

Journal of The Chemical Society

Chemical Communications

ISSUED TWICE MONTHLY

JCCCAT (11) 505–576 (1981)

CONTENTS

- Page
- 505 Use of Carbohydrates in the Preparation of Optically Active Sulphoxides
Damon D. Ridley and **Mary A. Smal**
- 506 N.M.R. Evidence for a Fluxional Allyl-hydride Species featuring an Aliphatic C–H . . . Ir^{III} Interaction
Oliver W. Howarth, Colin H. McAteer, Peter Moore, and **George E. Morris**
- 507 Synthesis of Cinnamolide and Polygodial
S. Christopher Howell, Steven V. Ley, Michael Mahon, and **Paul A. Worthington**
- 508 Simple Novel Synthesis of the Anthracyclonone System Using a New Modification of the Marschalk Reaction and a Carbohydrate as a Chiral Centre Source
David J. Mincher and **Gordon Shaw**
- 510 A Novel Route to 2-Substituted 1,2-Benzisothiazol-3(2*H*)-ones
Yuzuru Uchida and **Seizi Kozuka**
- 511 A Novel Synthesis of α - and γ -Fluoroalkylphosphonates
G. Michael Blackburn and **David E. Kent**
- 513 An Unusual Bonding Mode for a Dithiocarboxylate Ligand: a Tetradentate Interaction; X-Ray Crystal Structure of the Product of the Reaction of Nonacarbonyl-di-iron with 1,2-Benzodithiole-3-thione
Peter H. Bird, Upali Siriwardane, Alan Shaver, Orosman Lopez, and **David N. Harpp**
- 515 Methyl and Silyl Halide Radical Anions: An *Ab initio* Study
Timothy Clark
- 517 Photo-acoustic Spectroscopic Evidence for Site-Site Interactions in a Bifunctional Surface-bonded Phase
R. Stephen Davidson, W. John Lough, Stephen A. Matlin, and **Colin L. Morrison**
- 518 Differentiation of Spectra as a Means of Resolving Spin-forbidden Bands: Iron(III) Complexes
Trevor R. Griffiths and **Keith King**
- 521 Reinvestigation of the Claim that Bis-(η^5 -cyclopentadienyl)tin(II) and (η^5 -Cyclopentadienyl)tricarbonyl-tungsten Hydride form Bis-[(η^5 -cyclopentadienyl)tricarbonyltungsten]tin(II)
Thomas S. Dory, J. J. Zuckerman, C. D. Hoff, and **J. W. Connolly**
- 522 A New Method for the Chemical Modification of Polymers
David C. Weber, Patrick Brant, Carmine Carosella, and **Lewis G. Banks**
- 523 A Novel Stereoselective Route to *cis*-Olefins *via* Addition of Vinyl Cuprates to $\alpha\beta$ -Unsaturated Sulphones and Subsequent Desulphonylation
Gioacchino De Chirico, Vito Fiandanesi, Giuseppe Marchese, Francesco Naso, and **Oronzo Sciacovelli**
- 524 Synthetic Route to *C*-Methylated Chlorins
Roger J. Snow, Christopher J. R. Fookes, and **Alan R. Battersby**
- 526 Perfluorotetracyclobutacyclo-octatetraene; a Planar Eight-membered Ring System; X-Ray Crystal Structure
Frederick W. B. Einstein, Anthony C. Willis, William R. Cullen, and **Robert L. Soulen**
- 528 An Octanuclear Iridium Carbonyl Cluster Based on Two Equivalent Tetrahedral Units. Synthesis and X-Ray Characterization of Bis(tetraphenylphosphonium) Hexa- μ -carbonylhexadecacarbonyl-*ditetrahedro*-octairidate(2-)
Francesco Demartin, Mario Manassero, Mirella Sansoni, Luigi Garlaschelli, Carlo Raimondi C., Secondo Martinengo, and **Franco Canziani**
- 530 Oxidation of 1,1-Disubstituted Hydrazines to Tetrazenes with Benzeneseleninic Acid
Thomas G. Back
- 531 Electron Spin Resonance Investigation of the Thermolysis, Photolysis, and Oxygenation of Bi- and Tri-metallic Organochromium Complexes
Laurence Carlton, W. Edward Lindsell, and **Peter N. Preston**
- 533 X-Ray Crystal and Molecular Structure of the *p*-*t*-Butylphenol-Formaldehyde Cyclic Octamer Cyclo{octa[(5-*t*-butyl-2-acetoxy-1,3-phenylene)methylene]}
- 534 Syntheses of Naphtho[2,3-*c*]pyran-5,10-quinones using Ceric Ammonium Nitrate
Giovanni Dario Andreotti, Rocco Ungaro, and **Andrea Pochini**
- 535 Elimination-Addition Mechanisms of Sulphonyl Group Transfer: Evidence for a Dicarbanionic Intermediate in the Alkaline Hydrolysis of Aryl Methylsulphonylmethanesulphonate Esters
Trevor A. Chorn, Robin G. F. Giles, Peter R. K. Mitchell, and **Ivan R. Green**
Sergio Thea, Giuseppe Guanti, and **Andrew Williams**

