Chemical Communications

1 JUNE 1977

JCCCAT (11) 361-392 (1977)

CONTENTS

- Page
- 361 Geometrical Requirements for Fluorescent Intramolecular Excimer Formation and Fluorescence Quenching
R. Stephen Davidson and **Terence D. Whelan**
- 362 Solution Structure and Reactivity of $M^+[\text{Fe}(\text{CO})_3(\text{NO})]^-$, $M = \text{Na}, \text{K},$ or PPN [PPN = $(\text{Ph}_3\text{P})_2\text{N}$]
Keith H. Pannell, Yu-Sen Chen, and **Kimber L. Belknap**
- 363 Polycyclohexene: Homopolymerisation of Cyclohexene Under Mild Conditions
Michael F. Faron and **Christos Tsonis**
- 364 Allylic Hydroperoxides from the Autoxidation of Methyl Oleate
Robert F. Garwood, Bhupinder P. S. Khambay, Basil C. L. Weedon, and **Edwin N. Frankel**
- 365 Stereochemistry of 2 + 2 Photoaddition of Cyclopentene to Hexafluorobenzene
Boris Šket and **Marko Zupan**
- 366 ^{13}C and ^{15}N Nuclear Magnetic Resonance Parameters of Ethyl Diazoacetate
Robert L. Lichter, Puliur R. Srinivasan, Amos B. Smith, III, R. Karl Dieter, Christopher T. Denny, and **Jerome M. Schulman**
- 368 Isomeric *Hypho* Borane Structures $\text{B}_2\text{H}_2\text{-L}$ [$\text{L} = (\text{Ph}_2\text{P})_2\text{CH}_2, (\text{Ph}_2\text{PCH}_2)_2,$ or $(\text{Me}_2\text{NCH}_2)_2$]; X-Ray Crystal and Molecular Structures
Nathaniel W. Alcock, Howard M. Colquhoun, Gerald Haran, Jeffrey F. Sawyer, and **Malcolm G. H. Wallbridge**
- 370 Molecular Association in a Silver(I) Complex of a Planar Macrocyclic Ligand. X-Ray Crystal Structure of a Binuclear Silver(I) Complex
S. Martin Nelson, Stephen G. McFall, Michael G. D. Drew, and **A. Hamid bin Othman**
- 372 Asymmetric Induction. An Anisotropic Inductive Effect as an Important Factor in the Hydride Reduction of 3-Alkyl Bicyclo[2.2.2]octan-2-ones
Marc Chérest, Hugh Felkin, Pascal Tacheau, Jean Jacques, and **Daniel Varech**
- 373 Electron Spin Resonance Study of Inversion Isomers of 1-Fluorocyclopropyl Radicals
Takashi Kawamura, Masahiro Tsumura, and **Teijiro Yonezawa**
- 374 Preparation of a Stable, Fluorescent 1-Alkylthio-2-alkylisoindole
S. Stoney Simons, Jr. and **David F. Johnson**
- 375 Five- to Nine-bond ^{31}P - ^{31}P Spin Coupling Constants in Derivatives of Benzene and Naphthalene
Ludger Ernst
- 376 Acanthamolide, a Melampolide Amide from *Acanthospermum glabratum* (Compositae)
Amal A. Saleh, Geoffrey A. Cordell, and **Norman R. Farnsworth**
- 377 Adsorption of Carbon Monoxide on Copper (100) at 295 K, Characterized by Photoelectron Spectroscopy
Saadoon A. Isa, Richard W. Joyner, and **M. Wyn Roberts**
- 378 CH_3O^+ and $\text{C}_2\text{H}_5\text{O}^+$: High Barriers to Isomerisation and Low Barriers to Symmetry-allowed 1,1-Elimination
Richard D. Bowen and **Dudley H. Williams**
- 380 Ene Reaction of Chloral with Olefins Catalysed by Lewis Acids, and some Applications in Organic Synthesis
G. Bryon Gill and **Brian Wallace**
- 382 Asymmetric Induction in the Ene Reaction of Chloral with (1*S*,5*S*)-(-)- β -pinene; Control of Stereoselectivity by the Choice of Lewis Acid Catalyst
G. Bryon Gill and **Brian Wallace**
- 384 Interaction of Cycloalkanes with Polymers
Ian T. Harrison
- 385 The Structure of $[\text{Os}_7(\text{CO})_{21}]$; X-Ray and ^{13}C Nuclear Magnetic Resonance Analyses
Colin R. Eady, Brian F. G. Johnson, Jack Lewis, Ronald Mason, Peter B. Hitchcock, and **K. Mark Thomas**

Contents—continued overleaf

Contents—*continued*

Page	
386	Oxidative Bonding of Natural Oestrogens to DNA by Chemical and Metabolic Means G. Michael Blackburn, Lawrence Orgee, and Gillian M. Williams
387	Crystal and Molecular Structure of $[\text{Fe}_4(\text{CO})_{11}(\text{NEt})(\text{ONeEt})]$: a New <i>Quadro</i> Iron Cluster with Two Face-bridging Organic Ligands Giuliana Gervasio, Rosanna Rossetti, and Pier Luigi Stanghellini
388	<i>p</i> -Phenylenebistetrathiafulvalene Martin L. Kaplan, Robert C. Haddon, and Fred Wudl
389	Very High Electrical Conductivity in AsF_5 -Graphite Intercalation Compounds E. Robert Falardeau, Geoffrey M. T. Foley, Claude Zeller, and F. Lincoln Vogel
390	Novel Transformation of $[(\eta^1\text{-C}_5\text{H}_5)_2\text{SnFe}(\text{CO})_4]_2$: Crystal Structure of $[(\text{C}_5\text{H}_5)_2\text{Fe}(\text{CO})_2]_2\text{Sn}_2\text{Fe}_3(\text{CO})_2$ Timothy J. McNeese, Stan S. Wreford, Donald L. Tipton, and Robert Bau
392	Corrigenda
