

# Molecular BioSystems unzips ...

...to form its own strand of  
interdisciplinary science

Since launch in 2005, *Molecular BioSystems* has been paired with *Chemical Communications*. This interaction with the host has resulted in an excellent channel of communication for the published content, which has reached a wide audience.

It is now time to unzip the two complementary journals, and from January 2008 *Molecular BioSystems* will assemble its very own strand of science as a solo publication, under the supervision of Sarah Thomas, Editor and Thomas Kodadek, Chair of the Editorial Board.

To ensure that you continue to read the very best in chemical biology research, with a focus at the interface between chemistry and the -omic sciences and systems biology, recommend *Molecular BioSystems* to your librarian today!

# Physically demanding

*PCCP* publishes its tenth volume in 2008. A challenging decade has seen the journal successfully establish its place on the physical chemistry leaderboard; a reflection of its physical endurance, speed of publication, quality and high impact.

Acknowledged as the journal of choice for fast publication of cutting-edge research in physical chemistry, chemical physics and biophysical chemistry, *PCCP* is committed to publishing research of only the highest quality. At **0.866**, *PCCP* has the highest official ISI immediacy index of any general physical chemistry journal and an impressive impact factor of **2.892**.\*

## Enduring quality