Contents—continued overleaf

For Notices to Authors, see issue 1, pp. 1 to 4

Contents—continued

| Page | |
|------|--|
| 537 | Carbon–Carbon Bond Formation through Olefin–Methylcarbyne Linkage at a Diruthenium Centre: X-Ray Crystal Structure of $[\text{Ru}_2(\text{CO})(\mu\text{-CO})\{\mu\text{-}\eta^1, \eta^3\text{-C}(\text{Me})\text{C}(\text{Me})\text{CH}_2\}(\eta\text{-C}_5\text{H}_5)_2]$ Andrew F. Dyke, Jacques E. Guerschais, Selby A. R. Knox, Jean Roué, Richard L. Short, Graham E. Taylor, and Peter Woodward |
| 539 | Improvement of Optical Purity of Metal Tris-(1,10-phenanthroline) Chelates by Use of Adsorption on a Colloidal Clay Akihiko Yamagishi and Mitsuyuki Soma |
| 540 | Active Metals from Potassium–Graphite. Palladium–Graphite as Catalyst in the Hydrogenation of Nitro-compounds, Alkenes, and Alkynes Diego Savoia, Claudio Trombini, Achille Umani-Ronchi, and Giancarlo Verardo |
| 541 | Active Metals from Potassium–Graphite. Palladium–Graphite-catalysed Vinylic Substitution Reactions Diego Savoia, Claudio Trombini, Achille Umani-Ronchi, and Giancarlo Verardo |
| 542 | Photoassisted Isomerisation of Olefins by Platinum Complexes Pierre Courtot, Roger Pichon, and Jean-Yves Salaün |
| 543 | Not the Alkoxy-carbonylamino-acid <i>O</i> -Acylisourea N. Leo Benoiton and Francis M. F. Chen |
| 545 | New Helium-moderator Anomaly in Recoil Tritium Chemistry David J. Malcolme-Lawes, Yacoub Ziadeh, and Graham Oldham |
| 546 | Selenoxide Fragmentation Leading to Allylic Amides Akio Toshimitsu, Hiroto Owada, Toshiaki Aoi, Sakae Uemura, and Masaya Okano |
| 547 | Dehydrogenation of Cyclic and Bicyclic Secondary Alkyl Peroxides during Flash Vacuum Pyrolysis A. J. Bloodworth and David S. Baker |
| 549 | Intramolecular Reactions of <i>N</i> -Nitrenes: Evidence for Non-concerted Addition to Alkenes Robert S. Atkinson, John R. Malpass, Karen L. Skinner, and Katherine L. Woodthorpe |
| 550 | Ring Cleavage of 3-Azidothiophens; a Novel Extrusion of Acetylene Christopher J. Moody, Charles W. Rees, and Siu Chung Tsoi |
| 551 | On Relative Leaving Abilities: Use of Isobasic Plots to Determine the Relative Nucleofugalities of Thiulates and their Oxy-analogues Kenneth T. Douglas and Manoochehr Alborz |
| 553 | Ranks of Carbon Leaving Groups in Alkene-forming Elimination Manju Varma and Charles J. M. Stirling |
| 554 | Pyrrrolizidine Alkaloids: Evidence for <i>N</i> -(4-Aminobutyl)-1,4-diaminobutane (Homospermidine) as an Intermediate in Retronecine Biosynthesis Hassan A. Khan and David J. Robins |
