Z)

Softcover 350 pages
ISBN 0 85186 321 3 (1991) Price £49.95

Special Package Price
Complete Package Volumes 1–5 £249.00

The Chemical Safety Data Sheets series is:

- ★ Full of vital information on health hazards and safety measures
- ★ Fully indexed – synonyms, trade names and CAS Registry Numbers ensure quick location of a data sheet
- ★ Practical and easy to use with a uniform presentation
- ★ Attractive with a readable format

And in addition:

- ★ Saves time spent searching for up-to-date information on the hazards of working with a chemical and the precautions required
- ★ Is relevant to a wide range of applications of chemicals in the laboratory and industry
- ★ Aids in-depth study through its extensive reference system
- ★ Is prepared by an independent organisation, not a pressure group

Chemical Safety Data Sheets are essential for everyone concerned with safety. They have proved to be of benefit to employees in the chemical industry, laboratory managers, environmental health officers, hospitals, safety organisations, fire brigades, trade unions and local authorities.
