Emerging Area

One-pot multi-step synthesis: a challenge spawning innovation

D. Tyler McQuade, USA

Communications

Gadolinium texaphyrin-methotrexate conjugates. Towards improved cancer chemotherapeutic agents

Jonathan Sessler, USA

A new reactivity pattern for vinyl bromides; cine-substitution via palladium catalysed C-N coupling/ Michael addition reactions

Michael Willis, UK

Selective targeting of DNA for cleavage within DNA-histone assemblies by a spermine-[CpW(CO)₃Ph]₂ conjugate

Debra Mohler, USA

Articles

Synthesis of achiral and racemic catenanes based on terpyridine and a directionalized terpyridine mimic, pyridyl-phenanthroline

Jay Siegel, Switzerland

A stereoselective synthesis of 1,6-diphenyl-1,3,5-hexatrienes utilising 4,4,6-trimethyl-2-vinyl-1,3,2-dioxaborinane as a two-carbon alkenyl building block

Andrew Whiting, UK

Polyaza metacyclophanes as ditopic anion receptors

Jonathan Steed, UK

Synthesis and double-faced antioxidant activity of polyhydroxylated 4-thiaflavans

Stefano Menichetti, Italy

Efficient synthesis of lycotetraose, the tetrasaccharide constituent of the tomato defence glycoalkaloid alpha-tomatine

Sergey Nepogodiev, UK

Organic Chemistry Textbooks from the Royal Society of Chemistry

Tutorial Chemistry Texts is a major series consisting of short, single topic or modular texts. Each book provides a concise account of the basic principles underlying a given subject, embodying an independent-learning philosophy and including worked examples.

Readership: Undergraduate chemistry students & university lecturers

Format: Softcover

Price: £14.95 | RSC member price £9.95

Mechanisms in Organic Reactions

R A Jackson

This book helps students to make sensible proposals for the mechanisms of particular organic reactions, and then how to distinguish between different possible mechanisms.

0 85404 642 9 | 2004 | 192 pages

www.rsc.org/books/6429

Nucleic Acids

S Doonan

Nucleic Acids describes the way in which the fundamentally important biological activities of these molecules can be understood in terms of their chemical structures.

0 85404 481 7 | 2004 | 185 pages

www.rsc.org/books/4817

Organic Spectroscopic Analysis

R J Anderson, D Bendell and P W Groundwater

This book aims to provide the reader with a basic understanding of how nuclear magnetic resonance (NMR), infrared (IR) and ultraviolet-visible (UV-Vis) spectroscopy, and mass spectrometry (MS) give rise to spectra, and how these spectra can be used to determine the structure of organic molecules.

0 85404 476 0 | 2004 | 176 pages