| 556 | Model Studies on the Synthesis of Milbemycin β_3 Stephen V. Attwood, Anthony G. M. Barrett, and Jean-Claude Florent |
| 557 | Photoreactions of Dispiro{naphthalene-1,2'-naphtho[2,1- <i>b</i>]pyran-3',1''-naphthalene}-2(1 <i>H</i>),2''(1' <i>H</i>)-dione. A Novel Case of β -C–C Cleavage in an Enone Tirumalai R. Kasturi, Gonibella J. Raju, and Vaidhyathanan Ramamurthy |
| 560 | A Novel S,N-Double Rearrangement; X-Ray Crystal Structure of 5-Carbamoyl-4-methylthio-2-phenyl-1,3-thiazin-6-one and Its 2,3-Dihydro-derivative Masataka Yokoyama, Masaki Nakamura, Tsuneo Imamoto, and Kei-ichi Yamaguchi |
| 561 | Mechanism of Direct Side-chain Acylation and Aminoarylation of 2- and 4-Picoline 1-Oxides Rudolph A. Abramovitch, Dorota A. Abramovitch, and Piotr Tomasik |
| 563 | Synthesis of 2,3-Disubstituted Indoles Under Mild Conditions Graziano Baccolini and Paolo E. Todesco |
| 563 | Synthesis and X-Ray Characterisation of the Novel $[\text{Rh}_{10}\text{S}(\text{CO})_{10}(\mu\text{-CO})_{12}]^{2-}$ Anion; a Bicapped Square-antiprismatic Cluster Containing an Interstitial Sulphur Atom Gianfranco Ciani, Luigi Garlaschelli, Angelo Sironi, and Secondo Martinengo |
| 565 | Preparation of Stable Quinone Methide Imines Juzo Nakayama, Naohiko Matsumaru, and Masamatsu Hoshino |
| 567 | Hydrogen Uptake and Hydrogenation Activity of the Rare Earth Intermetallic Compound SmMg_3 treated with Anthracene Hayo Imamura and Susumu Tsuchiya |
| 568 | Cationic Cyclization Reactions of 6-Methylhept-5-en-2-one Oxime; X-Ray Crystal Structure of 3-Isopropylidene-2-methyl- Δ^4 -pyrroline Robert E. Gawley, Enrico J. Termine, and Kay D. Onan |
| 569 | Synthesis of Mercaptoacetonitrile under Mild Conditions Eckart Mathias and Michael Shimanski |
| 570 | Solid-state ^{29}Si N.M.R. and High-resolution Electron Microscopic Studies of a Silicate Analogue of Faujasite Jacek Klinowski, John M. Thomas, Marc Audier, Sukumaran Vasudevan, Colin A. Fyfe and John S. Hartman |
| 572 | Glycosyloxyselenation–Deselenation of Glycols: a New Approach to 2'-Deoxy-disaccharides Guy Jaurand, Jean-Marie Beau, and Pierre Sinay |
| 573 | The Role of Cyclohexadienones in the Thermal Sigmatropic Rearrangements of 2-Oxidoanilinium Ylides W. David Ollis, Ratnasamy Somanathan, and Ian O. Sutherland |
| 575 | Detection of One Symmetrical Precursor during the Biosynthesis of the Fungal Metabolite Austdiol using $[1,2\text{-}^{13}\text{C}_2]$ Acetate and $[Me\text{-}^{13}\text{C}]$ Methionine Lino Colombo, Cesare Gennari, Giuliana Severini Ricca, Carlo Scolastico, and Fabrizio Aragozzini |
