8 MAY 1974

JCCCAT (9) 313–360 (1974)

### CONTENTS

Page	
313	Protonation of Some 3-Arylsydnonones: a Carbon-13 and Nitrogen-15 Nuclear Magnetic Resonance Study <b>Alan J. Buglass</b>
314	Random Coil- $\beta$ -Form Transition of Poly-L-lysine. Evidence for the Formation of the $\alpha$ -Helical Structure during the Transition <b>Evaristo Peggion, Alessandro Cosani, Maria Terbojevich, and Lia Romanin-Jacur</b>
316	Resonance Raman Spectrum of $K_4Mo_2Cl_8$ <b>Robin J. H. Clark and Malcolm L. Franks</b>
318	Synthesis of <i>o</i> -Isopentenylphenols from 2,2-Dimethylchromans by Cleavage with Boron Trichloride <b>Russell J. Molyneux</b>
319	Oxidation of Ethyl 3-[Bis-( <i>N</i> -methylanilino)phosphinoyl]carbazate <b>Richard J. Cremllyn, Martin J. Frearson, and David Milnes</b>
319	Synthesis of <i>C</i> -Glycopyranosides by Photochemically Induced Addition of Methanol to Pyran-3-ulose <b>David L. Walker, Bert Fraser-Reid, and John K. Saunders</b>
320	Sulphonium Salt Formation from the Reaction of Methionine with some Aziridine Alkylating Agents <b>Philip A. Capps and Alan R. Jones</b>
321	Deacetoxycephalosporin C from <i>Streptomyces</i> and Fungi <b>R. Nagarajan, L. D. Boeck, R. L. Hamill, C. E. Higgins, and K. S. Yang</b>
322	Molecular Structure of <i>cis</i> -Dichloro[( <i>R</i> )- $\alpha$ -methylbenzylamine][( <i>S</i> )-1,2,2-trimethylpropyl ( <i>R</i> )-vinyl ether]-platinum(II) <b>Franco Sartori, Leonardo Leoni, Raffaelo Lazzaroni, and Piero Salvadori</b>
323	Reactions of Olefinic Double Bonds with Polyfluoroalkyl Radicals Generated Electrochemically <b>Christopher J. Brookes, Paul L. Coe, David M. Owen, Alan E. Pedler, and J. Colin Tatlow</b>
324	An Indirect Method for the Determination of the Reactivity of Amines and Other Compounds Towards Nitrosyl Chloride <b>D. Lyn H. Williams</b>
325	Novel Condensing Reagents for Polynucleotide Synthesis <b>Nobuya Katagiri, Keiichi Itakura, and Saran A. Narang</b>
327	<i>X</i> -Ray Structure of the Hydridotris(triphenylphosphine)ruthenium(II) ion $[RuH(PPh_3)_2(\eta\text{-Ph-PPh}_2)]^+$ <b>James C. McConway, Andrzej C. Skapski, Lawrence Phillips, Robert J. Young, and Geoffrey Wilkinson</b>
328	Electrointercalation in Transition-metal Disulphides <b>M. Stanley Whittingham</b>
329	Celacinnine, a Novel Macrocyclic Spermidine Alkaloid Prototype <b>S. Morris Kupchan, Harold P. J. Hintz, Roger M. Smith, Aziz Karim, Malcolm W. Cass, William A. Court, and Mitsuyoshi Yatagai</b>
330	<i>X</i> -Ray Crystal Structure of Octaethylporphinium (Monocation) Tri-iodide <b>Noriaki Hirayama, Akio Takenaka, Yoshio Sasada, Ei-Ichi Watanabe, Hisanobu Ogoshi, and Zen-Ichi Yoshida</b>
331	An E.s.c.a. Study of the Dissociative and Associative Chemisorption of Halogeno-alkenes and -alkynes on a Pt(100) Surface <b>Terence A. Clarke, Ian D. Gay, and Ronald Mason</b>
333	Molecular Chlorination of Monosubstituted Benzenes and 2-Substituted Thiophens in Acetic Acid at 25° <b>Richard N. McDonald and James M. Richmond</b>
334	Polar and Stereochemical Aspects of 1,2-Photoaddition of Ethylenes to Benzene <b>Derek Bryce-Smith, Andrew Gilbert, Brian Orger, and Hilary Tyrrell</b>
336	A Simple Method for the Disengagement of Organic Ligands from Iron Complexes <b>Youval Shvo and Eli Hazum</b>

