

TWO OF THE MOST
POPULAR ORGANIC
CHEMISTRY PUBLICATIONS

PERKIN TRANSACTIONS 1 + 2

– essential reading for organic chemists

Perkin Transactions 1 is a leading international journal for the publication of synthetic organic and bio-organic chemistry research results. It contains high quality original research papers and urgent communications on the following topics:

- ★ Synthetic organic chemistry
- ★ Chemistry and biosynthesis of natural products
- ★ Medicinal chemistry
- ★ Organometallic chemistry
- ★ Chemistry of polymers and biological macromolecules
- ★ Agricultural chemistry
- ★ The relationship between molecular structure and biological activity

Perkin Transactions 2 contains papers and communications of interest to all involved with any branch of physical organic chemistry. It is one of the most respected publications in its field. The journal covers the physicochemical aspects of organic chemistry including:

- ★ Kinetic
- ★ Mechanistic
- ★ Structural
- ★ Spectroscopic
- ★ Theoretical studies

Key Features of Perkin Transactions:

- ★ Rapid publication – on average 5 months from receipt for full papers and 3 months for communications
- ★ Top class material – over one third of submitted papers are rejected
- ★ International in readership and authorship
- ★ New look pictorial contents list – easy to scan for papers of interest
- ★ Attractive presentation and well designed format
- ★ Conference diary

1993 Subscription Details

Perkin Transactions 1

Published twenty-four times per annum plus annual author and subject index

EC	£586.00	USA	\$1290.00
Canada (+ GST)	£677.00	Rest of World	£645.00

ISSN 0300-922X

Back issues available on request.

Perkin Transactions 2

Published twelve times per annum plus annual author and subject index

EC	£468.00	USA	\$1030.00
Canada (+ GST)	£541.00	Rest of World	£515.00

ISSN 0300-9580

Back issues available on request.

Together Perkin Transactions 1 and 2 should meet all organic chemistry requirements. Take out your subscriptions today.

To order please contact: Turpin Distribution Services Ltd, Blackhorse Road, Letchworth, Herts SG6 1HN, UK. Tel: +44 (0) 462 672555. Fax: +44 (0) 462 480947. Telex: 825372 TURPIN G.

For further information on **Perkin Transactions 1** or **2** please contact: Sales and Promotion Department, Royal Society of Chemistry, Thomas Graham House, Science Park, Milton Road, Cambridge CB4 4WF, UK. Tel: +44 (0) 223 420066. Fax: +44 (0) 223 423623. Telex: 818293 ROYAL.

NEW

Surface Engineering

This title is published in three highly illustrated volumes and covers the latest developments in the subject. It provides a unique combination of the science of coatings and surfaces, the technologies of deposition, surface modification and analysis, and practical applications. The three volumes provide a useful and comprehensive blend of reviews and state-of-the-art papers, written by international experts, and reflect the current status of and likely future advances in surface engineering.

Surface Engineering Volume I: Fundamentals of Coatings

This volume considers principles of coating/substrate design in aqueous and high temperature corrosion, and wear properties, scanning the coatings spectrum from organic, through metallic to ceramic. The emphasis in this volume is on the science and design of coatings and substrate systems rather than on technology.

Hardcover

ISBN 0 85186 665 4 (1993)

Approx 385 pages

Price £52.50

Due: Autumn 1993

Surface Engineering Volume II: Engineering Applications

Volume II is dedicated to topics concerning the performance of coatings and surface treatments embracing four main areas: the inhibition of wear and fatigue; corrosion control; application of coatings in heat engines and machining; and qualities and properties of coatings.

Hardcover

ISBN 0 85186 675 1 (1993)

Approx 350 pages

Price £52.50

Due Autumn 1993

Surface Engineering Volume III: Process Technology and Surface Analysis

Volume III has two thrusts as indicated by its title: process technology and surface analysis. Both areas are central to surface engineering and each holds particular promise, not only for improvement in existing types of coatings performance, but also in the design, development and evaluation of totally new coating/substrate systems.

Hardcover

ISBN 0 85186 685 9 (1993)

Approx 350 pages

Price £52.50

Due: Autumn 1993
