# NEW PUBLICATIONS

from The Royal Society of Chemistry

## TWO NEW BOOKS FOR TEACHERS AND STUDENTS OF CHEMISTRY RSC PAPERBACKS

In 1983 The Royal Society of Chemistry introduced a new series of inexpensive texts for students and teachers. Topics covered relate to those subjects which are commonly featured in courses on chemistry and related areas, which are currently taught in schools, universities and colleges.

Prices quoted below apply to both RSC Members and non-RSC Members.

### FOOD: The Chemistry of its Components

By T. P. Coultate

Softcover 202pp  
0 85186 483 X (1984)

Price £5.95 (\$11.00)

This book gives a detailed account of the chemistry of the principal substances of which our food is composed. Both the macro-components, the carbohydrates, lipids and proteins, which can be classified by their chemical structures, and the micro-components, the colours, flavours, vitamins and preservatives, which are classified in terms of function are considered. Throughout the book, Dr Coultate's theme is the relationship between the chemical structure of a substance and its contribution to the properties and behaviour of foodstuffs—whether observed in the laboratory, the factory, the kitchen or the dining room.

#### Contents:

Introduction, carbohydrates, lipids, proteins, colours, flavours, vitamins, preservatives, EEC numbers of food additives. Subject index. This book will be of particular benefit to students and teachers of food science and related courses in universities, colleges of further education and schools.

**ORDERING** RSC Members should send their orders to:  
The Membership Officer, The Royal Society of Chemistry, 30 Russell Square, London WC1B 5DT.  
Non-RSC Members should send their orders to:  
The Royal Society of Chemistry, Distribution Centre, Blackhorse Road, Letchworth, Herts SG6 1HN.

### WATER

Revised 1st Edition

By Felix Franks

Softcover 102pp  
0 85186 473 2 (1984)

Price £2.50 (\$6.00)

The book considers the present state of our knowledge of liquid water, its remarkable physical properties and how these give rise to a unique structure, its influence on the interactions between solutes, its role in maintaining biologically active structures, its involvement in chemical reactions and the problems posed by its management and in providing sufficient amounts of water of adequate quality.

An understanding of the behavioural properties of water is fundamental to gaining an appreciation of many scientific processes and principles. Science students and teachers will, therefore, find *Water* not only interesting reading, but also of considerable relevance to their studies.

#### Contents:

Occurrence, importance and physical properties; The place of water in the general classification of liquids; Isotopic composition; The structure of the water molecule and the nature of the hydrogen bond in water: Ice – its structure and dynamics; The structure of liquid water; The dynamic properties of liquid water; Towards a molecular description of water; Aqueous solutions of simple molecules; Aqueous solutions of electrolytes; The role of water in the stabilisation of biologically significant structures; Reactions in aqueous solutions; Water in the environment – quality, availability and exploitation; Summary and future prospects.

## CLASSIFIED ADVERTISEMENTS

### THE UNIVERSITY OF LEEDS

#### DEPARTMENT OF ORGANIC CHEMISTRY POSTDOCTORAL RESEARCH FELLOW

Applications are invited for the above post for work on the synthesis of spiroketal antibiotics. The appointment is available from 1 October 1984 for a fixed period of one year, with the possibility of a further fixed term appointment of up to two years thereafter.

Applicants should have, or shortly expect to receive, a Ph.D. in Organic Chemistry or should have equivalent research/industrial experience.

Salary on the IA Range for Research and Analogous Staff (£7190-£11615), according to age, qualifications and experience.

Informal enquiries may be made to Dr. P. J. Kocienski (telephone (0532) 431751 ext 7418).

Application forms and further particulars may be obtained from the Registrar, the University, Leeds LS2 9JT, quoting reference no. 45/31 AD. Closing date for applications 1 July 1984.

### UNIVERSITY OF GLASGOW

#### Department of Chemistry POSTDOCTORAL RESEARCH ASSISTANTSHIP

Applications are invited for a Postdoctoral Research Assistantship, supported by the S.E.R.C., to undertake research into the biosynthesis of sulphur-containing fungal metabolites. The salary will be within £7190-£8080 on Range 1A of the scales for Research and Analogous Staff, with placement according to age and experience. Appropriate Superannuation Scheme will apply.

Application enclosing a *curriculum vitae* and the names of two referees should be sent to Professor G. W. Kirby, Department of Chemistry, University of Glasgow, Glasgow, G12 8QQ as soon as possible.

In reply please quote Ref. No. 5251CC