Contents—continued overleaf

Contents—continued

Page	
337	Biosynthesis of the Antitumor Antibiotic Anthramycin by <i>Streptomyces refulvius</i> <b>Laurence H. Hurley</b> and <b>M. Zmijewski</b>
338	Electroreductive Coupling of Schiff Bases with Alkyl Halides. Synthesis of Amino Acids <b>Tameo Iwasaki</b> and <b>Kaoru Harada</b>
339	Structure of the Cyclic Tetrapeptide Tentoxin. Crystal and Molecular Structure of the Dihydro Derivative <b>Walter L. Meyer, Lee F. Kuyper, Daniel W. Phelps,</b> and <b>A. Wallace Cordes</b>
340	Relationship Between the Photoelectron Spectra and Torsional Barriers of Aminophosphines <b>Alan H. Cowley, Michael J. S. Dewar, John W. Gilje, D. Wayne Goodman,</b> and <b>Jerald R. Schweiger</b>
341	Anodic Fragmentation of Branched Alkanes <b>Theodore M. Siegel, Larry L. Miller,</b> and <b>James Y. Becker</b>
342	Modified Silica Gels as Selective Adsorbents for Sulphur Dioxide <b>Robert L. Burwell, Jun.</b> and <b>Orlando Leal</b>
343	X-Ray Structure of the Novel Ligand-bridged Olefinic Tertiary Arsine Complex $C_{11}H_{15}AsAg_2(NO_3)_2$ <b>M. K. Cooper,</b> (the late) <b>R. S. Nyholm, P. W. Carreck,</b> and <b>Mary McPartlin</b>
344	<i>Syn</i> -(1' <i>R</i> )-spiro[cyclobutan-2-one-1,7'-(2'- <i>exo</i> -methylnorbornane)]; A Front Octant Compound <b>David A. Lightner</b> and <b>Dennis E. Jackman</b>
345	Preparation of Sodium [ $^2H_1$ ]Acetate with Exceptional Isotopic Purity <b>Derek A. Robinson</b>
346	Stereospecific Synthesis of Allyl Amides by the Cyanoborate Process <b>Andrew Pelter, Akira Arase,</b> and <b>Michael G. Hutchings</b>
347	Regiospecific Substitution of Pyridine by Trialkylalkynylborates in the Presence of Acetyl Chloride <b>Andrew Pelter</b> and <b>Ken J. Gould</b>
348	A Symmetry-allowed Pericyclic Reaction involving Two 'Forbidden' Processes. The Thermal Rearrangement of ( <i>E</i> )-2-Benzylidene-( <i>Z</i> )-mesityl(phenyl)methyleneindane into ( <i>Z</i> )-2-Benzyl-1-mesityl(phenyl)-methyleneindane <b>John S. Hastings, Harry G. Heller, Howard Tucker,</b> and <b>Keith Smith</b>
350	Synthesis of 5-Cyanopyrimidines <b>H. Kristinsson</b>
350	Biosynthesis of Narcissidine <b>Claudio Fuganti, Dario Ghiringhelli,</b> and <b>Piero Grasselli</b>
351	Stereochemistry of the Reductoisomerase and $\alpha\beta$ -Dihydroxyacid Dehydratase-catalysed Steps in Valine and Isoleucine Biosynthesis. Observation of a Novel Tertiary Ketol Rearrangement <b>Frank B. Armstrong, Charles J. R. Hedgecock, James B. Reary, David Whitehouse,</b> and <b>David H. G. Crout</b>
353	<i>cis trans</i> Isomerization of $PtCl_2[PEt_3]_2$ . Evidence against a Consecutive Displacement Mechanism <b>Wynand J. Louw</b>
353	$^{13}C$ Nuclear Magnetic Resonance Study of the Formation of a Cyclopentyl Cation from Thujan-3-ol <b>Collette M. Holden</b> and <b>David Whittaker</b>
354	Nuclear Magnetic Resonance and Structural Studies of Rhodium-Diarylcarbene Complexes <b>Takakazu Yamamoto, Albert R. Garber, John R. Wilkinson, Charles B. Boss, William E. Streib,</b> and <b>Lee J. Todd</b>
356	Reversible Uptake of Molecular Oxygen and Carbon Monoxide by a New Polyoxime-Copper Complex <b>Sung Jho Kim</b> and <b>Takeo Takizawa</b>
357	Pyrolysis of Phenyl 2,2,2-Trideuterioacetate. Evidence Against a Concerted Mechanism <b>Aldos C. Barefoot</b> and <b>Felix A. Carroll</b>
358	Mononuclear Heterocyclic Rearrangements involving a Sulphur atom: Conversion of 1,2,4-Oxadiazoles into 1,2,4-Thiadiazoles <b>M. Ruccia, N. Vivona,</b> and <b>G. Cusmano</b>
359	Alkali Metal Tetracarbonylhydridoferrate. A New Route to 3-Alkyl or 3-Aryl-indoles <b>G. P. Boldrini, M. Panunzio,</b> and <b>A. Umani-Ronchi</b>
359	Synthesis of 2,7-Diazabiphenylene by Thermal Extrusion of Nitrogen from 2,7,9,10-Tetra-azaphenanthrene <b>J. A. Hugh MacBride</b>
