

Journal of The Chemical Society

Chemical Communications

ISSUED TWICE MONTHLY

JCCCAT (22) 1153–1200 (1981)

CONTENTS

- Page
- 1153 Enantioselective Route to Both (+)- and (–)-Enantiomers of Quebrachamine using a Single Chiral Synthon
Seiichi Takano, Masahiro Yonaga, and Kunio Ogasawara
- 1155 Synthesis of a Potential Synthon for the Chiral Synthesis of the Corynanthe-type Indole Alkaloids: Enantioselective Total Synthesis of (–)-Antirrhine
Seiichi Takano, Nobuhiko Tamura, and Kunio Ogasawara
- 1157 Synthesis and Determination of the Configuration of 23,25-Dihydroxyvitamin D₃; a New Metabolite of Vitamin D₃; X-Ray Crystal Structure of a 3,23,25-Triol Precursor
Nobuo Ikekawa, Tadashi Eguchi, Yutaka Hirano, Yoko Tanaka, Hector F. DeLuca, Akiko Itai, and Yoichi Itaka
- 1159 Ketone Enolates as Nucleophiles in Palladium-catalysed Allylic Alkylation
Jean-Claude Fiaud and Jean-Luc Malleron
- 1160 Autorecycling System for Reduction of Carbonyl Compounds to Alcohols by 1,5-Dihydro-5-deazaflavins
Fumio Yoneda, Kazunori Kuroda, and Mutsuko Kamishimoto
- 1162 Synthesis of 6-Aza-*nido*-decaborane(12) and its Derivatives
Karel Baše, František Hanousek, Jaromír Plešek, Bohumil Štíbr, and Antonín Lyčka
- 1163 Photoinduced 1,5-Acyl Shift of 3-Acylated 3-Methyloxepin-2(3*H*)-ones
Nobuto Hoshi and Hisashi Uda
- 1164 Acetato-complexes of Osmium(II, III, and IV)
David S. Moore, Alfredo S. Alves, and Geoffrey Wilkinson
- 1165 E.S.R. Evidence for Chromium(V) Porphyrinates
John T. Groves and Robert C. Haushalter
- 1167 E.S.R. Spectra and Reactivity of Alane Radical Anions in Solution
Jeremy R. M. Giles and Brian P. Roberts
- 1168 Partial Resolution of Tris(acetylacetonato)ruthenium(III) on a Liquid Chromatography Column of Δ-Tris(1,10-phenanthroline)nickel(II) Montmorillonite
Akihiko Yamagishi
- 1169 Stable Isotope Studies of the Biosynthesis of the Sesquiterpenoid Dihydrobotrydial
A. Peter W. Bradshaw, James R. Hanson, and Ian H. Sadler
- 1170 The Preparation and Characterisation of some Organocyanophosphide(I) Salts
Robert M. K. Deng and Keith B. Dillon
- 1171 Preparation and X-Ray Crystal Structures of Copper(I) Complexes of the S₃N[–] Ion
Josef Bojes, Tristram Chivers, and Penelope W. Coddling
- 1173 A New Synthetic Route to Perfluoroalkylphosphonates involving Facile Formation of the CF-P Linkage
Masao Kato and Masaaki Yamabe
- 1174 1,2,3-Triazine
Akio Ohsawa, Heihachiro Arai, Hidefumi Ohnishi, and Hiroshi Igeta
- 1175 Unusual Stereospecificity in the Hydrogenation of an Isopropenyl Function with Wilkinson's Catalyst; A Route to Chiral Methyl Valine
David H. G. Crout, Max Lutstorf, Philip J. Morgan, Robert M. Adlington, Jack E. Baldwin, and Michael J. Crimmin
- 1177 First Example of Predominant β-Orientation in Electrophilic Substitution of Pyrrole
Maurizio Speranza
- Contents—continued overleaf

For Notices to Authors, see issue 1, pp. 1 to 4

Contents—continued

Page	
1178	Sulphonamidomercuration; a New Method for Amination of Olefins José Barluenga, Carmen Jiménez, Carmen Nájera, and Miguel Yus
1180	α -C-Glycopyranosides from Lewis Acid Catalysed Condensations of Acetylated Glycols and Enol Silanes Robert David Dawe and Bert Fraser-Reid
1181	Oxidative Aminomercuration of Prop-2-ynol. Syntheses of Substituted Propane-1,2-di-imines and 2-Aminopropionamidines José Barluenga, Fernando Aznar, and Ramón Liz
1182	Novel Syntheses of 1,6-Methano[10]annulene and 4-Methylazulene Martin G. Banwell and Con Papamihail
1184	Comparison of Proton Hyperfine Coupling Constants for the Monomer and Dimer Radical Cations of Dimethyl Sulphide and Dimethyl Selenide Jih Tzong Wang and Ffrancon Williams
1185	N.M.R. Spectrum of Na ⁻ in Sodium-Hexamethylphosphoric Triamide Solutions Peter P. Edwards, Sarah C. Guy, Dolores M. Holton, and William McFarlane
1187	Effect of Ring Substituents on the Lifetime of Biradicals photogenerated from 2,4,6-Tri-isopropylbenzophenones Yoshikatsu Ito, Hiroaki Nishimura, Teruo Matsuura, and Hisaharu Hayashi
1188	Three New β,γ -Methylene Analogues of Adenosine Triphosphate G. Michael Blackburn, David E. Kent, and Friedrich Kolkmann
1190	Use of the Bis(trimethylsilyl)cyclopentadienyl Ligand for stabilising Early (f ⁰ -f ³) Lanthanocene Chlorides; X-Ray Structure of [(Pr{ η -[C ₅ H ₃ (SiMe ₃) ₂]} ₂ Cl) ₂] and of Isoleptic Scandium and Ytterbium Complexes Michael F. Lappert, Anirudh Singh, Jerry L. Atwood, and William E. Hunter
1191	Organometallic Complexes of the Group 3A and Lanthanoid Metals containing M(μ -Cl) ₂ Li Bridging Units; the X-Ray Structure of [Nd{ η -[C ₅ H ₃ (SiMe ₃) ₂]} ₂ (μ -Cl) ₂ Li(thf) ₂] (thf = tetrahydrofuran) Michael F. Lappert, Anirudh Singh, Jerry L. Atwood, and William E. Hunter
1193	Generation and Reactivity of 4-Azatricyclo[5.3.1.1 ^{3,9}]dodec-3-ene and 5-Azatricyclo[4.4.1.1 ^{3,9}]dodec-5-ene, New Bridgehead Imines Tadashi Sasaki, Shoji Eguchi, Soji Hattori, and Takashi Okano
1195	5,6-Methanoleukotriene A ₄ . A Stable and Biologically Active Analogue of Leukotriene A ₄ Kyriacos C. Nicolaou, Nicos A. Petasis, and Steven P. Seitz
1196	Mode of Mammalian Oxygenation at Primary Carbon Atoms: Steric Course of Hydroxylation of C-1 Chiral Octanes by Rat Liver Microsomes Eliahu Caspi, Stuart Shapiro, and James Piper
1197	Surprising Reactivity of Very Crowded Phosphinic Derivatives Antoine Bacciredo, Guy Bertrand, Pierre Mazerolles, and Jean-Pierre Majoral
1198	Biosynthesis of the Meroterpenoid Metabolite, Andibenin B: Aromatic Precursors Alan J. Bartlett, John S. E. Holker, Eugene O'Brien, and Thomas J. Simpson
1200	Addendum
1200	Corrigenda
