CONTENTS

- 1557 Heterobimetallic Clusters of Copper(II) with $[\text{MS}_4^{2-}]$ (M = Mo, W). Synthesis and Structural Characterization of Polymeric $(\text{NMe}_4)_2[(\text{CuNCS})_4\text{WS}_4]$ **J. M. Manoli, C. Potvin, F. Secheresse, S. Marzak**
- 1558 *Endo*-Selectivity and Kinetic Control in Alkali Metal– NH_3 – NH_4^+ Reductions of Bicyclo[2.2.1]heptan-2-ones **Valentin Rautenstrauch**
- 1561 Control of the Degree of Molecular Recognition by Shape-specific Weak Interactions between Nonpolar Groups **Tadashi Endo, Koki Tajima, Minoru Yamashita, Masato M. Ito, Jun-ichiro Nishida, Toshikazu Ogikubo**
- 1562 A Polynitrosyl Iron Aggregate from the Reaction of Nitric Oxide with $[N,N'$ -Ethylenebis(acetylacetonimine)iron(II)] **Fabio Corazza, Euro Solari, Carlo Floriani, Angiola Chiesi-Villa, Carlo Guastini**
- 1564 α -Hydroxy Ketone Rearrangement as a Key Step *en route* to the Calebassinine Skeleton **Giovanni Palmisano, Bruno Danielli, Giordano Lesma, Marina Mauro**
- 1566 Structure of the Functional Part of Photoprotein Aequorin **Branislav Musicki, Yoshito Kishi, Osamu Shimomura**
- 1568 Reduction of Cyclic Hemiacetals. The Synthesis of Demethoxyvelutherin and Nanaomycin A **George A. Kraus, Maria Teresa Molina, John A. Walling**
- 1570 Remote Participation in Electrophilic Reactions of 'Protected' Polyols **David R. Mootoo, Bert Fraser-Reid**
- 1572 Hydrolytic Studies on $(\eta^5\text{-C}_5\text{Me}_5)\text{TiMe}_3$; X-Ray Structure of $[(\eta^5\text{-C}_5\text{Me}_5)\text{TiMe}(\mu\text{-O})]_3$ containing a Ti_3O_3 Ring **Severino García Blanco, M. Pilar Gómez Sal, Sagrario Martínez Carreras, Miguel Mena, Pascual Royo, Ricardo Serrano**
- 1573 Molecular and Crystal Structure of a Nonionic Detergent: Nonanoyl-*N*-methylglucamide **Anke Müller-Fahrnow, Volker Zabel, Manfred Steifa, Rolf Hilgenfeld**
- 1574 A Simple Synthesis of 3*H*- λ^5 -Phosphole Derivatives from Alkyldiphenylphosphine Imines and Dimethyl Acetylenedicarboxylate **José Barluenga, Fernando López, Francisco Palacios**
- 1575 Ruthenium Catalysed *N*-Heterocyclisation: Indoles from 2-Aminophenethyl Alcohols **Yasushi Tsuji, Keun-Tae Huh, Yasuharu Yokoyama, Yoshihisa Watanabe**
- 1577 Stereoselective Oxygenation of 2,3-Diaryloxiranes by Irradiation of Electron Donor–Acceptor Complexes of Tetracyanoethylene **Tsutomu Miyashi, Masaki Kamata, Toshio Mukai**
