

An international, high quality journal covering the full breadth of synthetic, physical and biomolecular organic chemistry.

See for yourself - examples of forthcoming papers are listed below.

For further details and free access to Issue 1, visit

[www.rsc.org/obc](http://www.rsc.org/obc)

## Perspectives

Catalytic and enantioselective allylic C-H activation with Donor/acceptor substituted carbenoids  
*Huw Davies, USA*

Lewis-acid assisted cross metathesis of acrylonitrile with functionalized olefins catalyzed by phosphine-free ruthenium carbene complex  
*Ren He, China*

## Communications

Aminocatalytic preparation of bisindolylalkanes  
*Nicholas Tomkinson, UK*

Synthetic studies of pseurotin A: Preparation of an advanced lactam aldehyde intermediate  
*Nathaniel Finney, Switzerland*

A Novel Azetidinyll gamma-Lactam Based Peptide With a Preference for beta-Turn Conformation  
*Amit Basak, India*

Concise synthesis of aryl-C-nucleosides by Friedel-Crafts alkylation  
*Oliver Seitz, Germany*

## Articles

Control of Rotor Motion in a Light-driven Molecular Motor: Towards a Molecular Gearbox  
*Ben Feringa, The Netherlands*

Exceptionally slow kinetics of the intramolecular quadruplex formed by the Oxytricha telomeric repeat  
*Keith Fox, UK*

On the Reaction of Diphenylketene with Isocyanides  
*Jeremy Robertson, UK*

## Professor Don Tilley

US Associate Editor for inorganic, organometallic and materials chemistry, *ChemComm*

**ChemComm is the leading international journal for the publication of communications on important new developments in the chemical sciences.**

Each one of ChemComm's US Associate Editors is happy to receive submissions from the Americas in their subject area.

T. Don Tilley is Professor of Chemistry at the University of California, Berkeley. His research involves synthetic, structural, and reactivity studies in organometallic systems. Metal-mediated routes to new polymers, and molecular approaches to the designed construction of advanced solid state materials and heterogeneous catalysts are also being developed.

### Call for papers!

Professor Tilley is pleased to receive papers on important developments in inorganic, organometallic and materials chemistry. Submit today at [www.rsc.org/resource](http://www.rsc.org/resource)

For enquiries, please contact:  
Professor Tilley at [chemcomm@berkeley.edu](mailto:chemcomm@berkeley.edu)

17050525

### Why publish in ChemComm:

- Impact factor: 3.997
- Rapid publication – typically 60 days (from receipt to publication)
- Now: weekly publication
- 3 page communications – providing authors with the flexibility to develop their results and discussion
- 40 years publishing excellent research
- High visibility – indexed in MEDLINE
- 'Hot papers' are highlighted – helping authors to promote their work
- FREE colour where scientifically necessary
- FREE inclusion in Chemical Biology Virtual Journal
