## Chemical Communications

17 APRIL 1974

JCCCAT (8) 281-312 (1974)

### CONTENTS

Page

- 281 Tenellin and Bassianin, Metabolites of *Beauveria* Species. Structure Elucidation with  $^{15}\text{N}$ - and Doubly  $^{13}\text{C}$ -Enriched Compounds using  $^{13}\text{C}$  Nuclear Magnetic Resonance Spectroscopy  
**A. Gavin McInnes, Donald G. Smith, Chi-Kit Wat, Leo C. Vining, and Jeffrey L. C. Wright**
- 282 New Techniques in Biosynthetic Studies using  $^{13}\text{C}$  Nuclear Magnetic Resonance Spectroscopy. The Biosynthesis of Tenellin Enriched from Singly and Doubly Labelled Precursors  
**A. Gavin McInnes, Donald G. Smith, John A. Walter, Leo C. Vining, and Jeffrey L. C. Wright**
- 284 X-Ray Crystal and Molecular Structure of the Bromolactone of Echinocystic Acid Diacetate. The Absolute Configuration of Naturally Occurring Oleananes  
**Charles H. Carlisle, Peter F. Lindley, Miss Aurea Perales, Robin B. Boar, James F. McGhie, and Derek H. R. Barton**
- 285 Photocyclisation of 2-(*o*-Methoxyaroyl)-3-methylcyclohex-2-enones with Elimination of the *ortho*-Methoxy-group  
**Y. Tamura, S. Fukumori, S. Kato, and Y. Kita**
- 286  $^{13}\text{C}$  Relaxation Time Study of Hydrophobic Bonding  
**Oliver W. Howarth**
- 288 Reaction of Phosphorus Pentachloride with  $\beta$ -Ketoesters. A Convenient Route for the Preparation of  $\beta$ -Chlorovinyl Acids  
**Abdel-Hamid Youssef and Hamdy M. Abdel-Maskoud**
- 288 Double Inversion at Two Nitrogen Atoms in Bicyclic Hydrazines: A Carbon-13 Nuclear Magnetic Resonance Study  
**Yujiro Nomura, Naruhito Masai, and Yoshito Takeuchi**
- 289 The Multiplicity of the Photo-Fries Rearrangement  
**Waldemar Adam**
- 291 Cation Radicals: Aromatic Chlorination *via* Peroxydisulphate-Copper(II) Chloride Systems  
**Anthony Ledwith and Peter J. Russell**
- 292 Photochemical Ring Expansions of Five- and Six-membered Ring Ketones Derived from Pentoses  
**Peter M. Collins, Nathan N. Oparaeche, and Brian R. Whitton**
- 293 The Rate of Nitronium Ion Formation from Nitric Acid in Aqueous Sulphuric Acid  
**John W. Chapman and Alec N. Strachan**
- 294 Hydrogen-Deuterium Exchange between  $\text{LiBH}_4$  and  $\text{LiBD}_4$ . Isotope Effects on the  $^1\text{H}$  and  $^{11}\text{B}$  Nuclear Magnetic Resonance Spectra of Species  $\text{LiBH}_n\text{D}_{4-n}$   
**Bruce D. James, Brian E. Smith, and Roger H. Newman**
- 295 Donor Strength of *N*-Substituted Phosphoramides  
**Yehuda Ozari and Joseph Jagur-Grodzinski**
- 296 Total Synthesis of the Alkaloid ( $\pm$ )-Deoxyaspidodispermine  
**Takeshi Ohnuma, Kohichi Seki, Takeshi Oishi, and Yoshio Ban**
- 297 Hydroxylation of Diamantan-1- and -4-ol with the Fungus *Rhizopus nigricans*  
**Frank Blaney, Don E. Johnston, M. Anthony McKervey, Sir Ewart R. H. Jones, and John Pragnell**
- 298 Synthesis of Terrein, a Metabolite of *Aspergillus terreus*  
**Joseph Auerbach and Steven M. Weinreb**
- 299 New Arrangements of Transition Metal Atoms in Carbido-carbonyl Clusters of Rhodium and Cobalt  
**Vincenzo G. Albano, Paolo Chini, Secondo Martinengo, Mirella Sansoni, and Donatella Strumbolo**
- 300 A New Synthesis of the Alkaloid ( $\pm$ )-Colchicine  
**Eiichi Kotani, Fudo Miyazaki, and Seisho Tobinaga**
- 301 3-Dimethylsulphonioidolide. An Unusually Basic Crystalline Sulphonium Ylide  
**G. Doyle Daves, Jr., William R. Anderson, Jr., and Michael V. Pickering**

Contents—continued overleaf

Contents—*continued*

Page		
302	Unexpected Fluxional Behaviour in Hexacarbonyl-( $\pi$ -cycloheptadienyl)-( $\pi$ -cycloheptatrienyl)triruthenium	<b>Thomas H. Whitesides</b> and <b>Richard A. Budnik</b>
303	Electronic Structure of Octachlorodimolybdate(II)	<b>Joe G. Norman, Jun.</b> , and <b>Harold J. Kolari</b>
305	<i>cis-trans</i> -Isomerism in a Co-ordinated Monothio- $\beta$ -diketone: X-Ray Structure of Tetraethylammonium Monothiothenoyltrifluoroacetatepentacarbonyltungstate(0)	<b>Mary McPartlin, Glen B. Robertson, George H. Barnett,</b> and <b>Mervyn K. Cooper</b>
306	An Anomaly in the Reactivity Patterns of the Octachlorodirhenate(III) Anion. The Chemistry and Crystal Structure of the $\mu$ -Dichloro-rhenium(III) Complex of 1,2-Bis(diphenylphosphino)ethane, $\text{Re}_2\text{Cl}_8(\text{dppe})_2 \cdot 2\text{MeCN}$	<b>John A. Jaecker, William R. Robinson,</b> and <b>Richard A. Walton</b>
307	Reduction of $\beta$ -Nitrostyrene with Sodium Bis-(2-methoxyethoxy)aluminium Dihydride. A Convenient Route to Substituted Phenylisopropylamines	<b>John R. Butterick</b> and <b>A. M. Unrau</b>
308	Deuterium Studies in the Disproportionation of Pyrimido[4,5- <i>b</i> ]quinolinium Salts	<b>Jim Clark</b> and <b>Bahman Parvizi</b>
309	Reactions of $\text{RuCl}_2(\text{PPh}_3)_3$ with Carbinols: Formation of Ethers, Hydrogen-Deuterium Exchange, and Racemization of Optically Active Alcohols	<b>Yoel Sasson</b> and <b>Jochanan Blum</b>
310	$^{13}\text{C}$ Nuclear Magnetic Resonance of Triacontacarbonyldodecarhodate(2-): $[\text{Rh}_{12}(\text{CO})_{20}(\mu_2\text{-CO})_2(\mu_3\text{-CO})_8]^{2-}$	<b>Paolo Chini, Secondo Martinengo, David J. A. McCaffrey,</b> and <b>Brian T. Heaton</b>
312	Photoreactions of 2-Allyloxyacetophenone	<b>F. Ryan Sullivan</b> and <b>Lee B. Jones</b>
312	Corrigenda
