

Only **one journal** provides a truly interdisciplinary platform for the exchange of ideas on Soft Matter. But don't just take our word for it, see what our readers say:

"I am interested in this journal, which has two specific merits: it promises to give good coverage of chemistry; it is the product of a not-for-profit organisation. My hope for the future is that the soft matter communities can be united and that the journals may lead the way and play an important part in this."

Professor Pierre-Gilles de Gennes, Soft Matter, 2005, 1, 16

"You are undertaking a commendable endeavour in launching an interdisciplinary journal at the interface between physics, chemistry, materials science and biological physics."

Dr Christos Likos, University of Düsseldorf, Germany

"A journal in this field has been missing."

Professor Ulrich Wiesner, Cornell University, USA

Soft Matter -
an outstanding new journal

Professor Jonathan Sessler

US Associate Editor for supramolecular chemistry, *ChemComm*

ChemComm is the leading international journal for the publication of communications on important new developments in the chemical sciences.

Each one of ChemComm's US Associate Editors is happy to receive submissions from the Americas in their subject area.

Professor Sessler is Roland K. Pettit Centennial Professor of Chemistry at The University of Texas at Austin. Research in his group is focused on various aspects of macrocyclic and supramolecular chemistry, including expanded porphyrins, base-pairing models, anion receptor chemistry, lanthanide and actinide coordination, and novel metal-based approaches to drug development.

Call for papers!

Professor Sessler is pleased to receive papers on important developments in supramolecular chemistry. Submit today at www.rsc.org/resource

For enquiries, please contact:

Professor Sessler at chemcommun@cm.utexas.edu

Why publish in ChemComm:

- Impact factor: 3.997
- Rapid publication – typically 60 days (from receipt to publication)
- Now: weekly publication
- 3 page communications – providing authors with the flexibility to develop their results and discussion
- 40 years publishing excellent research
- High visibility – indexed in MEDLINE
- 'Hot papers' are highlighted – helping authors to promote their work
- FREE colour where scientifically necessary
