DOSE

DICTIONARY OF SUBSTANCES AND THEIR EFFECTS

Dictionary of Substances and their Effects (DOSE) is a new, unique, user-friendly guide to 5,000 chemicals and the impact they have on life forms and the environment across the globe

Compiled with the aid of official lists from the EC, UK, USA and Canada, DOSE is being published in seven alphabetical volumes, which will be completed in 1994.

Each volume contains an index of chemical names, CAS registry numbers and molecular formulae, as well as a glossary of biological organisms. A separate volume containing cumulative indices of all volumes will be published after Volume 7.

DOSE LISTS EACH CHEMICAL'S:

- IDENTIFIERS
- OCCUPATIONAL EXPOSURE
- STATUS IN LEGISLATION WORLDWIDE
- EFFECTS ON SEWERAGE WORKS PROCESSES
- USES
- ECOTOXICITY
- MAMMALIAN TOXICITY
- PHYSICAL PROPERTIES

DOSE enables the user to make rapid hazard assessments of chemicals, facilitating risk assessment and further action. Such a store of information is of critical importance to scientists, environmentalists, industry professionals, regulators and researchers - indeed anyone affected by or concerned about chemicals and their potential effects on the environment the world over.

DOSE THE INTEGRATED INFORMATION SOURCE WITH GLOBAL IMPORTANCE.

NEW

Issues in Environmental Science and Technology

Editors: **R E Hester**, *University of York, UK*
R M Harrison, *University of Birmingham, UK*

***A new series to
tackle important
environmental issues . . .***

In response to the rapid growth of interest in the environment and the acute need for concise, authoritative and up-to-date reviews of topical issues, the Royal Society of Chemistry is launching **Issues in Environmental Science and Technology**.

This new series will publish review articles on topics of global concern, written by world experts in their specialized fields. It will present a multidisciplinary approach to pollution and environmental science and in addition to covering the chemistry of environmental processes, will focus on broader issues such as economic, legal and political considerations.

Each issue will address a different theme and will contain approximately six articles, most of which will be specially commissioned by the editors.

The first two issues will cover:

**1 Mining and its