- 1579 Electroconductive Charge Transfer Complexes of 2,4,6-Tricyano-*s*-triazine and of 3,6-Dicyano-1,2,4,5-tetrazine with Tetrahydrofulvalene **Anna Berlin, Giorgio A. Pagani, Franco Sannicolò**
- 1580 Control of Si–C Bond Cleavage at Carbon α to Phosphorus. Suppression of Facile Protodesilylation of $\text{PPh}_2\text{CH}_2\text{SiMe}_2\text{H}$ by Complexation through Phosphorus to Ruthenium and the X-Ray Crystal and Molecular Structure of $[\text{Ru}(\eta^6\text{-}p\text{-cymene})\text{Cl}_2(\text{PPh}_2\text{CH}_2\text{SiMe}_2\text{OH})]$ **Ron D. Brost, Gregg C. Bruce, Stephen R. Stobart**
- 1582 The Anionic Sulphonylamine Mechanism in the Hydrolysis of Aryl Sulphamates **Sergio Thea, Giorgio Cevasco, Giuseppe Guanti, Andrew Williams**
- 1583 Stabilization of Alleged 'Bishomoaromatic' Bicyclo[3.2.1]octa-2,6-dienyl Anion by Counterion Interactions and by Hyperconjugation **Paul von Ragué Schleyer, Elmar Kaufmann, Alexander J. Kos, Herbert Mayr, Jayaraman Chandrasekhar**
- 1585 First Example of Electrophilic Substitution by Addition–Elimination (σ -Substitution) in Pyrroles **Michael De Rosa, Ines Brillembourg**
- 1587 Preparation, Crystal Structure, Magnetic Properties, and Chemical Reactions of a Hexanuclear Mixed Valence Manganese Carboxylate **Andrew R. E. Baikié, Andrew J. Howes, Michael B. Hursthouse, Andrew B. Quick, Peter Thornton**
- 1588 Small Copper Particles in a Cellulose Matrix **Emma FitzGerald, Kenneth F. Gadd, Sally Mortimore, William Murray**
- 1589 Steric Effect of Substituents in Allylic Groups in Oxidative Addition of Allylic Phenyl Sulphides to a Palladium(0) Complex. C–S Bond Cleavage triggered by Attack of Pd on the Terminal Carbon of the C=C Double Bond **Kohtaro Osakada, Tsunehisa Chiba, Yoshiyuki Nakamura, Takakazu Yamamoto, Akio Yamamoto**
- 1591 Extraction of ^{106}Ru from Simulated Liquid Nuclear Wastes using Inorganic Phases with Covalently-bound Sulphur Ligands and Inorganic Sulphides **Alan Dyer, Michael J. Hudson, Christopher Sharp**
- 1592 Diastereoselective Conjugate Addition to 3-(*p*-Tolylsulphonyl)chromone: a Route to Chiral 2-Substituted Chroman-4-ones **Suthiweth T. Saengchantara, Timothy W. Wallace**
- 1595 A Peptide–Sugar Crystalline Complex containing a Very Strong Hydrogen Bond **Robert O. Gould, Paul Taylor, Katherine M. Varvill, Malcolm D. Walkinshaw**

