Ref No 971

## Molecular Biology and Biotechnology - 3rd Edition

Edited by J.M. Walker, *University of Hertfordshire* and E.B. Gingold, *South Bank University*

The 3rd Edition of this immensely popular textbook brings readers up to date with the latest advances in this rapidly developing field. It has been thoroughly revised and expanded, combining entirely new chapters on current hot topics with existing chapters that have been rewritten and extended. **Molecular Biology and Biotechnology** 3rd Edition provides real breadth of coverage, taking account of both molecular biology and industrial applications. It also gives in-depth coverage of key areas, resulting in a uniquely comprehensive publication. Highlights of this 3rd Edition include increased coverage of the cloning of yeast and animal cells, plant genetic engineering, and new coverage of polymerase chain reactions, DNA fingerprinting, transgenesis and vaccine development, reflecting the rapid growth of interest in these areas.

**Softcover** xviii + 428 pages ISBN 0 85186 794 4 1993 Price £39.00

Ref No 1098

## Container Molecules and their Guests

By Donald J. Cram and Jane M. Cram, *University of California*

**Monographs in Supramolecular Chemistry** - Series Editor: J. Fraser Stoddart, FRS, *University of Birmingham, UK*

This volume covers the evolution of host-guest complexation chemistry in the minds and hands of Nobel Prize winner Donald Cram and his co-workers at UCLA, over the 25-year period from 1970-1994. It deals with the fundamental principles and objectives that govern this rapidly developing subject and illustrates the emergence of a new field of biomimetic chemistry. The book demonstrates how a number of techniques, such as molecular modeling, synthesis, crystal structure, NMR solution structure and mass spectral structure determinations can be combined to develop a new branch of organic chemistry. It discusses the chemistry of completely new families of complexes - the carceplexes, hemicarceplexes and velcralexes - and reviews for the first time the uses of the interiors of hemicarceplexes as a new phase for carrying out chemical reactions and for protecting unstable species. Many will be inspired by the wonderful achievements that Cram and his team have made in this exciting branch of supramolecular chemistry.

**Hardcover** xiv + 224 pages ISBN 0 85186 972 6 Price £49.50 Expected date of publication: July 1994

Ref No 987

## Chemistry and Light

By Paul Suppan, *University of Fribourg, Switzerland*

This new text book provides a concise introduction to all aspects of light-induced processes in chemistry, physics and biology, as well as in medicine and industry. It is up to date with the latest advances in the field, in particular the probing of the fastest light-induced reactions on picosecond and femtosecond time scales, and is based on the photochemistry and photophysics degree course devised by the author. **Chemistry and Light** is a must for final year undergraduates, as well as for post-graduate students.

**Softcover** xiv + 296 pages ISBN 0 85186 814 2 1994 Price £19.50

Ref No 185

## Biotransformations: A Survey of the Biotransformations of Drugs and Chemicals in Animals - Volume 6

Edited by David R. Hawkins, *Huntingdon Research Centre Ltd*

Now in its sixth outstanding volume, **Biotransformations** has become established as a unique and important source for those involved in the discovery and development of new compounds. It now broadly covers the scientific literature for the period 1987 to 1992. The series provides a ready way of accessing information on the known pathways for the biotransformation of structurally-related compounds. Key functional groups provide an index-related procedure for retrieving information on compounds of interest. A further index allows the retrieval of examples of specific biochemical reactions which may have wider application.

**Hardcover** xxxii + 412 pages ISBN 0 85186 127 X Price £130.00  
Expected date of publication: End June 1994

### To order please contact:

The Royal Society of Chemistry, Turpin Distribution Services Limited, Blackhorse Road, Letchworth, Herts SG6 1HN, United Kingdom.  
Telephone: +44 (0) 462 672555. Fax: +44 (0) 462 480947. Telex: 825372.  
Please quote your credit card details. We can now accept Access/Visa/Mastercard/EuroCard.

Turpin Distribution Services Limited is wholly owned by The Royal Society of Chemistry.

# Issues in Environmental Science and Technology

Editors: **R E Hester**, *University of York, UK*  
**R M Harrison**, *University of Birmingham, UK*

***A new series to  
tackle important  
environmental issues . . .***

In response to the rapid growth of interest in the environment and the acute need for concise, authoritative and up-to-date reviews of topical issues, the Royal Society of Chemistry is launching **Issues in Environmental Science and Technology**.

This new series will publish review articles on topics of global concern, written by world experts in their specialized fields. It will present a multidisciplinary approach to pollution and environmental science and in addition to covering the chemistry of environmental processes, will focus on broader issues such as economic, legal and political considerations.

Each issue will address a different theme and will contain approximately six articles, most of which will be specially commissioned by the editors.

**The first two issues will cover:**

**1 Mining and its  
Environmental Impact**

**ISBN 0 85404 200 8 April 1994  
Price £15.00**

**2 Waste Incineration  
and the Environment**

**ISBN 0 85404 205 9 July 1994  
Price £15.00**

**Also Available on subscription . . .** ISSN 1350-7583  
EC £25.00 USA \$47.00

Published twice yearly from 1994  
Canada £28.00 + GST Rest of World £27.00