- 1597 A Hexanuclear Oxovanadium(IV) Anionic Aggregate containing μ_2 - and μ_6 -Carbonato Groups: Synthesis and Structural Characterization of $(\text{NH}_4)_5[(\text{VO})_6(\text{CO})_4(\text{OH})_9] \cdot 10\text{H}_2\text{O}$ **Thomas C. W. Mak, Peng-ju Li, Chen-mou Zheng, Kun-yao Huang**
- 1599 The Total Synthesis of Litsenolides C_1 and C_2 **William W. Wood, Graham M. Watson**
- 1600 Non-chelation-controlled Nucleophilic Addition to Chiral α -Siloxyketones **Manfred T. Reetz, Michael Hüllmann**
- 1602 Routes to Spiroacetals derived from Chroman-4-one **Peter J. Cremins, Timothy W. Wallace**
- 1604 Formation of 1-Aza-allyl Radicals from 2-Halogenoalkylamines **Iain MacInnes, John C. Walton**
- 1606 Stereochemistry at the Phosphorus Atom during Palladium-catalysed Formation of Carbon-Phosphorus Bonds and Mechanistic Implications **Yuanyao Xu, Jing Zhang**
- 1607 CH_3OC^+ : A Long-sought Molecule, predicted to Exist by Theory, Identified **Ben van Baar, Peter C. Burgers, Johan K. Terlouw, Helmut Schwarz**
- 1608 Activated Imines as Carbon Electrophiles: Applications in Alkaloid Synthesis **Jahangir, David B. MacLean, Michael A. Brook, Herbert L. Holland**
- 1610 Synthesis and Insertion Reactions of Cationic Alkylbis(cyclopentadienyl)titanium Complexes **Manfred Bochmann, Ladislav M. Wilson**
- 1611 *In situ* Fourier Transform I.R. Observation of Methylating Species in ZSM-5 **Timothy R. Forester, She-Tin Wong, Russell F. Howe**
- 1613 Binding Geometry of Benzo[*a*]pyrene Diol Epoxide Covalently Bound to DNA. A Flow Linear Dichroism Study **M. Eriksson, B. Jernström, A. Gräslund, B. Nordén**
- 1615 Synthesis of Hydrocarbons from Methanol on Cobalt Catalysts: a Tracer Study **Philippe de Werhier d'Antigneul, M. Paul Sharma, Michel Blanchard, Paul Canesson**
- 1616 Outer-sphere Ligand to Ligand Charge Transfer of Metal Complexes **Arnd Vogler, Horst Kunkely**
- 1617 Synthesis and X-Ray Crystallographic Characterisation of the Diphosphane bridged Cluster $[\text{Ir}_4(\text{CO})_{11}\text{PhPPPhIr}_4(\text{CO})_9(\text{AuPEt}_3)_2]$ **J. Nicola Nicholls, Paul R. Raithby, Maria D. Vargas**
- 1619 Analysis of Glycopeptides by Fast Atom Bombardment Mass Spectrometry in Relation to their Hydrophobicity **Stephen Naylor, Nicholas J. Skelton, Dudley H. Williams**
- 1621 A Simple, Mild Elimination of Hydrogen Halide from Primary Alkyl Bromides and Iodides **Sotiris Jeropoulos, Edward H. Smith**
- 1622 The Formation of $[\text{Ir}(\text{CO})\text{Cl}_2(\text{PEt}_3)_2(\text{NF}_2)]$ and its Rhodium Analogue: Complexes containing the Novel Difluoroamido Ligand **Russell W. Cockman, E. A. V. Ebsworth, John H. Holloway**
- 1623 Electrophilic Fluorination of Aryltrialkyltin Derivatives with Caesium Fluoroxysulphate **Martin R. Bryce, Richard D. Chambers, Stephen T. Mullins, Ann Parkin**

Corrigenda

- 1624 An Asymmetric Synthesis of Chiral Nifedipine Analogues **A. I. Meyers, Thomas Oppenlaender**
- 1624 A Stable Methyleneketene and the Stepwise Fragmentation of Meldrum's Acids **Primoz Lorenčak, J. C. Pommelet, Josselin Chucho, Curt Wentrup**
- 1624 Iminoacetonitrile, an HCN Dimer; I.R. Identification in an Argon Matrix **Primoz Lorenčak, Gerhard Raabe, Juliusz J. Radziszewski, Curt Wentrup**

New Books from VCH Verlagsgesellschaft

Atomic Absorption Spectrometry

Edited by B. Welz

Eight years have passed since the first edition of this book. This second, completely revised and enlarged edition again provides a thorough introduction to the physical concepts as well as the inherent methodology and gives a broad survey on all kinds of application.

With many new chapters, additions and changes throughout the book, it reflects all major advances in atomic absorption spectrometry over the last years. It covers the various absorption techniques separately to describe their equipment particulars, their typical failures and how to avoid them. When discussing special applications as well as the analysis of the elements, the author always compares the different techniques which are applicable and points out major advantages and disadvantages.

Electroorganic Syntheses Methods and Applications Part I: Oxidations

Edited by S. Torii

Advances in electroorganic synthesis in recent years have provided the chemist with a versatile tool of great promise. Product selectivity, high energy efficiency and cleanliness are typical of some of its advantages. This book reviews recent progress in the electrooxidation of organic compounds. New methods are described, as are the concepts for choice of electrolysis conditions and apparatus design. Subjects are arranged by functional groups of heteroelements that characterize the starting elements. The treatment is supported by more than 800 references, and is unusually rich in structural diagrams, all of which makes the information easy to grasp and apply. *Monographs in Modern Chemistry No. 15*

ISBN 3 527 26318 7
Price £47.00

Frontiers in Bioinorganic Chemistry

Edited by A. V. Xavier

This book presents recent and stimulating developments in bioinorganic chemistry and sets the stage for the even more exciting discoveries to come. Leading experts describe their current research and thus provide a state-of-the-art report that covers such diverse topics as Nucleic Acid-Metal Ion Interactions, Metals in Medicine, Biological Mineralization, and Electron Transfer Processes. Sophisticated applications of Mossbauer, EPR, NMR spectroscopy, and EXAFS are discussed, and a newly found method—Optical Detection of Paramagnetic Resonance by Magnetic Circular Dichroism—is presented, which will open new avenues of research.

ORDERING

RSC members should send their orders to: Membership Manager, The Royal Society of Chemistry, 30 Russell Square, London WC1B 5DT.

Non-RSC members should send their orders to: The Royal Society of Chemistry, Distribution Centre, Blackhorse Road, Letchworth, Herts SG6 1HN, England.

Gas Chromatographic Retention Indices of Toxicologically Relevant Substances on SE-30 or OV-1

Second, Revised and Enlarged Edition

Report II of the Commission for Clinical-Toxicological Analysis, German Science Foundation (DFG) Special Issue of The International Association of Forensic Toxicologists Bulletin.

The retention indices presented in this book resulted from an intensive search for reliable and comparable data obtained with acceptable procedures on the low-polarity dimethylsilicone stationary phases SE-30 or OV-1, which should be used preferentially as liquid phases for drug identification.

Contents:

Gas-chromatography and retention indices of drugs, poisons, their metabolites and other relevant substances in toxicological analysis to assess acute and chronic intoxications; Calculation of retention indices and their applicability in practice; Retention indices; Comments on the Tables; Substance names; Reported data; Tables; Substance names in alphabetical order vs. retention indices; Retention indices in numerical order vs. substance names; CAS registry numbers in numerical order vs. substance names; CAS index names in alphabetical order vs. CAS registry numbers; References.

Softcover Pages 176pp

Price £21.00

The Practice of Quantitative Gel Electrophoresis

Edited by V. Neulhoff, A. Maelicke

This book presents gel electrophoretic procedures which are applicable to the identification and isolation of charged molecules. All methods have proved reliable and are used in daily laboratory work. The equipment required for gel electrophoresis is also described in detail. For items that are not commercially available, the reader is given all the information needed to do the construction himself. Theoretical aspects are dealt with to the extent that they are indispensable for the application of a method. A comprehensive index completes the book and makes it a reliable reference work.

Pages 265pp

Price £35.00

CLASSIFIED ADVERTISEMENTS

University of Exeter Department of Chemistry GLAXO RESEARCH FELLOWSHIP

A post-doctoral Research Fellowship is available for the study of the photolysis of halogenated cyclopentanones leading to thromboxane-A₂ analogues. The work will be conducted at the University of Exeter under the supervision of Professor S. M. Roberts (University of Exeter) and Professor R. F. Newton (Glaxo Group Research, Ware). The position will be available from 1 January 1987 and will be tenable for one year in the first instance. The post will be suitable for a person with wide experience in synthetic organic chemistry. The salary will be in the range £8020-£9495 per annum depending on age and experience. Applications with curriculum vitae and the names of 2 referees should be forwarded to Professor S. M. Roberts, University of Exeter, Exeter EX4 4QD by 12 December 1986.
